During this inspection Staff reviewed the AGLC new construction project specifications for the project. The purpose of this project was for pressure improvement for the Dahlonega, GA area. Southern Co. Gas had to use their portable LNG trailer during extreme cold temperatures in the past. Staff reviewed the materials being used, coating and jeeping procedures for the pipe, welding procedures, and qualification records along with a qualification field inspection on personnel performing all covered tasks.

The Pipeline construction consisted of 90,587 feet of 16-inch steel transmission pipe starting at the station at Hwy 53 Dawsonville, GA going cross country on AGL Right of Way ending on Old Dahlonega Hwy. in Murrayville, GA. Construction was installed by directional boring and some open ditch. Staff reviewed the welding procedures and verified the credentials and qualifications of the welders on the project.

As a result of this inspection Staff noted no probable violations of the minimum federal safety standards.
