3. GENERAL REGULATIONS

3.7 CONNECTIONS - (Cont'd)

3.7.5 Minimum Protection Criteria

A. General

Minimum Protection Criteria have been specified so that Company personnel, equipment, and services will be protected from the harmful effects of signal power overload, hazardous voltages and longitudinal imbalance. Minimum Protection Criteria apply to the direct electrical, acoustic, or inductive connections of Customer equipment, test equipment and Customer-provided communications systems to the network.

B. All Connections

Customer equipment, test equipment and Customer-provided communications systems, which are connected to the network on a direct electrical basis or an acoustic or inductive basis, must comply with the following:

1. To protect other Company services, it is necessary that the signal that is applied at the station meets the following limits:

a. Metallic Voltage

(1) 4kHz to 270 KHz

Center Frequency (f) of 8 KHz Band	Max. Voltage in All 8 KHz Bands	Terminating Impedance
8 KHz to 12 KHz	- (6.4 + 12.6 log f) dBV*	300 ohms
12 KHz to 90 KHz	(23 - 40 log f) dBV	135 ohms
90 KHz to 266 KHz	- 55 dBV	135 ohms

*dBV = 20 $\log_{10}$ voltage in volts

(2) The root-mean-square (RMS) value of the metallic voltage components in the frequency range of 270 KHz to 6 MHz shall, averaged over 2 microseconds, not exceed -15 dBV. This limitation applies with a metallic termination having an impedance of 135 ohms.

3. GENERAL REGULATIONS

3.7 CONNECTIONS - (Cont'd)

3.7.5 Minimum Protection Criteria (Cont'd)

B. All Connections (Cont'd)

1. (Cont'd)

b. Longitudinal Voltage

(1) 4 KHz to 270 KHz

Center Frequency (f) of 8 KHz Band	Max. Voltage in All 8 KHz Bands	Longitudinal Terminating Impedance
8 KHz to 12 KHz	- (18.4 + 20 log f) dBV*	500 ohms
12 KHz to 42 KHz	(3 - 40 log f) dBV	90 ohms
42 KHz to 266 KHz	- 62 dBV	90 ohms

*dBV = 20 $\log_{10}$ voltage in volts

(2) The root-mean-square (RMS) value of the longitudinal voltage components in the frequency range of 270 KHz to 6 MHz shall, averaged over 2 microseconds, not exceed -30 dBV. This limitation applies with a longitudinal termination having an impedance of 90 ohms.

2. To prevent the interruption or disconnection of a call, it is necessary that the signal power applied at the station be limited. Specifically, the signal at the station shall at no time have energy concentrated solely in the 2450 to 2750 Hz band. If there is signal power at the station in the 2450 to 2750 Hz band, it must not exceed the power present at the same time in the 800 to 2450 Hz band.

3. GENERAL REGULATIONS

3.7 CONNECTIONS - (Cont'd)

3.7.5 Minimum Protection Criteria (Cont'd)

C. Direct Electrical Connections

In addition to the regulations in B. preceding, Customer equipment, test equipment and Customer-provided communications systems, which are connected to the network on a direct electrical basis, must comply with the following:

1. To prevent excessive noise and crosstalk, it is necessary that the power of the signal presented at the AT&T Central Office not exceed 12dB below one milliwatt when measured over any three second interval. To insure that this limit is not exceeded, the power of the signal, which may be applied by the Customer equipment, test equipment or Customer-provided communications system to the station, will be specified for each Customer location. In no case shall the power exceed one milliwatt.

D. Acoustic or Inductive Connections

In addition to the regulations in B. preceding, Customer equipment and Customer-provided communications systems, which are connected to the network on an acoustic or inductive basis, must comply with the following:

l. To prevent excessive noise and crosstalk, it is necessary that the power of the signal, which is applied by the equipment to the station located on the Customer's or user's premises, be limited so that the signal power does not exceed 9dB below one milliwatt when averaged over any three second interval. However, to permit each Customer, independent of distance from the serving office, to supply signal power which at the serving office, approximates 12dB below one milliwatt when averaged over any three-second interval, the Company, at the Customer's request, will specify, for each Customer location, the signal power at the station, which shall in no case exceed one milliwatt.

