Agreed-Upon Procedures Applied to the Universal Access Fund Application for the period ending 6/30/2025

May 25, 2026

P.O. Box 615 | Liberty, MO 64069 p 816.309.2682 f 816.429.6789 info@hurlbertcpa.com www.hurlbertcpa.com

Independent Accountant's Report on Applying Agreed-Upon Procedures

BLUE RIDGE TELEPHONE COMPANY

To the Georgia Public Service Commission:

We have performed the procedures enumerated below on the application for funding from the Georgia Universal Access Fund provided to us by management of Blue Ridge Telephone Company (or the "Company"). The responsible party Blue Ridge Telephone Company is responsible for the application.

The engaging party, Georgia Public Service Commission ("GPSC") has agreed to and acknowledged that the procedures performed are appropriate to meet the intended purpose of assessing the application's reasonableness prior to funds being distributed to Blue Ridge Telephone Company as of June 30, 2025. This report may not be suitable for any other purpose. The procedures performed may not address all the items of interest to a user of this report and may not meet the needs of all users of this report and, as such, users are responsible for determining whether the procedures performed are appropriate for their purposes.

The procedures are listed below with associated findings listed on the following pages.

AUP	Agreed-Upon Procedure
1	Obtain UAF company pre-filed information and schedules filed with the GPSC
2	Issue specific Contractor data requests to the UAF Companies and schedule field work
3	Audit the Company's UAF model (printed version as well as spreadsheet testing)
4	Trace amounts on the Applicant's Form M back to Company prepared schedules matching their General Ledger
5	Trace Form M data to the UAF Model column entitled Balance Per Books
6	Trace amounts in the "subject to separations" adjustment column of the UAF Model to Net Operating Income (NOI) and Rate of Return (ROR) on rate base calculations
7	Trace amounts in the "non-regulated" adjustment column of UAF Model to supporting journal entries of cost study. Selected supporting work papers are reviewed for reasonableness, accuracy, and conformance.
8	Test the FCC Part 36 study and review allocation/traffic factors
9	Test and recalculate the Revenue Requirement Section on the UAF Model
10	Review each invoice over $250 and select those invoices that appear unreasonable
11	Review corporate allocations and the Company's Cost Allocation Manual

12 Verify fixed asset amounts in the Company's Continuing Property Record and identify those assets that are inappropriately included in rate base in the UAF application. If applicant is a recipient of Federal or state Broadband Grants, determine whether the grants were to be used as revenue, expense offsets, or for capital acquisitions. To the extent such grants are/were used for capital acquisition, review books to ensure that such purchased assets are excluded from the rate base for UAF purposes

13 Verify the amounts of Federal universal service fund support reported in the UAF Application. Review UAF Applicant work

14 Verify that any long-term debt interest costs treated as AFUDC (Allowance for Funds Used During Construction) were treated either as current year income or as a reduction to interest rates

15 Verify that any Patronage Dividends credited (not necessarily received in cash) from long term lenders are treated as a reduction to the cost of debt

16 Review the outside auditor's report on the financial statements and report any adverse findings or qualified opinions

17 Review and test the requested amount for Executive Compensation and Corporate Operations Expense and compared the amount shown in the UAF application to the GPSC caps

18 Review depreciation rates used for the UAF application and compare to the rates adopted by the GPSC

19 Review cost allocation manual, verify that it is being used, test a sample of allocations and report when the manual was last updated

20 Incorporate revised factors or methods adopted by GPSC, such as cost of equity, into the UAF model

21 Prepare exhibits of financial results and support mechanisms. Analyze as to why increases/decreases occurred

22 Identify Construction Work in Progress and Retirement amounts for the test year

23 Identify the Company's affiliates and non-regulated services

24 Identify the total costs charged to the regulated company by the affiliate or parent company. Quantified costs by FCC USOA Account and determined the per access line amount over the past 3 years. If the costs appear unreasonable, propose adjustments or informed GPSC staff and recommend an affiliated transactions engagement be performed

25 For ACAM UAF companies only, obtain the Company spreadsheet depicting calculated amounts, review Company prepared adjustments, trace adjustments in the UAF application model to the spreadsheet and identify impact of the adjustment

