Re: Georgia Power Company's 2020 Distributed Generation Request for Proposals for Solar Photovoltaic Generation; Docket No. 43085

Dear Ms. Tanner:

On September 8, 2020, the Georgia Public Service Commission (the "Commission") issued an order approving Georgia Power Company's ("Georgia Power") 2020 Distributed Generation ("DG") Request for Proposals for Solar Photovoltaic Generation. As approved by the Commission in its July 29, 2019 Order Adopting Stipulation As Amended in Docket No. 42310 ("Final IRP Order") regarding Georgia Power's 2019 Integrated Resource Plan, the 2020 DG RFP was designed to procure a 160 megawatts ("MW") portfolio of DG solar photovoltaic resources sized greater than 1 kilowatt up to 3 MW alternating current ("AC").

Georgia Power and two winning bidders have executed 2020 DG Solar Power Purchase Agreements ("PPAs"), the effectiveness of which is subject to the Commission's approval. Attachment 1 includes a spreadsheet that provides project-specific information for the PPA winning bidders and facilities. The PPA terms and conditions are pro forma and are consistent with what the Commission approved on September 8, 2020, as modified by the Commission's September 13, 2021 Order Modifying 2020 DG RFP PPA. In addition, both PPAs have been entered into pursuant to the Commission's May 10, 2022 Order Approving Bidder Buy-Down of Interconnection Costs. A trade secret copy of the PPAs have been provided to Commission Staff.

Georgia Power hereby requests that these DG PPAs be deemed certified because the need for these new resources is sourced from a need identified in the Final IRP Order. Please call me at (404) 885-3779 if you have any questions regarding this filing.

Sincerely,

Allison W Pryor
