Re: Georgia Power Company's 2020 Distributed Generation Request for Proposals for Solar Photovoltaic Generation; Docket No. 43085

Dear Ms. Tanner:

Georgia Power Company's ("Georgia Power" or the "Company") 2020 Distributed Generation Request for Proposals for Solar Photovoltaic Generation ("2020 DG RFP"), approved by the Georgia Public Service Commission (the "Commission") on September 1, 2020, has concluded. Georgia Power hereby submits the final list of the executed Power Purchase Agreements ("PPAs") between Georgia Power and the winning bidders in the program, and hereby requests an additional sum in accordance with the Commission's Final Order approving Georgia Power's 2019 Integrated Resource Plan ("2019 IRP") issued in Docket No. 42310. The 2020 DG RFP's final portfolio of winning PPAs consists of approximately 89 MW (37 projects).

Between September 24, 2021, and December 20, 2022, Georgia Power submitted fourteen requests to the Commission, seeking certification of 42 executed PPAs from the 2020 DG RFP. However, after receiving Commission approval, 5 PPAs were subsequently terminated pursuant to Section 16(b)(iii) of the PPA. Therefore, as a final program summary, Georgia Power has attached hereto, as Attachment 1, a spreadsheet that includes project-specific information for the final portfolio of 37 DG solar projects. As shown in Attachment 1, four bidders offering eight projects took advantage of the "buy down" option authorized by the Commission, which allowed a bidder with a project that failed to provide a total net benefit to customers to execute a winning PPA by "buying down" its estimated interconnection costs until the remaining interconnection costs were equal to the Company's avoided cost cap.

Pursuant to the Commission's 2019 IRP Final Order, Georgia Power is allowed an additional sum of 8.5% of the levelized projected net benefits for the DG solar projects procured through the 2020 DG RFP. The 2019 IRP Final Order states, in pertinent part, that "*[t]he Additional Sum for ... DG resources ... shall be set at 8.5% of the projected net benefits. This amount shall be levelized and recovered annually for the term of the PPA.*" Georgia Power has

provided the project-specific information to support the additional sum request to Staff. Georgia Power requests an additional sum for 29 of these 37 solar DG projects, which totals to a levelized amount of $69,375 per year for a term of 30 years. For the avoidance of doubt, Georgia Power is not requesting an additional sum for the eight projects listed in Attachment 1 that took advantage of the buy-down option.

Please contact me at (404) 885-3243 if you have any questions regarding the summary of the certified PPAs and the Company's request for an additional sum from the 2020 DG RFP.

Sincerely,

/s/Judith H. Fuller