26 Test and review the Approved Cost of Equity and Cost of Capital Rates of Tier II local exchange carriers for the purpose of evaluating applications for reimbursement from the UAF. The rate of return on rate base will be limited to the lesser of 8.0% or the level computed based on a 9.25% return on equity, using the applicant's actual cost of debt and the applicant's actual debt/equity structure. Verify that the above calculation was used in the respective UAF Model

27 Finalize work papers and prepare final report

28 Prepare testimony if requested.

We were engaged by the GPSC to perform this agreed-upon procedures engagement and conducted our engagement in accordance with attestation standards established by the American Institute of Certified Public Accountants. We were not engaged to and did not conduct and examination or review engagement, the objective of which would be the expression of an opinion or conclusion, respectively, on the application. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported to you.

We are required to be independent of Blue Ridge Telephone Company and to meet our other ethical responsibilities, in accordance with relevant ethical requirements related to our agreed-upon procedures engagement. This report is intended solely for the information and use of the Georgia Public Service Commission and Blue Ridge Telephone Company and is not intended to be, and should not be, used by anyone other than these specified parties.

Current Request for UAF Disbursements – Summary of Findings

Blue Ridge Telephone Company's final revenue deficiency is $3,780,162. We propose no adjustments.

Table 1
Blue Ridge Telephone Company

Georgia UAF Summary	Amounts
Original Company Requested Amount from Georgia Universal Access Fund	$3,780,162
Total Adjustments	$0
Final Amount Recommended by Staff	$3,780,162

As presented in Table 1, we propose Blue Ridge Telephone Company receive a UAF disbursement of $3,780,162 based upon the test year for the twelve months ending June 30, 2025.

Profile of Blue Ridge Telephone Company

Blue Ridge Telephone Company is a subsidiary of TDS Telecommunications LLC ("TDS Telecom") in Madison, WI. Blue Ridge had 7,424 access lines as of 12/31/2024 in the area of Blue Ridge, GA.

Agreed-Upon Procedures

Procedure 1: Obtained UAF company pre-filed information and schedules filed with the GPSC.

Conclusion – We reviewed pre-filed files downloaded from the GPSC web site. There were no discrepancies noted.

Procedure 2: Issued specific Contractor data requests to the UAF Companies and scheduled field work.

Conclusion – Data requests were sent to the Company and the Company responded to all data requests.

Procedure 3: Audited the Company's UAF model (printed version as well as spreadsheet testing).

Conclusion – There were no discrepancies noted.

Procedure 4: Traced amounts on the Applicant's Form M back to Company prepared schedules matching their General Ledger.

Conclusion – There were no discrepancies noted.

Procedure 5: Traced Form M data to the UAF Model column entitled Balance Per Books

Conclusion – There were no discrepancies noted.

Procedure 6: Traced amounts in the "subject to separations" adjustment column of the UAF Model to Net Operating Income (NOI) and Rate of Return (ROR) on rate base calculations.

Conclusion – There were no discrepancies noted.

Procedure 7: Traced amounts in the "non-regulated" adjustment column of UAF Model to supporting journal entries of cost study. Selected supporting work papers are reviewed for reasonableness, accuracy, and conformance.

Conclusion – There were no discrepancies noted.

Procedure 8 Tested the FCC Part 36 study and review allocation/traffic factors.

Conclusion – The factors appeared reasonable.

Procedure 9: Tested and recalculate the Revenue Requirement Section on the UAF Model.

Conclusion – There were no discrepancies noted.

Procedure 10: Reviewed each invoice over $250 and select those invoices that appear unreasonable.

Conclusion – Of the selected corporate account invoices, we found no invoices that were unreasonable.

Procedure 11: Reviewed corporate allocations and the Company's Cost Allocation Manual

Conclusion – The Company did employ a current cost allocation manual and the allocations tested were accurate.

