Re: Georgia Power Company's 2024 Distributed Generation Request for Proposals; Docket No. 55623

Dear Ms. Tanner:

On October 3, 2024, the Georgia Public Service Commission (the "Commission") issued an order approving Georgia Power Company's ("Georgia Power") 2024 Distributed Generation ("DG") Request for Proposals ("RFP") and Pro Forma Power Purchase Agreement ("PPA"). The 2024 DG RFP was designed to procure approximately 250 megawatts ("MW") of DG solar photovoltaic resources sized greater than 250 kilowatts up to 6 MW alternating current ("AC"). This includes the second 100 MW of DG resources approved in the 2022 IRP Final Order as well as 150 MW rolled forward from Georgia Power's previous distributed generation solicitation.

Georgia Power and ten winning bidders have executed the second group of 2024 DG Solar PPAs, the effectiveness of which is subject to the Commission's approval. Attachment 1 includes a spreadsheet that provides project-specific information for the PPA winning bidders and facilities. The PPA terms and conditions are pro forma and are consistent with what the Commission approved on October 3, 2024. Trade secret copies of the PPAs have been provided to Commission Staff.

Georgia Power hereby requests that these DG PPAs be deemed certified because the need for these resources is sourced from a need identified in the 2022 IRP Final Order.

Please call me at (404) 885-3779, if you have any questions regarding this filing.

Best Regards,

Allison W Pryor
