RAYLE ELECTRIC MEMBERSHIP CORPORATION
RATE SCHEDULE 9
OUTDOOR SECURITY LIGHTING SERVICE

AVAILABILITY

Throughout the Cooperative's service area from existing lines of adequate capacity.

APPLICABILITY

Applicable only to outdoor security lighting by ballast operated vapor lamp fixtures, either Mercury Vapor (MV) or High Pressure Sodium (HPS), and poles conforming to the Cooperative's specifications. Service will be rendered only at locations that, solely in the opinion of the Cooperative, are readily accessible for maintenance.

MONTHLY RATE

Cooperative Owned and Maintained System
Overhead Rates

Description	Unmetered Energy Rate*	Metered Energy Rate*
Security Lighting		
100 Watt HPS	$10.00	$7.40
150 Watt HPS	$11.30	$7.75
175 Watt MV	$10.00	$7.40
Flood Lighting		
150 Watt HPS	$14.00	$10.25
250 Watt HPS	$16.60	$10.60
400 Watt HPS	$19.80	$10.75
Street Lighting		
100 Watt HPS	$10.60	$8.15
150 Watt HPS	$12.50	$9.00
250 Watt HPS	$14.75	$9.00
400 Watt HPS	$18.85	$9.75

* The above rates apply where the light fixture is installed on an existing pole or where consumer makes a contribution of $400 for a pole required to support the luminaire.
See section below for Monthly Pole Charges.

Underground Rates - 30 foot Wood Pole

Description	Unmetered Energy Rate**	Metered Energy Rate**
Security Lighting		
100 Watt HPS	$12.20	$9.65
150 Watt HPS	$13.50	$10.00
175 Watt MV	$13.80	$10.00
Flood Lighting		
150 Watt HPS	$16.00	$12.50
250 Watt HPS	$18.95	$13.15
400 Watt HPS	$22.10	$13.15
Street Lighting		
100 Watt HPS	$13.00	$11.00
150 Watt HPS	$15.05	$11.55
250 Watt HPS	$17.30	$11.55
400 Watt HPS	$20.85	$11.85
Ornamental or Post Top		
100 Watt HPS	$18.50	$11.55
150 Watt HPS	$19.85	$11.85
250 Watt HPS	$23.00	$12.85
400 Watt HPS	$26.35	$12.85

Underground Rates - 20 foot Fiberglass Pole

Description	Unmetered Energy Rate**	Metered Energy Rate**
Street Lighting		
100 Watt HPS	$14.10	$11.55
150 Watt HPS	$16.35	$12.85
250 Watt HPS	$18.25	$12.85
400 Watt HPS	$22.10	$13.15
Ornamental		
100 Watt HPS	$19.55	$17.00
150 Watt HPS	$20.80	$17.00
250 Watt HPS	$23.70	$17.95
400 Watt HPS	$26.90	$17.95

** The above rates apply where consumer makes a contribution of $550 for a wood pole and $650 for a fiberglass pole. See section below for Monthly Pole Charges.

RAYLE EMC
OUTDOOR SECURITY LIGHTING SERVICE
SCHEDULE 9
PAGE 3

Pole Charges

Type	Monthly Charge	Contribution
Wood 30 Ft. - OH	$3.00	$400
Wood 30 Ft. - URD	$4.50	$550
Fiberglass 20 Ft.	$5.50	$650

Contributions-in-aid of construction will be required for other types of poles, equal to the installed cost of such poles, including pole, conductor, cable riser, anchor base, etc., as applicable for the installation. At its option, however, the Cooperative may determine and offer an appropriate monthly facilities rate, in lieu of such required contribution.

Customer Owned System

Nominal Lamp Wattage	Estimated Monthly kWh	Controlled Energy Charge	Extra kWh for Cont. Burning	Adder for Cont. Burning
25	13	$2.81	15	$1.54
50	22	$3.36	26	$2.67
70	30	$3.86	35	$3.59
75	32	$3.98	38	$3.90
100	42	$4.60	50	$5.14
120	50	$5.10	59	$6.06
150	62	$5.84	73	$7.50
175	70	$6.34	83	$8.52
250	100	$8.20	118	$12.12
400	156	$11.67	184	$18.90
1,000	363	$24.51	429	$44.06
1,500	542	$35.60	641	$65.83

CONDITIONS OF SERVICE

1. The Cooperative will furnish, install, operate and maintain the lighting equipment, including lamp, luminaire, bracket attachment, control device, poles and necessary wiring electrically connected so that the power for operation of the light does not pass through the meter for the consumer's other usage, (except where consumer selects the metered lighting option as provided in the tables above).

2. The above Cooperative Owned and Maintained System monthly rates will apply only to fixtures and poles designated as standard equipment by the Cooperative. Contributions-in-aid of construction will be charged to cover the cost difference of other than standard fixtures and poles, provided the Cooperative agrees to install such equipment. However, at its option, the Cooperative may develop and offer a monthly rate for such non-standard pole and/or fixture, either in lieu of or in combination with any contribution.

3. The lighting equipment shall remain the property of the Cooperative, including poles installed when the consumer makes a contribution-in-aid of construction. The consumer shall protect the lighting equipment from deliberate damage.

4. The poles for support of the luminaries are to be wood or other poles of the Cooperative's existing distribution system or extensions thereof.

5. The Cooperative reserves the right to specify the number and location of service points.

6. Lighting service shall be provided only at locations which are accessible to the Cooperative's equipment for servicing purposes. The consumer shall allow authorized representatives of the Cooperative to trim trees and shrubs as necessary for maintenance of the lighting equipment and for removal of the lighting equipment upon termination of service under this schedule.

7. Fixtures served by underground wiring will be available at the applicable rates provided above where required buried cable does not exceed on the average, 50 feet per luminaire. A contribution-in-aid of construction may be charged amounting to $2.50 per foot of the excess buried cable over 50 feet per luminaire. Where paving or other obstructions exist, the consumer will be required to (1) perform all trenching, install duct furnished by the Cooperative, backfill, and complete the work to the mutual satisfaction of all parties concerned or (2) reimburse the Cooperative for its costs incurred in the installation.

8. Where lighting service is requested for street lighting purposes in a private development, at its option, the Cooperative may provide such service by converting monthly fixture rates to a "per resident" rate which will then be assessed on the electric service bill of each resident; provided, however, that the Cooperative may require such contractual assurances as it deems appropriate to assure payment of charges.

9. The term "customer owned system" means complete ownership by the consumer of all facilities up to the point of connection to the Cooperative's existing supply lines.

10. For Customer Owned Systems the Cooperative may, at its option, verify kWh by installing a kWh meter or device to limit connected load or verify dusk to dawn operation.
