Re: Southern Company Services, Inc.
2024 Informational Filing – Intercompany Interchange Contract
Docket No. ER10-171-000

Dear Secretary Bose:

Southern Company Services, Inc. ("SCS"), acting on its own behalf and as agent for Alabama Power Company, Georgia Power Company, Mississippi Power Company, and Southern Power Company, hereby submits, for informational purposes only,[1] the annual informational filing required under the Southern Company System Intercompany Interchange Contract ("IIC").[2]

On May 9, 2022, SCS filed the current version of the IIC ("Amended and Restated IIC") in Docket No. ER22-1820-000.[3] The Amended and Restated IIC was accepted for filing by the Commission in a letter order dated July 11, 2022, with the effective date of July 13, 2022 supplied in a subsequent filing.[4] SCS is submitting a complete copy of the informational filing in PDF format and is

[1] As required by the Commission's letter order accepting Southern's earlier informational filing, SCS is submitting this filing for "informational purposes only" and "[u]pon receipt, the Commission will not act on or notice the informational filing[ ] because the formula rate implementation protocols provide specific procedures for notice, review, and challenges to the annual updates." *See S. Co. Servs., Inc.*, Docket Nos. ER10-133-000 and ER10-171-000 (July 1, 2010) (delegated letter order).

[2] Designated in the Commission's eTariff Viewer as Alabama Power Company, Cost Based Rate Tariffs, Rate Schedule No. 138, Southern Company System Intercompany Interchange Contract.

[3] Filing of Amended and Restated Southern Company System Intercompany Interchange Contract, Docket No. ER22-1820-000 (May 9, 2022).

[4] *See Ala. Power Co.*, Docket No. ER22-1820-000 (July 11, 2022) (delegated letter order) (accepting the Amended and Restated IIC for filing with a placeholder effective date of December 31, 9998); Notice of Effective Date for Amended and Restated Southern Company System Intercompany Interchange Contract, Docket No. ER22-1820-000 (July 29, 2022)

also providing certain informational schedules and associated work papers in native format, as required by Order No. 703.[5]

As contemplated in Section 5.2 of the IIC Manual, the monthly capacity worth factors used to derive the monthly capacity charges for reserve sharing purposes have been updated based upon an evaluation of system reliability. *See* Informational Schedule 3, p. 2. This letter constitutes the informational notice under IIC Section 4.5 of the Operating Committee's exercise of its discretion in that regard.[6]

Copies of these enclosures have been sent to representatives of parties to the IIC. If you have any questions concerning this informational filing, please contact the undersigned.

Sincerely,

/s/ Abigail C. Fox
Abigail C. Fox
Attorney for Southern Company Services, Inc.

afox@balch.com

(updating the effective date of the Amended and Restated IIC to July 13, 2022). *See also* Compliance Filing of the Amended and Restated Southern Company System Intercompany Interchange Contract, Docket No. ER22-1820-001 (July 29, 2022) (providing an executed version of the Amended and Restated IIC with the July 13, 2022 effective date); *Ala. Power Co.*, Docket No. ER22-1820-001 (Oct. 3, 2022) (delegated letter order) (accepting the compliance filing for filing).

[5] *Filing Via the Internet*, Order No. 703, FERC Stats. & Regs. ¶ 31,259 (2007).

[6] The capacity worth factors were last updated three years ago, with the requisite notice under Section 4.5 provided as part of the IIC Informational Filing for 2021 that was submitted on November 2, 2020.

Informational Schedule 1

2024

THE SOUTHERN COMPANY SYSTEM
INTERCOMPANY INTERCHANGE CONTRACT

January 1, 2024 to December 31, 2024
Determination of Peak Period Load Ratios
Reference: Manual, Article I

	Actual Peak Period Energy (1)				2024 Peak Period Load Ratios (2) Total	2024 Peak Period Load Ratios (2) Excluding Southern Power
	June 2023 (MWH)	July 2023 (MWH)	August 2023 (MWH)	June-August 2023 (MWH)		
Alabama	**3,046,811**	**3,051,286**	**3,581,301**	**9,679,398**	**34.2084**	**40.7129**
Georgia	**3,736,777**	**3,947,180**	**4,461,289**	**12,145,246**	**42.9230**	**51.0847**
Mississippi	**628,490**	**592,773**	**728,843**	**1,950,106**	**6.8920**	**8.2024**
Southern Power	**1,325,800**	**1,523,166**	**1,671,685**	**4,520,651**	**15.9766**	
System - Total	**8,737,878**	**9,114,406**	**10,443,118**	**28,295,401**	**100.0000**	
System (Excluding Southern Power)	**7,412,078**	**7,591,240**	**8,771,433**	**23,774,750**		**100.0000**

Notes: (1) Peak period energy = energy supplied during the peak period of 7:00 AM through 9:00 PM Monday through Friday for the months of June, July, and August, 2023.

