AFFIDAVIT IN SUPPORT OF
TRADE SECRET PROTECTION

I, Jonathan Hogg, after first being duly sworn, hereby affirm that I am Senior Vice President and Chief Risk Officer of IPC Systems, Inc. ("IPC"), an applicant for Certificate of Authority to Resell Interexchange Telecommunications Services in Georgia. Pursuant to Rule 515-3-1-.11. Trade Secrets, this Affidavit is submitted in support of IPC's request that the following exhibits to IPC's *Application for Certificate of Authority to Resell Interexchange Telecommunications Service* be deemed confidential Trade Secrets as defined in O.C.G.A. Section 10-1-761(4)) and protected from dissemination:

Exhibit B – Corporate Structure
Exhibit E – Audited Financial Statement

Exhibit B– Relationship of Applicant to All Affiliated Companies. IPC's organizational structure falls within the definition of "trade secret" set forth in O.G.C.A. § 10-1-761(4) and General Rule 515-3-1.11 in that the organizational structure is not commonly known by or available to the public. IPC is a major commercial enterprise with numerous affiliated interests. The business derives economic value by treating information concerning the organization structure as confidential. Dissemination of IPC's organizational structure could adversely impact IPC by providing valuable competitive information to competitors that is not otherwise be publicly available.

Exhibit E - Financial Statements. IPC's financial statements fall within the definition of "trade secret" set forth in O.G.C.A. § 10-1-761(4) and General Rule 515-3-1.11 in that they are financial data not commonly known by or available to the public. IPC has used its best efforts to keep and maintain such information secret. To the best of IPC's knowledge, current information concerning these matters has not been disclosed or released to the public.

IPC's financial statements derive economic value from not being generally known to and not being readily ascertainable by proper means by other persons who can obtain economic value from their disclosure and use. Specifically, the information contained therein contains extremely sensitive information that could be used by competitors to determine financial information that could be used to the detriment of IPC in the marketplace. Disclosure of such information would be extremely detrimental and could be used by IPC's competitors to materially affect IPC's ability to compete effectively.

Due to the sensitive nature of IPC's organizational structure and financial information, it is appropriate for the Commission to restrict access to these documents. Such information should be used solely by the Commission in exercising its governmental functions. There is no legitimate purpose to be served in disclosing such information to persons or entities other than the appropriate staff of the Commission.

TARIFF FORMAT

A. Page Numbering - Page numbers appear in the heading of each page. Pages are numbered sequentially. However, occasionally, when a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.

B. Page Revision Numbers - Revision numbers also appear in the heading of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its Tariff approval process, the most current page number on file with the Commission is not always the page in effect. Consult the Check Sheet for the page currently in effect.

C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:

2.
2.1.
2.3.6.
2.3.6.A.
2.3.6.A.1.
2.3.6.A.1.(a).
2.3.6.A.1.(a).I.
2.3.6.A.1.(a).I.(i).
2.3.6.A.1.(a).I.(i).(1).

D. Check Sheets - When a Tariff filing is made with the Commission, an updated Check Sheet accompanies the Tariff filing. The Check Sheet lists the pages contained in the Tariff with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some pages). The Tariff user should refer to the latest Check Sheet to find if a particular page is the most current on file with the Commission.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY

1. General

a. The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede tariff language contained herein.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

1. General (Cont'd)

b. The TSP program has two components, restoration and provisioning.

i. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.

ii. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

2a. TSP Request Process - Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

a. Determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.

1. National Security Leadership

2. National Security Posture and U.S. Population Attack Warning

3. Public Health, Safety, and Maintenance of Law and Order

4. Public Welfare and Maintenance of National Economic Posture

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

2a. TSP Request Process - Restoration (Cont'd)

b. Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.

c. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (http://tsp.ncs.gov/).

d. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (http://tsp.ncs.gov/), for information on identifying a sponsor for TSP requests.

e. Submit the SF 315 to the OPT.

f. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

2b. TSP Request Process - Provisioning

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in 2a above for restoration priority assignment except for the following differences. The user should:

a. Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in 2a(a) above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.

b. Verify that the Company cannot meet the service due date without a TSP assignment.

c. Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

3. Responsibilities of the End-User

End-users or entities acting on their behalf must perform the following:

a. Identify telecommunications services requiring priority.

b. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).

c. Accept TSP services by the service due dates.

d. Have Customer Premises Equipment (CPE) and Customer Premises Wiring (CPW) available by the requested service due date and ensure (through contractual means or otherwise) priority treatment for CPE and CPW necessary for end-to-end service continuity.

e. Pay the Company any authorized costs associated with priority services.

f. Report to the Company any failed or unusable services with priority levels.

g. Designate a 24-hour point of contact for each TSP request and apprise the OPT.

h. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

4. Responsibilities of the Company

The Company will perform the following:

a. Provide TSP service only after receipt of a TSP authorization code.

b. Revoke TSP services at the direction of the end-user or OPT.

c. Ensure that TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).

d. Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.

e. Designate a 24-hour point of contact to coordinate TSP processes with the OPT.

f. Confirm completion of TSP service order activity to the OPT.

g. Participate in reconciliation of TSP information at the request of the OPT.

h. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor.

i. Ensure that other carriers supplying underlying facilities are provided information necessary to implement priority treatment of facilities that support NS/EP services.

2.0 RULES AND REGULATIONS (CONT'D)

2.11 EMERGENCY/CRISIS/DISASTER RESTORATION AND PROVISIONING - TELECOMMUNICATIONS SERVICE PRIORITY (CONT'D)

4. Responsibilities of the Company (Cont'd)

j. Assist in ensuring that priority level assignments of NS/EP services are accurately identified 'end-to-end' by providing to subcontractors and interconnecting carriers the restoration priority level assigned to a service.

k. Disclose content of the NS/EP TSP database only as may be required by law.

l. Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.