Blue Ridge Telephone Company records revenues, expenses, assets and liabilities that are solely regulated or non-regulated directly to separate sub-accounts. For joint and common expenses, direct analysis or indirect analysis cost allocation methodologies, based upon the functional activities being performed and type of cost incurred, are routinely performed. The results are incorporated into either the Company's labor distribution process or monthly cost allocation accrual entries, resulting in direct posting to separate regulated and non-regulated sub-accounts during the monthly General Ledger process. This minimizes manual processes and the need for additional end of year or special regulatory reporting separation of regulated and non-regulated costs. For joint and common investments, annual Part 64 studies are performed to update the allocations between regulated and non-regulated operations. In sum, allocations of plant assets, accumulated depreciation reserves, deferred income taxes, depreciation expense, and related operating expenses are provided for. These direct and indirect non-regulated assignments, allocations, and adjustments from this comprehensive Part 64 Cost Allocation process are utilized by the Company in developing the proper Interstate Cost Study, Interstate USF filing and UAF model balances.

Procedure 12 Verified fixed asset amounts in the Company's Continuing Property Record and identify those assets that are inappropriately included in rate base in the UAF application. If applicant is a recipient of Federal or state Broadband Grants, determined whether the grants were to be used as revenue, expense offsets, or for capital acquisitions. To the extent such grants are/were used for capital acquisition, review books to ensure that such purchased assets are excluded from the rate base for UAF purposes.

Conclusion – There were no discrepancies noted. There were no Broadband Grants.

Procedure 13 Verified the amounts of Federal universal service fund support reported in the UAF Application. Review UAF Applicant work.

Conclusion – There were no discrepancies noted.

Procedure 14: Verified that any long-term debt interest costs treated as AFUDC (Allowance for Funds Used During Construction) were treated either as current year income or as a reduction to interest rates.

Conclusion – Not applicable.

Procedure 15: Verified that any Patronage Dividends credited (not necessarily received in cash) from long term lenders are treated as a reduction to the cost of debt.

Conclusion – Not applicable.

Procedure 16: Reviewed the outside auditor's report on the financial statements and report any adverse findings or qualified opinions.

Conclusion – The Company's outside auditor's 2025 report provided an unqualified opinion.

Procedure 17: Reviewed and test the requested amount for Executive Compensation and Corporate Operations Expense and compared the amount shown in the UAF application to the GPSC caps.

Conclusion – The Company was not above the GPSC Executive Compensation Expense Cap or the Corporate Operations Cap.

Procedure 18: Reviewed depreciation rates used for the UAF application and compared to the rates adopted by the GPSC.

Conclusion – The Company's depreciation rates matched or were less than the rates prescribed by the GPSC.

Regulated Depreciation Expense was $1,918,225 in the UAF application. Per the UAF model, Total Plant in Service was $67,444,740. Composite depreciation rate equals depreciation per year divided by total historical cost. The composite rate is shown below.

Depreciation Expense	$1,918,225
Total Plant in Service	$67,444,740
Composite Rate	2.84%

Procedure 19: Reviewed cost allocation manual, verify that it is being used, test a sample of allocations and report when the manual was last updated.

Conclusion – The Company did employ a current cost allocation manual and the allocations tested were accurate.

Procedure 20: Incorporated revised factors or methods adopted by GPSC, such as cost of equity, into the UAF model.

Conclusion - The current cost of equity approved by the GPSC is 9.25%. Using the Company's actual debt/equity ratio and actual cost of debt, the Company's weighted average cost of capital ("WACC") is 9.25%. Because the Company's WACC did exceed the GPSC's 8% cap, the allowed return on rate base was the 8%.

Procedure 21: Prepared exhibits of financial results and support mechanisms. Analyzed as to why increases/decreases occurred.

Conclusion – Significant additions to plant occurred while revenues and expenses increased for the year.

