Electronic Filing

June 19, 2025

Ms. Sallie Tanner
Executive Secretary
Georgia Public Service Commission
244 Washington Street S.W.
Atlanta, Georgia 30334

Dear Ms. Tanner,

Attached are the following revisions to the Telcove Operations LLC Georgia Tariff No. 3, submitted with a June 19, 2025, issue date and a proposed effective date of July 3, 2025.

Section	Revised Pages	
5	First Revised Page 50 through Page 58	
5	Second Revised Page 68 through Page 70	
5	First Revised Page 71 through Page 78	
5	Second Revised Page No. 79 and Page 80	
5	First Revised Page 81 through Page 87	
5	Second Revised Page No. 88	

This filing grandfathers Dedicated Access Services effective July 3, 2025. A grandfathered service is one that is no longer sold, and availability is limited to lines currently in service at existing locations. Current customers are being notified of this change.

If you have questions or need additional information, please reach out to me.

Sincerely,

Jim Adams

GA2025-02

JIM ADAMS
Senior Government Operations Analyst

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.1 General

The various types of Company service offerings are described below. Company services are billed at predetermined monthly rates. Recurring charges are billed in advance of the month in which service is performed. In addition, the optional features and any extraordinary installation costs other than recurring and non- recurring charges may apply as described herein. Customers requesting these services may subscribe to services on a month-to-month basis, or for term discount plans of 1 to 5 years. Customers subscribing to a term discount plan may receive a discount on charges for these arrangements. Agreements for services in excess of 5 years will be negotiated on an ICB. All arrangements will be filed with the Commission prior to service.

5.2 Service Configurations

There are two types of service configurations over which Company's services are provided: point-to-point service and multipoint service.

(A) Point-To-Point Service **– GRANDFATHERED [1]** (C)

Point-To-Point Service connects two Customer-designated premises, either on a directly connected basis, or through a hub where multiplexing functions are performed.

(C)

(B) Multipoint Service **– GRANDFATHERED**

Multipoint Services connect three or more Customer designated premises through a Company hub. There is no limitation on the number of locations connected via multipoint service. However, when more than three points are provided in tandem, the quality of service may be degraded. Multipoint service may be provided where technically possible. If Company determines that the requested characteristics for a multipoint service are not compatible, the Customer will be advised and given the opportunity to change the order within 60 days.

(N)

[1] Effective July 3, 2025, Dedicated Access Services will no longer be available to new customers or for new orders from existing customers, including any Moves, Adds or Changes. Customers with services under existing contracts will continue to be supported as required until the expiration of the contract. Contracts will not be renewed. Service terms will expire at the end of the current applicable service term. (N)

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications

The following service descriptions and technical specifications will apply to Company's services. When references to Bellcore Technical Publications on file with the Commission are made for performance criteria, the criteria will be considered objectives for Company's performance. In no case should the reference to these Bellcore standards be construed as creating any warranties on the part of Company. Technical publications are available for review by the Customer upon request.

5.3.1 Voice Grade Service (DS-0) **– GRANDFATHERED** (C)

A Voice Grade Facility is a channel which provides voice frequency transmission capability in the normal frequency range of 300 to 3000 HZ and may be terminated as analog two-wire or four-wire, or where facilities permit, as a four-wire in a digital format when used in conjunction with another Voice Grade Facility termination at the other end. Voice Grade Facilities are provided between Customer designated locations or between a Customer designated location and a Company's hub.

Transmission specifications are defined in Bellcore Technical Reference TR-TSY-000335, issue 2 and PUB 41004, Table 4, and those publications referenced therein for Voice Grade frequency (300-3000hertz Voice Grade Transmission).

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

5.3.2 Digital Data Service (DDS) **– GRANDFATHERED** (C)

A Digital Data Channel is a channel for duplex four-wire transmission of synchronous serial data at rates of 2.4, 4.8, 9.6, 19.2, 56, or 64 Kbps. The actual bit rate is a function of the channel interface selected by the Customer. The channel provides synchronous service with timing provided by Company, through Company facilities to the Customer in the received bit stream. Digital Data channels are provided only between Customer designated locations and/or between Customer designated locations and a Company's hub.

5.3.3 DS-1 Service **– GRANDFATHERED** (C)

DS-1 Service, or Digital Signal Level 1 Service, is a channel for the transmission of 1.5644 Mbps data. The actual bit rate and framing format is a function of the channel interface selected by the Customer. DS-1 Channels are provided between Customer designated locations and between Customer designated locations and a Company's hub.

Technical standards are defined in Bellcore Technical Reference TR-NPL-000054, TR-TSY-000342, TR-TSY-000194, and PUB 62508, PUB 62411, PUB 62411A.

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

5.3.4 DS-3 Service **– GRANDFATHERED** (C)

DS-3 Service, or Digital Signal Level 3 Service, is a channel for the transmission of 44.736 Mbps data. The actual bit rate and framing format is a function of the channel interface selected by the Customer. DS-3 Channels are provided between Customer designated locations and/or between Customer designated locations and a Company's hub. DS-3 service is provided with an electrical interface. As an option, this service may be provided to a Customer with an optical interface at the Customer's premises. Services with this option will terminate in Company's Optical Line Terminating Equipment (OLTE) located in Company's hub. The OLTE located at the Customer's premises is subject to the mutual agreement of the parties, and must be compatible with the OLTE located in Company's hub. The optical interface option is available only where facilities permit, and is offered on an Individual Case Basis (ICB)

Technical standards are defined in Bellcore Technical Reference TR-NPL-000054, TR-TSY-000342, TR-TSY-000194, and PUB 62508, PUB 62411, PUB 62411A.

