Conexon Connect LLC

Line 610 - Description of Functionality in Emergency Situations

47 C.F.R. § 54.313(a)(1)

Conexon Connect LLC ("Company") is able to remain functional in emergency situations including loss of external power, damage to facilities, and network traffic spikes. Company's Optical Line Terminal ("OLT") cabinets are placed primarily at electric power substation locations, which are the most resilient locations for service and restoration in the event of a power outage. These fiber hub locations are equipped with battery backup resources that are designed to deliver 8 hours of runtime in the event of a power failure. In addition, in the event of an extended power outage, the fiber hub locations are pre-wired with a transfer switch and an external generator plug that allows for rapid connection to a portable generator. The fiber hubs are connected to one of the Company's two data centers (currently located in Kansas City, MO and Atlanta, GA) which are designed with redundant commercial power feeds. In addition, the data centers are equipped with battery backup designed to temporarily provide power until an automatic transfer switch connects to one of the redundant on-site generators capable of supporting full network functionality. The Company's network is engineered to provide maximum capacity in order to handle excess traffic in the event of traffic spikes resulting from emergency situations. Company facilities are remotely monitored and managed by a centralized Network Operations Center which is staffed 24 x 7, 365 days a year. Technicians are able to remotely access and respond to alarm conditions. By design, transport redundancy is built into the telephony and data network on many levels and in the event of a hardware or circuit failure or traffic spike, the networks are able to self-correct in many cases or, at many locations, technicians are able to manually switch network elements to alternate facilities both locally and remotely.

Line 1010 – Lines 1010 and 1030 Description of Voice and Broadband Service Rate Comparability

Rule 54.313(a)(2)

Rule 54.313(a)(3)

FCC Form 481:

As required in 47 C.F.R. § 54.313(a)(2), recipients of high-cost support must provide a description of how their pricing for fixed voice services is no more than two standard deviations above the applicable national average urban rate for voice service, as published annually by the Wireline Competition Bureau ("WCB"). Likewise, as required in 47 C.F.R. § 54.313(a)(3), high-cost support recipients must provide a description of how their pricing for services meeting the FCC's broadband public interest obligations is no higher than the applicable benchmark to be announced annually in a public notice issued by the WCB.

Conexon Connect LLC complies with the applicable pricing benchmarks, which were updated for 2023 by the Wireline Competition Bureau in DA 22-1338 (WC Docket No. 10-90) published on December 16, 2022 ("Public Notice"). This document states that carriers must provide basic residential voice service for no more than $59.62 per month. The Company's residential voice-only service is priced at $39.95 per month, and the residential voice service rate when bundled with broadband service is $29.95 per month. Both rates are below the maximum rate of $59.62 per month.

Likewise, the Public Notice sets forth the benchmarks for broadband service rates based on download and upload speeds, and capacity allowance. The Company's broadband services meet the FCC's public interest obligations (as a recipient of Rural Digital Opportunity Fund auction support) and comply with applicable rate benchmarks. The following is a comparison between the Company's speed sets (all symmetrical) and corresponding prices, and the FCC maximum rate benchmarks:

Speed	Usage Allotment	Price	Benchmark
100Mps/100Mps	Unlimited	$49.95	$98.55
1Gbps/1Gps	Unlimited	$79.95	$142.55

The above comparison demonstrates that the Company's broadband offerings are priced at or below the FCC's reasonable comparability rate benchmarks.
