FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

Schedule FR-31

Rate Code 1

RESIDENTIAL SERVICE

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY

Available to all residential consumers in the service area of Flint EMC.

APPLICABLE

Applicable for residential use only when supplied through one meter to each residence, apartment or dwelling unit, mobile home, subject to the established rules and regulations.

TYPE OF SERVICE

Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Service Charge, Single-Phase	***$38.00 per Month***
Service Charge, Three-Phase	***$38.00 per Month***
kWh Usage	***11.05 Cents per kWh***

LIHEAP DISCOUNT

For members that receive LIHEAP assistance, the monthly Service Charge will be reduced to fifty percent (50%) of the monthly service charge.

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge noted above.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement.

In the event payment is not received by 5:00 P.M. on the due date for standard postpay accounts, there will be a five-percent (5%) late payment fee added.

Effective: Bills rendered on or after April 1, 2026

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

Schedule FGS-26 Rate Code 2 (Regular)
Rate Code 3 (Churches)
GENERAL SERVICE DEMAND Rate Code 8 (Seasonal)

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account

AVAILABILITY

On all existing distribution lines or within the service area of Flint Electric Membership Corporation where adequate capacity is available.

APPLICABLE

To nonresidential consumers, excluding irrigation and poultry house loads, requiring one standard voltage delivered at one metering point, except those consumers classified and billed under other rate schedules.

TYPE OF SERVICE

Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Regular

Service Charge, Single-Phase	***$45 per Month***
Service Charge, Three-Phase	***$52 per Month***
All kW of Billing Demand	***$6.58 per kW***
All kWh	***8.63 Cents per kWh***

Churches

Service Charge, Single-Phase	***$45 per Month***
Service Charge, Three-Phase	***$50 per Month***
All kW of Billing Demand	***$6.57 per KW***
All kwh	***8.63 Cents per kwh***

Seasonal

Service Charge, Single-Phase	***$45 per month***
Service Charge, Three-Phase	***$52 per Month***
All kW of Billing Demand	***$6.52 per KW***
All kwh	***8.63 Cents per kwh***

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge noted above, per meter plus the amount designated by rate per kW of Demand.

DETERMINATION OF BILLING DEMAND

The monthly billing demand shall be based on the highest 15-minute demand measured during the current month and the previous eleven months and shall be the greater of:

1. 100% of the current month.
2. 85% of the peak demand measured in the billing months of June through September, inclusive.

OFF-PEAK BILLING DEMAND FOR CHURCHES

Billing demand for churches of worship shall be 85% of the current month.

SEASONAL SERVICE

A consumer incurring 75% of his annual kWh consumption during the months of June through September will be billed on the above rate, plus a surcharge of 25%. Billing demand each month will be the actual metered demand.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five- percent (5%) late payment fee added.

OFF-PEAK LIGHTING SERVICE
(Consumer-owned, operated and maintained)

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY

On all distribution lines or within the service area of Flint EMC.

APPLICABLE

To any individual, corporation, county or municipal consumer for off-peak lighting installed, owned, operated and maintained by the consumer.

Service is subject to the established rules and regulations of the cooperative. Service will be rendered only at locations that, solely in the opinion of the cooperative, are readily accessible for construction and maintenance.

TYPE OF SERVICE

Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Service Charge	***$38.00 per Month***
All kWh	***8.73 Cents per kWh***

General Notes:

1. The number and location of service points shall be as specified by the cooperative.
2. For signs located along Federal highways, appropriate permits will be required.
3. Construction charge may be required for line extension.

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge noted above.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

TERMS OF PAYMENT

Leased Pole	Wood Pole 30/6	80	30	$6.25
Covenant Street Lights				$3.40

Note: Photos of lights are representative of fixtures, but actual installations may vary.

EXPLANATORY NOTES

1. If the Cooperative is required to install a pole for the exclusive purpose of rendering outdoor lighting, then the consumer-member will be required to pay, prior to construction, a non-refundable construction charge of the amount set forth in the pole section below.
2. In the event the Cooperative is requested to replace an existing cooperative-owned mercury vapor, high pressure sodium, or metal halide fixture that is operational with an equivalent LED fixture , then the consumer-member will be required to pay the Cooperative $150.00 for each existing 150W – 250W fixture to be replaced and $200.00 for each existing 400W – 1,000W fixture to be replaced.
3. In the event the Cooperative is required to replace an existing cooperative-owned lighting fixture requiring greater height than that which is achievable on existing poles, then the consumer-member will be required to pay the Cooperative a construction charge to cover the cost of rearranging facilities.
4. The consumer-member may be required to reimburse the Cooperative for any maintenance work which is required because of vandalism.

5. If the consumer-member requests a change in a lighting fixture within one year of initial installation a non-refundable charge of $200 will be assessed. If a member requests that a lighting fixture be disconnected or reconnected temporarily (for less than one year), then a non-refundable charge of $135.00 will be assessed.
6. Wiring requirements for outdoor lighting.

Installation of Wiring for Lights - If a light fixture is installed where no underground streetlight wire is available or on a pole without low voltage power, new wiring must be installed for the light. Installing this wiring and transformer (if needed) would require a one-time fee as detailed below.

a. Residential Neighborhoods – Underground streetlight wiring is available only in areas served by Flints' underground distribution system where the underground streetlight cable is buried in the same trench with the distribution system. A construction charge will be assessed in the amount of $5.50 per foot for trenching outside of the same trench as the distribution system. Where paving or other obstructions exist, the consumer-member will be required to perform all trenching, install duct furnished by the Cooperative, backfill and complete the paving to the mutual satisfaction of all parties concerned.

b. Apartment Complexes & Commercial Establishments – A construction charge of $5.50 per foot for trenching will be assessed for all underground streetlight wiring.

c. Where paving or other obstructions are currently present, or may become a conflict in the future, underground streetlight wiring shall be placed in conduit either by trenching, open ditch or directional boring. Where conduit(s) are installed by trenching or open ditch to eliminate conflict with pavement or obstructions, a cost adder of $3.20 per foot shall be applied to 6(a) and 6(b) above. When directional boring is used to place conduit, the cost of underground wiring in 6(a) and 6(b) above shall be increased to $15.50 per foot for sections installed by directional boring method.