(2) Peak period load ratios = company peak period energy divided by the system peak period energy (expressed in percent).

Informational Schedule 3

2024

Southern Company

Determination of Annual Capacity Rate

January 1, 2024 - December 31, 2024

Reference: Manual, Article V

Rate Basis:	Alabama Purchased Resource	Georgia Purchased Resource	Mississippi Purchased Resource	Southern Power Purchased Resource
1. Net Production Capacity (kW)	17,104	21,462	3,446	7,988
2. Gross Investment in Peaking Facilities (I)				
3. Levelized Fixed Capacity Charge (LFCC)				
4. Annual Charge ($ per kW year)	$ 73.200000 (a)	$ 73.200000 (b)	$ 73.200000 (d)	$ 73.200000 (e)

Notes:
(a) Cost of Peaking Resources Purchased by Alabama Power Company
(b) Cost of Peaking Resources Purchased by Georgia Power Company
(d) Cost of Peaking Resources Purchased by Mississippi Power Company
(e) Cost of Peaking Resources Purchased by Southern Power Company

MONTHLY CAPACITY CHARGES

Definitions of Capacities Used in Exhibit I

Resource Type	Installed Capacity	Full Load Capacity	Peak Load Capacity
Coal	The turbine nameplate capacity of the unit	The normal full load capability as described in Section 4.2.2 of the Manual and certified by the Senior Production Officer	Incremental peaking capability as described in Section 4.2.6 of the Manual and certified by the Senior Production Officer
Nuclear	The turbine nameplate capacity of the unit	The normal full load capability as described in Section 4.2.2 of the Manual and certified by the Senior Production Officer	Typically zero for nuclear units
Oil/Gas	The turbine nameplate capacity of the unit	The normal full load capability as described in Section 4.2.3 of the Manual and certified by the Senior Production Officer	Incremental peaking capability as described in Section 4.2.6 of the Manual and certified by the Senior Production Officer
Combined Cycle	The sum of the individual combustion turbine and steam turbine nameplate capacities for the unit. Where nameplate ratings are not available, design heat balance values at ISO conditions are used.	The seasonally-adjusted normal full load capability in base-mode operation as described in Section 4.2.4 of the Manual and certified by the Senior Production Officer	Incremental peaking capability available through extended operating modes such as full pressure or power augmentation as certified by the Senior Production Officer
Combustion Turbine	The turbine nameplate capacity of the unit	The seasonally-adjusted normal full load capability as described in Section 4.2.5 of the Manual and certified by the Senior Production Officer	Typically zero for combustion turbines
Hydro	The total turbine nameplate capacity of the facility	The best gate or full gate capacity of the facility as defined in Section 4.2.7 the Manual and certified by the Senior Production Officer	Typically zero for hydro facilities
Pumped Storage	The total turbine nameplate capacity of owned facilities. N/A for facilities that are not operated by Southern Companies where nameplate data is unavailable	The best gate or full gate capacity of the facility as defined in Section 4.2.7 the Manual and certified by the Senior Production Officer	Typically zero for hydro facilities
CC Purchase	The seasonally-adjusted normal full load capability in base-mode operation as described in Section 4.2.4 of the Manual as provided by the seller and certified by the Senior Production Officer	The seasonally-adjusted normal full load capability in base-mode operation as described in Section 4.2.4 of the Manual as provided by the seller and certified by the Senior Production Officer	Incremental peaking capability available through extended operating modes such as full pressure or power augmentation as provided by the seller and certified by the Senior Production Officer
Peak Purchase	The seasonally-adjusted normal full load capability of the unit as provided by the seller consistent with Section 4.2.5 of the Manual and certified by the Senior Production Officer	The seasonally-adjusted normal full load capability of the unit as provided by the seller consistent with Section 4.2.5 of the Manual and certified by the Senior Production Officer	Typically zero for peaking resources
DSO	The total capacity available through interruptible programs, standby generation, or other demand side options	The equivalent capacity available through demand side options as calculated in accordance with Section 4.2.8 of the Manual and certified by the Senior Production Officer	Typically zero for demand side options
Reserved Purchase	The contracted capacity available through a purchase as described in Section 4.2.9 of the Manual.	The contracted capacity available through a purchase as described in Section 4.2.9 of the Manual.	Typically zero for reserved purchases
Reserved Sale	N/A	Zero. The contracted capacity sold to others as described in Section 4.2.9 of the Manual is shown as Sold Capacity in Exhibit I.	Typically zero for reserved sales
Reserved - Other	The nameplate capacity for owned variable energy resources (e.g., wind and solar).	The equivalent capacity, if applicable, for variable energy resources (e.g., wind and solar).	Zero for variable energy resources
