SYNOPSIS OF PROPOSED REVISIONS
HOUSTON CWSP
NOVEMER 2025

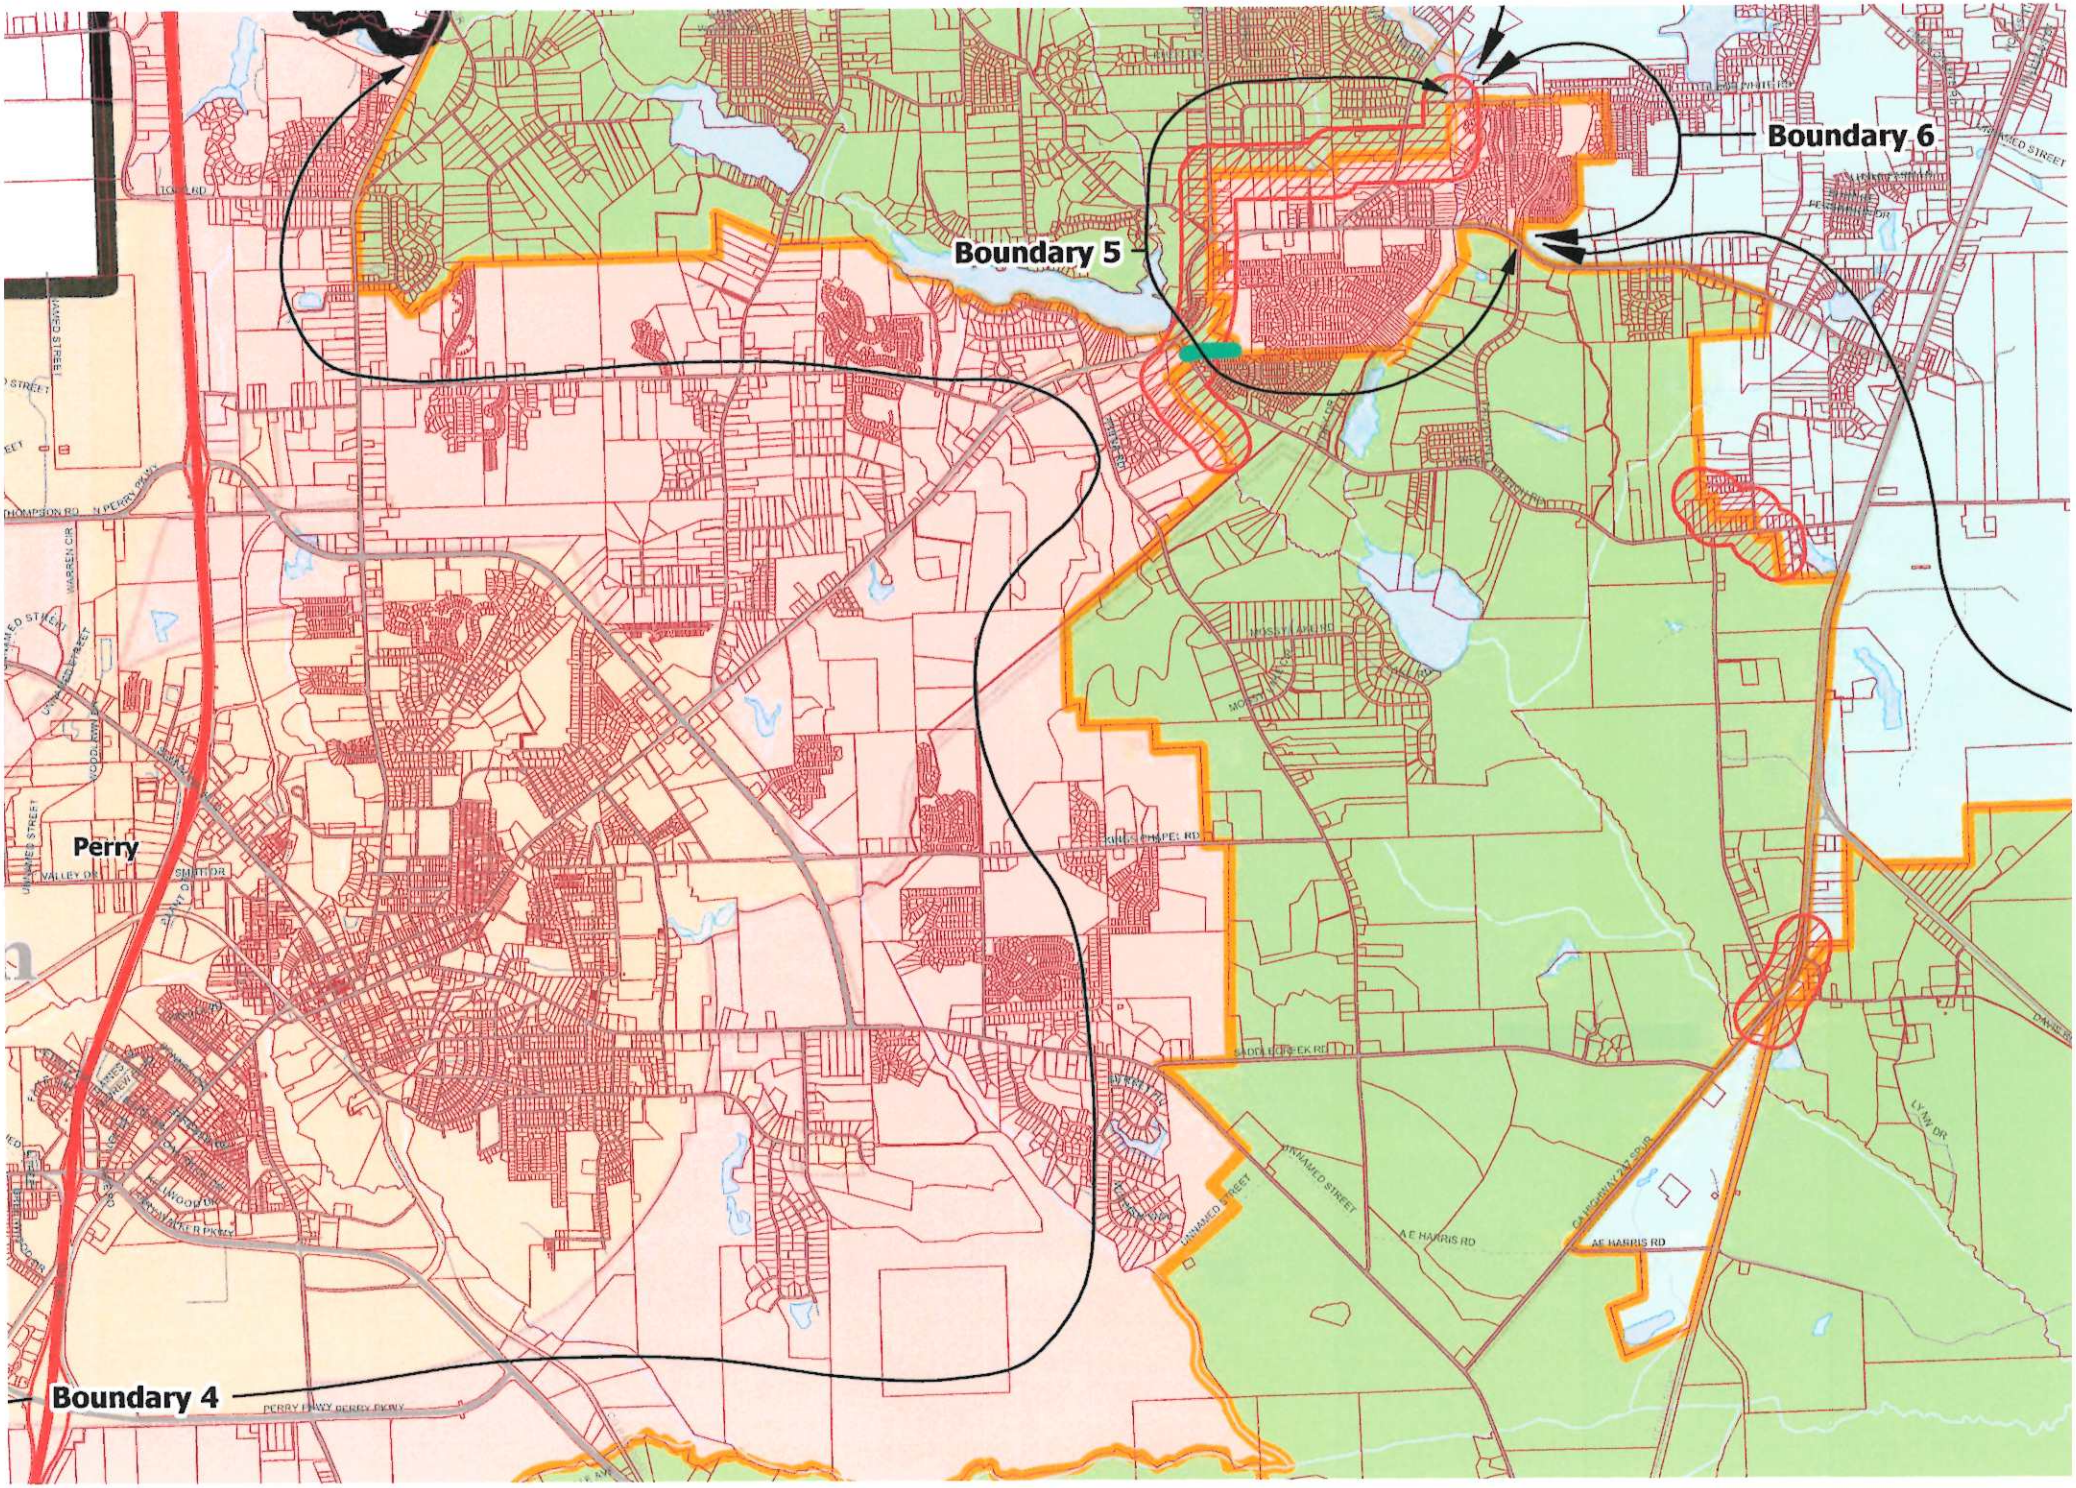

- The currently approved Plan, which was approved in 2017, was prepared using an older version of the CWSP template. The proposed amended Plan was prepared using the current CWSP template. Significant changes, such as the location of information in Section Two and Attachment B, are indicated in the redlined version. Minor changes are not redlined.
- Boundary Descriptions in the currently approved Plan rely on references to Tax Map Parcel Numbers. Since the current CWSP template requires references to the latitude and longitude of significant points along the Boundaries, all Boundary Descriptions in the Houston Plan have been rewritten in the