   In lieu of charges set forth in Section 6(c), consumer may perform all trenching or boring, install conduits or ducts, backfill and pave; provided the materials and installation satisfactorily meets requirements set forth by Cooperative. Upon acceptance by Cooperative, consumer-member installation of conduits and duct shall become property of and be maintained by the Cooperative.

d. Aerial wiring for lighting is available in locations with existing overhead power lines. The cost to install aerial wiring for lighting is $1.60 per foot with a $160.00 minimum charge. If there are any trees that need to be trimmed or removed to allow for the installation of aerial wiring, the member would be responsible for this work.

e. If a transformer is required to be installed for the purpose of providing power to a light, the installation cost shall be:

Pole Mount Transformer = $1,500.00

Pad Mount Transformer = $2,700.00

Pole Installation Costs

TYPE	ONE TIME CHARGE
30' Wood	$1,150.00
35' Wood	$1,215.00
40’ Wood	$1,250.00
16' Aluminum (Brushed)	$560.00
16' Fiberglass (Black)	$440.00
16’ Fiberglass (Acorn, Black)	$440.00
30' Steel & Sub Base	$2,500.00
30’ Fiberglass with 6' Arm	$1,100.00
30’ Fiberglass with 2 - 6' Arm	$1,275.00

Lease pole rates apply to 30-foot wood poles only.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 p.m. on the due date, there will be a five-percent (5%) late payment fee added.

Effective: Bills rendered on or after April 1, 2020.

Service Charge	***$38.00 per Month***
All kWh	***16.20 Cents per kWh***

CHARGE FOR FAILURE TO INTERRUPT SERVICE

All loads served on the Interruptible Service rate above are expected to be interrupted when a control signal is issued by Flint EMC's load management system. Consumer's whose load fails to interrupt may be subject to a charge of $5 per kW of load that is not interrupted, applicable for each occurrence of failure to interrupt. In addition, repeated failure to interrupt shall result in removal from the Interruptible Service rate and service being provided under Firm Service rate.

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge noted above.

AID TO CONSTRUCTION

Irrigation line extension allowances are based upon Section 211 of Flint Energies Service Rules and Regulations.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

INTERRUPTIBLE SERVICE TERM AGREEMENT

A consumer electing to terminate on the Interruptible Service rate may not return to the Interruptible Service rate for at least twelve (12) months.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five percent (5%) late payment fee added.

Effective: Bills rendered on or after April 1, 2026

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

Schedule FIS-ILE-6

Rate Code 30 (Interruptible)
IRRIGATION SERVICE Rate Code 31 (Firm)

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY

On all existing distribution lines or within the service area of Flint EMC where adequate capacity is available.

APPLICABLE

Applicable to service to provide for irrigation purposes as follows.

1. ***Interruptible Service***: Irrigation loads where such load may be controlled by Flint EMC's load management system during peak periods. Peak periods are any hours between 2:00 P.M. and 8:00 P.M. that Flint operates load control from May 1st to October 31st. Off Peak hours are all other hours.
2. ***Firm Service***: Irrigation loads that are not interruptible as defined above.

TYPE OF SERVICE

Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Interruptible Service:	
Service Charge	***$38.00 per Month***
All kWh	***12.50 Cents per kWh***
Firm Service:	
Service Charge	***$38.00 per Month***
All kWh	***19.10 Cents per kWh***

CHARGE FOR FAILURE TO INTERRUPT SERVICE

All loads served on the Interruptible Service rate above are expected to be interrupted when a control signal is issued by Flint EMC's load management system. Consumer's whose load fails to interrupt may be subject to a charge of $5 per kW of load that is not interrupted, applicable for each occurrence of failure to interrupt. In addition, repeated failure to interrupt shall result in removal from the Interruptible Service rate and service being provided under Firm Service rate.

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge noted above.

AID TO CONSTRUCTION

Irrigation line extension allowances are based upon Section 211 of Flint Energies Service Rules and Regulations.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

CONFIDENTIAL TRADE SECRET
NOT FOR PUBLIC DISCLOSURE

SCHEDULE QF
QUALIFYING FACILITY STANDBY SERVICE

The following tariff contains information which constitutes a "trade secret." All information that Flint EMC considers to be a trade secret has been redacted from the Public Disclosure filings that Flint EMC is making by separate filing on this date. The undersigned hereby swears and affirms that the legal and factual basis for Flint EMC's assertion that the protected information is a trade secret includes, among other things, the following:

(1) The information which has been redacted from the enclosed 'PUBLIC DISCLOSURE DOCUMENT" (hereinafter, the "trade secrets") is of great economic value to Flint EMC by virtue of its not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use. Specifically, maintaining the confidentiality of the trade secrets is of commercial value to Flint EMC because, among other reasons:

I. The information would be helpful to Flint EMC's potential and actual competitors in seeking to acquire competitive retail electric service contracts in the future.

(2) Other persons can obtain economic value from the disclosure of the trade secrets by, among other things:

I. Knowledge of the trade secrets could permit other electric suppliers to undercut Flint EMC's pricing, fee structure or service terms within this rate classification.

(3) Flint EMC uses the following procedures, among others, to maintain the secrecy of the trade secrets:

I. Flint EMC uses passwords, physical security measures, and limits the distribution of the trade secrets to only those who need the information for the benefit of Flint EMC, and who have agreed not to use or distribute the information to others.

IN WITNESS WHEREOF, the undersigned has duly executed the Affidavit this 31st day of March 2026.

[AFFIANT]

Sworn to and subscribed before me this

SCHEDULE QF-30 Rate Code 35

QUALIFYING FACILITY STANDBY SERVICE

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received, which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY

Available to Members of Flint EMC who were taking service on Schedule QF-14 as of January 1, 1999. Other Members who qualify under Section 201 of the Public Utility Regulatory Policies Act of 1978 as a co-generator or small power producer should contact Flint EMC for the appropriate schedule.

APPLICABILITY

Applicable to Members who have Qualifying Facilities with total on-site capacity of [redacted] or more that is used to serve the Member's load. Member load in excess of that which can be served by the Qualifying Facility may be served under this rate as long as that excess, or supplemental, load is not greater than [redacted] of the load served by the generator.

STANDBY SERVICE

Standby Service is the capacity and energy provided by Flint EMC to replace that is normally provided by the Member's generator. In order to receive service on this Schedule, the Member shall specify the level, in kW, of service to be provided under this schedule. This is the generator capacity for which Flint EMC is providing Standby Service plus service in excess of that normally provided by the Member's generator.

