Re: National Emissions Standards for Hazardous Air Pollutants: Coal- and Oil-Fired Electric Utility Steam Generating Units Review of the Residual Risk and Technology Review
EPA-HQ-OAR-2018-0794

Dear Mr. Goffman,

The Edison Electric Institute (EEI) appreciates the opportunity to provide the enclosed responses to the U.S. Environmental Protection Agency's (EPA) proposed rule, *National Emissions Standards for Hazardous Air Pollutants: Coal- and Oil-Fired Electric Utility Steam Generating Units Review of the Residual Risk and Technology Review (RTR)* (Proposed Rule), which is commonly known as the Mercury and Air Toxics Standards (MATS). 88 *Fed. Reg.* 24,854 (Apr. 24, 2023). EPA's Proposed Rule is of critical importance to EEI members as they continue to lead this clean energy transformation.

EEI is the association that represents all U.S. investor-owned electric companies. Our members provide electricity for about 220 million Americans and operate in all 50 states and the District of Columbia. As a whole, the electric power industry supports more than 7 million jobs in communities across the United States. EEI's member companies are proud to provide America's resilient clean energy and to be leading the transformation of energy.

If you have any questions or need additional information regarding EEI's comments, please feel free to reach out to me at abond@eei.org, 202-508-5523.

Sincerely,

/s/ Alex Bond
