This regulation will permit a customer to use devices which serve his convenience in his use of the facilities of the Company in the service for which they are furnished under this tariff, provided any such device so used would not endanger the safety of Company employees or the public; damage, require change in or alteration of, or involve direct electrical connection to, the facilities of the Company; or interfere with the proper functioning of such facilities or otherwise injure the public in its use of the Company's services. However, except as otherwise provided in this tariff, nothing herein shall be construed to permit the use of a recording device, or of a device to interconnect any line or channel of the Company with any other communication line or channel of the Company or of any other person.

3. GENERAL REGULATIONS

3.12 PAYMENTS AND CHARGES

3.12.1 Payment for Service

Applicants for service are required to pay installation charges and construction charges, wherever such charges are applicable, in advance of the establishment of service. Nonrecurring charges are payable when service is established. Customers whose service has been suspended for failure to comply with tariff provisions are required to pay all outstanding charges up to the time of restoration of service before service is re-established.

Service is provided and billed based on a minimum period of at least one month. AT&T may bill customers on other than a monthly basis unless a customer billed in such a manner requests monthly billing. Charges for toll message service are billed after the service has been rendered and are payable upon request.

The customer assumes responsibility for the following:

- charges for message telecommunications service sent from and charged to his service

- charges for message telecommunications service received at his service location on which the charges are reversed with the prior consent of any person answering the call

- charges for calls placed between two services other than the customer's and billed to him/her with the prior consent of any person at his service location

- charges for calls charged to his special billing number or calling card number by him/her or by any person with his knowledge, consent or acquiescence

In all other cases, the responsibility for all charges is that of the party who originates the call.

If objection in writing is not received by the Company within thirty days after a statement of account is rendered, such statement shall be deemed to be correct and binding upon the customer.

The customer is responsible for payment of all charges for services and facilities, including charges for messages originated from or accepted at the customer’s station and for charges billed the customer for calling card messages. All bills are due when rendered. Nonpayment of charges for services may result in the suspension or termination of any and all of the Non-Local services furnished the customer.

3. GENERAL REGULATIONS

3.12 PAYMENTS AND CHARGES (Cont'd)

3.12.2 Credit Limits

AT&T may establish credit limits for new and existing customers based on the customer's payment history. Any customer may receive a lower credit limit upon request. Customers will be notified of their initial credit limit amount and subsequent credit limit changes through notices mailed to the customer. In the event that the established credit limit is exceeded on an account, access to AT&T's long distance services will be restricted where facilities are available. Access to local calling, emergency services (9-1-1), 800, 888 will not be affected by this restriction. Customers attempting to access restricted services will be automatically routed to a service representative for information regarding service restoral.

In the event a customer has not reached their initially established credit limit, but has become delinquent in their payments, AT&T may place a restriction on continued use of AT&T long distance services until the customer is able to make satisfactory arrangements with the Company. This restriction may be set lower than the customer's initial credit limit due to their delinquent status. Access to local calling, emergency services (9-1-1), 800, 888 will not be affected by this restriction. In the event that access is restricted due to payment delinquencies, customers attempting to access the restricted services will be automatically routed to either a recorded announcement or a service representative for information regarding service restoral.

3. GENERAL REGULATIONS

3.12 PAYMENTS AND CHARGES (Cont'd)

3.12.3 Deposits

When an applicant's credit is not established or when the credit of an existing customer has become doubtful, a deposit may be required as security for the payment of future bills for service, in an amount equal to the estimated gross bill of the full period of service when service is under contract for a period of less than thirty days; in all other cases the amount shall not be more than the estimated gross bill for any single billing period plus one month, except that in any case a minimum of $5.00 may be required. If the amount deposited does not provided adequate security for the payment of future bills for the amount of service used by the customer, additional deposits may be required, but the total deposit shall not exceed the limit specified above.

Deposits made in connection with residence service may be returned to the depositor when his/her credit has been established by prompt payment of bills or by other means and will in any event be returned to the depositor when he/she shall have paid promptly bills for service over a period of twelve consecutive months. Any customer having secured the return of such deposit will not be required to make a new deposit unless the service has been discontinued or the customer's credit standing impaired through failure to comply with tariff provisions. Payment within thirty days after the date of the bill, or the payment of any contested bill, payment of which is withheld beyond the period herein mentioned and the dispute is terminated substantially in favor of the customer and payment is made within ten days thereafter, shall be considered prompt payment within the meaning of the foregoing provision relating to the return of deposits.

Deposits are returnable after the service has been discontinued and payment has been made in full for all amounts due the Company, provided, however, that if the amounts due the Company have not been paid in full, the Company will deduct unpaid amounts from the amount of the deposit and refund the difference. Interest is paid on all deposits at the rate of 7% per annum without deduction for any taxes thereon. The interest accrued upon deposits held more than a year is paid each twelve months.

3. GENERAL REGULATIONS

3.12 PAYMENTS AND CHARGES (Cont'd)

3.12.4 Interruption of Service

When service is interrupted for a period of at least 24 hours, the Company, after due notice by the customer, shall apply the following schedule of allowance:

- 1/30 of the tariff monthly price of all service and facilities furnished by the Company rendered inoperative to the extent of being useless for each of the first three (3) full 24-hour periods during which the interruption continues after notice by the customer to the Company conditioned that the out-of-service extends beyond a minimum of 24 hours.

- 2/30 of each full 24-hour period beyond the first three 24-hour periods. However, in no instance shall the allowance for the out-of-service period exceed the total charges in a billing period for the service and facilities furnished by the Company rendered inoperative to the extent of being useless.

- When service is interrupted for a period of at least 24 hours due to such factors as storms, fires, floods or other conditions beyond the control of the Company, an allowance of 1/30 of the tariff monthly price for all services and facilities furnished by the Company rendered inoperative to the extent of being useless shall apply for each full 24 hours during which the interruption continues after notice by the customer to the Company.

Nothing contained herein and no tariff adopted hereto shall limit any responsibility or liability on the part of the Company to a customer, which would exist pursuant to law but for this rule and said tariff.

The foregoing allowances shall not be applicable where service is interrupted by the negligence or willful act of the customer to service or where the Company pursuant to the terms of the contract for service suspends or terminates service for nonpayment of charges or for unlawful or improper use of the facilities or for any other reason provided for in the filed and effective tariff.

3. GENERAL REGULATIONS

3.12 PAYMENTS AND CHARGES (Cont'd)

3.12.5 Restoral of Service Conditions

If the customer has a history of payments returned for insufficient funds, the company may require payment by cash, money order or certified check. If such payment is made by personal check, restoral of service will be affected upon clearance of the check by the bank.

3.12.6 Charges for Fractional Months

When service is established or a switched service is disconnected, or for any reason, a customer's billing date is changed, the charge for service for each fractional part of a current billing month is determined as follows:

- The charge for service is a pro rata share of the monthly charge.

- For purposes of administering this regulation, every month is considered to have thirty (30) days.

The foregoing provisions do not affect the regulations governing the minimum term of contract.

5.4 TIMING OF MESSAGES

The time when connection is established, (determined in accordance with the time, standard or daylight saving, observed at the location of the rate center of the calling station) determines whether Day, Evening, or Night & Weekend prices apply.

- In cases where a message begins in one price period and ends in another, the price in effect at the time the connection is established applies to the initial period. If a minute is split between two rate periods, the rate period applicable at the start of the minute applies to that entire minute. The duration of each call is recorded in whole minutes, with partial minutes rounded up to the next whole minute (for example, a 45 second call will be billed as a one-minute call).

- If the calculation for the charge results in a fractional charge, the fraction or amount will be rounded down to the nearest whole cent.

- Chargeable time ends when a calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the network or by the Company operator.

- Chargeable time does not include time lost because of faults or defects in the service.

- When exchange telephone service used for MTS is connected through a service terminating arrangement or connecting arrangement at a customer's premises to a communications system, chargeable time for all calls begins when a call from the telecommunications network terminates in or passes through the first terminal equipment on that communications system. It is the customer's responsibility to furnish answer supervision so that chargeable time may begin.