TYPE OF SERVICE

Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Service Charge:	***[redacted]***
Demand Charge:	
Top 10 Curtailment Period Demand	***[redacted]***
Transmission Charge:	
Top 5 Curtailment Period Demand	***[redacted]***
Energy Charge:	
May 1 – September 30

Option 2:	***[redacted]***
	[redacted]
Other Months:	***[redacted]***
Facilities Charge:	***As defined in Facilities Charge Adder section below***

REDACTED

ENERGY CHARGE OPTION

[redacted]

TOP 10 CURTAILMENT PERIOD DEMAND

The Member's Top 10 Curtailment Period Demand shall be the Member's average demand during the ten hours of the prior calendar year in which Flint EMC establishes its capacity responsibility under its contract with its power supplier, unless another billing demand is established by agreement between the Member and Flint EMC. The Member's average demand described above shall be calculated as the sum of the Member's demands in the ten designated hours divided by ten. Flint EMC shall provide notification to the Member, using an agreed notification methodology, of hours which it projects to be potential capacity responsibility hours. Should Flint EMC fail to provide notification to the Member of one or more hours that are among the ten designated hours, those hours without notification shall not be included in the calculation of Top 10 Curtailment Period Demand.

If, in Flint's judgment, the Member's demand during one or more of the ten designated hours is increased as the result of an outage to or disruption of the power supply provided by Flint, Flint will modify the measured demand for such hours.

If one or more of the hours in which Flint EMC establishes its capacity responsibility under its contract with its power supplier occurs outside the months of May, June, July, August and September, such hour(s) will not be used to determine Member's Billing Demand.

Using an agreed notification methodology, Flint EMC shall have no liability for failure of the Member to receive notification. Flint EMC shall also have no liability for lost production or any damage to Member's equipment which results from Member's response to such notification.

TOP 5 CURTAILMENT PERIOD DEMAND

The Member's Top 5 Curtailment Period Demand shall be the Member's average demand during the five hours of the prior calendar year in which Flint EMC establishes its transmission responsibility under its contract with its transmission provider, unless another billing demand is established by agreement between the Member and Flint EMC. The Member's average demand described above shall be calculated as the sum of the Member's demands in the five designated hours divided by five. Flint EMC shall provide notification to the Member, using an agreed notification methodology, of hours which it projects to be potential capacity responsibility hours. Should Flint EMC fail to provide notification to the Member of one or more hours that are among the five designated hours, those hours without notification shall not be included in the calculation of Top 5 Curtailment Period Demand.

If, in Flint's judgment, the Member's demand during one or more of the five designated hours is increased as the result of an outage to or disruption of the power supply provided by Flint, Flint will modify the measured demand for such hours.

Using an agreed notification methodology, Flint EMC shall have no liability for failure of the Member to receive notification. Flint EMC shall also have no liability for lost production or any damage to Member's equipment which results from Member's response to such notification.

REQUESTS TO CURTAIL LOAD

Flint EMC may request that Member curtail load at any time during the year when such curtailments are needed for purposes of transmission system integrity or to maintain service to Cooperative's other Members. Member shall make a reasonable effort to comply with such requests but shall not be penalized for any failure to comply.

MONTHLY RATE

Service Charge	***$38.00 per Month***
Off- peak kWh	***$9.75 Cents per kWh***
On-peak kWh	***$1.905 per kWh***

ON-PEAK AND OFF-PEAK HOURS

For the purpose of this Rate Schedule, on peak hours are any hours between 2 P.M. and 8 P.M. that Flint operates load control from May 1st through October 31st. Off-peak hours are all other hours.

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge noted above.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five- percent (5%) late payment fee added.

Effective: Bills rendered on or after April 1, 2026

CONFIDENTIAL TRADE SECRET
NOT FOR PUBLIC DISCLOSURE

SCHEDULE EIS
EDUCATION INSTITUTION SERVICE

The following tariff contains information which constitutes a "trade secret." All information that Flint EMC considers to be a trade secret has been redacted from the Public Disclosure filings that Flint EMC is making by separate filing on this date. The undersigned hereby swears and affirms that the legal and factual basis for Flint EMC's assertion that the protected information is a trade secret includes, among other things, the following:

(1) The information which has been redacted from the enclosed 'PUBLIC DISCLOSURE DOCUMENT" (hereinafter, the "trade secrets") is of great economic value to Flint EMC by virtue of its not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use. Specifically, maintaining the confidentiality of the trade secrets is of commercial value to Flint EMC because, among other reasons:

I. The information would be helpful to Flint EMC's potential and actual competitors in seeking to acquire competitive retail electric service contracts in the future.

(2) Other persons can obtain economic value from the disclosure of the trade secrets by, among other things:

I. Knowledge of the trade secrets could permit other electric suppliers to undercut Flint EMC's pricing, fee structure or service terms within this rate classification.

(3) Flint EMC uses the following procedures, among others, to maintain the secrecy of the trade secrets:

I. Flint EMC uses passwords, physical security measures, and limits the distribution of the trade secrets to only those who need the information for the benefit of Flint EMC, and who have agreed not to use or distribute the information to others.

IN WITNESS WHEREOF, the undersigned has duly executed the Affidavit this 31st day of March 2026.

[AFFIANT]

Sworn to and subscribed before me this 31 day of March, 2026.

SCHEDULE EIS-4 **Rate Code 50**

EDUCATIONAL INSTITUTION SERVICE

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received, which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service is capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY

Throughout Flint EMC's service area, in accordance with Flint EMC's Service Rules and Regulations and subject to the execution of a contract for service mutually agreed upon by Flint EMC and the member.

APPLICABLE

To qualified educational institutions which meet all of the following eligibility requirements:

1. Electric service of standard voltage will be metered at one location.
2. The connected load must be [redacted] or greater.
3. Facility first receives permanent service on or after June 1, 2009.

TYPE OF SERVICE

Service shall be provided as set forth in the contract for service between Flint EMC and the member.

MONTHLY RATE.

Service Charge	**[redacted] per month**
All kW of Billing Demand	**[redacted] per kW**
All kWh	**[redacted] cents per kWh**

MINIMUM MONTHLY CHARGE

The minimum monthly charge shall be the greater of the following:

1. The sum of the charges contained in the above provision entitled "MONTHLY RATE."

2. The charge as may be specified in the contract for service between the Corporation and the member.

REDACTED

DETERMINATION OF BILLING DEMAND

The Billing Demand the highest 15-minute demand measured during the billing month.

WHOLESALE POWER COST ADJUSTMENT

The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider, Schedule WPCA.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five- percent (5%) late payment fee added.

EDUCATIONAL SYSTEM SERVICE

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account

AVAILABILITY

Throughout Flint EMC's service area from existing lines of adequate capacity, in accordance with Flint EMC's Service Rules and Regulations.