Financial Results: 2022 – 2025

Description	2022	2023	2024	2025
Net telecom plant	$7,099,394	$7,610,528	$11,256,006	$11,790,237
Operating Revenues	13,407,681	13,709,840	15,008,244	15,446,250
Operating Expenses	10,986,943	11,899,397	12,005,527	12,167,098
Net operating margins	2,420,738	1,820,443	3,002,717	3,279,152
Total access lines	8,739	8,547,	8,116	7,424

Receipt of Federal Universal Service Support 2022 – 2025

Description	2022	2023	2024	2025
High-Cost Loop Support ("HCLS")	$0	$0	$0	$0
Interstate Common Line Support	0	0	0	0
Local Switching Support ("LSS")	0	0	0	0
Safety Net Additive Support	0	0	0	0
Safety Valve Support ("SVS")	0	0	0	0
Lifeline & Link-up programs	2,957	2,993	2,471	2,522
ACAM	982,471	875,466	768,462	581,453
Total	$985,428	$878,459	$770,933	$583,975

Procedure 22: Identified Construction Work in Progress and Retirement amounts for the test year.

Conclusion – The Company had Construction Work in Progress and Plant Retirements at 6/30/2025 of $3,110,505 and $2,181,653, per form M, respectively.

Procedure 23 Identified the Company's affiliates and non-regulated services.

Conclusion – Affiliated and non-regulated services were reviewed and found reasonable.

Products and/or services offered by affiliates include:
Capital Leasing Services
Corporate Operations Management (includes Executive Management, Accounting/Finance, Regulatory Affairs, Human Resource Administration, Information Systems, and Legal)
Customer Operations Management (includes Sales, Marketing, Retail and Wholesale Billing, and Customer Service)
Hosted & Managed Services
Intercompany Field Service Technician Labor
Intercompany Customer Operations Labor
Plant Operations Management (includes Network Admin, Testing, and Engineering)
Risk Management Services
Wholesale Access/Transport Services

Products and/or services offered to affiliates include: Intercompany Field Service Technician Labor, Wholesale Access/Transport Services and Wholesale Billing and Collection Services

TDS's centralized service company, TDS Telecom Service LLC ("TTS"), is the primary originator of intercompany billing ("ICB") transactions amongst TDS's LEC operations. TTS has a centralized employee base which performs daily operational activities on behalf of its LEC affiliates; such as network operations support, customer service, and sales and marketing, as well as accounting, executive, external relations, human resources, and information technology functions. The costs associated with the performance of these operational activities are captured within TDS's accounting system via an array of cost centers established for the various functional groups and sub-groups involved. The nature of the operational activities, the affiliates receiving the benefits of the operational activities, and either direct or indirect relative measures of benefits received by the respective affiliates are identified for the established cost centers. On a monthly basis the sum of the individual cost centers' costs; e.g. labor, benefits, and other expenses; are allocated to the benefitting affiliates via TDS's ICB accounting process.

Procedure 24 Identified the total costs charged to the regulated company by the affiliate or parent company.

Finding - Total costs charged to Blue Ridge by the:

Affiliate	14,533,199.03
CATV	59,794.61
Parent	2,060,977.88
	16,653,971.52

The costs do not appear unreasonable and therefore, no affiliate audit is recommended.

Cost per Access Line

Quantified costs by FCC USOA Account and determined the per access line amount over the past 3 years. If the costs appear unreasonable, propose adjustments or informed GPSC staff and recommend an affiliated transactions engagement be performed.

Blue Ridge had the overall lowest average cost per access line among all UAF companies.

Because of the size of the Company and management's operational effectiveness, costs were reasonable as compared to other Georgia companies.

Procedure 25 For ACAM UAF companies only, obtain the Company spreadsheet depicting calculated amounts, Reviewed Company prepared adjustments, trace adjustments in the UAF application model to the spreadsheet and identify impact of the adjustment.

Conclusion – Blue Ridge received ACAM revenues in the amount of $581,453. There were no discrepancies noted.

Procedure 26 Tested and Reviewed the Approved Cost of Equity and Cost of Capital Rates of Tier II local exchange carriers for the purpose of evaluating applications for reimbursement from the UAF. The rate of return on rate base will be limited to the lesser of 8.0% or the level computed based on a 9.25% return on equity, using the applicant's actual cost of debt and the applicant's actual debt/equity structure. Verify that the above calculation was used in the respective UAF Model.

Conclusion – There were no discrepancies noted.

Procedure 27 Finalized work papers and prepare final report.

Procedure 28 Prepared testimony if requested.