current format. Boundary locations that are unchanged are not indicated as revisions in the redlined Plan. Only revised or additional Boundary locations are redlined.
- The most significant Boundary revisions in the proposed Plan are limited to the area immediately east of Houston Lake in the center of the County.
    - In the current Plan, Perry's territory is contiguous and separates MSE's territory to the north and to the south with MSE having a Pipeline-Only Right-of-Way through Perry's territory.
    - In the proposed Plan, territory in the vicinity of MSE's Pipeline-Only Right-of-Way will be transferred from Perry to MSE, separating a small area of Perry's territory to the east.
    - The transfer of territory from Perry to MSE eliminates the need for MSE to have a Pipeline-Only Right-of-Way and creates the need for Perry to have a Pipeline-Only Right-of-Way in the transferred territory.
    - The transfer of territory also significantly affects Boundaries 4 and 5, with the southern part of the current Boundary 5 becoming part of the new Boundary 4; and the eastern end of the current Boundary 4 becoming part of the new Boundary 5.
- Boundary 1 includes a minor revision to accurately describe the physical features used to establish the Boundary. The current Plan incorrectly references Horse Creek as part of the Boundary. A property parcel line is a more accurate Boundary descriptor.
- The name change to Mid-State Energy Commission is indicated in the redlined Plan.