APPLICABLE

To all full use electric service to State, County, City and Private educational institutions offering regular elementary, middle, high school and college courses meeting the following eligibility requirements:

1. Electric service of standard voltage is supplied at a single delivery point through a single meter.
2. Taking service on ESS-18 as of April 1, 2018 or taking initial service from Flint EMC after that date.

TYPE OF SERVICE

Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Service Charge	***[redacted] per Service Meter per Month***
All kWh	***[redacted] cents per kWh***
Billing Demand Charge	***Power Supply: [redacted] per kW of Power Supply Billing Demand each month, with the rate per kW increasing [redacted] each January 1, beginning January 1, 2021.***
	Transmission: [redacted] per kW of Transmission Billing Demand each month, with the rate per kW revised each January 1 to reflect the charge from Cooperative's transmission provider.

MINIMUM MONTHLY CHARGE

The minimum monthly charge under the above rate shall be the Service Charge.

DETERMINATION OF POWER SUPPLY BILLING DEMAND

The monthly Billing Demand for Power Supply shall be the Member's average demand during the ten hours of the prior calendar year in which Flint EMC establishes its capacity responsibility under its contract with its power supplier. The Member's average demand described above shall be calculated as the sum of the Member's demands in the ten designated hours divided by ten. Flint EMC shall provide notification to the Member, using an agreed notification

REDACTED

methodology, of hours which it projects to be potential capacity responsibility hours.

DETERMINATION OF TRANSMISSION BILLING DEMAND

The monthly Billing Demand for Transmission shall be the Member's average demand during the five hours of the prior calendar year in which Flint EMC establishes its transmission responsibility under its contract with its transmission provider. The Member's average demand described above shall be calculated as the sum of the Member's demands in the five designated hours divided by five. Flint EMC shall provide notification to the Member, using an agreed notification methodology, of hours which it projects to be potential capacity responsibility hours.

WHOLESALE POWER COST ADJUSTMENT

COMMERCIAL SERVICE – ELECTRIC VEHICLE CHARGING STATION RATE

PURPOSE
To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY
Available to all commercial consumers in the service area of Flint EMC.

APPLICABLE
Applicable for commercial, industrial, governmental, and other consumers for service to separately metered, stand-alone electric vehicle charging stations.

Any consumer on this rate is not eligible for Flint EMC's Net Energy Metering Rider or Flint's Pay-Your-Way rate.

CONDITIONS OF SERVICE

A. The consumer shall pay a contribution in aid of construction for 100% of the cost of dedicated local facilities installed by the Cooperative. Local facilities include transformers, secondary and service facilities, and the meter.
B. An audit of the facilities interconnect may occur at any time to verify that only Electric Vehicle charging load is connected to this service.

TYPE OF SERVICE
Single-Phase or Three-Phase, 60 Hertz, at available secondary voltages.

MONTHLY RATE

Service Charge:

Single Phase & Three Phase	***$100.00 per Month***

Energy Charges:

kWh Usage	***19.50 Cents per kWh***

Facilities Charges:

1.38% per dollar of investment in dedicated local facilities installed by the Cooperative. Dedicated transformer cost will be estimated where service is from an existing transformer of greater required capacity of that which is used for service to other consumers.

MINIMUM MONTHLY CHARGE
The minimum monthly charge under the above rate shall be the Service Charge plus Facilities Charge as listed in the "MONTHLY RATE" Section.

TERMS OF CONTRACT
Consumers electing to be served on the Commercial Service – Electric Vehicle Charging Station rate will be required to stay on the rate for twelve (12) consecutive months.

WHOLESALE POWER COST ADJUSTMENT
The amount calculated at the above rate will be adjusted to compensate for the changes in Flint Electric Membership Corporation's cost of wholesale power under the provisions of the Wholesale Power Cost Adjustment Rider,

Schedule WPCA.

TERMS OF PAYMENT

The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement.

In the event payment is not received by 5:00 P.M. on the due date for standard postpay accounts, there will be a five-percent (5%) late payment fee added.

SCHEDULE ACSR-1

AGRICULTURAL COMMUNITY SOLAR RIDER

PURPOSE

The purpose of this rider is to establish the methods and procedures for determining payments and charges applicable to Flint EMC members who desire to reduce their carbon footprint through the purchase of solar, hydro, or biomass energy resources managed by Flint EMC.

AVAILABILITY

Available to existing non-residential loads in Flint EMC's service area, for agricultural services which include (but not limited to) irrigation, poultry houses, dairies, and other farming. In addition to an eligible account being an agricultural account, this Rider is only available to the following rate schedules and is not available to solar rates or any member eligible for Schedule NEM (Net Energy Metering Rider):

- Schedule CPP – Critical Peak Pricing – Irrigation Service & Poultry Farm Service
- Schedule FIS – Irrigation Service (Interruptible & Firm)
- Schedule FIS-ILE – Irrigation Service – Increased Line Extension Option
- Schedule FGS – General Service Demand
- Schedule FSGS – General Service Non-Demand

DEFINITIONS

The following words and terms shall have the following meanings unless the context clearly indicates otherwise:

1. Billing Period: the period between the dates on which Flint EMC normally reads the retail service meter for billing purposes
2. Member: a specific member of Flint EMC
3. REC: Renewable Energy Certificate, a type of environmental credit that is issued when one megawatt-hour (MWh) of electricity is generated and delivered to the electric grid from a renewable energy resource.
4. Flint EMC Green Resource: a specific generating facility that Flint EMC manages or has a PPA with that includes energy and associated RECs
5. Excess Net Energy: the positive difference between the energy generated by the Member's allocation of the Flint EMC Green Resource and the energy consumed by the Member during the Billing Period, including the associated RECs
6. Net Metering: measuring the difference, over the Billing Period, between energy supplied to the Member from the electric grid and the energy generated and fed into the electric grid by the Member's allocation of the Flint EMC Green Resource

CONDITIONS OF SERVICE

Both the energy and associated RECs are bundled together and sold from a Flint EMC Green Resource under this Rider. The Member can decide which specific Flint EMC Green Resource to purchase output from, if more than one option exists, and available output exists from that facility. There is no guarantee that specific Flint EMC Green Resources or resource types will be available at any given time. There is also no guarantee of energy output from a Flint EMC Green Resource and is subject to climate and weather conditions, seasonal changes, natural disasters, acts of terrorism, cyberattacks, or other events caused by force majeure. Flint EMC has the right to deny any member who has needs beyond the purpose of this Rider. Certificates showing the total RECs retired on Member's behalf can be prepared, at Member's request, at the beginning of the calendar year for the previous calendar year, unless other terms are agreed upon by Member and Flint EMC.