5.3.5 DS-3 (X3), (X9), or (X12), (X24) Services **– GRANDFATHERED** (C)

DS-3 services may be ordered in multiples of 3 (X3), 9 (X9), or 12 (X12) (X24). These services are offered in the same configuration as DS-3 service (i.e. either electrical or optical interface), and with the same technical specifications. These services will be provided initially on an ICB.

SECTION 5 – SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

5.3.6 Fractional DS-1 Service (NOC) **– GRANDFATHERED**

(C)

Fractional DS-1 service consists of 2 to 24 DS-0 or DDS channels between two Customer designated locations, utilizing DS-1 level facilities, and multiplexing arrangements.

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

5.3.7 Multiplexing Services **– GRANDFATHERED** (C)

Multiplexing is provided in the following configurations:

M13 Multiplexing (ICB)

An arrangement that converts a 44.736 Mbps channel into 28 DS-1 channels using digital time division multiplexing.

DS-1 to DS-0 Multiplexing

An arrangement that converts a 1.544 Mbps channel into 24 channels for use with Voice Grade Facilities or DDS.

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

5.3.8 Private Local SONET Ring (PLSR) **– GRANDFATHERED** (C)

Private Local SONET Ring (PLSR) service is a local channelized service providing an optical fiber based self-healing digital channel for two-way transmission. The architecture of PLSR is designed to increase the reliability and availability for customer's private line and access services. The initial offering of PLSR will provide dedicated private SONET Ring networking between various customer sites and Company nodes. A dedicated fiber ring architecture is the preferred transport medium consisting of optical/electrical elements (OC-n fiber muxes) dedicated to the Company end-user customer.

Private Local SONET Ring (PLSR) high-bandwidth services provide customers with the high-quality point-to-point circuits and real-time restoration necessitated by mission- critical applications.

The Company's initial PLSR offering consists of the following restorable service types:

- OC-3
- OC-12
- OC-48

(C)

5.3.9 Private Local SONET Ring (PLSR) Concatenated (c) **– GRANDFATHERED**

Private Local SONET Ring (PLSR) Concatenated (c) service allocates unchannelized service, providing an optical fiber based self-healing digital two-way transmission. Concatenation is a method of delivering very large amounts of bandwidth by bonding multiple sub rate channels within a SONET payload.

Unlike channelized PLSR services which provides "network handoff's" to demarcations, such as DS1 and DS3 terminations, concatenated PLSR services provides the total ordered bandwidth within the same channel delivered. OC-3(c) service delivers approximately 155.52Mbps, OC-12(c) delivers approximately 622.08Mbps and OC-48(c) is approximately 2.488Mbps via an optical delivery.

The Company's PLSR(c) offering consists of the following restorable service types:

- OC-3(c)
- OC-12(c)
- OC-48(c)

Note:

- Minimum network SONET availability to provide OC-3(c) must be OC-12
- Minimum network SONET availability to provide OC-12(c) must be OC-48
- Minimum network SONET availability to provide OC-48(c) must be OC-192

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

5.3.10 Inter City Private Line Service **– GRANDFATHERED** (C)

Inter-City Private Line Service provides large capacity point-to-point private data facilities to those subscribers whose businesses require the exchange of high volumes of data. This dedicated service is designed to deliver DS-1. DS-3, OC-3, and OC-12 services between two customer designated demarcation points utilizing TelCove's Dense Wavelength Division Multiplexing (DWDM) backbone transport network.

1. DS-1 and DS-3 Service

   DS-1 and DS-3 Service are high capacity point-to-point private line service designed for the simultaneous full-duplex transmission of digital signals at nominal speeds of 1.5644 and 44.736 Mbps respectively.

2. OC-3 Service

   OC-3 Service is a high capacity point-to-point private line service designed for the simultaneous full-duplex transmission of digital signals based on the Synchronous Optical Network (SONET) standard at a nominal speed of 155 Mbps.

3. OC-12 Service

   OC-12 Service is a high capacity point-to-point private line service designed for the simultaneous full-duplex transmission of digital signals based on the Synchronous Optical Network (SONET) standard at a nominal speed of 622 Mbps.

SECTION 5 - SERVICE DESCRIPTIONS AND TECHNICAL STANDARDS

5.3 Service Descriptions and Technical Specifications (Cont'd)

(C)

5.3.10 Inter City Private Line Service **– GRANDFATHERED** (Cont'd)

4. Rates and Charges

Monthly recurring charges are mileage based and include local access charges from TelCove's point of presence to the subscriber's demarcation point.

5. Installation Interval

The installation interval for Inter-City Private Line Service will be determined on an individual case basis (ICB). There will be no installation charge for any facility with a term equal to or greater than three years.

SECTION 6 - RATES AND CHARGES

6.1 Dedicated Facilities **– GRANDFATHERED** (C)

6.1.1 Charges for Changes to Pending Orders, Service Rearrangements and Expedite Charges

From time to time, customers may request changes to pending orders, rearrangements to existing service, and order completion to standard intervals. In these cases, the Customer will be required to reimburse Company for the increased expenses incurred on an ICB.

6.1.2 Point-To-Point and Multipoint Services

(a) Voice Grade (VF) Services

	Recurring Charges - Term					**Non-Recurring**