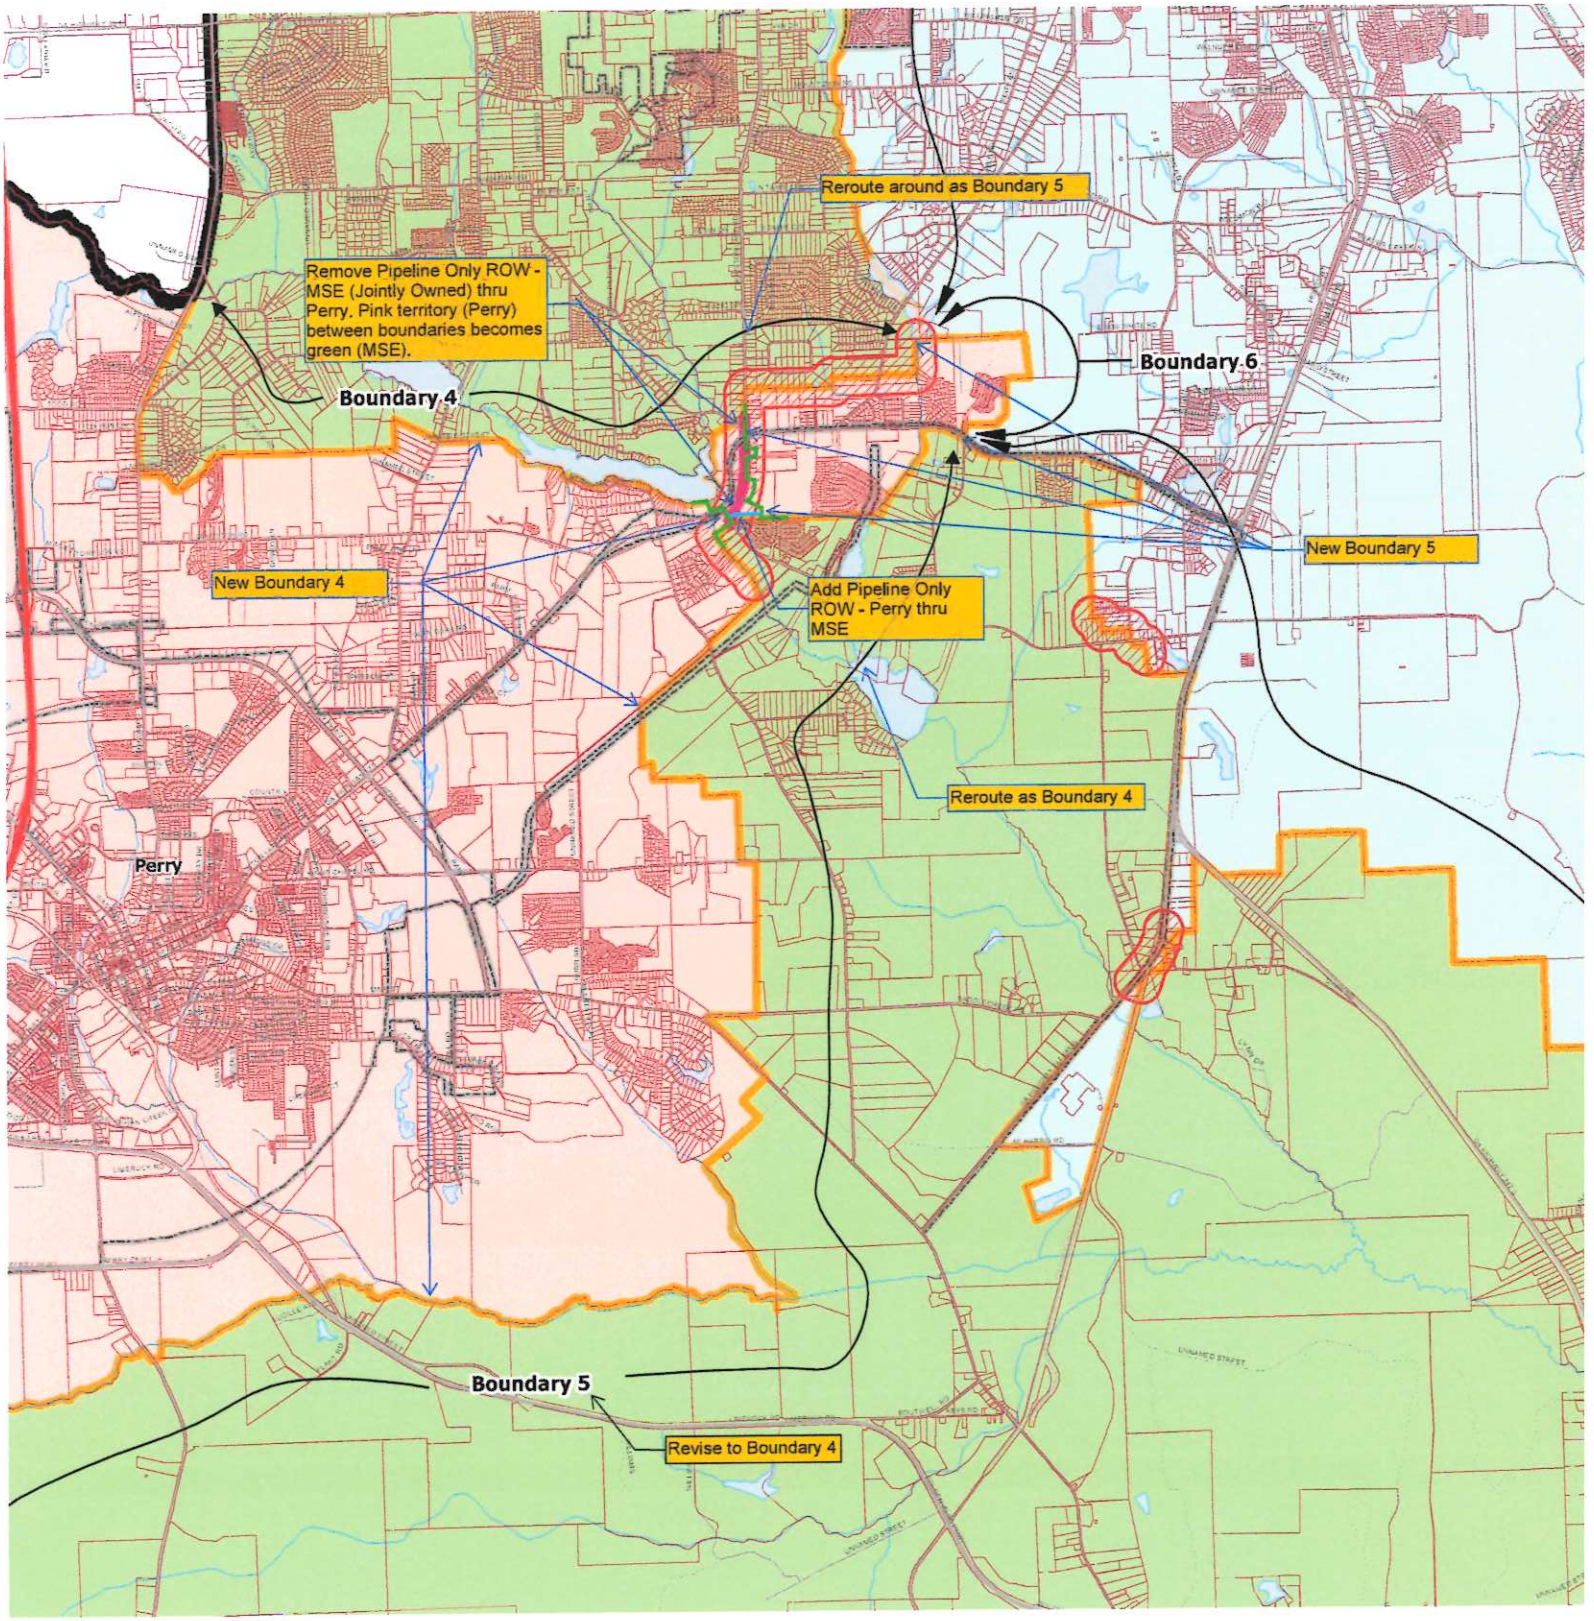

Houston County - Countywide Safety Plan

Attachment C

HOUSTON CWSP
PROPOSED MSE PIPELINE
WARNER ROBINS
MSE
Boundary 4
CONNECT TO EXISTING MSE & PERRY FACILITIES
PERRY

Boundary 6
Boundary 5
Perry
Boundary 4

Reroute around as Boundary 5
Remove Pipeline Only ROW - MSE (Jointly Owned) thru Perry. Pink territory (Perry) between boundaries becomes green (MSE).