Member will need to provide notice of carbon goals or renewable energy requirements upfront before being approved for this Rider. Without sufficient notice, Flint EMC cannot guarantee the availability of this Rider. Any forecasted changes to a Member's electric load, beyond weather related fluctuations in energy usage, need to be shared with Flint

REDACTED

EMC. Any permanent decrease to the allocation of the Flint EMC Green Resource must be communicated with Flint EMC at least six (6) months in advance of when the desired change is requested. Member understands and agrees that any energy and associated RECs purchased through this Rider will be for use by the Member and will not be able to be sold or traded on any market.

NET METERING METHODOLOGY

Net Metering will be accomplished using single directional metering for the Member premise and single directional metering for the Flint EMC Green Resource to determine the energy allocation for each Member.

DISPOSITION OF ENERGY AND RENEWABLE ENERGY CERTIFICATES

If the energy consumed by the Member during the Billing Period exceeds the Member's energy allocation from the Flint EMC Green Resource, then all energy generated by the Member's allocation of the Flint EMC Green Resource shall be deemed to have been used by the Member. If the Member's allocation of the Flint EMC Green Resource during the Billing Period exceeds the energy consumed by the Member, then such Excess Net Energy shall be purchased by Flint EMC as provided under the Purchase Rate section of this Rider.

Any Excess Net Energy purchased by Flint EMC will include the associated bundled RECs.

ALLOCATION OF FLINT EMC GREEN RESOURCE

Member can opt for any percentage allocation of a Flint EMC Green Resource up to a maximum based on the following formula:

[*redacted*]

The determination of a Member's maximum allocation will be solely and exclusively made by Flint EMC, using data gathered by the metering equipment installed at the Member's location.

RATES AND CHARGES

Each Member shall be charged for electric service under the appropriate rate schedule(s) applicable regardless of this Rider. Member is responsible for charges under their existing rate(s) as well as charges under this Rider. Charges under this Rider applicable to any Time of Use rate shall apply solely to off-peak kWh, regardless of when the actual Flint EMC Green Resource produced energy.

Member will pay a charge for every kWh they purchase from Flint EMC under this Rider. Pricing under this Rider is subject to the market and can be updated as needed by Flint EMC; however, any committed transaction with a Member will retain the original pricing agreed upon.

[redacted]

PURCHASE RATE

The rates used to determine the dollar amount paid for Excess Net Energy by Flint EMC are below and are subject to change by Flint EMC at any time. Any committed transaction with a Member will retain the original pricing agreed upon. This Purchase Rate for Excess Net Energy will not apply to any additional on-site solar or any energy returned to Flint EMC's lines via distributed generation resources.

[redacted]

TERMS OF PAYMENT

The above charges are subject to applicable taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five-percent (5%) late payment fee added.

Late payments for bundled energy and RECs through this Rider will delay the retirement and certificate creation on behalf of the Member and could cause RECs to be forfeited.

EFFECTIVE: Bills rendered on or after April 1, 2026

REDACTED

CONFIDENTIAL TRADE SECRET
NOT FOR PUBLIC DISCLOSURE

SCHEDULE CICSR
COMMERCIAL AND INDUSTRIAL COMMUNITY SOLAR RIDER

The following tariff contains information which constitutes a "trade secret." All information that Flint EMC considers to be a trade secret has been redacted from the Public Disclosure filings that Flint EMC is making by separate filing on this date. The undersigned hereby swears and affirms that the legal and factual basis for Flint EMC's assertion that the protected information is a trade secret includes, among other things, the following:

(1) The information which has been redacted from the enclosed 'PUBLIC DISCLOSURE DOCUMENT" (hereinafter, the "trade secrets") is of great economic value to Flint EMC by virtue of its not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use. Specifically, maintaining the confidentiality of the trade secrets is of commercial value to Flint EMC because, among other reasons:

I. The information would be helpful to Flint EMC's potential and actual competitors in seeking to acquire competitive retail electric service contracts in the future.

(2) Other persons can obtain economic value from the disclosure of the trade secrets by, among other things:

I. Knowledge of the trade secrets could permit other electric suppliers to undercut Flint EMC's pricing, fee structure or service terms within this rate classification.

(3) Flint EMC uses the following procedures, among others, to maintain the secrecy of the trade secrets:

I. Flint EMC uses passwords, physical security measures, and limits the distribution of the trade secrets to only those who need the information for the benefit of Flint EMC, and who have agreed not to use or distribute the information to others.

IN WITNESS WHEREOF, the undersigned has duly executed the Affidavit this 31st day of March 2026.

[AFFIANT]

Sworn to and subscribed before me this
31 day of March, 2026.

SCHEDULE CICSR-2

COMMERCIAL AND INDUSTRIAL COMMUNITY SOLAR RIDER

PURPOSE

The purpose of this rider is to establish the methods and procedures for determining payments and charges applicable to Flint EMC members who desire to reduce their carbon footprint through the purchase of solar, hydro, or biomass energy resources managed by Flint EMC.

AVAILABILITY

Available to existing non-residential members in Flint EMC's service area where demand equals or exceeds [redacted] during any month or where eligible accounts alone or in aggregate require [redacted] or more each year under this Rider. This Rider is only available to the following rate schedules and is not available to time of use or solar rates or any member eligible for Schedule NEM (Net Energy Metering Rider):

[redacted]

DEFINITIONS

The following words and terms shall have the following meanings unless the context clearly indicates otherwise:

1. Billing Period: the period between the dates on which Flint EMC normally reads the retail service meter for billing purposes
2. Member: a specific member of Flint EMC
3. REC: Renewable Energy Certificate, a type of environmental credit that is issued when one megawatt-hour (MWh) of electricity is generated and delivered to the electric grid from a renewable energy resource.
4. Flint EMC Green Resource: a specific generating facility that Flint EMC manages or has a PPA with that includes energy and associated RECs
5. Excess Net Energy: the positive difference between the energy generated by the Member's allocation of the Flint EMC Green Resource and the energy consumed by the Member during the Billing Period, including the associated RECs
6. Net Metering: measuring the difference, over the Billing Period, between energy supplied to the Member from the electric grid and the energy generated and fed into the electric grid by the Member's allocation of the Flint EMC Green Resource

CONDITIONS OF SERVICE

Both the energy and associated RECs are bundled together and sold from a Flint EMC Green Resource under this Rider. The Member can decide which specific Flint EMC Green Resource to purchase output from, if available output exists from that facility. There is no guarantee that specific Flint EMC Green Resources or resource types will be available at any given time. There is also no guarantee of energy output from a Flint EMC Green Resource and is subject to climate and weather conditions, seasonal changes, natural disasters, acts of terrorism, cyberattacks, or other events caused by force majeure. Flint EMC has the right to deny any member who has needs beyond the purpose of this Rider. Certificates showing the total RECs retired on Member's behalf will be prepared at the beginning of the calendar year for the previous calendar year, unless other terms are agreed upon by Member and Flint EMC.

Member will need to provide notice of carbon goals or renewable energy requirements upfront before being approved for this Rider. Without sufficient notice, Flint EMC cannot guarantee the availability of this Rider. Any forecasted changes to a Member's electric load, beyond weather related fluctuations in energy usage, need to be shared with Flint EMC. Any permanent decrease to the allocation of the Flint EMC Green Resource must be communicated with Flint EMC at least six (6) months in advance of when the desired change is requested. Member understands and agrees that any energy and associated RECs purchased through this Rider will be for use by the Member and will not be able to be sold or traded on any market.

REDACTED

NET METERING METHODOLOGY

Net Metering will be accomplished using single directional metering for the Member premise and single directional metering for the Flint EMC Green Resource to determine the energy allocation for each Member.

DISPOSITION OF ENERGY AND RENEWABLE ENERGY CERTIFICATES

If the energy consumed by the Member during the Billing Period exceeds the Member's energy allocation from the Flint EMC Green Resource, then all energy generated by the Member's allocation of the Flint EMC Green Resource shall be deemed to have been used by the Member. If the Member's allocation of the Flint EMC Green Resource during the Billing Period exceeds the energy consumed by the Member, then such Excess Net Energy shall be purchased by Flint EMC as provided under the Purchase Rate section of this Rider.

Any Excess Net Energy purchased by Flint EMC will include the associated bundled RECs.

ALLOCATION OF FLINT EMC GREEN RESOURCE

Member can opt for any allocation of a Flint EMC Green Resource in kilowatts alternating current (kW_{ac}) up to a maximum based on the following formula:

[redacted]

The determination of a Member's maximum allocation will be solely and exclusively made by Flint EMC, using data gathered by the metering equipment installed at the Member's location. The final allocation may be adjusted for a Member wanting 100% of their energy needs covered under this rider.

RATES AND CHARGES

Each Member shall be charged for electric service under the appropriate rate schedule(s) applicable regardless of this Rider. Member is responsible for charges under their existing rate(s) as well as charges under this Rider.

Member will pay a charge for every kWh they purchase from Flint EMC under this Rider. Pricing under this Rider is subject to the market and can be updated as needed by Flint EMC; however, any committed transaction with a Member will retain the original pricing agreed upon.

[redacted]

PURCHASE RATE

The rates used to determine the dollar amount paid for Excess Net Energy by Flint EMC are below and are subject to change by Flint EMC at any time. Any committed transaction with a Member will retain the original pricing agreed upon. This Purchase Rate for Excess Net Energy will not apply to any additional on-site solar or any energy returned to Flint EMC's lines via distributed generation resources.

[redacted]

TERMS OF PAYMENT

The above charges are subject to applicable taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five-percent (5%) late payment fee added.

Late payments for bundled energy and RECs through this Rider will delay the retirement and certificate creation on behalf of the Member and could cause RECs to be forfeited.

EFFECTIVE: Bills rendered on or after April 1, 2026

REDACTED

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

Schedule FGPR-1

GREEN POWER RIDER
Green Power is power produced from renewable resources.

PURPOSE
To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account

AVAILABILITY
Available to all residential consumers in the service area of Flint EMC.

APPLICABLE
This schedule is applicable to and becomes an additional rider to each standard electric service rate schedule that serves members which choice to purchase green power.

TYPE OF SERVICE
Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

MONTHLY RATE

Charge **$4.00 per 150 kWh Block**

TERMS OF PAYMENT
The above charges are subject to applicable sales taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five- percent (5%) late payment fee added.

TERM OF RATE SCHEDULE
Any customer who selects this optional rate rider agrees to purchase energy under this schedule for a minimum of 12 months. After 12 months, the customer may cancel service on this rate schedule at any time.

Effective: Bills rendered on or after November 1, 2003

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

SCHEDULE LM-11

LOAD MANAGEMENT RIDER

PURPOSE
To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY
This schedule is available in conjunction with service under these Flint EMC Rate Schedules:

General Service Rates 2, 3 and 8
Large General Service 7
Large Industrial Service Rate 39
Customer Choice Rate 44

Where the member (or a third party provider) has available generation which can provide for electric service to the member business/industry or the member agrees to reduce its electric demand by at least 100 kW or 50%, whichever is greater, without the use of generation during peak load hours in the summer. The availability of credits under this Rider is contingent upon the member's load reduction resulting in a corresponding reduction in Flint's top 10 and Top 5 billing demand hours from its wholesale power supplier and transmission provider.

When using generation to reduce demand under this Rider, the member or a third-party provider must own, provide and maintain generation, communication, metering and interconnection equipment agreed upon by the member and Flint EMC needed to assist in demand reduction. Member must sign an interconnection agreement with Flint EMC stating specifics of the responsibilities of the member in regard to the interconnection between member facilities and Flint EMC's distribution system. Safe interconnections and operation are paramount and all tenets of IEEE 1547 must be met. All safety-related interconnection equipment, communication and metering are the responsibility of the member and/or third party provider.

When the member agrees to reduce demand under this Rider without the use of generation, the member must provide and maintain the communications equipment agreed upon by the member and Flint EMC needed to receive notifications of load management periods.

DEMAND REDUCTION
Credits are available under this Rider for demand reduction during the top 10 and top 5 peak hours coincident with the wholesale power supplier's system and transmission provider's system, respectively. If the member elects to use qualified generation, it must meet requirements set forth by Flint EMC. The demand reductions typically occur in the summer months of May through September from 2 pm to 8 pm, however, it is possible for demand reductions to occur at any point during the year. Typically, demand reduction will not be called upon for more than 120 hours each calendar year. Member must provide outputs from generator to drive Flint EMC's metering equipment to verify power produced by generator.

ANNUAL CREDIT
Member (or the third party generation provider) will be eligible to receive a single annual credit in November each year for every kW removed from the member's demand during the top 10 peak hours in the summer months, according to this schedule:

2024	$64.62 per kW-year
2025	$26.31 per kW-year
2026	$26.84 per kW-year

ANNUAL CREDIT

Member (or the third party generation provider) will be eligible to receive a single annual credit in November each year for every kW removed from the member's demand during the top 5 peak hours during the year, according to this schedule:

2024	$25.59 per kW-year
2025	$26.51 per kW-year
2026	$29.66 per kW-year

DETERMINATION OF DEMAND REDUCTION FOR CREDIT

The following method will be used for the determination of kW demand reduction:

The determination of the credit will be solely and exclusively made by Flint EMC each November. The level of reduction will be determined using the member's average kW of demand compared to the demand that would otherwise have occurred during the top 10 and top 5 peak hours which will be determined by the wholesale power supplier and transmission provider, respectively. Flint EMC retains the exclusive right to determine the member's load reduction by analyzing member data gathered by the metering equipment installed at the member's location. If the generation does not run or the member fails to reduce demand during one or more of the top 10 or top 5 peak hours, the credit will be prorated based on the hours of generator operation or load reduction.

NOTIFICATIONS OF LOAD MANAGEMENT PERIODS

Flint EMC will use diligent commercially reasonable efforts to predict the annual system peak hours and notify the member and/or third party provider in advance. However, Flint is not able to guarantee an accurate prediction, or that adequate notice will be provided. Notification by Flint EMC will be provided to the member (and/or the third party generation provider) by direct telephone communications, email or automated signal, as mutually agreed. The member will hold Flint EMC harmless in connection with its response to notification.

The member assumes responsibility for and shall indemnify, defend, and hold Flint EMC harmless against all liability, claims for damage costs, and expenses for injury, including personal injury, or property damage to member and its officers, employees, agents and invitees on account of the use of this rider on the member's side of the meter, delivery point, or service point.

EFFECTIVE: Bills rendered on or after April 1, 2026

FLINT ELECTRIC MEMBERSHIP CORPORATION

SCHEDULE NEM-27

NET ENERGY METERING RIDER

PURPOSE

The purpose of this rider is to establish the methods and procedures for determining credits, payments, and charges applicable to members of Flint EMC who own and operate a Distributed Generation Facility (DG Facility).

AVAILABILITY

This rider is available to any member of Flint EMC who is leasing, or owning and operating a DG Facility and who executes a Net Metering and Interconnection Agreement with Flint EMC.

DEFINITIONS

The following words and terms shall have the following meanings unless the context clearly indicates otherwise:

"**Billing Period**" means, as to a particular member, the time period between the dates on which Flint normally reads the retail service meter for billing purposes.

"**Bi-directional Meter**" is a meter capable of measuring (but not necessarily displaying) electricity flow in both directions.

"**Distributed Generation Facility**" (DG Facility) means a device or system that is leased, or owned and operated by a Member of Flint EMC and that produces or stores electricity, or has the potential to produce or store electricity, and is located on the member's premises and is operated in parallel with the utility. A non-exhaustive list of technologies include generators, fuel cells, photovoltaic systems, battery energy storage systems, wind turbines, and hydro turbines.

"**Excess Net Energy**" is the electricity generated by the Member's DG Facility and delivered to Flint EMC's distribution system during the Billing Period.

"**Net Metering Member**" means a member receiving net metering service through the use of a Bi-directional Meter, whether through Monthly Net Metering or Instantaneous Net Metering

"**Monthly Net Metering**" means measuring the difference between electricity supplied to a Net Metering Member from the electric grid and the electricity generated and fed into the electric grid by the Net Metering Member's DG Facility on a Billing Period basis

"**Instantaneous Net Metering**" means measuring electricity supplied to a Net Metering Member from the electric grid and the electricity generated and fed into the electric grid by the Net Metering Member's DG Facility on a real-time basis.

"**Monthly Net Metering Member**" means a member generator that has applied for or has connected DG Facilities prior to September 1, 2025 using Monthly Net Metering.

Public Disclosure Document

"**Instantaneous Net Metering Member**" means a member generator that has applied for or has connected DG Facilities on or after September 1, 2025 using Instantaneous Net Metering, or a member that completes a Net Metering and Interconnection Agreement for a previously disconnected DG Facility on or after September 1, 2025

CONDITIONS OF SERVICE

There must be a Net Metering and Interconnection Agreement with the member and the member must have met all of the conditions of interconnection contained in the Distributed Generation & Interconnection policy

DISPOSITION OF ENERGY

For all Monthly Net Metering Members, if the electricity consumed during the Billing Period exceeds the electricity generated by the member's DG Facility during the Billing Period, then the member will be billed for the difference under their applicable rate schedule. If, during the Billing Period, the electricity generated by the Monthly Net Metering Member's DG Facility exceeds the electricity consumed, then the difference will be considered Excess Net Energy and shall be purchased by Flint EMC at rates as provided under the Purchase Rate section of this Rider.

For all Instantaneous Net Metering Members, any electricity generated by the Net Metering Member and delivered to the Cooperative's distribution system will be treated as Excess Net Energy and shall be purchased or credited by the Cooperative at rates as provided under the Purchase Rate section of this schedule.

RATES AND CHARGES FOR NET METERING SERVICE

Each Net Metering Member shall be charged for electric service under that rate schedule which would otherwise be applicable if the customer was not a Net Metering Member. If applicable, there may also be facilities charges reflected in the Member's Net Metering and Interconnection Agreement.

PURCHASE RATE

The rates paid by Flint EMC for Excess Net Energy shall be based upon the EMC's avoided cost of energy. The avoided cost of energy shall be applied as follows:

All Months	3.983 Cents per kWh

The rates as quoted herein may be adjusted at any time by Flint EMC.

TERM OF SERVICE

The term of service under this rider shall be the same as that under the appropriate Net Metering and Interconnection Agreement.

Any Monthly Net Metering Member that disconnects from Flint EMC's system for any reason shall forfeit any grandfathered provisions of this schedule and any new member, including the original member, that connects the existing DG Facility back to Flint EMC's system shall then be defined as an Instantaneous Net Metering Member. All Monthly Net Metering Members as of July 1, 2040 will be converted to Instantaneous Net Metering Members.

Effective: Bills rendered on or after April 1, 2026

Public Disclosure Document

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

SCHEDULE REC-2

RENEWABLE ENERGY CERTIFICATE RIDER

PURPOSE
The purpose of this rider is to establish the methods and procedures for determining payments and charges applicable to Flint EMC members who desire to reduce their carbon footprint through the retirement of renewable energy certificates (RECs).

AVAILABILITY
Available to all members in Flint EMC's service area.

The availability of RECs for purchase under this Rider will be subject to the total amount of RECs available to Flint EMC based upon existing power supply contracts Flint EMC has with REC-producing generation sources as well as RECs committed to other members under this Rider or other rate schedules. Flint EMC makes no guarantee that RECs will be made available to new or existing participants, with the exception of those reserved under a Long-Term Reservation.

CONDITIONS OF SERVICE
Member can opt for any percentage of energy usage, up to 100%, to be covered under this Rider. RECs may come from solar, wind, biomass, or other sources. There is no guarantee that RECs retired on behalf of a Member will come from any particular source.

Certificates showing the total RECs retired on Member's behalf will be prepared at the beginning of the calendar year for the previous calendar year, unless other terms are agreed upon by Member and Flint EMC.

Member will need to provide notice of carbon goals or renewable energy requirements for each year by December 31st of the previous year. Without sufficient notice, Flint EMC cannot guarantee availability of this Rider.

Any forecasted changes, upgrades, or growth to a Member's electric load, beyond weather related fluctuations in energy usage, needs to be shared with Flint EMC for Members using this Rider. Any desired changes to the percentage of energy usage covered under this Rider must be communicated with Flint EMC at least three (3) months in advance of when the desired change is requested.

Member understands and agrees that any energy offset with RECs through this Rider will be retired on behalf of the Member by Flint EMC and/or Green Power EMC and will not be able to be sold or traded on any market.

ANNUAL ADDER
Member will pay an additional charge for every kWh they purchase from Flint EMC that they want to be covered under this Rider. This adder shall apply for all RECs during the calendar year and is subject to change annually based on market pricing.

Under 25,000 kWh/month	Over 25,000 kWh/month
$0.01 per kWh	$0.0075 per kWh

LONG-TERM RESERVATIONS
For any non-residential Member that wants to make plans for future years, a Long-term Reservation can be used so that Flint EMC will hold the appropriate RECs on behalf of the Member. The price paid for the entire length of the reservation is based on the Annual Adder of the year the Long-term Reservation is made and also includes an inflation percentage adder. Any Long-term Reservation can be ended early with a three (3) month notice to Flint EMC.

2 years	Annual Adder + 2.5%
3 years	Annual Adder + 5%
5 years	Annual Adder + 10.5%

SPECIAL EVENT PURCHASE

One-time purchases of RECs for a special event or occasion can be made using the Annual Adder price above in addition to a $40 service fee.

TERMS OF PAYMENT

The above charges are subject to applicable taxes and are due on or before the due date printed on each billing statement. In the event payment is not received by 5:00 P.M. on the due date, there will be a five-percent (5%) late payment fee added.

Payment for RECs can be made on each monthly bill based on the kWh purchased during that billing period. A single payment at the end of the calendar year can also be made as well. Late payments for RECs will delay the retirement and certificate creation on behalf of the Member and could cause RECs to be forfeited.

EFFECTIVE: Bills rendered on or after April 1, 2026

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

Schedule RESLM-1

RESIDENTIAL LOAD MANAGEMENT RIDER

PURPOSE
To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account

AVAILABILITY
Available to all residential consumers in the service area of Flint EMC.

APPLICABLE
This schedule is applicable to and becomes an additional rider to each standard electric service rate schedule that serves members which participate in Flint EMC's Smart Select load management program.

TYPE OF SERVICE
Single-Phase or Three-Phase, 60 Hertz, at available secondary voltage.

ANNUAL CREDIT
Members that enroll in Flint's Smart Select program will receive a one-time $36 credit after Flint EMC installs a load control switch on the member's central air conditioning unit(s), water heaters, and/or pool pumps.

All active members participating in Flint EMC's Smart Select program who have switches on their qualifying devices may receive a credit after successful operation of load management during the months of May, June, July, August, September, and October. Flint EMC will typically operate load management during those months previously listed Monday through Sunday beginning at 2 PM Eastern Standard Time and ending at 8 PM Eastern Standard Time. The amount of the annual credit is $25 per participating member.

The load management switch must have been in place during the full usage period for which the load management credit is given. Flint EMC will remove the participating member from the Smart Select load management program if Flint EMC can no longer communicate with the member's load control switch(s) or has verified the load control switch is no longer connected to the qualifying device(s). Upon removal from the Smart Select load management program member will no longer receive the annual credit. Credit will be given only to those members whose accounts are active at the time the bill is rendered.

Effective: Bills rendered on or after April 1, 2022

FLINT ELECTRIC MEMBERSHIP CORPORATION
Reynolds, Georgia

SCHEDULE WPCA

WHOLESALE POWER COST ADJUSTMENT RIDER

PURPOSE

To provide revenue for patron's electric service and capital from the patrons. In compliance with cooperative principles and the Corporation's bylaws, revenue received which is in excess of operating cost and expenses, is patronage capital. All monies in excess of the cost of providing electric service are capital, at the moment of receipt, and will be credited to each patron's individual capital account.

AVAILABILITY

This schedule is applicable to and becomes a part of each electric service rate schedule of Flint EMC in which reference is made to "Schedule WPCA" or "Fuel Cost Adjustment".

The Wholesale Power Cost Adjustment calculation is to be made on a monthly basis and adjustments made at the discretion of Flint's Board of Directors.

Except as approved by the Board of Directors to deal with extraordinary future expenses related to power costs, to accommodate an over-recovery of power cost that extends beyond the period contemplated by this formula, and for other purposes, each metered kWh of energy sold by Flint EMC under an applicable rate schedule shall be increased (or decreased) by the amount computed as follows:

Formula: $WPCA = ((PC_A + \sum PC_P - \sum WPCA\$_A) \div \sum kWh_P) - \$0.08924;$

Where:

	WPCA	=	Wholesale Power Cost Adjustment (in $ per kWh);
	PC_A	=	Actual wholesale power cost for the current month;
	$\sum PC_P$	=	Sum of projected wholesale power costs for the next eleven months;
	$\sum WPCA\$_A$	=	Sum of actual WPCA revenues collected for the current month and the previous eleven months;
	$\sum kWh_P$	=	Sum of actual kWh sales for the current month and projected kWh sales for the next eleven months; and,
	$0.08528	=	Wholesale power cost included in calculation of base rates

EFFECTIVE: Bills effective April 1, 2026
