Re: Errata to Georgia Power Company's Application for the Certification of the CARES 2023 Utility Scale Renewable Power Purchase Agreements; Docket No. 56181

Dear Ms. Tanner:

On June 5, 2025, Georgia Power Company ("Georgia Power") filed its Application for the Certification of the CARES 2023 Utility Scale Renewable Power Purchase Agreements ("PPAs") in Docket No. 56181 ("Certification Application"). Georgia Power now files this Errata to correct a misstatement in the notes accompanying the capacity needs charts in Section 6.2 of the Certification Application. Georgia Power's Summer and Winter projected capacity needs include 500 MW that will be procured in the 500 MW Energy Storage System ("ESS") RFP issued later this year. As currently drafted, the supporting footnote incorrectly states that the capacity need shown does *not* include the 500 MW ESS RFP. As such, note (C) in Table 6.2.1 – Georgia Power Projected Summer Capacity Need (MW) and Table 6.2.2 – Georgia Power Projected Winter Capacity Need (MW) should now read as follows:

> (C) Includes territorial and imported power purchases. Capacity includes the 500 MW ESS RFP approved in the 2022 IRP to show total procurement needs.

No other changes are needed to Georgia Power's Certification Application at this time. If you have any questions about this filing, please email me at allison.pryor@troutman.com or call me at 404.885.3779.

Sincerely,

By Allison W. Pryor
