If applicant is a recipient of Federal or state Broadband Grants, determine whether the grants were to be used as revenue, expense offsets, or for capital acquisitions. To the extent such grants are/were used for capital acquisition, review books to ensure that such purchased assets are excluded from the rate base for UAF purposes

13 Verify the amounts of Federal universal service fund support reported in the UAF Application. Review UAF Applicant work

22 Identify Construction Work in Progress and Retirement amounts for the test year

23 Identify the Company's affiliates and non-regulated services

24 Identify the total costs charged to the regulated company by the affiliate or parent company. Quantified costs by FCC USOA Account and determined the per access line amount over the past 3 years. If the costs appear unreasonable, propose adjustments or informed GPSC staff and recommend an affiliated transactions engagement be performed

25 For ACAM UAF companies only, obtain the Company spreadsheet depicting calculated amounts, review Company prepared adjustments, trace adjustments in the UAF application model to the spreadsheet and identify impact of the adjustment

The rate of return on rate base will be limited to the lesser of 8.0% or the level computed based on a 9.25% return on equity, using the applicant's actual cost of debt and the applicant's actual debt/equity structure. Verify that the above calculation was used in the respective UAF Model