3. GENERAL REGULATIONS

3.8 RATE DETERMINATION

The rate for a Casual Calling/Initial Subscription Services call is determined by factors such as:

The distance between the rate centers of the originating (calling) station and the terminating (called) station; and, under certain conditions the distance between the V&H coordinates of an AT&T Central Office and the rate center of a station or the V&H coordinate of an AT&T Central Office,

The time of day and the day of week,

The duration of the call.

The specific factors, which apply to a given Casual Calling/Initial Subscription Services call and their application, are listed in the rate section applicable to that type of call. The regulations pertaining to those factors are as follows:

3. GENERAL REGULATIONS

3.8 RATE DETERMINATION (Cont'd)

3.8.1 Time of Day and Day of Week

The rate charged for a Casual Calling/Initial Subscription Services call is determined in part by the day of the week and the time of day at the originating (calling) station or at the AT&T Central Office associated with the originating (calling) station using special access. The rate charged for AT&T MEGACOM 800 is determined in part by the time of day and day of the week the AT&T Central Office associated with the terminating (called) station. Different rates may be applicable to a call at different times of the day and on certain days of the week as specified in the appropriate rate section for that call.

3.8.2 Determining the Chargeable Time of a Call

The chargeable time for a Casual Calling/Initial Subscription Services call is determined by the duration of the call. Chargeable time includes the initial period plus the additional time involved, if any, and is determined as follows:

A. On all calls, chargeable time begins when completed connection is established between the calling station and the called station.

B. Chargeable time ends when the calling station "hangs up". If the called station "hangs up" but the calling station does not, chargeable time ends when the connection is released either by automatic timing equipment in the telecommunications network or by the Company operator.

C. When Casual Calling/Initial Subscription Services is directly connected to a Customer-provided communications system at a Customer's or User's premises, chargeable time begins when a Casual Calling/Initial Subscription Services call terminates in, or passes through, the first Customer Equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Casual Calling/Initial Subscription Services so that chargeable time may begin.

3. GENERAL REGULATIONS

3.8 RATE DETERMINATION (Cont'd)

3.8.3 Determining the Applicable Rate in Effect

A. When a Casual Calling/Initial Subscription Services calls that use a special access line, when the call is established in one rate period and ends in another rate period, the rate in effect at the calling station for each rate period applies to the call occurring within that rate period. When a calling station on a Custom Network service uses a special access line, the rate in effect at the AT&T Central Office for each rate period applies to the portion of the call occurring within that rate period. When a unit of time is split between two rate periods, the rate applicable to that unit of time is based on the rate period in which it began.

B. Chargeable time for a rate period (e.g., 8 AM - 5 PM) begins with the first stated hour (e.g., 8 AM) and continues to, but does not include, the second stated hour (e.g., 5 PM).

3.8.4 Use of Casual Calling/Initial Subscription Services for Resale or Shared Use

When Casual Calling/Initial Subscription Services are resold or shared, the Customer may advise its User that a portion of the Customer's service is provided by this Company. However, the Customer shall not represent that this Company jointly participates in the provision of the Customer's services.

3. GENERAL REGULATIONS

3.9 VIOLATION OF REGULATIONS (Cont'd)

3.9.1 General

The Company may take immediate action to protect its services or interests when certain regulations contained in this tariff are violated. The specific regulations involved and the action(s) which will be taken by this Company are as specified in 3.9.B and 3.9.C following.

3.9.2 Interference, Impairment or Improper Use

The Company may temporarily restrict service immediately when the Customer violation:

- circumvents the Company's ability to charge for its services as specified in Section 3.2.1 (Fraudulent Use) preceding, or

- results in an immediate harm to the Casual Calling/Initial Subscription Services network or other Company services.

In such cases, the Company will make a reasonable effort to give the Customer prior notice before restricting service.

When a violation results in a denial for additional service and/or restriction of service, the denial and/or restriction will be removed when the Customer is in compliance with the regulation and so advises the Company.

3. GENERAL REGULATIONS

3.9 VIOLATION OF REGULATIONS (Cont'd)

3.9.3 Nonpayment of Charges

The Company may deny and/or restrict Casual Calling/Initial Subscription Services for nonpayment of charges due as specified in section 3.5 (Payment of Charges) preceding. A written notice will be sent to the Customer at least five days in advance of the restriction and/or denial of Casual Calling/Initial Subscription Services. Upon payment of charges, the restriction and/or denial of Casual Calling/Initial Subscription Services will be removed.
