following up with our conversation onsite on Jennadee Dr along with Wilean DUS acknowledges the issues of the shallow main and we have spent the past week spotting down Jennadee Dr verifying depths of the main covering over 900 ft.
(attached below is a drawing showing depths)

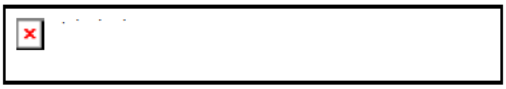

majority of the depths are 24" in depth or greater, and referring to opm regarding depths of Distribution Mains DIV 3 SEC 3.8 having 24" of cover is acceptable with approval.

DUS is proposing to proceed with lowering any main less than 24" and leaving the rest of the main as is with approval. Referring to the attached drawing we have two sections to lower.

In doing this, this will help expedite the installation of new services that are currently on hold in this area which is over 16 houses ready to close within two weeks. This street is already at final grade with sidewalks and sodded yards for most of the lots.
