Re: Georgia Power Company's 2023 Distributed Generation Request for Proposals; Docket No. 44942

Dear Ms. Tanner:

On August 22, 2023, the Georgia Public Service Commission (the "Commission") issued an order approving Georgia Power Company's ("Georgia Power") 2023 Distributed Generation ("DG") Request for Proposals ("RFP") and Pro Forma Power Purchase Agreement ("PPA"). As approved by the Commission in its July 29, 2022 Order Adopting Stipulation in Docket No. 44160 ("2022 IRP Final Order") regarding Georgia Power's 2022 Integrated Resource Plan, the 2023 DG RFP was designed to procure a 193 megawatts ("MW") portfolio of DG solar photovoltaic resources sized greater than 250 kilowatts up to 6 MW alternating current ("AC"). This includes the first 100 MW of DG resources approved in the 2022 IRP Final Order as well as 93 MW rolled forward, which were unfilled from Georgia Power's previous distributed generation solicitation.

Georgia Power and two winning bidders have executed the 2023 DG Solar PPA, the effectiveness of which is subject to the Commission's approval. Attachment 1 includes a spreadsheet that provides project-specific information for the PPA winning bidders and facilities. The PPA terms and conditions are pro forma and are consistent with what the Commission approved on August 22, 2023. A trade secret copy of the PPAs have been provided to Commission Staff.

Georgia Power hereby requests that these two DG PPAs be deemed certified because the need for these resources is sourced from a need identified in the 2022 IRP Final Order.

Please call me at (404) 885-3779, if you have any questions regarding this filing.

Best regards,

Allison W. Pryor
