Re: Notice of Termination of the Agreement for the Purchase of Energy, Environmental Attributes, and Electrical Products from a Renewable Resource with Storage Device Between Double Run Solar, LLC and Georgia Power Company; Docket No. 43814

Dear Ms. Tanner:

On April 27, 2021, Georgia Power Company and Double Run Solar, LLC executed an Agreement for the Purchase of Energy, Environmental Attributes, Electrical Products from a Renewable Source with Storage Device (the "Agreement"), amended April 26, 2022. The Georgia Public Service Commission approved the Agreement by Order dated July 6th, 2021. Because of project delays, the parties have terminated the Agreement, effective August 15, 2023.

Because of the termination of this Agreement, the available MWs for the Company's R3 program will be reduced by 220 MWs. Furthermore, the Company will reduce the amount of authorized additional sum for the 2022/2023 Utility Scale PPAs from $4,763,536 to $3,615,768 to account for the termination of the Agreement. Georgia Power intends to fill the approximately 220 MWs associated with the Double Run project in a future CARES procurement and Georgia Power will request Commission approval for any such replacement.

Please contact us if you have any questions regarding this filing.

Sincerely yours,

HOLLAND & KNIGHT LLP
