CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

All,

Please see the attached edit sales agreement I received last evening from Serverfarm. You will that they have reduced the term of the agreement from 27 months to 19 months and increased the hourly and daily volumes request. I have reviewed and have added comments.

Would you review and let me know your thoughts. If you have any questions, let me know.

Thanks,

Gas Authority

Subject: RE: Covington M2 Zoned Development

Thanks Frank
As I promised, I had my guys go to the drawing board and look at ways they could restrict/modify the project to make it more palatable to the city and its residents.

Here are their thoughts:

Below are restrictions that we recommend the City implement that make this a very community friendly data center development preventing all the unwanted elements of a data center while keeping all the benefits.

- Restrict the MWs to below 65 MWs. This is less of a requirement than some of the nearby manufacturing plants and production plants.
- Limited to a single building only (not a multi building park like the Amazon data center development).
- Closed loop cooling water system required, resulting in WUE of 0 gallons/daily (compared to Amazon's open loop 1m gallons/daily).
- No gas turbines as primary source of power or behind the grid solutions (compared to nearby ServerFarm facility which will have 2 years of gas turbines generating power). This is the cause of noise and pollution. If you are connected to the grid, you are actually as quiet if not quieter than any commercial development.
- Equipment yard oriented away from adjacent residential. Only auto parking will be located along the rear of building adjacent to the residential area.
- Additional landscaping features exceeding code on the side of the building facing residential.
- There must not be any tax abatement incentive package or Pilot Program

It's worth mentioning, there are 14 (older and less efficient) single building existing data centers in the Alpharetta – including the data center group committed to 647 Moore St. 5 of which are adjacent to residential. There has not been one complaint filed about these data centers over the past 30 years and the adjacent homes values do not show any discount to properties in the same neighborhood but not proximate to data centers. There is already plenty of case studies for this proposed data center project coexisting without issues in affluent communities.

Again, this site is zoned M2 and this is the best outcome for this parcel, especially if you implement all of these above restrictions. Most of the M2 zoning ordinance allows for uses that will disrupt the neighbors to the east (who are mostly renters in Unincorporated Newton County) and potentially impact their home value – including transload facilities and heavy distribution centers. We have had historical interest from transload facility users (we have worked with three transload companies in the state of Georgia in the last 24 months), but chose not to pursue that path, in addition to the 3PL users we were designing for, because of the data center pursuit. While we think there is a strong case for vested rights, we are hopeful with these imposed restrictions, everyone can come out with a win on this project.

Please let me know how else I can help the City leadership see that agreeing that we are vested and allowing this project to go forward will actually benefit the City substantially more than typical heavy industrial.

Here is the info we discussed.
Below is the email my guys sent to councilman Rutberg.
I attach also:

1. OLD SITE PLAN for traditional industrial warehouse.
2. Land use map of surrounding area
3. Great chart showing various impacts of small data center compared to lots of other uses
4. Signed zoning certification ltr from City
5. Our request to Judy for said letter where he describes the plans and actions engaged in towards a data center development

Holler if you need anything further.
Thanks
Simon

Subject: Covington M2 Zoned Development

Jared -

Sam Hay suggested I reach out to you via email regarding our 55-acre Heavy Industrial (M-2) zoned property at 647 Moore Street, which we have owned for approximately 4 years. Our prior application consisted of a ~300K SF Class A warehouse with excess trailer parking lots. We marketed the site for nearly 2yrs but we only received interest from 3PL distribution users give the excess trailer parking we had planned (we were unsuccessful in attracting manufactures or higher job count industrial users). While negotiating with these groups and being at the finish line to pull our Land Disturbance Permit (attached is the old site plan and surrounding uses), we decided to pivot to a data center development because the M-2 zoning allowed for data centers by right and this seemed like the highest and best use for the site. We were nearing the final stages of submittal for this use prior to the moratorium.

We've been working with GA Power on this property for nearly 2 years. The initial GA Power capacity and transmission study was completed in July 2024, we received the GA Power ESA contract in August 2025, and we selected a community conscious data center development partner who focuses on being great stewardess to the community immediately after that in September 2025. This data center developer requested a smaller load (55 MW vs Amazon's 750-1,000 MW), single building, single story, and closed looped system (nearly 0 gallons of water usage daily vs Amazon's 1mm gallons/daily).

This data center developer is not a hyperscaler. They focus on smaller scale projects (10-60MW) and currently operate facilities in Alpharetta and Norcross (and have never had a compliant from any neighbors). The proposed data center development footprint and building height would be almost identical to our previously submitted warehouse plan, but without any heavy truck traffic/very few autos and a noise level that would be less than half of an industrial distribution center. The taxable value from this project will >10x what our original industrial development would produce without enacting any burden to the local roads, water system, or community and our data center partner will not seek a pilot or abatement program from the City.

Given the moratorium and potential code changes under consideration, we would greatly appreciate the opportunity to meet with you to discuss the project and get your thoughts and guidance.

Please let us know if you have any availability in the next week or two. Thanks in advance for your time and consideration.

Best,
Lance Ravenscraft

Hi Mike,

Picking back up from our previous email, I noticed that the Performance Covenant template you shared includes an **Exhibit B** stating, *"Completion of final paving in accordance with the approved subdivision plans."* Could you please provide further clarification on this item, or, if available, forward the **approved subdivision plans** being referenced?
Additionally, could you forward the **Maintenance Bond template** as well?
Let me know if you have any questions.

Subject: RE: Hazelbrand Road - Maintenance Bond

Erick,

Actually, The should be a **maintenance bond** and **performance covenant.** When installing, or in this case re-locating, city owned infrastructure, the developer is responsible to maintain the new infrastructure for three years and has to file a covenant agreement on record for their responsibility of said maintenance.

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms "**Maintenance Covenant**" and "**Performance Covenant**" being used interchangeably to refer to the template previously shared?

As the new owner, we're being diligent in obtaining a copy, as it's important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

Good Afternoon Michael,
I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.
I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.
I will let you guys take it from here but wanted to make the introduction.
Thank you,
Kevin

Mike and Will,

The Transportation/Sales agreement is **not ready** to be forwarded for review or presentation to council. The agreement will need to be updated with the gas supply details and pricing was that information is received from the suppliers.

Attached you will find the other agreements with my comments and edits. Quick notes below:

Reimbursement agreement: edited Exhibit B to reflect the load ramp up schedule.
Load Letter:

- deleted section in Pink.
- Removed the word “guarantee” from Firm Supply. Under Force Majeure, the city cannot guarantee any volumes to any customer.
- Added Exhibit A to reflect load ramp up schedule

Facilities agreement: updated Exhibit A to match the language in load letter.

Mike, if Will agrees with my edits, I think you can forward these agreements to legal.

Rusty

Thanks Mike,

Hi Frank, On the Facilities Agreement, we just need to ensure consistency with the Phases outlined in the Load Letter and align the gas volume reference (XXX MCF) with the 750 MCF stated in the Load Letter.

Feel free to give me a call with any questions.

Thanks,
Will Whittington

Frank,

Please see the email below. I am listed as the signer on the Load Letter. If this needs to be, the Mayor, can we change that as well, please?

Thank you,

Mike

Hi Mike, I just reviewed with our attorney.

A couple of quick clarifications on the **Load Letter**:

- **Phase 2 / Payment Terms- Needs Updating based on Transco Analysis not Facilities Agreement Execution**: Initial remittance, not to exceed 50% of the Phase 2 cost (final amount to be determined), shall be

due within 60 days of Transco's confirmation of the Phase 2 requirement.

- **Signatures:** Our understanding is that you are the only required signatory. Once that is in place, we will proceed with execution of the Facilities Agreement

Once we receive the signed load letter with above slight modifications, we will execute the Facilities Agreement (With the updated XXXMCF and the Phasing) and CRA.

I know it is late EST, but is there any way we could try to get the load letter today? I think the facilities etc could wait till tomorrow.

Give me a call if you need anything.

Thanks,

Will

Mike,

Attached are draft copies of the facilities agreement and transportation agreement for your review. I am also including a spreadsheet showing annual revenues based on several different distribution margins. The transportation agreement has been vetted through OPS and I think is pretty much finished. As discussed, the facilities agreement and how the city would like to be handled the project cost should be vetted through the city attorney.

Hope this helps, but let me know if you need anything else.

Mike,

There are still some updates/edits that need to be added to the sales agreement.. one being adding the Transco reimbursement interconnect agreement as an exhibit.

You may want to have it on the agenda so they are aware it is coming, but I do not think we will have a "final" version ready by that time.

Rusty

Chris,
Appreciate the response. Would we not only want to cover the peak demand but also the “demand” component or “supplier adder” for the entire term of the delivered supply agreement?

I will defer to Jeff, but we could possible sell back the supply, but the adder will be a fixed cost due and payable to supplier.

Jeff, are you comfortable with the language they added about if the city could not deliver supply that they would have the right to have a third party deliver gas them? Not to complicate this, but do we need to add language and/or an exhibit regarding balancing for this request?

Thanks, Rusty

Rusty,

I see your comment on Exhibit D regarding the customer edit. It appears the peak demand is 18,000/day. $5mm would cover 55 days of $5 gas at that peak level, by my calcs. That’s probably reasonable given where gas prices

have been, but doesn't allow any cushion if prices exceed $5. Perhaps we could negotiate a number in the middle of $5-10mm?

With the customer making edits to Exhibit D, it appears the parties are in agreement that there will be an LC. Section 8, "Financial Responsibility", isn't clear on that, just saying the seller has the right to require. It may be better to revise that first sentence to say "The SELLER requires that CUSTOMER…".

Thanks,

Chris

Frank,

Thanks for review and edits. As soon as I have heard from the Gas Authority team on the other comments, I will get this back to you and Mike for final comments/approval.

Thanks,

Rusty

All,

Please see the attached edit sales agreement I received last evening from Serverfarm. You will that they have reduced the term of the agreement from 27 months to 19 months and increased the hourly and daily volumes request. I have reviewed and have added comments.

Would you review and let me know your thoughts. If you have any questions, let me know.

Thanks,

Gas Authority

Frank signed off on the Transco agreement so I would say that one is ready.

I am working on the edits for the sales agreement due the changes Serverfarm requested and hoping I can get that to you and Will by the end of the week for final review.

You may want to have it on the agenda so they are aware it is coming, but I do not think we will have a “final” version ready by that time.

Subject: RE: Covington M2 Zoned Development

Thanks Frank
As I promised, I had my guys go to the drawing board and look at ways they could restrict/modify the project to make it more palatable to the city and its residents.

Here are their thoughts:

Below are restrictions that we recommend the City implement that make this a very community friendly data center development preventing all the unwanted elements of a data center while keeping all the benefits.

- Restrict the MWs to below 65 MWs. This is less of a requirement than some of the nearby manufacturing plants and production plants.
- Limited to a single building only (not a multi building park like the Amazon data center development).
- Closed loop cooling water system required, resulting in WUE of 0 gallons/daily (compared to Amazon's open loop 1m gallons/daily).
- No gas turbines as primary source of power or behind the grid solutions (compared to nearby ServerFarm facility which will have 2 years of gas turbines generating power). This is the cause of noise and pollution. If you are connected to the grid, you are actually as quiet if not quieter than any commercial development.
- Equipment yard oriented away from adjacent residential. Only auto parking will be located along the rear of building adjacent to the residential area.
- Additional landscaping features exceeding code on the side of the building facing residential.
- There must not be any tax abatement incentive package or Pilot Program

It's worth mentioning, there are 14 (older and less efficient) single building existing data centers in the Alpharetta – including the data center group committed to 647 Moore St. 5 of which are adjacent to residential. There has not been one complaint filed about these data centers over the past 30 years and the adjacent homes values do not show any discount to properties in the same neighborhood but not proximate to data centers. There is already plenty of case studies for this proposed data center project coexisting without issues in affluent communities.

Again, this site is zoned M2 and this is the best outcome for this parcel, especially if you implement all of these above restrictions. Most of the M2 zoning ordinance allows for uses that will disrupt the neighbors to the east (who are mostly renters in Unincorporated Newton County) and potentially impact their home value – including transload facilities and heavy distribution centers. We have had historical interest from transload facility users (we have worked with three transload companies in the state of Georgia in the last 24 months), but chose not to pursue that path, in addition to the 3PL users we were designing for, because of the data center pursuit. While we think there is a strong case for vested rights, we are hopeful with these imposed restrictions, everyone can come out with a win on this project.

Please let me know how else I can help the City leadership see that agreeing that we are vested and allowing this project to go forward will actually benefit the City substantially more than typical heavy industrial.

Here is the info we discussed.
Below is the email my guys sent to councilman Rutberg.
I attach also:

1. OLD SITE PLAN for traditional industrial warehouse.
2. Land use map of surrounding area
3. Great chart showing various impacts of small data center compared to lots of other uses
4. Signed zoning certification ltr from City
5. Our request to Judy for said letter where he describes the plans and actions engaged in towards a data center development

Holler if you need anything further.
Thanks
Simon

Subject: Covington M2 Zoned Development

Jared -

Sam Hay suggested I reach out to you via email regarding our 55-acre Heavy Industrial (M-2) zoned property at 647 Moore Street, which we have owned for approximately 4 years. Our prior application consisted of a ~300K SF Class A warehouse with excess trailer parking lots. We marketed the site for nearly 2yrs but we only received interest from 3PL distribution users give the excess trailer parking we had planned (we were unsuccessful in attracting manufactures or higher job count industrial users). While negotiating with these groups and being at the finish line to pull our Land Disturbance Permit (attached is the old site plan and surrounding uses), we decided to pivot to a data center development because the M-2 zoning allowed for data centers by right and this seemed like the highest and best use for the site. We were nearing the final stages of submittal for this use prior to the moratorium.

We've been working with GA Power on this property for nearly 2 years. The initial GA Power capacity and transmission study was completed in July 2024, we received the GA Power ESA contract in August 2025, and we selected a community conscious data center development partner who focuses on being great stewardess to the community immediately after that in September 2025. This data center developer requested a smaller load (55 MW vs Amazon's 750-1,000 MW), single building, single story, and closed looped system (nearly 0 gallons of water usage daily vs Amazon's 1mm gallons/daily).

This data center developer is not a hyperscaler. They focus on smaller scale projects (10-60MW) and currently operate facilities in Alpharetta and Norcross (and have never had a compliant from any neighbors). The proposed data center development footprint and building height would be almost identical to our previously submitted warehouse plan, but without any heavy truck traffic/very few autos and a noise level that would be less than half of an industrial distribution center. The taxable value from this project will >10x what our original industrial development would produce without enacting any burden to the local roads, water system, or community and our data center partner will not seek a pilot or abatement program from the City.

Given the moratorium and potential code changes under consideration, we would greatly appreciate the opportunity to meet with you to discuss the project and get your thoughts and guidance.

Please let us know if you have any availability in the next week or two. Thanks in advance for your time and consideration.

Best,
Lance Ravenscraft

Mike and Will,

The Transportation/Sales agreement is **not ready** to be forwarded for review or presentation to council. The agreement will need to be updated with the gas supply details and pricing was that information is received from the suppliers.

Attached you will find the other agreements with my comments and edits. Quick notes below:

Reimbursement agreement: edited Exhibit B to reflect the load ramp up schedule.

Load Letter:

- deleted section in Pink.
- Removed the word “guarantee” from Firm Supply. Under Force Majeure, the city cannot guarantee any volumes to any customer.
- Added Exhibit A to reflect load ramp up schedule

Facilities agreement: updated Exhibit A to match the language in load letter.

Mike, if Will agrees with my edits, I think you can forward these agreements to legal.

Hi Mike,

Picking back up from our previous email, I noticed that the Performance Covenant template you shared includes an **Exhibit B** stating, *"Completion of final paving in accordance with the approved subdivision plans."* Could you please provide further clarification on this item, or, if available, forward the **approved subdivision plans** being referenced?
Additionally, could you forward the **Maintenance Bond template** as well?
Let me know if you have any questions.
Thank you,

Subject: RE: Hazelbrand Road - Maintenance Bond
Erick,

Actually, The should be a **maintenance bond** and **performance covenant.** When installing, or in this case re-locating, city owned infrastructure, the developer is responsible to maintain the new infrastructure for three years and has to file a covenant agreement on record for their responsibility of said maintenance.

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms "**Maintenance Covenant**" and "**Performance Covenant**" being used interchangeably to refer to the template previously shared?

As the new owner, we're being diligent in obtaining a copy, as it's important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

You don't often get email from mwillis@cityofcovington.org. Learn why this is important

Good Morning,

I was unable to locate a performance covenant that had been filed. But, in any case you as the new owner would need to file an updated one anyway.

Please find the template

Thanks, Kevin.

Mike, please send us the City of Covington Maintenance Covenant.

The Maintenance Bond (attached) states: *"This Bond is intended to comply with the requirements of the City of Covington's Maintenance Covenant and shall be interpreted so as to comply with the minimum requirements thereof"*

Good Afternoon Michael,
I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.
I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.
I will let you guys take it from here but wanted to make the introduction.
Thank you,
Kevin

Thanks Mike,

Hi Frank, On the Facilities Agreement, we just need to ensure consistency with the Phases outlined in the Load Letter and align the gas volume reference (XXX MCF) with the 750 MCF stated in the Load Letter.

Feel free to give me a call with any questions.

Thanks,
Will Whittington

Hi Mike, I just reviewed with our attorney.

A couple of quick clarifications on the **Load Letter**:

- **Phase 2 / Payment Terms- Needs Updating based on Transco Analysis not Facilities Agreement Execution**: Initial remittance, not to exceed 50% of the Phase 2 cost (final amount to be determined), shall be due within 60 days of Transco's confirmation of the Phase 2 requirement.
- **Signatures:** Our understanding is that you are the only required signatory. Once that is in place, we will proceed with execution of the Facilities Agreement

Once we receive the signed load letter with above slight modifications, we will execute the Facilities Agreement (With the updated XXXMCF and the Phasing) and CRA.

I know it is late EST, but is there any way we could try to get the load letter today? I think the facilities etc could wait till tomorrow.

Give me a call if you need anything.

Thanks,
Will

Subject: Transco Tap Property

Good Morning,

Are we going ot pursue the property purchase for the new Transco Tap, or should I ask Serverfarm to get their acquisition team on it? We cannot complete the tap application process without the coordinates (address) of the site. The City will need to own the property and not Serverfarm, so it is going to have to go to the Council for approval either way. This is very time sensitive for the project. I have not had to purchase property for a project before, and I am sure we need a real estate agent or someone to handle property acquisitions. Advice appreciated.

Thanks,
Mike

NATURAL GAS SALES AGREEMENT

This Natural Gas Sales Agreement (this "Agreement") is effective as of the date last signed below by and between SF ATL2, LLC dba SF ATL2 (DE), LLC, (hereinafter referred to as "CUSTOMER"), and the CITY OF COVINGTON, GEORGIA, a municipal corporation of the State of Georgia (hereinafter referred to as "SELLER"):

WITNESSETH:

WHEREAS, the SELLER owns and operates a natural gas distribution system for the purpose of providing firm and interruptible natural gas sales service to requesting customers; and

WHEREAS, the SELLER is a customer of the Williams Transco Natural Gas Company (hereinafter referred to as "Transco"), maintains firm capacity on the pipeline for natural gas system supply and has interruptible natural gas transportation agreements on TRANSCO's natural gas pipeline; and

WHEREAS, the CUSTOMER desires to purchase natural gas from the SELLER on a firm and interruptible basis to serve its facility located at 10835 Hazelbrand Rd, Covington, Georgia as provided for hereunder;

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements of the parties hereto hereinafter set forth, and other good and valuable consideration, it is agreed by and between the parties hereto as follows:

1. Nature of Service: CUSTOMER may purchase from SELLER firm and interruptible natural gas supplies in quantities up to the contract levels specified in Exhibit "A" of this Agreement. CUSTOMER shall purchase all natural gas requirements from SELLER, except that CUSTOMER may purchase natural gas from a third party if SELLER is not able to provide natural gas per the terms of this Agreement. SELLER provides the service from the TRANSCO delivery location 9002780 into SELLER's distribution system. No gas may be resold or transported to other facilities by CUSTOMER without SELLER'S written permission, which may be withheld in SELLER's sole discretion. A meter of suitable capacity and design to measure the natural gas for this service will be furnished and shall be maintained on CUSTOMER'S premises by SELLER at a suitable location agreed to by the parties, and shall be and remain the property of the SELLER. The CUSTOMER shall provide and maintain suitable spacing and fencing, as agreed by the parties, for the SELLER'S metering and regulating equipment.

2. Term: This Agreement shall commence on April 1, 2026 at 10:00 a.m. ET and shall continue in full force until October 30, 2027, at 9:59 a.m. ET, and shall continue with month to month evergreen term extensions thereafter consistent with the terms of SELLER'S Agreement with TRANSCO Natural Gas Company unless terminated by either party. As the SELLER holds firm contracts to serve CUSTOMER, this Agreement shall continue upon the same term the SELLER has with TRANSCO, unless and until terminated by either party in writing. A copy

of SELLER's agreement with TRANSCO is attached to this Agreement as Exhibit "E." SELLER will provide CUSTOMER with any amendments, updates, or renewals to the TRANSCO agreement, which will automatically form part of Exhibit "E" with no further action required by either party. SELLER may update SELLER will ensure that no terms in its agreement with TRANSCO conflict with the terms of this Agreement and in the event of a conflict, this Agreement will control. Any written non-renewal notice shall be delivered to the non-canceling party no later than 30 days preceding the end of the then-current term of this Agreement and shall be delivered by mail, certified mail or email to the non-canceling party. It is understood and agreed by the parties that the term of this agreement may be extended for more than one year by amendment. Such an amendment may be requested to maintain the same term as the Service Agreement with TRANSCO held by the SELLER.

3. Price: The price of natural gas for firm and interruptible service may vary monthly and shall be calculated according to Exhibit "A" to this Agreement.

4. Daily Volume of Firm Service: Except as set forth in Section 7 and as long as no event of force majeure has occurred and is continuing as described herein, SELLER shall make available to CUSTOMER daily volumes of firm gas up to the level of firm capacity acquired by SELLER in accordance with Exhibit "A" to this Agreement.

5. Notice of Curtailment: The interruptible natural gas service provided for herein (which does not include firm reservation of natural gas service provided in Exhibit "C") shall be subject to limitation by SELLER during periods of peak demand upon four (4) hours' telephone notice by SELLER to CUSTOMER. For the purpose of this Agreement, "peak demand" shall mean all periods in which SELLER reaches its maximum firm contract levels with TRANSCO. Upon the execution of this Agreement, CUSTOMER shall furnish SELLER with a written list containing the names and telephone numbers of persons to be contacted in the event of curtailment or interruption. Said contact list shall become part of this Agreement and shall be attached as Exhibit "B". Such curtailment or interruption may occur at any hour of day or night, and SELLER'S obligation to provide notice hereunder shall be met upon SELLER'S reasonable efforts to contact these named individuals at telephone numbers provided by CUSTOMER. CUSTOMER may revise the names and telephone numbers of persons to be contacted in the event of curtailment from time to time by notice in writing to SELLER.

6. Unauthorized Use of Gas: If, upon four (4) hours' notice of curtailment by SELLER as provided in Section 5 of this Agreement, CUSTOMER fails to comply with such curtailment or limitation in the manner specified by the telephone notice, and, by reason thereof, the SELLER incurs any TRANSCO penalties or higher gas costs, then CUSTOMER shall reimburse SELLER in the amount of such penalties and/or higher gas costs which are attributable to CUSTOMER'S failure to comply with SELLER'S telephone notice to CUSTOMER. CUSTOMER shall reimburse SELLER within fourteen (14) days of CUSTOMER'S receipt of SELLER'S written demand, which demand shall include adequate documentation to support its request for reimbursement of such penalties, for same. CUSTOMER'S reimbursement to SELLER as described herein shall not, under any circumstances, be construed or interpreted to authorize CUSTOMER to fail to comply with SELLER'S then current or any future notice of curtailment or limitation.

7. Billing and Payment: SELLER shall read meter(s) measuring the quantity of gas delivered to CUSTOMER on or about the 1st day of each month and SELLER shall render an invoice for any gas delivered to CUSTOMER during the preceding month as soon as reasonably possible after such reading. Such invoice shall be due and payable not later than the 60th day following the date of SELLER'S invoice to CUSTOMER when sent, by mutually agreed upon means, to the address specified by CUSTOMER. In the event CUSTOMER fails to forward the entire invoice amount (excluding amounts disputed by CUSTOMER) to SELLER when due and the invoice has been timely sent to the address specified by the CUSTOMER, a one-time late penalty of two percent (2%) of the unpaid amount of the invoice will be assessed. If CUSTOMER'S failure to comply with the terms of this Section 7 as herein provided continues for twenty (20) days following the date of SELLER'S written notice of non-compliance to CUSTOMER, SELLER shall have the right to terminate gas deliveries to CUSTOMER upon written notice to CUSTOMER by first class mail and/or certified mail of such termination forty-eight (48) hours prior to such termination. Upon termination of service pursuant to this paragraph, CUSTOMER shall pay SELLER outstanding charges. Termination of service pursuant to this paragraph shall also constitute termination of SELLER'S agreement to provide natural gas service under the terms of this Agreement but shall not relieve CUSTOMER of any obligation to pay or reimburse SELLER for any amounts due and owing under the terms of this Section 7, calculated as provided herein. [insert disputed amounts language and cross reference dispute provision below]

8. Financial Responsibility: The SELLER reserves the right to require that CUSTOMER provide an Adequate Assurance of Performance. "Adequate Assurance of Performance" means a standby letter of credit, in commercially reasonable form acceptable to the SELLER in an amount set forth in Exhibit "D". Agreements of standby letters of credit will be made with an institution acceptable to the SELLER.

   If SELLER has reasonable grounds for insecurity regarding the performance of any obligation under this Contract (whether or not then due) by the CUSTOMEER (including, without limitation, the occurrence of a material change in the creditworthiness of CUSTOMER, if applicable, or the price of Gas or CUSTOMER volumes increase such that SELLER determines that the then current "Adequate Assurance of Performance" is or is expected to be insufficient), SELLER may demand additional Adequate Assurance of Performance. Should Seller require any additional Adequate Assurance of Performance, it will issue a written request to CUSTOMER and give CUSTOMER at least thirty (30) days to comply with the request. Provided, however, that to the extent that during such thirty (30) day period, SELLER reasonable expects any such insecurity regarding the performance of any obligation under this Contract (whether or not then due) by the CUSTOMER (including, without limitation, nonpayment risk exceeding the coverage afforded by the then current Adequate Assurance of Performance), SELLER may curtail service hereunder sufficient to bring such nonpayment risk within such coverage.

9. Btu Adjustment: It is understood that the quantity of gas purchased by the SELLER is adjusted each month to reflect actual Btu content of such gas. All invoices to CUSTOMER for gas delivered shall be measured by meter(s) provided by SELLER. Gas shall be metered by

SELLER to CUSTOMER'S facility located at 10835 Hazelbrand Rd, Covington, Georgia, at a base pressure of 14.73 pounds per square inch absolute, at a temperature base of 60 degrees Fahrenheit and shall be adjusted for actual Btu content. Any such adjustment for actual Btu content pursuant to this Section 8 shall be in the same proportion as the corresponding adjustment made by TRANSCO for such gas transported to SELLER, provided that CUSTOMER shall have the option (at its expense) to install a recording calorimeter and any observed differences in Btu content shall serve as the basis for a request by CUSTOMER for an adjustment to the billing quantity. CUSTOMER shall provide SELLER all reasonable documentation supporting any claimed difference in Btu content. In the event CUSTOMER'S pressure or location requirements change during the term of this Agreement or any extensions thereof, CUSTOMER shall be responsible for any and all reasonable, out-of-pocket costs and expenses, assessed without markup on an open-book basis, associated with adjustments in pressure, facility location, and/or relocation of existing facilities necessary to supply CUSTOMER'S modified requirements.

10. Gas Quality: All physical properties of the gas sold and delivered to CUSTOMER hereunder, including specific gravity, Btu content and physical impurities, shall be within the same limits prescribed by TRANSCO for such gas transported by TRANSCO to SELLER in accordance with TRANSCO's effective tariff.

11. Minimum Delivery Pressure: Delivery pressure into CUSTOMER'S fuel line shall not fall below fifteen (15) pounds per square inch (p.s.i.g.).

12. Force Majeure: Neither party shall be liable to the other for any failure to perform any provision or obligation of this Agreement (except CUSTOMER'S obligation to pay for natural gas dispatched and delivered plus any late charges for nonpayment calculated in accordance with Section 7 hereof) to the extent such failure is caused by or results directly or indirectly from any act of God; fires, floods, storms or other natural disasters; war, acts of terrorism; accidents; breakage or accident to machinery or lines of pipe, freezing or rupture of lines of pipe not due to the negligence of SELLER or any third party or to any failure to maintain, inspect, or timely repair such machinery or lines of pipe; the refusal or inability of any transporter to accept gas for delivery or failure of any transporter to deliver gas; the loss or failure of SELLER'S gas supply due to a Force Majeure event. This provision only applies to the extent the Force Majeure event is or any similar cause or emergency beyond the control of the party failing to perform.

13. Responsibility and Liability: SELLER and CUSTOMER do respectively assume full responsibility and liability for the maintenance and operation of the facilities operated by each, and each shall indemnify to extent allowed by law and save harmless the other from all liability and expense (including reasonable attorney's fees) on account of any and all damages arising from third-party claims or actions, including injury to and death of persons, arising directly or indirectly from any act or omission by the indemnifying party hereunder in connection with the installation, presence, maintenance and operation of facilities operated by the indemnifying party. It is agreed that neither party hereto shall be liable to the other for damage to the equipment, apparatus, appliances or property of any kind, caused by defects in or failure of the machinery, apparatus, or appliances. SELLER shall have no obligation for

the distribution or control, or care, or protection, or proper utilization of the gas beyond the meter set which establishes the point of its delivery of gas to CUSTOMER. CUSTOMER shall have no obligation for the distribution or control, or care, or protection, or proper utilization of the gas prior to its delivery to the meter set which establishes the delivery point of gas to CUSTOMER. SELLER shall not be liable for damages or injuries to persons or property resulting in any manner directly or indirectly from the receiving, use or application by CUSTOMER of such natural gas unless such damages or injuries are caused solely out of the gross negligence or willful misconduct of the SELLER or SELLER'S agents, employees, or contractors. CUSTOMER shall not be liable for damages or injuries to persons or property resulting in any manner directly or indirectly from the receiving, provision, use or application by SELLER of such natural gas unless such damages or injuries are caused solely out of the gross negligence or willful misconduct of the CUSTOMER or CUSTOMER'S agents, employees, or contractors.

14. Negotiation of Disputes: The parties shall attempt in good faith to resolve all claims, disputes and controversies of any nature, arising out of or relating to this Agreement or the relationship of the parties (collectively "Dispute") promptly by negotiation between executives with authority to settle the Dispute. Either party may give the other party written notice ("Initial Notice") of any Dispute not resolved in the normal course of business for resolution under this paragraph. The Initial Notice shall include a statement of that party's position and the names and titles of the executive and any other people who will represent that party's position. Within fifteen (15) days of the delivery date of the Initial Notice, the receiving party will respond with its own position statement and the names and titles of the executive and any other people who will represent that party's position. Within twenty-five (25) days of the delivery date of the Initial Notice, the parties will meet at a mutually acceptable time and place, and thereafter as often as reasonably deemed necessary to resolve the Dispute. Each party will honor the other party's reasonable requests for information during such negotiations.

15. Mediation of Disputes: If a Dispute has not been resolved by negotiation as described above within 45 (forty-five) days of the delivery date of the Initial Notice, or if the parties' executives failed to meet within 25 (twenty-five) days of such delivery date, the parties agree that prior to attempting to resolve the Dispute by arbitration or litigation, they shall attempt to settle the Dispute by mediation in Augusta, Georgia under the then current Center for Public Resource's ("CPR") Model Mediation Procedures for Business Disputes. Within ten (10) days of a party's written notice of its desire to mediate to the other party, the parties will appoint a mutually acceptable mediator from the CPR Panels of Distinguished Neutrals. All applicable statutes of limitation and defenses based upon the passage of time will be tolled for the duration of any Dispute resolution under this Section. All negotiations and mediations shall be considered confidential and shall be treated as compromise and settlement negotiations for purposes of applicable rules of evidence. The parties shall continue to perform under this Agreement pending the final resolution of any Dispute, except as set forth in Section 7.

16. Governing of Law: This Agreement shall be governed by and interpreted in accordance with the domestic laws of the State of Georgia without giving effect to any choice or conflict of

law provision or rule (whether of the State of Georgia or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the State of Georgia.

17. Amendments and Waivers: No amendment of any provision of this Agreement shall be valid unless the same shall be in writing and signed by SELLER and CUSTOMER. No waiver by any Party of any default, misrepresentation, or breach of covenant hereunder, whether intentional or not, shall be deemed to extend to any prior or subsequent default, misrepresentation, or breach of covenant hereunder or affect in any way any rights arising by virtue of any prior or subsequent such occurrence.

18. Notices: Any notice or communication required or permitted to be given pursuant to this Agreement shall be confirmed in writing (with exception of a curtailment notice pursuant to Section 5 of this Agreement) and shall be deemed properly given when emailed, hand delivered, sent by overnight mail service, or mailed from within the United States by certified mail, return receipt requested, postage paid to the following addresses:

19. Severability: Any term or provision of this Agreement that is invalid or unenforceable in any situation in any jurisdiction shall not affect the validity or enforceability of the remaining terms and provisions hereof or the validity or enforceability of the offending term or provision in any other situation or in any other jurisdiction. The parties will replace the invalid or unenforceable provision with a new provision that most closely reflects the parties' original intent with respect to the invalid or unenforceable provision.

20. Time of Essence: Without expanding either party's termination rights under this Agreement,

each party agrees that time is of the essence with respect to its obligations under this Agreement and each and all of its provisions.

21. Entire Agreement: This Agreement (including attached Exhibit "A") constitutes the entire agreement between the parties and supersedes and cancels any prior negotiations, arrangements, offers, agreements or understandings, written or oral, to the extent they relate in any way to the subject matter hereof.

22. Prior Contracts and Claims: This Agreement cancels and supersedes all prior contracts and claims between SELLER and CUSTOMER, except for volumes delivered but not yet billed under any previous agreement.

23. Binding Effect: This Agreement shall be binding upon the parties hereto and their successors and assigns.

24. Incorporation of Exhibits: Each Exhibit attached hereto constitute part of this Agreement.

25. Counterparts: This Agreement may be executed in one or more counterparts, each of which shall be deemed an original but all of which together will constitute one and the same instrument.

26. Construction: The introduction and recitals are a material part of this Agreement.

27. Anticipated Load Projections: SELLER requests that CUSTOMER provide a Month-Ahead load forecast by day for both firm and interruptible load at least six (6) business days prior to the start of each calendar month (Timely Month-Ahead Load Forecast). In addition, CUSTOMER will provide notice not later than 8:00 a.m. ET day ahead of any significant variations from the Timely Month-Ahead Load Forecast. If load changes occur after the Timely Day-Ahead Load Forecast CUSTOMER is requested to notify SELLER as soon as practical. Failure to provide SELLER with Timely Day-Ahead Forecasts with load variations could result in pipeline imbalance penalties that are subject to being passed through the Customer.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be signed in their respective names and on their behalves by their proper officers or officials thereunto duly authorized as of the day and year written below.

Signed and Sealed this _____ day of _____, 2025.

NATURAL GAS SALES AGREEMENT
BETWEEN SF ATL2, LLC dba SF ATL2 (DE), LLC (CUSTOMER)
AND THE CITY OF COVINGTON, GEORGIA (SELLER)

EXHIBIT "A"

I. **Firm Contract Quantity:** Firm Base Load quantities of gas will be delivered based on the Customer's average daily quantities as requested by Customer. SELLER will make commercially reasonable efforts to supply such requested Firm Base Load quantities, including entering into firm wholesale contract obligations necessary to supply such requested Firm Base Load quantities ("Contract Obligations"). **Customer will have a right to review the Contract Obligations before entered into by SELLER.** Daily quantities of Firm Base Load quantities will be deemed as first gas through the meter and will be scheduled based on Exhibit "C". Volumes above the Firm Base Load quantities per day will be considered interruptible volumes and are subject to curtailment.

Special Provision: During peak, operational flow order days, CUSTOMER will limit its daily gas takes from the SELLER to those hourly volumes as shown in Exhibit "C". Any volumes requested above those volumes shown in Exhibit "C" will be considered interruptible volumes and subject to availability.

II. **Interruptible Contract Quantity:** The SELLER will provide Interruptible Natural gas Service for all timely nominated and confirmed quantities of up to 9,600 MMBtu per day in excess of the Firm Base Load Quantity stated in section I, subject to confirmation on the availability and the curtailment provisions contracted in the Natural Gas Sales Agreement.

III. **Monthly Charges for Firm Contract Quantity:** The sales price of gas shall be comprised of the following components for all firm and interruptible gas and Exhibit "B" shows the sample rate:

A. **Firm Contract Quantity Commodity Price:** For firm base load quantities, the rate is defined as NYMEX LD delivered to the City Gate of SELLER, plus any Contract Obligations entered into on behalf of CUSTOMER and not covered by such rate.

B. **Interruptible Commodity Price:** For interruptible quantities, the rate is defined as the daily market price of natural gas based on timely notices. Customer may request to purchase Interruptible Quantities in advance of the month, daily with timely notice, and daily without timely notice. Timely notice is 8:00 a.m. ET five business days prior to the start of the month, 8:00 ET on business day ahead of gas flow and ratable volumes over weekend/holidays, or not less than two hours prior to ID2 pipeline nomination deadline.

C. **Pipeline Fuel Cost:** The rate for fuel retention shall reflect the effective cost of TRANSCO's percentage of fuel retained as allowed for in their tariff.

D. **Pipeline Transportation Charge:** The rate of TRANSCO's firm transportation reservation fee applicable to the firm quantities per day, and the applicable commodity transportation charges, plus all applicable surcharges on the actual volumes delivered, as identified in TRANSCO's tariff. Total firm monthly volumes shall be determined as those firm contract quantities times the number of days in the month; the balance of usage shall be considered "interruptible" volumes. For all "interruptible" volumes purchased by the CUSTOMER from the SELLER, a transportation rate equal to TRANSCO's FERC approved interruptible transportation rate per MMBtu will apply to quantities.

Special Provision: In the event TRANSCO substantially changes its tariff, SELLER

reserves the right to alter the pricing structure contained herein; it is the SELLER'S intent to flow through charges as incurred, and the CUSTOMER'S intent to pay such charges.

E. **Agent and Supplier Fee:** Fees include those charges associated with the delivery of natural gas supplies to the SELLER charged by its supply agent or other suppliers outside of the Delivered Supply Contract Commodity Price adder.

F. **Distribution Fee:** The distribution fee shall be calculated monthly on the load of the CUSTOMER'S facilities located on SELLER'S natural gas system, and shall be:

For all volumes @ $0.20/MMBtu

G. **Taxes:** All applicable taxes shall be added as a separate line item(s) on all invoices to customer.

STATEMENT OF QUALIFICATIONS (SOQ) FOR ANNUAL CONSULTING SERVICES

CATEGORY B - SITE PLAN REVIEW SERVICES (ON-GOING SERVICES)

Confidential information on page 33

AUGUST 5, 2025

LETTER OF INTEREST

AUGUST 5, 2025

KIMLEY-HORN
11720 Amber Park Drive
Suite 600
Alpharetta, GA 30009
770 619 4280

Scott Cromer
City of Covington Purchasing Department
2194 Emory Street
Covington, GA 30014

RE: *Request for Qualifications for Annual Consulting Services | Category B—Site Plan Review Services (On-going Services)*

Dear Mr. Jewell and Members of the Selection Committee:

The City of Covington (City) is seeking the partnership of a firm that has the availability, expertise, and resources to serve as a reliable on-call consultant. As new projects emerge, the City needs the confidence that comes from partnering with a full-service engineering consulting firm with ample experience in the area, technical expertise in the full breadth of natural gas services, and the resources of a large firm that is wholly dedicated to providing excellent client service. That firm is Kimley-Horn.

EXPERTISE IN ALL THINGS NATURAL GAS: We have a dedicated nationwide team of natural gas specialists with decades of experience in programmatic work for municipalities and natural gas providers throughout the country. Our natural gas engineering professionals have easy access to in-house specialists in traffic management, environmental services, and permitting, which will allow us to identify potential schedule and cost efficiencies for you whenever possible. We will leverage this expertise to consistently exceed your expectations.

STRONG LOCAL RELATIONSHIPS: At Kimley-Horn, we take pride in our long-standing relationships with the Georgia Department of Transportation (GDOT), local municipalities, and permitting agencies around Covington. Our team's deep understanding of the regional regulatory landscape helps ensure seamless navigation through the permitting process, fostering efficient project approvals. This collaboration not only streamlines complex procedures but also reflects our commitment to exceptional client service and community partnership.

RESOURCES OF A LARGE, CLIENT-CENTRIC FIRM: Thanks to our experience serving clients through on-call projects, we understand how critical it is to provide the right staff and resources at the right time for any situation that may arise—sometimes at a moment's notice. With more than 450 staff in our five offices throughout Georgia, we are well-positioned to serve you whenever project needs arise. Additionally, because Kimley-Horn is a client focused firm that functions as one profit center, the City will have the resources of every member of our 8,900-person firm nationwide. When unique situations arise, we will get you the right people and tools you need to accomplish your goals.

Thank you for your consideration of our qualifications. We are committed to serving the City on this on-call contract and look forward to working with you to support your commitment to providing high-quality natural gas services to your customers. If you have any questions or need additional information, please do not hesitate to contact me at the information below. ***Kimley-Horn acknowledges that no formal addenda were issued, but our questions were answered via email by Mike Jewell on July 15, 2025.***

Sincerely,

Kimley-Horn and Associates, Inc.

TEAM AND QUALIFICATIONS

FIRM QUALIFICATIONS

Founded in 1967 in Raleigh, NC, Kimley-Horn has grown to one of the premiere full-service engineering and planning consulting firms in the nation. Our permanent staff includes more than 8,900 professional, technical, and support staff in more than 145 offices across the US, including more than 450 employees among our four Atlanta-area offices. In addition to engineering services for natural gas systems, Kimley-Horn's range of disciplines includes, site development, planning, transportation, traffic, roadway, landscape architecture, structures, water/wastewater, environmental, and aviation.

KIMLEY-HORN OFFICE LOCATIONS

Kimley-Horn Office

Kimley-Horn Natural Gas Experience

Kimley-Horn has been committed to serving the natural gas industry **for over a decade, and this team has 71 years of combined experience serving on 750+ natural gas projects** and assisting clients nationwide in maintaining access to both new and existing critical infrastructure. Our team's proactive approach, flexibility, and innovative design enable our clients to meet critical deadlines and address both short- and long-term planning needs. Kimley-Horn's skilled professionals successfully have expanded utility service to previously unserved areas, extended the life of existing infrastructure through rehabilitation and/or repair, designed new facilities, and replaced aging infrastructure. Our natural gas expertise is supplemented by our in-house land development, traffic, and permitting capabilities to provide a one-stop shop for natural gas projects.

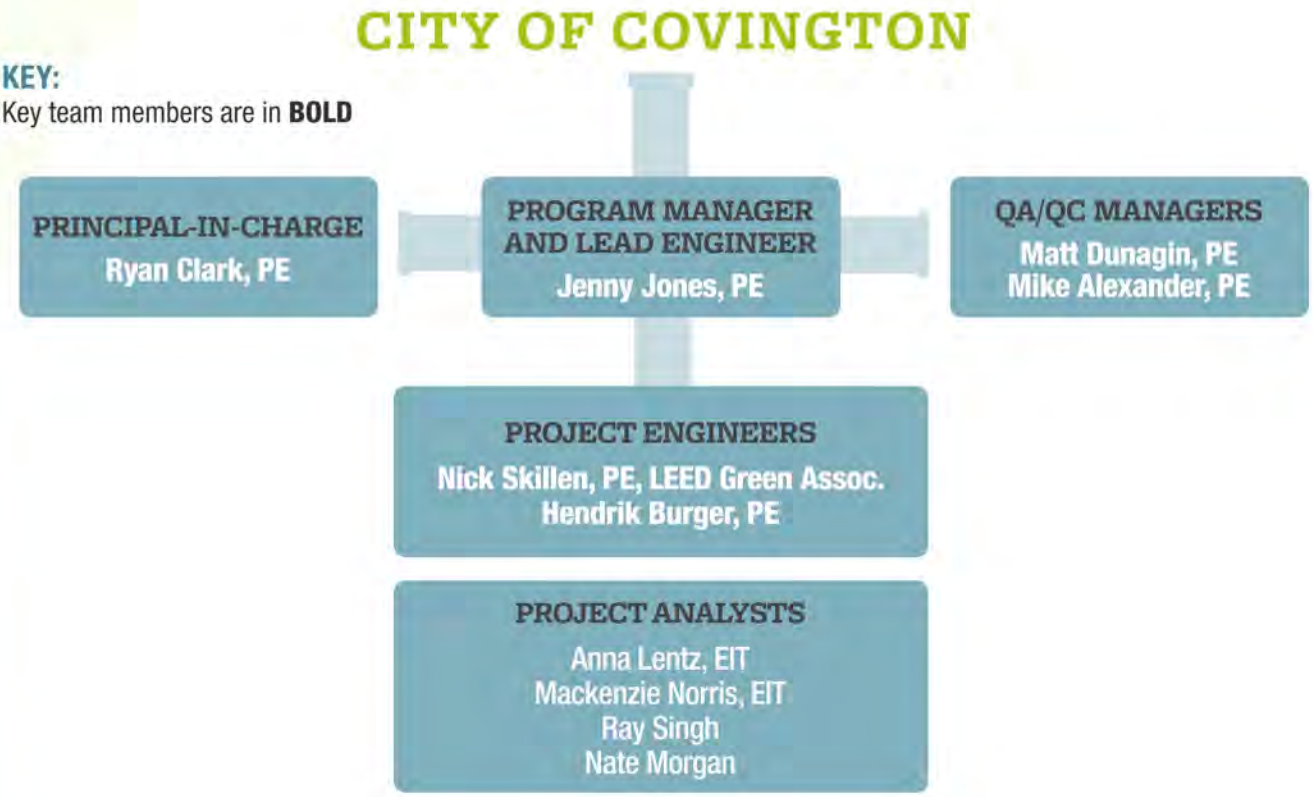
In addition, we have the outstanding in-house resources and technical expertise to provide virtually all required services. An employee-owned corporation, Kimley-Horn prides itself on a proven history of successful client service over the last 56 years. We have provided engineering and planning services to municipalities and agencies across the country and are currently serving numerous cities and counties throughout Georgia and the Southeast. A few of our staff members are former municipal engineers and planners who have a unique perspective on the common challenges facing growing municipalities and utility authorities.

NATURAL GAS CAPABILITIES

Our natural gas expertise is supplemented by our in-house land development, traffic, and permitting capabilities to provide a one-stop shop for natural gas projects.

- Pipeline Design (Transmission and Distribution)
- Routing Studies and Assessments
- Metering and Regulating (M&R) Station Design
- Station Maintenance and Upgrades
- Trenchless Technology
- Grant Writing
- Utility Conflict Resolution
- Main Replacement and Upgrades
- Project Management
- Base Mapping and GIS Services
- Permitting Services
- Pig Receiving/ Launching Station Design
- Electrical/ SCADA Design
- DOT Coordination
- Site Development
- Pipeline Integrity Design
- Environmental
- Structure and Foundation Design

HIGHLY EXPERIENCED, KNOWLEDGEABLE TEAM



Our team's combined municipal experience in design, planning, administration, and construction phase services has given us a comprehensive understanding of how to work with cities, counties, state DOTs, and other regulatory agencies, elected officials, various stakeholders, and the local community to negotiate support and buy-in to achieve project objectives.

Kimley-Horn has carefully assembled a multidisciplinary team with the skills and experience needed to meet the required services under this contract. Under the leadership of **Jenny Jones, PE,** Program Manager, our team will work to function as an extension of your staff through frequent communication, strong performance and management, and a constant focus on the schedule and budget for this contract. Additionally, our key team members will be supported by engineering production staff who also have been instrumental in the delivery of numerous high-profile natural gas projects around the country.

Kimley-Horn has a proven track record of delivering well-considered routing and construction designs that effectively minimize impacts and mitigate risks to project schedules, budgets, and long-term operations. For projects of significant length and complexity, which involve operational, construction, and environmental constraints, it is crucial to have a team that is adept at managing the diverse challenges that may arise. Our team is capable of quickly pivoting to implement alternate plans, ensuring efficiency and project continuity.

With extensive experience working alongside municipalities, we possess an in-depth understanding of the requirements and processes necessary to design and permit large-scale projects while staying within budget. We have assembled a highly qualified, locally knowledgeable team, ready to leverage their expertise to ensure the successful execution of your project.

An organizational chart that identifies the project manager and key team members is included below. Resumes can be found in the Appendix, starting on page 21.

EXPERIENCE

EXPERIENCE WITH NATURAL GAS PROJECTS

We have **more than a decade** of experience of successfully delivering on **750+ natural gas infrastructure projects**, fostering lasting partnerships with local utility companies and municipal gas agencies to bring comprehensive natural gas solutions. In Georgia, we have **completed more than 75 similar projects directly and indirectly for municipal gas agencies in the last five years**, including distribution and transmission pipelines, stations, and master plans. **Our 10 relevant project sheets and key team member resumes highlighting relevant project experience can be found in the Appendix, starting on page 21.**

EXPERIENCE WITH ON-CALL CONTRACTS

Kimley-Horn has extensive experience working on and completing similar contracts for government entities. Our team's success is due to our ability to quickly mobilize and commit necessary resources to deliver contracts and task orders. We realize there are specific needs with standby services and on-call contracts, and **we have successfully completed nearly 6,000 projects for municipal clients throughout the Southeast in the past 10 years with 380 being in Georgia.**

One feature that separates Kimley-Horn from other firms is our ability to provide integrated services for any project. Kimley-Horn has outstanding in-house resources and technical expertise to provide virtually all required services. One of the benefits Kimley-Horn offers is our diversified resources and the ability to draw upon our experienced team and partnerships at any time. **Jenny Jones, PE,** will call upon any resources you may need, and can assure you that, if required, additional technical expertise is only a phone call away. We are pleased to offer the City a consulting firm that is local, provides a wealth of experience in natural gas projects, has complementary engineering discipline in-house capabilities, and has an experienced, professional team that has served Georgia clients **for over 50 years on more than 8,800 successful projects.**

Our Georgia municipal clients include the following.

- Athens-Clarke County
- Bulloch County
- Chatham County
- Chatham County-Savannah MPC
- Cherokee County
- Cherokee County School District
- City of Albany
- City of Alpharetta
- City of Atlanta
- City of Augusta

EXPERIENCE WITH THE CITY OF COVINGTON

Kimley-Horn has succesfully delivered two projects for the City in the last 10 years–a culvert replacement and a downtown parking study.

EXPERIENCE LOCATED IN THE CITY OF COVINGTON

Kimley-Horn is familiar with the City and the area surrounding it, as demonstrated in our project experience below.

- Piedmont Healthcare, Airspace Analysis and Helistop Siting
- Serverfarm, Site Development
- Falconwood Farms Traffic Industrial Development
- SK Microworks America
- United Rentals Covington Site Improvements
- Highway 212 and 20 Mixed-Use Development
- EZ Car Wash–Covington
- Confidential EV Client Site Design for EV Chargers
- SR 142 at Hartland Drive GDOT ICE Traffic Analysis
- Project Hazelbrand–Traffic Impact Study
- Lochridge Boulevard Environmental Site Assessment
- Covington Multifamily Site Civil Engineering
- Dorchester Place Due Diligence
- DaVita Dialysis Site Design and Permitting
- 3110 Highway 278 Site Planning
- City of Covington Culvert Replacement
- Covington Downtown Parking Study
- Peoples Self Storage
- Crown Castle Atlantic Herron Project
- Crown Castle Atlantic Holmes Project
- Mount Pleasant Traffic Analysis
- Covington Comprehensive Transportation Plan
- Covington Hydro Study

MUNICIPAL ORGANIZATIONS WHERE NATURAL GAS SERVICES WERE PROVIDED

Kimley-Horn has completed similar services for the following municipalities.

- Augusta Utilities
- City of Adairsville, GA
- City of Augusta, GA
- City of Buford, GA
- City of Charlottesville, VA
- City of Ellensburg, WA
- City of Live Oak, FL
- City of Tomball, TX
- Colorado Springs Utilities
- Knoxville Utilities Board (KUB)
- Roanoke Gas Company
- Various municipalities through the AGL DOT program

RESUMES

Resumes for our key team members are included in the Appendix, starting on page 21.

RELEVANT PROJECT EXPERIENCE

1. ATLANTA GAS LIGHT (AGL) DOT AND CITY OF SANDY SPRINGS, PEACHTREE DUNWOODY AT LAKE HEARN DRIVE

SANDY SPRINGS, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Chris Brittian, EIT
770 570 8292
wcbritti@southernco.com

Viraj Patel, EIT
404 558 1267
virpatel@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $21,257

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved full-depth roadway widening, installation of new sidewalk, proposed drainage and grading, and gas system improvements for approximately 0.25 miles. Existing utilities included a 4" PLS and a 12" STL gas main. Kimley-Horn was responsible for the first submission, which included mapping the existing gas lines and providing a utility conflict matrix identifying all conflicts between existing gas infrastructure and proposed improvements. For the second submission, Kimley-Horn was tasked with showing any necessary relocations based on those conflicts. To support this effort, Kimley-Horn coordinated with a surveyor to obtain SUE Level A test holes on the 12" STL gas main. The findings confirmed that no gas main relocations were required for this project.

KEY TEAM MEMBERS INVOLVED:

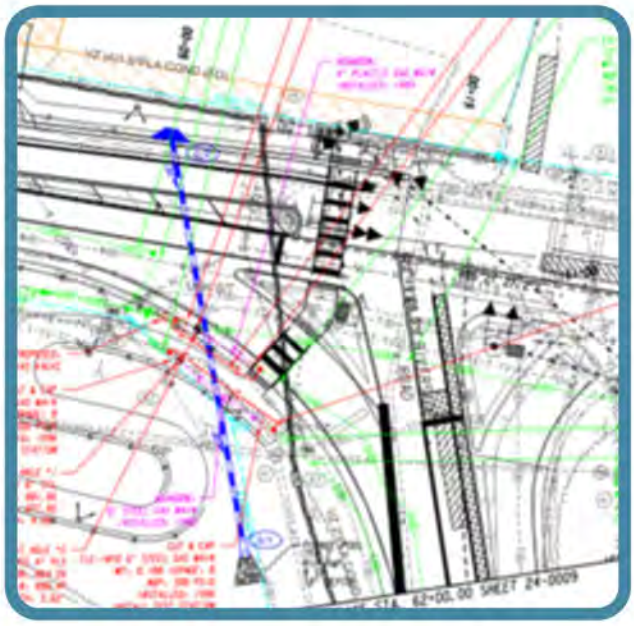
Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

2. AGL DOT AND CITY OF ROSWELL, RIVERSIDE ROAD IMPROVEMENTS–RIVIERA ROAD TO OLD ALABAMA ROAD

ROSWELL, GA

OWNER: AGL



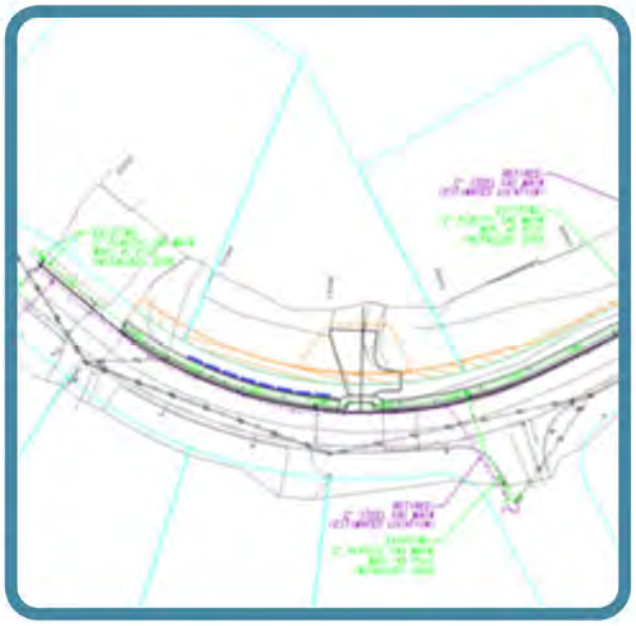
OWNER CONTACT INFORMATION:
Chris Brittian, EIT
770 570 8292
wcbritti@southernco.com

Viraj Patel, EIT
404 558 1267
virpatel@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $29,050

YEAR COMPLETED: 2025



DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved installing new drainage systems, road improvements, signal improvements, grade cuts, and gas system improvements for approximately 0.85 miles. Kimley-Horn was responsible for the first submission, which included mapping and labeling the existing 4" PLS, 4" STL, 6" STL, and 12" STL gas lines, as well as the regulator station. For the second submission, Kimley-Horn provided a utility conflict matrix to identify conflicts between the existing gas infrastructure and proposed improvements, and showed necessary relocations based on these conflicts. To support this effort, Kimley-Horn coordinated with a surveyor to obtain SUE Level A test holes on the 6" STL and 12" STL gas mains. The SUE data indicated no relocation was needed for the 12" STL gas main, thus preventing the relocation of the regulator station.

KEY TEAM MEMBERS INVOLVED:
Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

3. AGL DOT AND DEKALB COUNTY, SPRING CREEK SIDEWALK

DEKALB COUNTY, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Chris Brittian
770 570 8292
wcbritti@southernco.com

Trevar Gallandt
470 259 9565
tgalland@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $9,960

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved installation of new driveways, sidewalk, and gas system improvements for approximately 0.1 miles. Kimley-Horn was responsible for the first submission, which included mapping and labeling the existing 2" PLS gas lines. For the second submission, Kimley-Horn provided a utility conflict matrix to identify conflicts between the existing gas infrastructure and proposed improvements, and showed necessary relocations based on these conflicts. To support this effort, Kimley-Horn coordinated with a surveyor to obtain SUE Level B on the 2" PLS gas main. The SUE data indicated no relocation was needed.

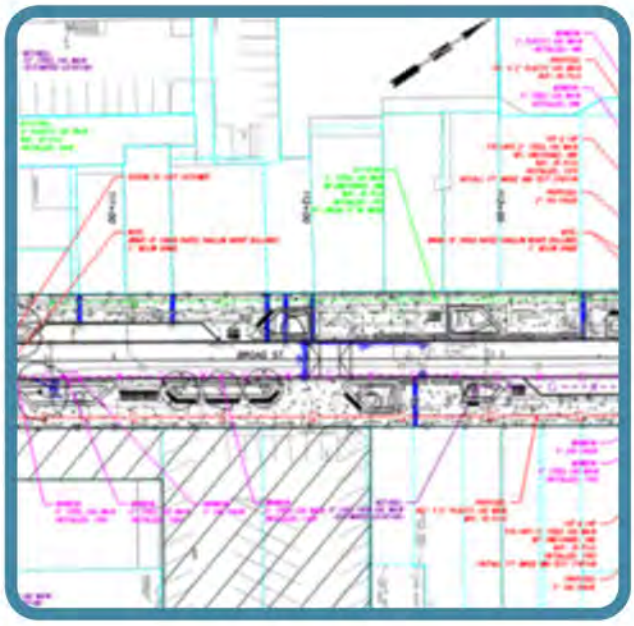
KEY TEAM MEMBERS INVOLVED:
Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

4. AGL DOT AND CITY OF ATLANTA, SOUTH DOWNTOWN GARNETT AND BROAD STREET STREETSCAPE

ATLANTA, GA

OWNER: AGL



OWNER CONTACT INFORMATION:
Chris Brittian
770 570 8292
wcbritti@southernco.com

Trevar Gallandt
470 259 9565
tgalland@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $14,289

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved installation of updated drainage systems, sidewalk bollards, deep foundations, and gas system improvements for approximately 0.3 miles. Kimley-Horn was responsible for the first submission, which included mapping and labeling the existing 2" PLS, 2" STL, 4" PLS, 4" STL, and 6" STL gas lines. For the second submission, Kimley-Horn provided a utility conflict matrix to identify conflicts between the existing gas infrastructure and proposed improvements, and showed necessary relocations based on these conflicts. To support this effort, Kimley-Horn coordinated with a surveyor to obtain SUE Level B on the 2" STL and 8" STL gas mains. The SUE data indicated that portions of the 2" STL were shallow. Although both lines were relocated, it provided better insight to the client regarding the depth and location.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

770 570 8292
wcbritti@southernco.com

Joseph White, PE, LEED AP
404 858 2275
josewhit@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $17,464

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved installation of new drainage systems, grade cuts, and gas system improvements for approximately 2.2 miles. Kimley-Horn was responsible for the first submission, which included mapping and labeling the existing 2" PLS, 2" STL, and 8" STL gas lines, as well as the regulator station. For the second submission, Kimley-Horn provided a utility conflict matrix to identify conflicts between the existing gas infrastructure and proposed improvements, and showed necessary relocations based on these conflicts. To support this effort, Kimley-Horn coordinated with a surveyor to obtain SUE Level B 8" STL gas main. The SUE data resolved some conflicts and gave us the confidence to meet with the DOT regarding the remaining conflicts. Through this collaboration with the DOT, a portion of the relocation was resolved and avoiding relocation in an environmental area within a railroad right-of-way.

KEY TEAM MEMBERS INVOLVED:
Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

ROLE OF FIRM: Prime

CONTRACT VALUE: $6,736

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved a large highway project. Kimley-Horn was tasked with providing a cost estimate for the facilities within the scope. Additionally, Kimley-Horn reviewed the test hole data provided to determine if the 10" STL, 14" STL, and 16" STL gas mains would be impacted. Kimley-Horn coordinated with GDOT and the design firm to present the findings and provide a solution that would be beneficial for both parties.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

8. AGL DOT AND GDOT, JERRY JONES DRIVE

MONROE COUNTY, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Chris Brittian

wcbritti@southernco.com

Joseph White, PE, LEED AP
404 858 2275
josewhit@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $17,418

YEAR COMPLETED: 2024

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved installation of new drainage systems, electric poles, roadway improvements, and gas system improvements for approximately 2.5 miles. Kimley-Horn was responsible for the final plan review, which consisted of analyzing the changes made from the second submission to the final plans. Once the conflicts were identified, we altered the design and added any additional items, such as a new rectifier system.

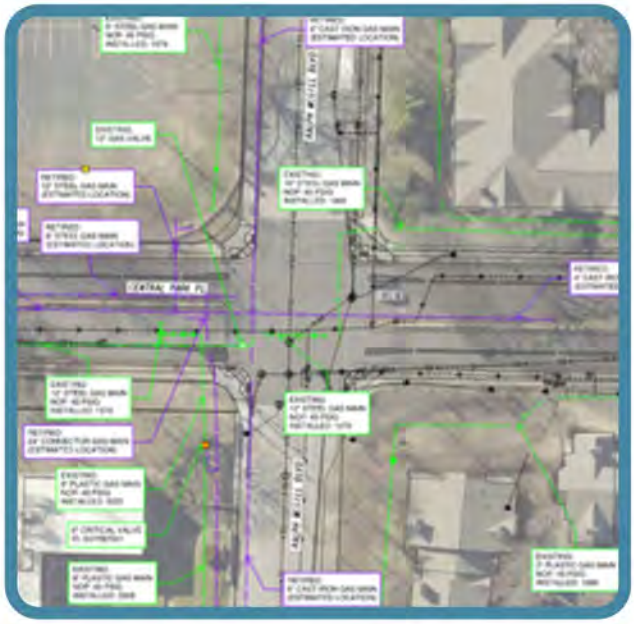
KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

9. AGL DOT AND CITY OF ATLANTA, CYCLE ATLANTA QUICK IMPLEMENTATION

FULTON COUNTY, GA



OWNER: AGL

OWNER CONTACT INFORMATION:
Chris Brittian
770 570 8292
wcbritti@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $19,886

YEAR COMPLETED: 2024

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn completed markups to the preliminary plans, providing an estimated location of the client's facilities, which helped the city with the design of their improvements.

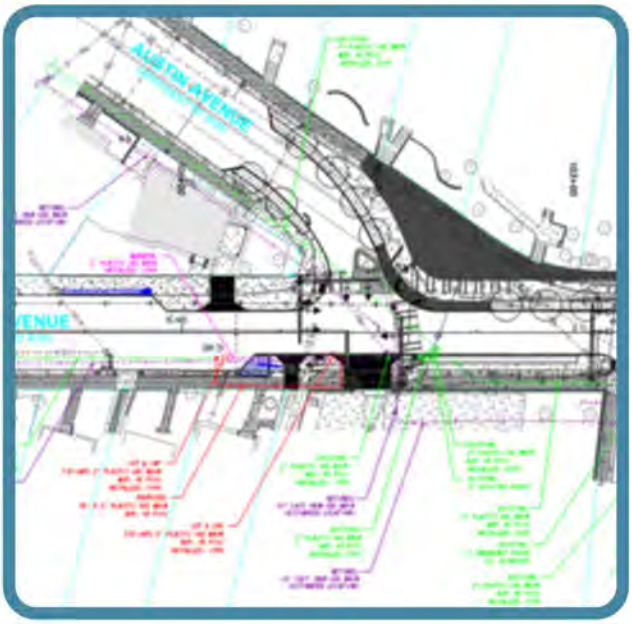
KEY TEAM MEMBERS INVOLVED:
Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

10. AGL DOT AND CITY OF ATLANTA, EUCLID AVENUE MOBILITY IMPROVEMENTS

DEKALB COUNTY, GA

OWNER: AGL



OWNER CONTACT INFORMATION:

Trevar Gallandt
470 259 9565
tgalland@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $8,063

YEAR COMPLETED: Ongoing

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project involved installation of new drainage systems and traffic improvements for approximately 0.29 miles. Kimley-Horn was responsible for the first submission, which included mapping and labeling the existing 2" PLS, 4" PLS, 6" PLS, and 8" PLS gas lines. For the second submission, Kimley-Horn provided a utility conflict matrix to identify conflicts between the existing gas infrastructure and proposed improvements, and showed necessary relocations based on these conflicts. To support this effort, Kimley-Horn coordinated with a surveyor to obtain SUE Level B on the 2" PLS and 8" PLS gas mains. The SUE data resolved some conflicts and allowed us to find a resolution between the client and the design firm.

KEY TEAM MEMBERS INVOLVED:
Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nate Morgan | Project Analyst | Nate assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

PROJECT MANAGEMENT APPROACH

COMMITTED PROJECT LEADERSHIP

Effective overall management is essential to delivering successful projects completed on schedule and within budget. The approach to any project begins with an effective and experienced project manager who understands the program requirements and is committed to developing a team that provides the right staff for a project and maximizes the expertise and experience of each individual. Kimley-Horn has carefully selected a team of expert engineering and construction professionals with a wealth of experience and a thorough understanding of how local governmental and municipalities operate. We do not utilize pure managers who have not experienced all facets of a project. Each of our project managers also serve as project engineers and are heavily involved in each task to ensure a quality product.

TEAM SELECTION

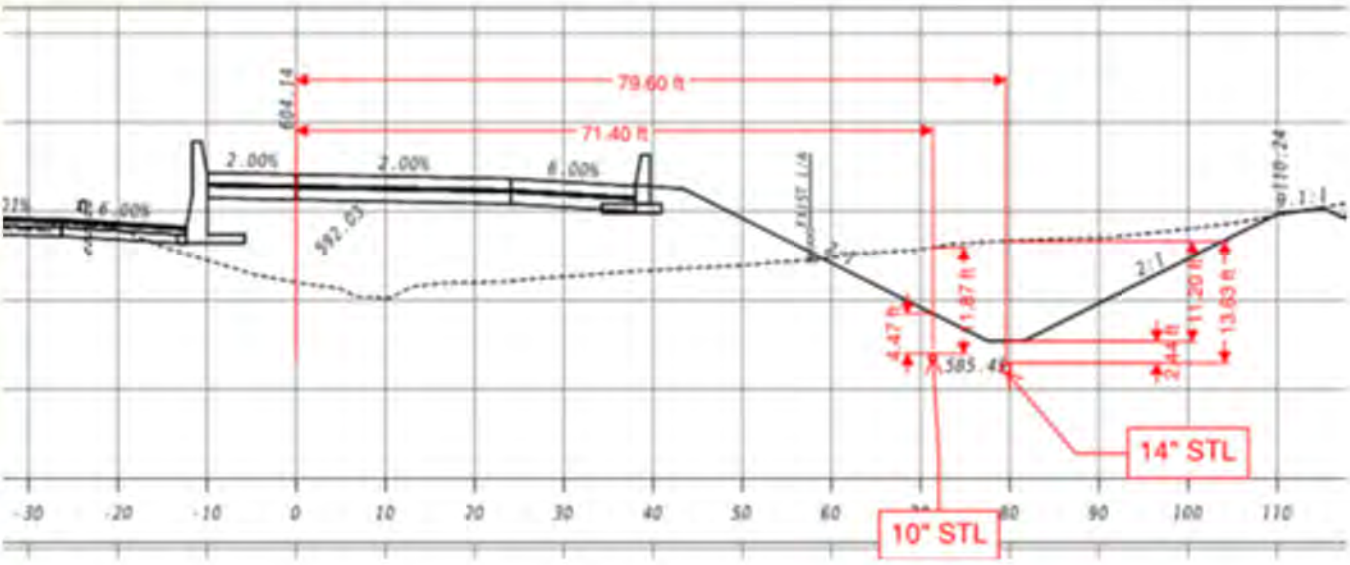
Kimley-Horn recognizes that each assignment under a general professional engineering services contract is unique. Therefore, each assignment will be managed as an independent project. For assignments under this as-needed engineering services contract, Kimley-Horn proposes to follow a general process as outlined below. Selecting the right team after communicating a need for professional services, Jenny Jones, PE, Program Manager, and appropriate supporting professionals will meet with the City to review the assignment, scope of services, and alignment of service expectation. We will discuss the City's definition of project success and essential factors. After the initial meeting, we will provide a draft scope of services, staffing plan, and fee budget for review by the City. We will assign the appropriate task leaders depending on project needs. Key team members will be involved on every assignment to ensure communications, continuity, and delivery of exceptional service. As noted, Kimley-Horn is unique in that we are one profit center allowing us to pull the available and qualified resources from our bench to correctly staff a project.

SCOPE AND FEE PREPARATION

A detailed project work plan will be developed for each assignment. This will be provided in the form of a formal and detailed scope of services with a description of tasks, assigned staff, deliverables, schedule milestones, internal quality reviews, client meetings, presentations, external client reviews, and deliverables. This will be coordinated with and accompanied by a task and staff-based level of effort (by hours) fee estimate and task plan. The work plan will be reviewed with the City to assure complete understanding of the services, budget, schedule, and deliverables prior to Notice to Proceed (NTP).

NOTICE TO PROCEED

Kimley-Horn will hit the ground running once the desired services of a task are requested and communicated effectively. Only upon receiving executed authorization and a Notice to Proceed, we will schedule a formal project kick-off meeting with Jenny Jones and the team. At the kick-off, we will revisit project success factors previously defined during our initial assignment review meeting. Kimley-Horn will schedule and conduct regular project status and review meetings with the City to evaluate progress and to adjust services as needed. Our preference is for face-to-face meetings as a cooperative forum for candid discussion and resolution of unforeseen occurrences or design challenges; however, we also have tools for efficient virtual meetings. Regular meetings allow project participants to be fully informed, resolve issues, and review intermediate deliverables. For all associated meetings, we will prepare meeting summaries, including a listing of decisions made and action items to ensure that we have fully communicated. If on review of the meeting summary it is discovered that decisions were not fully communicated, we will issue a revised summary noting updates. This documentation allows our clients to record decisions that had been made early in the project or perhaps by previous staff members. Our document reminders help the project team avoid delays and stay on track. We will provide a monthly project status report with monthly invoices.



COMMUNICATION

Regular meetings are important but are not our only means of communication. We will tailor our communication style to meet the preferences and schedule of the City staff. We regularly track lists of outstanding items for each project and use the list to remind each responsible party of their task and deadlines.

Kimley-Horn has implemented state-of-the-art systems for online and virtual meetings where we can provide presentations, documents for review, real-time mark-ups, and virtual face-to-face communication.

PROJECT SUCCESS EXAMPLE

AGL DOT, I-75 Commercial Vehicles Lanes Design-Build, Monroe County, GA: Kimley-Horn was contracted by AGL to develop a cost estimate for the facilities located within the limits of the I-75 improvement project. As part of this effort, Kimley-Horn also reviewed the provided test hole data to assess potential impacts to the existing 10", 14", and 16" STL high-pressure gas mains. These mains are critical gas lines, and any required relocation would have resulted in significant construction costs, permitting challenges, and service disruptions. After conducting a detailed conflict analysis, Kimley-Horn facilitated coordination between AGL, GDOT, and the roadway design consultant to present the findings and explore feasible design alternatives. This early and proactive collaboration was instrumental in finding practical solutions that minimized impacts to existing utilities. By working closely with the roadway design team, Kimley-Horn was able to recommend specific adjustments to proposed storm drainage layouts and roadway grading that would maintain required clearances and avoid conflicts with the gas mains. This strategic coordination effort ultimately allowed AGL to leave its facilities in place, saving substantial time and money by eliminating the need for gas main relocations. The teamwork between all parties not only protected vital infrastructure but also streamlined the project schedule and reduced construction risks. This effort highlights the value of early utility coordination in complex infrastructure projects.

BILLING RATES

Kimley-Horn will work under various compensation methods. For well-defined scopes, we typically will propose a lump-sum fee contract with a detailed hourly estimate by task for the clients review and concurrence. Those scope list all assumptions and clarifications. Lump-sum tasks may align with the clients goal of maintaining a firm budget for the project. Alternatively, where a project scope is indeterminate such as on-going or as-needed services, we will typically work under a time and materials contract with a not to exceed amount that may be adjusted or reduced as the project requirements dictate. Our current hourly labor rate schedule is below.

Classification	Rate	Personnel
Analyst I	$130-$160	Mackenzie Norris Nate Morgan Accountant
Analyst II	$170-$200	Anna Lentz Ray Singh
Professional	$200-$230	Nick Skillen Hendrik Burger
Senior Professional I	$255-$325	Jenny Jones Ryan Clark Matt Dunagin Mike Alexander
Senior Professional II	$350-$410	Senior Engineers
Senior Technical Support	$120-$300	CADD Tech
Technical Support	$100-$175	Summer Intern
Support Staff	$85-$145	Office Administrator

- Effective through June 30, 2026
- Subject to adjustment thereafter
- Internal reimbursable expenses will be charged at 5% of labor billings
- External reimbursable expenses will be charged at 15% mark-up, or per the contract
- Subconsultants will be billed per the contract

OPEN RECORDS

Kimley-Horn understands that all materials included in this submittal are the property of the City, and they will make every effort to protect the confidential elements listed on page 33.

APPENDIX

RESUMES

YEARS OF EXPERIENCE 13

ALPHARETTA, GA

JENNY JONES, PE

PROGRAM MANAGER AND LEAD ENGINEER

Jenny brings 13 years of diverse project experience, with expertise in natural gas pipeline design and utility coordination, project management, and permitting. Her technical background includes the design of horizontal jack and bores and HDDs beneath major roadways, railroads, and water bodies, as well as utility conflict analysis. She has been instrumental in conducting numerous route studies and analyses for AGL projects and has successfully led projects from conception through construction, effectively navigating complex challenges throughout the process. Additionally, Jenny has strong capabilities in civil site design, jurisdictional permitting, and National Pollutant Discharge Elimination System (NPDES) permitting. She is proficient in AutoCAD Civil 3D, BoreAid, Pipeline Toolbox, and ArcGIS Pro. Jenny brings proven leadership and hands-on experience to the Kimley-Horn team. ***Benefit to the City: Jenny has extensive experience in natural gas projects and collaboration with various Georgia municipalities, GDOT, and gas agencies. Her expertise will bring improved energy efficiency and cost savings.***

VIRGINIA BEACH, VA

RYAN CLARK, PE

PRINCIPAL-IN-CHARGE

PROFESSIONAL CREDENTIALS

Bachelor of Science, Civil Engineering, Virginia Polytechnic Institute and State University

Professional Engineer in GA, DE, ID, NC, NY, OH, PA, VA, WI, and WV

Ryan has earned a reputation for strong performance through his leadership of complex natural gas projects. During the past 15 years, he has successfully delivered projects routed within congested urban locations, situated within transmission easements, requiring permitting from multiple municipalities and agencies, and/or requiring delivery on aggressive schedules. He also is skilled in station design, including the design of launchers and receivers to support pigging operations. Ryan has valuable experience with permitting and design in roadway ROW. He also is highly skilled in jack and bore and HDD design and operations. Ryan has designed hundreds of successfully completed drills ranging up to 4,400 feet. He excels at leading cross-functional teams to deliver projects on time and within budget and will work closely with his carefully selected team members to bring best practices to you on this important project. ***Benefit to the City: Ryan Clark has led hundreds of natural gas projects for clients across the nation. He has deep knowledge of natural gas industry codes and standards ensuring efficiecy and compliance with the highest safety and regulatory requirements.***

YEARS OF EXPERIENCE 19

NASHVILLE, TN

MIKE ALEXANDER, PE

QA/QC MANAGER

PROFESSIONAL CREDENTIALS

Bachelor of Science, Mechanical Engineering, Georgia Institute of Technology

Professional Engineer in GA, AL, FL, TN, TX, and UT

Mike has 19 years of experience leading complex natural gas projects, including a decade of engineering and management experience with one of the largest natural gas utilities in the country. He specializes in design for transmission and distribution systems, and his expertise encompasses all aspects of engineering, construction, and operations, including natural gas pipeline design, metering, and regulating stations, renewable natural gas upgrading and injection, hydrogen blending, pipeline replacement programs, routing analysis, and horizontal directional drill (HDD). Mike also brings valuable experience in integrity management projects, regulatory affairs, and compliance, as well as pipeline program execution and management. Mike has successfully completed projects in states nationwide, many of which had aggressive timelines and complex permitting requirements. ***BENEFIT TO THE CITY: Mike has extensive experience in natural gas systems and has prior experience with a major gas utility provider that gives him valuable insight into the construction and operation side, increasing value to our clients.***

YEARS OF EXPERIENCE
5

ALPHARETTA, GA

NICK SKILLEN, PE, LEED GREEN ASSOC.

PROJECT ENGINEER

PROFESSIONAL CREDENTIALS

Bachelor of Science, Civil Engineering, University of Georgia

Professional Engineer in GA, FL, and TN

LEED Green Associate

Nick has a wide range of natural gas project experience to bring to the table. He has worked on distribution projects, transmission projects, station M&R projects, and more. He is skilled in M&R station design both with mechanical, site civil, and electrical design for regulator, over pressure protection, odorization, and metering projects. He has performed various trenchless HDDs and J&Bs and has performed difficult linear pipeline utility conflict design on distribution systems. For transmission projects, he has completed the design for hydrotesting, pipeline replacement, pipeline integrity analysis, and more. He is proficient in record drawing design for various linear and station natural gas projects and enjoys seeing various projects be successfully designed and built from start to finish. He regularly uses software, including Microsoft Project, AutoCAD Civil3D, ArcGIS Pro, Excel, and others often needed on these types of natural gas projects. ***BENEFIT TO THE CITY: Nick has extensive experience providing design for a variety of natural gas projects in the Southeast.***

CONSULTANT'S AFFIDAVIT OF EMPLOYMENT ELIGIBILITY

STATE OF GEORGIA
NEWTON COUNTY

By executing this affidavit, the undersigned Contractor verifies its compliance with O.C.G.A. 13-10-91, stating affirmatively that the individual, firm, or corporation which is engaged in the physical performance of services on behalf of **City of Covington** has registered with, is authorized to use and uses the Federal work authorization program commonly known as E-Verify, or any subsequent replacement program, in accordance with the applicable provisions and deadlines established in O.C.G.A. §13-10-91. Furthermore, the undersigned Contractor will continue to use the Federal work authorization program throughout the contract period.

The undersigned further agrees that, should it employ or contract with any Subcontractor(s) in connection with the physical performance of services pursuant to this contract with the **City of Covington.** Contractor will secure from such Subcontractor(s) similar verification of compliance with O.C.G.A. 13-10-91. Contractor further agrees to maintain records of such compliance and provide a copy of each such verification to the **City of Covington** at the time the Subcontractor(s) is retained to perform such service. Contractor hereby attests that its Federal work authorization user identification number and date of authorization are as follows:

2023677

E-Verify Company ID Number

11/17/2022

Date of Authorization

Kimley-Horn and Associates, Inc.

Name of Contractor

Request for Qualifications for Annual Consulting Services | #2025-15 RFQ

Name of Project

I (We) hereby declare under penalty of perjury that the foregoing is true and correct.

SAVE AFFIDAVIT

STATE OF GEORGIA
NEWTON COUNTY

By executing this affidavit under oath, as an applicant for a public benefit, as referenced in O.C.G.A. §50-36-1, administered by the Georgia Department of Community Affairs, the undersigned applicant verifies one of the following with respect to my ability to enter into a contract with the City of Covington:

1) ✓ I am a United States citizen.

OR

2) _____ I am a legal permanent resident of the United States.

OR

3) _____ I am an otherwise qualified alien or non-immigrant under the Federal Immigration and Nationality Act and lawfully present in the United States with an alien number issued by the Department of Homeland Security or other federal immigration agency. My alien number issued by the Department of Homeland Security or other federal immigration agency is:

_____

The undersigned applicant also hereby verifies that he or she is 18 years of age or older and has provided at least one secure and verifiable document, as required by O.C.G.A. §50-36-1(f)(1), with this affidavit.

The secure and verifiable document provided with this affidavit can best be classified as:

driver's license

In making the above representation under oath, I understand that any person who knowingly and willfully makes a false, fictitious, or fraudulent statement or representation in an affidavit shall be guilty of a violation of O.C.G.A §16-10-20, and face criminal penalties as allowed by such criminal statute.

Executed this the 16th day of July, 2025 in Alpharetta, GA (City), _____ (State).

CONFIDENTIAL

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See ***Specific Instructions*** on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Kimley-Horn and Associates, Inc.

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☑ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) _____

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) _____

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) **5**

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any) _____

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions ☐

5 Address (number, street, and apt. or suite no.). See instructions.

421 Fayetteville Street, Suite 600

6 City, state, and ZIP code

Raleigh, NC 27601

Requester's name and address (optional)

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–		–				

or

Employer identification number

5	6	–	0	8	8	5	6	1	5

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person** Tammy Fox **Date** March 1, 2025

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

COVINGTON georgia

A MEMBER OF **THE CAMPOS FAMILY**

August 5th, 2025
Mike Jewell
Gas Director
City of Covington
Subject: Statement of Qualifications – Annual Consulting Services RFQ #2025-15

Dear Mr. Jewell,

Campos EPC, LLC (CEPC) is pleased to submit our Statement of Qualifications in response to the City of Covington's Request for Qualifications (RFQ #2025-15) for Category A – On-Call Consulting Services. We appreciate the opportunity to support the City's Natural Gas Department and are confident that our team's experience, technical capabilities, and commitment to client alignment make us an ideal partner.

Since our founding, CEPC has grown from a small engineering company to a multi-disciplinary professional consulting firm—successfully expanding engineering and design services across the country, supporting clients and communities by extending the life of existing infrastructure, enabling system expansion, assisting in regulatory compliance, and replacing aging assets. As the organization grows, we consistently invest in operations that are local to the markets we serve, allowing for close collaboration and a staff that specializes in the needs, standards, and processes of our clients. We have performed work similar to what is requested in this RFQ for many natural gas and electric utility operators across the U.S., including Dominion Energy, NiSource (Columbia Gas of Virginia & Maryland), Duke Energy/Piedmont Natural Gas, Eversource, PG&E, and Xcel Energy.

Our goal is to always align with our clients by providing local support whenever possible, ensuring a readily available presence, convenient access to CEPC leadership, and a strategic project execution and response plan. We envision leading the City of Covington efforts from our local office in Atlanta. Additionally, CEPC will leverage our East Region offices (Boston, Charlotte, Philadelphia, Amherst, and Tampa) as well as our corporate office in Denver and numerous other national locations as needed. This ensures a scalable and responsive team for Covington's project needs.

The CEPC team includes Professional Engineers (PEs) registered in nearly every U.S. state, who are actively involved in all projects—from mentoring teams to reviewing designs, calculations, and equipment selection. We also are proud to partner with Suburban Consulting Engineers, Inc. (SCE) as a key subcontractor. SCE is a full-service, multi-disciplined engineering and geospatial consulting firm with a strong presence in Georgia and a proven track record supporting municipal utilities.

We acknowledge receipt of the RFQ and any subsequent addenda. Please do not hesitate to contact us with any questions or requests for additional information. We look forward to the opportunity to serve the City of Covington.

Sincerely,
Justin Kuster, P.E. (GA PE 047081)
Area Manager - Campos EPC

1. Team & Qualifications

Campos EPC & SCE are proud to present a highly qualified and experienced team of professionals with deep expertise in natural gas infrastructure, engineering design, permitting, construction support, and regulatory compliance. Our team is structured to provide responsive, high-quality service across both ***Category A – On-Call Consulting Services*** as outlined in the City of Covington's RFQ.

Our professionals bring decades of combined experience supporting municipal utilities, public agencies, and private operators across the Southeast and nationally. Each team member has been carefully selected for their technical expertise, leadership, and proven ability to deliver results in complex utility environments.

- **Chris Barros, P.E., – Regional Vice President - East** - Brings 30 years of energy industry experience, including leadership roles at ODIN EPC and Veolia North America. He has a strong background in engineering, project management, and large-scale feasibility, design, and construction projects, with prior experience at Eversource.
- **Justin Kuster, P.E., – Senior Engineer / Project Manager** - Over a decade of experience in utility pipeline engineering, specializing in distribution and transmission. Led over 100 miles of pipeline projects and previously supported Atlanta Gas Light with DOT-related relocations.
- **Joe Craycraft, P.E. – Director of Integrity Services** - Expert in asset lifecycle management for high-pressure pipelines. Leads MAOP reconfirmation, risk analysis, and integrity assessments, with strong experience in GIS and document systems.
- **Rusty Adler – Director of Engineering, Station** - Specializes in station and pipeline design, pressure analysis, and valve automation. Has worked on diverse projects for major utilities including PG&E and Xcel Energy.
- **Ryan Wamble, P.E. PMP – Director of Engineering, Pipeline** – Extensive field and design experience in pipeline replacements and hydrostatic testing. Skilled in trenchless installation and environmental permitting, managing large-scale programs.
- **Romeo Shiplee, P.E. – Director of Geotechnical Engineering** - 17 years of geotechnical and construction observation experience. Expert in trenchless methods, feasibility studies, and geotechnical support for complex infrastructure projects.
- **Tyler Weiers, P.E., CP 4 – Manager, Corrosion Control** - Licensed in 30 states and certified in cathodic protection. Provides corrosion mitigation, electrical grounding, and power system design for gas utilities nationwide.
- **Matthew J. Beksel, PE – Senior Associate / Gas Utility Department Manager** - 17 years of experience in civil and utility engineering. Oversees engineering and inspection teams, manages gas transmission projects, and brings strategic insight and technical leadership to complex infrastructure initiatives.
- **Gregory V. Nicosia, PE – Project Engineer** - licensed Professional Engineer with a background in chemical engineering and an MBA. Excels in managing complex gas utility projects, training new designers, and producing detailed technical deliverables

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

- **Matthew J. Pskowski – Senior Project Coordinator** - Mechanical engineer with over 13 years of experience in gas utility project coordination. Specializes in managing large-scale utility construction projects, corrosion control, and regulatory compliance.
- **Kevin P. Campbell – Principal / Client Development Manager** – Over 15 years of experience in utility infrastructure and client relationship management. Has led strategic planning and coordination for over 3,500 miles of pipeline projects.

Additionally, our sub-consultant, SCE, provides full-service solutions on all aspects of natural gas-related projects including feasibility studies and route planning, surveying, preliminary and final design, construction and environmental permitting, traffic control plans, related regulatory coordination, applications and approvals, construction cost estimates, and bid phase services. We understand the criticality during construction on natural gas utility projects, and our professionals are well trained and experienced in providing project management, material tracking and traceability, construction stake-out, construction inspection, Enhanced GIS Data Collection, and as-built survey and plan generation. SCE's GIS department provides additional support to our Gas Utility Department with developing and implementing custom GIS systems specific to Client needs. Our successful project history, local knowledge, and well-established relationships with governmental agencies, supports SCE's position as a leader in the gas utility industry throughout the State of Georgia region.

2. Project Experience

Category A – On-Call Consulting Services

Pipeline HDD inspection

Owner: Private Utility Client
Contact Info: Private
Role of Firm: CEPC provided coating conductance testing on HDD.
Contract Value: $50k
Year Completed: 2025
Description: Coating conductance testing for pipelines installed via Horizontal Directional Drilling (HDD) ensures protective coatings can endure mechanical stresses and prevent corrosion. This quality assurance process includes lab and field tests, along with post-installation in-situ evaluations like visual inspections, holiday detection, and electrical conductance testing.

Enhanced GIS, As-built preparation, and Construction Support

Owner: Private Utility Client
Contact Info: Private
Role of Firm: increase the Client's pipeline capacity into Northwest Metro Atlanta and alleviate low pressure situations experienced during cold weather periods in these areas.
Contract Value: $175k
Year Completed: 2025
Description: Construction support for pipeline projects includes technical documentation such as Post Construction Redlines, HDD Daily Field Reports, and Data Reviews to ensure quality and compliance. Final integrity checks like Metallurgical Reviews, Pressure Test validation, and FIP/HAZOPS completion help confirm operational readiness and mitigate risks before commissioning.

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

Route 46 Reinforcement Project

Owner: New Jersey Natural Gas
Contact Info: James Perry & Dylan Rodgers, (973) 586-4691
Role of Firm: SCE provided engineering, surveying, environmental, and permitting services for pipeline design and permit submission.
Contract Value: Not disclosed
Year Completed: 2024
Description: The project included 2.3 miles of 12" steel trunk gas main and 1 mile of 6" steel replaced with 8" plastic distribution main. SCE designed trenchless crossings, coordinated with agencies, and obtained necessary approvals.

Replacement of District Regulator Station #02-C

Owner: Private Utility Client
Contact Info: Private
Role of Firm: SCE performed survey, easement coordination, and permitting for regulator station relocation.
Contract Value: Not disclosed
Year Completed: 2023
Description: The aging regulator station was relocated 500 feet for improved access. SCE designed the new station, coordinated easement acquisition, and prepared traffic control plans.

System Reinforcement Regulator Station

Owner: Private Utility
Contact Info: Private
Role of Firm: SCE provided full design services including civil, mechanical, and electrical engineering, as well as permitting support.
Contract Value: $14 million
Year Completed: 2022
Description: This project involved the design and construction of a regulator station to reduce high-pressure gas to distribution pressure. SCE provided complete design and permitting services.

M&R Station Integrity Improvements

Owner: Private Utility
Contact Info: Private
Role of Firm: SCE provided design, procurement support, and inspection services.
Contract Value: Not disclosed
Year Completed: 2021
Description: The project included piping downgrade and replacement to improve station integrity. SCE supported design and construction phases.

Gas System Modernization Program (GSMP)

Owner: Private Gas Utility
Contact Info: Private
Role of Firm: SCE supported the full project lifecycle from design to as-built documentation.
Contract Value: Not disclosed
Year Completed: Ongoing
Description: SCE supports the replacement of 50 miles/year of cast iron and vintage steel mains across New Jersey. Services include design, permitting, construction support, and record drawing preparation.

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

10 PSIG System Upgrade (Phase II)

Owner: Private Utility
Contact Info: Private
Role of Firm: SCE provided design, permitting, and bid document preparation.
Contract Value: Not disclosed
Year Completed: 2020
Description: This project upgraded a low-pressure system to 60 PSIG in Washington, NJ. SCE prepared design drawings, obtained permits, and supported bidding.

Century Road Bridge Rehabilitation

Owner: Private Utility
Contact Info: Private
Role of Firm: SCE provided structural design and permitting services.
Contract Value: Not disclosed
Year Completed: 2019
Description: The project involved relocation of a 24" gas main via free span across a bridge in Paramus, NJ. SCE designed the support system and secured necessary permits.

Infrastructure Investment Program (IIP)

Owner: Private Gas Utility
Contact Info: Private
Role of Firm: SCE provided full design packages, Maximo work orders, and record updates.
Contract Value: Not disclosed
Year Completed: Ongoing
Description: The program includes replacement of 150 miles of LP main and upgrades for 20,000 customers across New Jersey. SCE supports design, documentation, and GIS integration.

3. Project Approach / Execution Plan

The management of services and open lines of communication between Campos EPC/SCE and City of Covington leadership is a vital condition to a successful partnership. For this reason, the team organization is structured in a manner to allow for **regionally focused operational leadership.**

Split into regional areas and further into regional districts, our local operation will be led by **Area Manager, Justin Kuster** to provide direct and immediate access to City of Covington counterparts and project partners and will be responsible for the day-to-day operations, project/program management, proposal development, and overall client management. Our experience has shown that establishing a regional

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

operation center increases our leadership's ability to develop an in-depth and specialized **understanding of City of Covington's goals, objectives, processes, and standards**.

At Campos EPC, one of our core values is **Client Alignment**. We operate in service of our clients with a mission to help them reach their goals and objectives. We use our collective knowledge and experience to work together to anticipate issues or pitfalls that may impact our success rate.

2.1 Management of a Work Order (Hub & Spoke Service Delivery Model)

Campos EPC & SCE will manage an engineering project Work Order via a 'Hub and Spoke Service Delivery Model' which will effectively engage Project Management, Project Controls and more significant the necessary technical subject matter experts (SMEs) . Upon award of a Work Order, Campos EPC executive leadership will assign a dedicated project team to ensure optimal Project Management and Controls with emphasis on assigning technical discipline SMEs. The assigned Project Manager will fully own the responsibility to deliver the project safely, on schedule, under budget, and; supported by our Quality Assurance/Quality Control (QA/QC) department, of high quality. The Project Manager will be the dedicated project leader ("HUB"). Assigned SME's ("Spokes") will have well defined scope of work expectations, delivery milestones and clear QA/QC expectations.

The Project's Hub and Spoke delivery team will socialize weekly as an internal project team via working meetings to prepare in advance for City of Covington's project status meetings. Campos EPC's Area Manager – Justin Kuster has extensive experience working within Pipeline Project Management Departments and will leverage this experience to ensure Projects seamlessly aligns with City of Covington's Delivery model. This will include alignment with City of Covington's Asset Management, Engineering, Project Management and Controls, Gas Operations, Instrumentation and Controls and Construction Operations. Delivery expectations will be met across these departments via robust project 'Hub" meetings at City of Covington's offices. Potential risks-to-project will be used to extrapolate the overall projects forecasted spend. Month-over-month the Project Manager supported by a dedicated biller will upload and process timely high-quality invoices for City of Covington's review and approval. Potential risk(s) to the project's performance will be communicated to City of Covington's leadership monthly or sooner, if appropriate. Reporting will consist of dashboards expressing the project's safety, scope, schedule, budget status, management of change with emphasis on impacts to the overall projects forecasted spend.

Campos' SME resources include the most highly experienced subject matter experts in Gas Engineering, Electrical Engineering, EPC, Project/Program Management and Project Controls who, as part of our Process Department, provide the quality management, technical oversight and training, process documentation, and KPI/Benchmarking data that ensure our services meet client expectations on quality, clearly communicate project performance, and reflect exceptional technical competency.

Every project begins with a fatal flaw analysis to understand any challenges that could impact the design, scope, and schedule of its execution. Our analysis involves, as applicable, permitting, environmental, geotechnical, land, roadways, and other external factors that can have a significant project impact(s) if

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

not factored in at the onset. Permitting and environmental involves the conditions in the field, the regulations governing activities, and the engagement of all stakeholders, such as Public Agencies, public works, public interest groups, local cities, etc. Our approach integrates all these stakeholders and any environmental (including high consequence areas) as part of the project feasibility to identify, plan for, and resolve potential flaws before they impact design, schedule, and cost.

2.2 Project Management

Kick Off Meeting

After notice-to-proceed, Suburban Consulting Servies will schedule a Kick-Off Meeting with our selected Team to review the work scope, responsibilities, and schedule. Key members of the overall Project Team will participate in the project Kick-Off Meeting to collect pertinent project, site-specific data, and design criteria.

The Agenda for the Kick-Off Meeting will typically address the following topics:

- Confirm the project's objectives
- Establish lines of communication between project responsible persons and other third parties as applicable
- Establish/confirm co-ordination roles with third parties
- Outline the QA/QC Processes required for all deliverables
- Outline Covington's review and approval requirements
- Outline path forward for the standards, specifications to be used

Project Execution / Coordination Procedure

Concurrent with the Kick-Off activities, CEPC will prepare a Project Execution Plan (PEP) to meet the needs of this project and City of Covington's specific requirements. The Execution Plan will be prepared under direct guidance from CEPC's Project Manager and Lead Engineer as well as a joint effort by all departments / discipline leads on the Project Team to define and communicate the specific direction by which the project is to be executed in accordance with the Contract and within the budget and schedule duration. The Execution Plan will be used to inform project personnel of their functions, interfaces, scope of work and individual/collective activities required in achieving mutual goals and the specific strategies.

The Project Execution Plan will be finalized and issued for City of Covington's review and approval during the first two weeks after receipt of Notice to Proceed. Once approved and issued, the PEP will be kept current throughout the project.

The Project Execution Plan will address the following items:

- Document Management
- Schedule
- Cost Budget
- Recovery Plan

Status Review Meetings - The following will be used to determine the project status:

- Safety Statistics
- Schedule Status

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

- Deliverable Status
- Needs List (Action) items
- Procurement Progress
- Construction Activities Progress
- Cost Reports
- Third Party Inspection of procurement/fabrication progress reports

Any deviations from the plan will require a mutually agreeable corrective action which will be monitored closely to ensure that the overall goals of the project are not jeopardized.

Change Management Procedure – Campos EPC & SCE will use the Change Order process maintained by City of Covington to raise early warnings and communicate potential change orders to City of Covington to ensure that no work is commenced on variations or deviations to scope without prior approval by City of Covington. The change control system is intended to be forward looking, acting as a tool for control and ensuring early notification and consideration of the implications of any proposed changes, their effect to the Contract Price and scheduled completion dates.

Confidential *- Without the prior written permission of Campos EPC, LLC the contents of this page and this document, in whole or part, are not to be disclosed to any third party, and are to be disclosed only to client personnel that have the need to know.*

BUILDING PERMIT APPLICATION

Date Received: _____

Received By: _____

Permit No.: _____

Invoice No.: _____

PLEASE COMPLETE THE FOLLOWING:

Commercial plan review fee: $250.00 Residential plan review fee: $75.00

Incomplete applications will be denied and returned to the applicant.

I. PROJECT INFORMATION:

Project Address: 10835 Hazelbrand Road NE, Covington, GA 30014

Parcel ID: 0080-083 Parcel Size (Acres): 3.5 Zoning District: M-2

Project Name: VoltaGrid Server Farm

Description of Project: Containerized Natural Gas Reciprocating Generators

Permit Type: ☐ Residential ☐ Commercial ☑ Industrial ☐ Other

Project Type: ☐ New Construction ☐ Interior Build/Remodel ☐ Exterior Remodel ☐ Basement Finish

☐ In Ground Pool ☐ Shell Only ☐ Other _____

New Construction:
# of bedrooms: _____ # of full baths _____ # of half baths _____ detached ☐ attached ☐ garage

Project Cost/Valuation (excluding land cost): _____

Total Square Footage: _____

Intended Use of Structure(s): ☐ Single Family House ☐ Multifamily House ☐ Apartment

☐ Retail ☐ Restaurant ☐ Professional ☐ Other _____

Building Height: _____ Number of Levels: _____

Will a temporary power pole be needed? ☐ yes ☐ no Fire Sprinkler System Provided? ☐ yes ☐ no

Is the property located within a historic district? ☐ yes ☐ no
If yes, applicant must also submit proof of a Certificate of Appropriateness.

II. APPLICANT INFORMATION:

Name: _____

Address: _____

Phone: _____ Email: _____

Applicant is: ☐ Property Owner ☐ General Contractor ☐ Business Owner/Tenant

☐ Architect/Engineer ☐ Other _____

III. REQUIREMENTS:

☐ 1 full set of stamped building plans on 24" x 36" paper (including site layout plan, Tree Preservation Plan, backflow protection device and grease trap – if applicable)

☐ 2 separate sets of electrical plans (non-residential) ☐ 1 separate set of gas plans (non-residential)

☐ 1 set of digital plans in pdf format ☐ Plan review fee

☐ Signed affidavit ☐ Copy of state license ☐ Copy of business license ☐ Copy of driver's license

☐ Signed subcontractor affidavit for each subcontractor

☐ If structure is to be placed on a septic system, please provide proper documentation from the Newton County Health Department.

☐ If your home is in Covington's Historic Districts, you will need to complete a Certificate of Appropriateness **prior** to the completion of this application.

IV. CONSTRUCTION TYPE- IBC 503

☐ Type I (**Fire Resistive**) concrete and steel structure (including roof)

☐ Type II (**Non-Combustible**) steel or concrete walls – similar to Type I but roof material is combustible

☐ Type III (**Ordinary – Brick and Joist Structure**) masonry bearing walls with floors, structural framework and roof made of wood or other combustible material

☐ Type IV (**Heavy Timber**) masonry wall similar to Type II but interior consist of heavy timber

☐ Type V (**Wood Frame**) interior and exterior walls are wood framed

Exterior Building Material: ☐ Brick ☐ Stone ☐ Stucco/EIFS ☐ Other _____

Roofing Material: ☐ Metal ☐ Asphalt ☐ Other _____

After July 1st, tax amount is pro-rated by 50%.

Practitioners of professions as described in O.C.G.A Section 48-13-9(c) (1)-(20) shall elect as their entire occupation tax one of the following:

☑ The occupation tax is based on the number of employees, including owners.

☐ A tax of $100.00 per practitioner who is licensed as such by the state of Georgia. The tax under this option shall apply to each practitioner maintaining an office or location in the city.

Is this business a non-profit 501(C) (3)? ☐ yes ◉ no
If yes, please include letter of certification. Exempt status to include disable Veterans (sole propriety) legally blind owned businesses, state, and local authorities.

Please check one of the following business types for this business:

* ☑ Corporation ☐ LLC ☐ Sole Proprietorship ☐ Partnership (attach required documentation)

Please note: Occupational tax expires on December 31st of each calendar year. You must renew your tax on an annual basis prior to January 31st of the following year. If it is not paid penalty fees will be applied per O.C.G.A 48-2-40. Failure to comply shall result in a citation to Municipal Court which shall require court fees in addition to paying the occupational tax. Administration Fee on late renewals are $50 plus the occupational tax fee.

If this business is no longer in operation, please notify our office in writing, so that we can close your account.

I have read and understand that it shall be my responsibility to renew this occupational tax on an annual basis and agree to pay all penalties incurred.

Tammy Wallace **Signature / Date** 3/13/2026

OCCUPATIONAL TAX APPLICATION

Verification Status for Public Benefits & Private Employer Affidavit (E-Verify)

SECTION 1 – Please Check One

As required by the State of Georgia through OCGA 50-36-1(e), the City of Covington must verify your eligibility for Georgia Public Benefits through the Systematic Alien Verification of Entitlement (SAVE) Program operated by the United States Department of Homeland Security before a license is issued.

By executing this affidavit under oath, as an applicant for a public benefit referenced in O.C.G.A. Section 50-36-1, I am stating the following with respect to my City of Covington, Georgia, application for: Occupational Tax

☑ I am a United States Citizen

☐ I am a legal permanent resident 18 years of age or older or I am otherwise a qualified alien or non-immigrant under the Federal Immigration and Nationality Act 18 years of age or older and lawfully present in the United States. *If selecting this box **must include documents** to verify immigration status with application.

SECTION 2 – Please Check One

☐ 10 OR LESS EMPLOYEES

By Executing this affidavit, the undersigned private employer verifies that it is exempt from compliance with O.C.G.A. § 36-60-6, stating affirmatively that the individual, firm or corporation employs ten (10) or less Employees and therefore, is not required to register with and/or utilize the federal work authorization program commonly known as E-Verify, or any subsequent replacement program, in accordance with the applicable provisions and deadlines established in O.C.G.A. § 13-10-90.

☑ MORE THAN 10 EMPLOYEES (Please visit https://www.uscis.gov or call 1-888-464-4218)

By executing this affidavit, the undersigned private employer verifies its compliance with O.C.G.A. § 36-60-6, stating affirmatively that the individual, firm or corporation employs more than ten (10) Employees and has registered with and utilizes the federal work authorization program commonly known as E-Verify, or any subsequent replacement program, in accordance with the applicable provisions and deadlines established in O.C.G.A. § 13-10-90. Furthermore, the undersigned private employer hereby attests that its federal work authorization user identification number and date of authorization are as follows:

160357 — Federal Work Authorization User Identification Number/E-Verify

05/30/2012 — Authorization

Date: 3/13/2026

Authorization Number is ONLY required if business employees more than 10 Employees.

TITLE:
DRAWING INDEX MECHANICAL

NO.	DATE	REVISION DESCRIPTION	DRAWN	CHECK	APPR
0	12/19/2025	ISSUED FOR CONSTRUCTION	CN	MA	BD

PROJECT NAME/NUMBER:
SERVER FARM ATL2

DRAWING NO.:
25108102-001-MP-DRW-0000-002

SCALE: NONE

REV.: 0

NUMBER OF SHEETS: 2 OF 2

LINE SYMBOLS

- MAJOR PROCESS LINES
- MAJOR SECONDARY
- MINOR PROCESS OR UTILITY LINES MINOR SECONDARY
- INSTRUMENT LINES
- PNEUMATIC LINES (GAS OR AIR)
- ELECTRICAL LEADS
- HYDRAULIC LINES
- INSTRUMENT CAPILLARY TUBING
- HEAT TRACE (ELECTRIC)
- SONIC
- INTERNAL DATA LINK
- BINARY
- SKID OR PACKAGE UNIT LIMITS FUTURE PROCESS LINES
- EXISTING PROCESS LINES
- LINES GOING TO OR FROM A SPECIFIED DRAWING
- DIRECTION OF FLOW

VALVE SYMBOLS

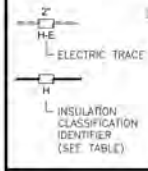
- GATE VALVE
- BALL VALVE
- GLOBE VALVE
- PLUG VALVE
- CHECK VALVE
- NEEDLE VALVE
- BUTTERFLY VALVE
- CLOSED VALVE
- ANGLE VALVE
- THREE WAY VALVE
- FOUR WAY VALVE
- PRESSURE RELIEF VALVE
- PRESSURE/VACUUM RELIEF VALVE
- DUMP VALVE
- GAUGE GLASS VALVE
- BLIND FLANGE W/BLEED VALVE & PLUG
- CONTROL VALVE
- PRESSURE REGULATOR (SELF CONTAINED)
- PRESSURE REGULATOR (REMOTE SENSING)
- DOUBLE ACTING PISTON ACTUATOR
- SINGLE ACTING PISTON ACTUATOR SPRING RETURN
- ELECTRIC MOTOR OPERATED VALVE
- ROTARY MOTOR OPERATED VALVE
- THREE WAY SOLENOID VALVE
- GAUGE VALVE
- BLEED RING WITH VALVE

MISCELLANEOUS SYMBOLS

- FLANGE
- ORIFICE FLANGE
- BLEED RING
- PADDLE SPACER
- BLIND FLANGE
- HOSE CONNECTION
- WELD CAP
- PIPE BREAK
- QUICK OPENING CLOSURE

FIRE SYSTEM SYMBOLS

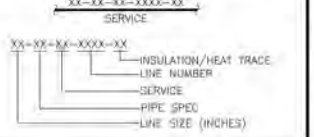
- HOUSED HYDRANT – TWO HOSE OUTLET
- POST INDICATING VALVE
- FIREWATER MONITOR
- HOSE REEL
- SPRINKLER HEAD W/ SPRAY NOZZLE



MISCELLANEOUS SYMBOLS CONTINUED

- ORIFICE PLATE (BETWEEN FLANGES)
- INSULATING FLANGE JOINT
- OPEN SPECTACLE BLIND
- CLOSED SPECTACLE BLIND
- STARTUP STRAINER
- PLUG
- CONCENTRIC REDUCER
- ECCENTRIC REDUCER (SHOWN FLAT SIDE DOWN)
- CONCENTRIC SWAGE
- FLEXIBLE HOSE (FLANGED)
- FLEXIBLE HOSE
- EXPANSION BELLOWS
- INSULATION
- BASKET STRAINER
- MAGNETIC METER
- FLOW INDICATOR
- CLEANOUT TEE
- SILENCER
- INLINE MIXER
- FLAME ARRESTOR
- MECHANICAL ISOLATION JOINT
- ULTRASONIC METER
- FLOW ELEMENT (VENTURI)
- FLOW ELEMENT (TURBINE)
- FLOW ELEMENT (VORTEX)
- FLOW ELEMENT (QUICK CHANGE ORIFICE PLATE)
- FLOW STRAIGHTENING VANES
- RUPTURE DISC
- PITOT OR PITOT–VENTURI
- OVERVOLTAGE PROTECTOR
- FIVE VALVE MANIFOLD
- THREE VALVE MANIFOLD
- RAIN CAP
- PIPE MITER
- BARRED TEE
- AUTOMATIC AIR RELEASE
- AUTOMATIC AIR/VACUUM RELEASE
- SPECIFICATION BREAK
- "Y" TRAP
- "P" TRAP
- SPECIALTY ITEM
- VENDOR SUPPLIED
- TIP–IN JOINT NUMBER
- PIG SIG
- UNION
- CORIOLIS METER
- POSITIVE DISPLACEMENT METER (LOCAL TOTALIZING)
- ROTAMETER
- FLOW ELEMENT–UNCLASSIFIED
- SAMPLE CONNECTION
- CORROSION PROBE
- FLOW SIGHT GAUGE
- INSTRUMENT AIR SUPPLY
- INSULATING UNION
- TWO VALVE MANIFOLD

SERVICE DESIGNATIONS



AG	ACID GAS	HO	HOT OIL	PTW	WATER, POTABLE
AI	AIR, INSTRUMENT	IA	INSTRUMENT AIR	RA	RICH AMINE
AS	AIR, STARTING	IG	INSTRUMENT GAS	RC	RAW CONDENSATE
CD	CONDENSATE	JW	JACKET WATER	RG	RICH GLYCOL
DPC	DRAIN, CLOSED	LA	LEAN AMINE	S	STEAM
DPO	DRAIN, OPEN	LG	LEAN GLYCOL	SC	STABLE CONDENSATE

EQUIPMENT DESIGNATIONS INSTRUMENT & ACTUATED VALVE NUMBERING

SEE GENERAL NOTES ON THIS SHEET

VALVE NUMBERING SYSTEM

VALVE TYPE

- BALL VALVE
  B1 = CONVENTIONAL PORT BALL VALVE
  B2 = CONVENTIONAL PORT ORBIT BALL VALVE
  B3 = FULL PORT BALL VALVE
  B4 = FULL PORT ORBIT BALL VALVE
- GLOBE VALVE
  L1 = GLOBE VALVE
- CHECK VALVE
  C1 = WAFER CHECK VALVE
  C2 = FULL BODY CHECK VALVE
  C3 = FULL BODY CHECK VALVE – PISTON TYPE
  C4 = EXCESS FLOW CHECK VALVE
- GATE VALVE
  G1 = CONVENTIONAL PORT GATE VALVE
  G2 = FULL PORT GATE VALVE
- PLUG VALVE
  P1 = CONVENTIONAL PORT PLUG VALVE
  P5 = NON LUBRICATED PLUG VALVE
- BUTTERFLY VALVE
  F1 = WAFER TYPE
  F2 = LUG TYPE
- NEEDLE VALVE
  N1 = THT
  N2 = WITH BLEED PORT
  N3 = WITH VALVED BLEED PORT
- ANGLE VALVE
  A1 = CONVENTIONAL PORT ANGLE VALVE
  A2 = FULL PORT ANGLE VALVE

VALVE MATERIALS

CODE	DESCRIPTION
1	CARBON STEEL
2	LOW TEMP.
3	304SS
4	316SS
5	1 1/4 CR – 1/2 MO
6	CPVC
7	BRASS

CONTROL VALVE DESIGNATIONS

CODE	DESCRIPTION
FC	FAIL CLOSED
FO	FAIL OPEN
FL	FAIL LOCKED (POSITION NO CHANGE)
TSO	TIGHT SHUTOFF
LO	LOCKED OPEN

INSULATION NOTE

CODE	DESCRIPTION
H	CALCIUM SILICATE
C	FIBERGLASS

VALVE DESIGNATION

CODE	DESCRIPTION
CSO	CAR SEAL OPEN
CSC	CAR SEAL CLOSED
GO	GEAR OPERATED
LC	LOCKED CLOSED
LO	LOCKED OPEN
NC	NORMALLY CLOSED
NO	NORMALLY OPEN
P	PLUGGED

PIPING SPECS

CODE	DESCRIPTION
A1	CLASS CS
AA	CLASS SS
B1	CLASS CS

LINE TREATMENT

CODE	DESCRIPTION
E	ELECTRICAL HEAT TRACE

MATERIAL

CODE	DESCRIPTION
C.S.	CARBON STEEL
S.S.	STAINLESS STEEL

Attention: Scott Cromer

Re: 2025-15, Annual Consulting Services
Category A - On-Call Consulting Services

Dear Mr. Cromer and Selection Committee:

Providing the City of Covington with consulting engineering services to protect and improve quality of life is a mission that requires people dedicated to serving citizens and backed by a team of dependable consultants. Keck & Wood (KW) is ready to provide reliable and steady professional services to help you serve the citizens and natural gas customers of the City of Covington. We are the right choice to be selected as the City's Site Plan Review Services for assistance in development plan review and natural gas technical assistance based on the following:

We Value Long-Term Relationships - As consulting professionals, we strive to be your trusted advisor. More than 75% of our work is generated from local government and municipal engineering projects resulting in long-term collaborative partnerships. For decades, we have been providing natural gas consulting services for clients including the Cities of Buford, Winder, and Eatonton, just to name a few. Additionally, dating back to 2017, we have been providing the City of Covington with a variety of engineering services with projects including Pace Street LCI, Traffic & Parking Study, Turner Lake Road Widening, and are currently one of the City's Annual Consulting Engineers. ***We value our longstanding client relationships.***

Dedicated Natural Gas Team - At KW we have a team of engineers dedicated to only serving the natural gas needs of our clients. Services include distribution system design; system mapping, modeling, and GIS; state DOT coordination, regulator station/metering design, system relocation and extensions; and bidding and construction administration. Having this niche service in-house, will benefit the City of Covington through ***streamlined communications coupled with a shared knowledge of City procedures from a tight-knit group of professionals.***

Responsiveness - Having served local governments throughout Georgia for 70+ years, we understand the need for effective communication and know how important it is to be responsive and nimble when serving on-call contracts. Our natural gas team of professionals is committed to being available to address your project needs and concerns. ***We know there will be times when you need our services on short notice and we will always be ready to serve!***

KW hereby acknowledges receipt of Addendum No. 1 dated July 21, 2025.

We look forward to partnering with the City of Covington. If you have any questions or need additional information, please contact me at 706-540-4010 (mobile), 678-417-4006 (direct), or by email at jpayne@keckwood.com.

Sincerely,

Keck & Wood, Inc.

John Payne, PE
Vice President | Natural Gas Market Leader

On-Call Consulting Services for the City of Covington will be performed by staff located in KW's Duluth, GA office.

Firm History. Since its founding in 1954, KW has continued the traditions of engineering excellence and commitment to exemplary service established by our founders, Wylly Keck and Tom Wood. ***With over 70 years of public sector experience***, KW has earned an outstanding reputation for integrity, knowledge, and professionalism in advising our clients. We are committed to improving the quality of life of the region and communities we serve through ethical conduct and dedicated client service.

Corporate Structure/Legal Status. KW is a Class C Georgia Corporation, incorporated in 1959, 100% employee owned, and governed by a seven person Board of Directors. From our offices in Duluth, GA, Rock Hill, SC, and North Charleston, SC, we serve clients in the southeastern states.

Business Activities. KW offers professional Engineering, Planning, Land Surveying, and Landscape Architecture services to provide solutions for natural gas, energy supply, transportation, traffic, parks & recreation, water resources, and urban redevelopment. We proudly serve community & local governments, state governments & jurisdictional authorities, utility infrastructure, public institutions, and private developers. ***Our natural gas professional services include***, but are not limited to:

- Distribution System Design
- System Mapping, Modeling, GIS
- State DOT Coordination
- Regulator Station/Metering Design
- System Relocation & Extensions
- Bidding & Construction Administration

Additional professional services include:

- Planning
- Traffic Engineering
- Rural & Urban Roadway
- Development Plan Review
- Streetscape
- Multi-Use Paths/Trails
- Parks & Recreation
- Utility Coordination
- Stormwater Systems
- Water/Wastewater Treatment
- Wastewater Collection
- Water Supply, Storage & Distribution
- Public Works Facilities
- Landscape Architecture

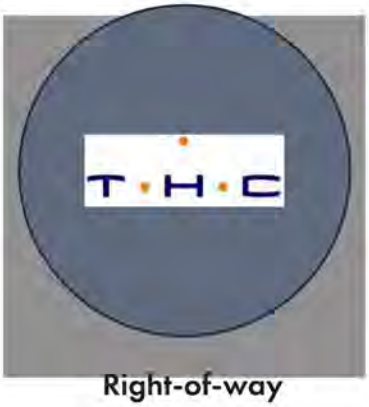
Subconsultant Firm Information

To augment the KW Team, we have included Trusted Partners and Professionals.

Environmental Assessments

Edwards-Pitman Environmental, Inc.

Edwards-Pitman provides natural and cultural resources surveys, environmental permitting and mitigation planning for transportation projects. Their environmental division offers a full range of NEPA and Permitting services; including ecological surveys, threatened and endangered species surveys, air and noise analysis and documentation, historical and archaeological resource surveys, Section 106 and 4(f) compliance, wetland delineations, jurisdictional determinations, Section 404 permitting and mitigation strategies. They offer experienced, well-trained, professional staff capable of producing exceptional environmental surveys and reports in a timely, cost-efficient manner.



Land Surveying

Rochester | DCCM

Since 1966, the ***Rochester | DCCM*** name has been synonymous with quality, reliability and expertise. As Georgia's premier infrastructure solution provider, their team of engineers, land surveyors, and GIS professionals, along with their exceptional support staff deliver technical knowledge and seasoned guidance backed by the responsiveness your project demands.

Since their inception, Rochester | DCCM's expertise in land surveying has given them a significant competitive advantage. By constantly staying on the forefront of new technology and techniques, their registered, professional land surveyors and survey teams deliver fast, accurate information.

- ALTA/ASCM surveys
- Boundary surveys
- Topographic, GPS, Volume surveys
- Easement/ROW Acquisition Services
- Database preparation
- Construction staking
- As-built surveys
- Airborne/static GPS photo control
- Infrastructure inventorying for GIS
- Revit modeling
- Boundary Disputes
- Construction layout
- Pipeline mapping
- Reservoir/shoreline surveys
- Wetland delineation
- Terrestrial scanning indoor/exterior
- Airborne lidar collection/extraction UAS/UAV
- Photogrammetry aerial collection & processing

Right-of-way

THC, Inc.

THC, Inc. is a professional program management firm providing right of way land acquisition, relocation and noise mitigation services for airports, highway departments, utility companies, municipalities, governmental agencies and engineering firms around the nation since 1994. Whether you need help acquiring property for natural gas system expansion, relocating families from a flood-prone area or managing an airport sound insulation program, THC can provide you with professional services to complete your local, state or federally funded project.

Organizational Chart

The team selected for the Annual Consulting Services is ready to serve the City of Covington!

We have the experience and personnel capacity needed for a successful delivery.

Representative Projects

KW has an extensive history completing natural gas infrastructure projects.

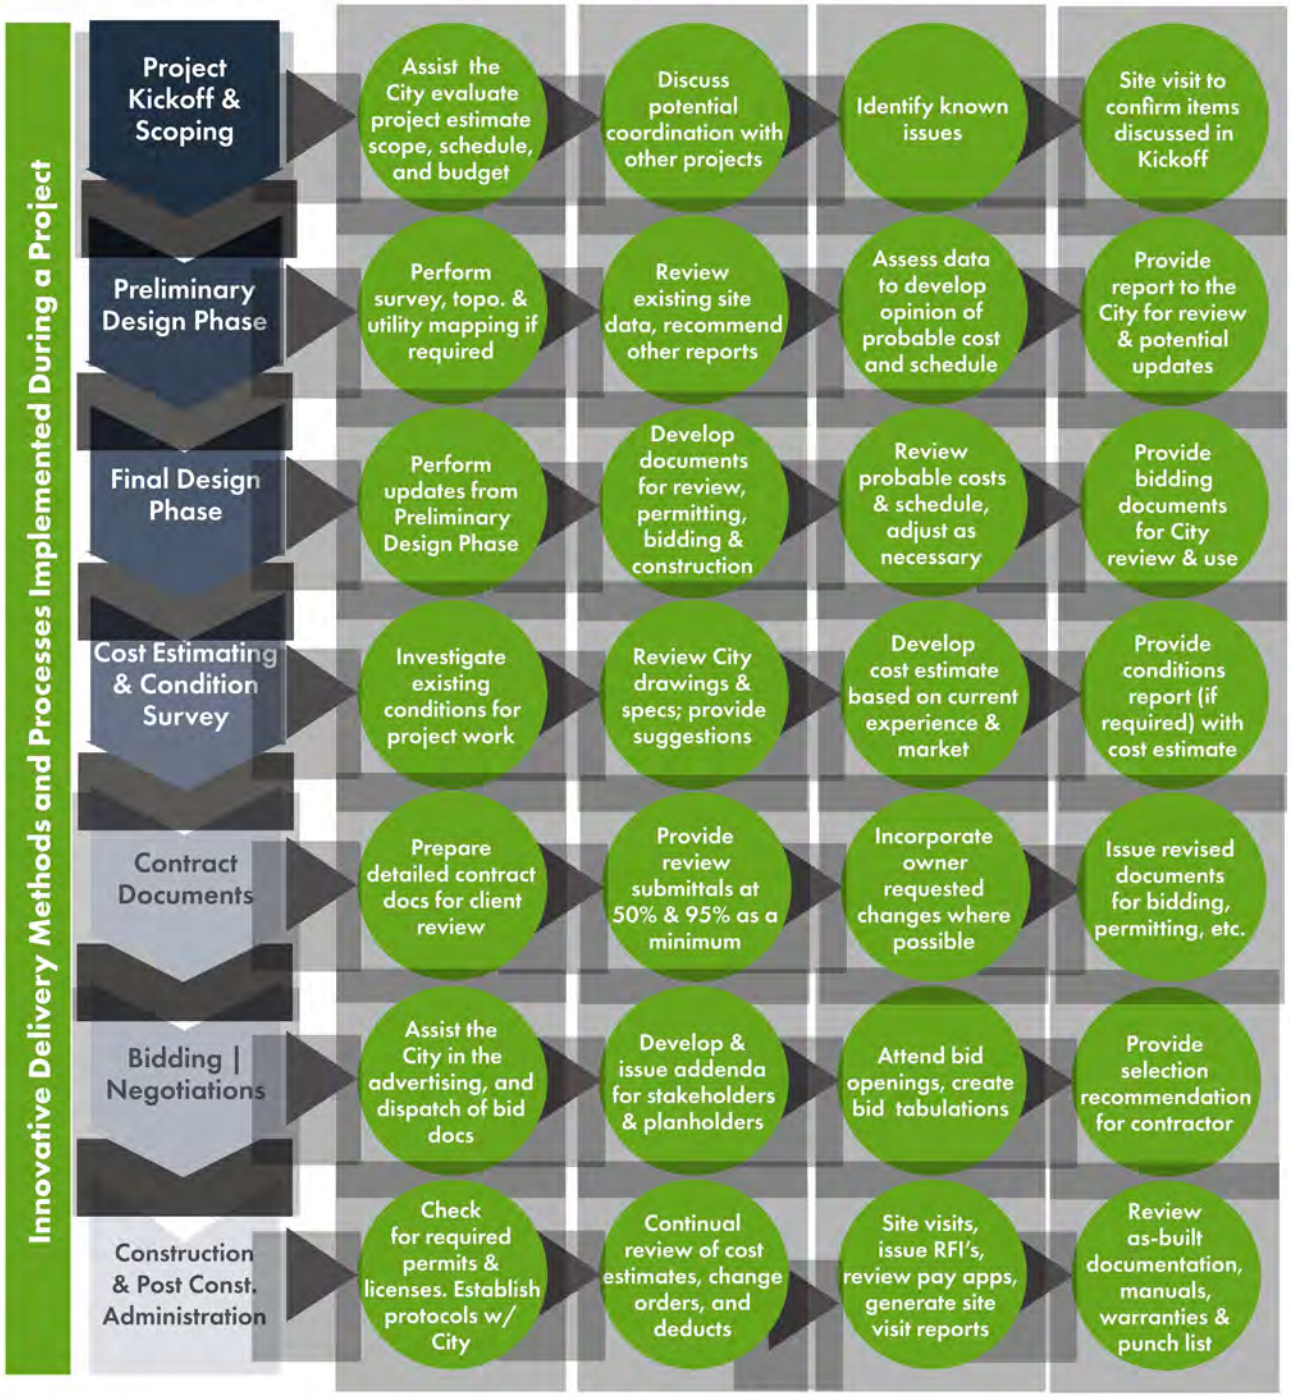
Below is a list of 50+ projects completed in the last 10 years. Highlighted project descriptions are located in the Appendix.

Owner	Project	Status/Year Complete
City of Adairsville Steve Smith | Gas Department Manager ssmith@adairsvillega.net	*Natural Gas Take Station Upgrades*	2024
	SR 53 Industrial Development Gas Service	2019
City of Buford Daren Perkins | Gas Superintendent dperkins@cityofbuford.com	Thompson Mill Road at North Bogan Road	'25 Awaiting Construction
	Indian Shoals Road Natural Gas Relocation	2024
	Sardis Church Road Natural Gas Relocation	2022
	2022 Annual Natural Gas Service Contract	2022
	SR 324 at SR 124 Gas Relocations	2021
	SR 324/I-85 Interchange Gas Relocations	2020
	Dacula Road - SR 8 Gas Relocations	2020
	2020 Annual Natural Gas Service Contract	2020
	SR 316 at Harbins Road Gas Relocations	2020
	SR 8 Gas Main Extension	2019
	SR 347 Utility Relocations	2019
	SR 324/Auburn Road Gas Facilities Relocations	2018
	2017 Annual Contract for Natural Gas Services	2017
	Harbins Road Gas Facilities Relocation	2016
	SR 8/SR 324 Natural Gas Line Replacement	2015
	Atlanta Highway/Auburn Natural Gas Extension	2015
City of Commerce Drew Hart | Gas Superintendent dhart@commercega.gov	I-85 Natural Gas Main GDOT Permitting	2025
	Fort Lamar Natural Gas Extension Assessment	2025
	SR 334 Natural Gas Main GDOT Permitting, Phase I	2025
City of Eatonton Gary Sanders | City Administrator gsanders@eatontonga.us	*Natural Gas System Mapping and Modeling*	2023
	6-Inch High Pressure Gas Main Improvements	'25 Final Design
	PHMSA Grant Application Assistance	2024
City of Lawrenceville Todd Hardigree | Natural Gas Director todd.hardigree@lawrencevillega.org	SR 316 from Collins Hill Road to Cedars	' 25 Awaiting GDOT Bid
	SR 81 at Ozora Church Road Natural Gas	2025
	SR 316 Natural Gas Relocation	' 25 Awaiting GDOT Bid
City of Madison Shawn Wood | Public Works Director swood@madisonga.com	US 441 North Utility Relocation - 2nd Submission	'25 Awaiting GDOT Bid
	Bostwick Natural Gas Main Extension, Phase II	2025
	SR 83 - Monticello Road Natural Gas Main	2024
	Bostwick Natural Gas Main Extension, Phase I	2023
	Natural Gas System Evaluation	2022
	US 441 Utility Relocations	2021
	US 278 Gas Main Extension	2017
City of Monticello Robbie Colvin | Gas Superintendent rcolvin@monticelloga.org	Gas System Mapping	2018

Representative Projects (cont.) | City of Covington Experience

Owner	Project	Status/Year Complete
City of Perry Chad McMurrian | Engineering Services Mngr chad.mcmurrian@perry-ga.gov	SR 127 Natural Gas Relocation	2022
	Houston Lake Road Gas Main Extension	2020
City of Sugar Hill Alex Philmon | Natural Gas Supervisor aphilmon@cityofsugarhill.com	Tessa Development Natural Gas Plans	2025
City of Thomson Trelles Robinson | Natural Gas Director trelles.robinson@thomson-mcduffie.gov	Camellia Park Gas Main Extension	2024
Tri-County Natural Gas Authority Wendell Matthews |Natural Gas Superintendent wmmtcng@gmail.com	SR 44 from S of King Drive to E of Greensboro	' 25 Awaiting GDOT Construction
City of Winder Horace Gee | Utilities Director horace.gee@cityofwinder.com	West Winder Bypass Utilities Relocation, Phase III	'25 Under Construction
	Linwood Avenue & Mimosa Street Natural Gas	2025
	2022 High Pressure Gas Main Improvements	2025
	Bethlehem Church - SR 53 Construction Administration	2024
	2024 PHMSA Grant Application	2024
	Bethlehem Church - SR 53 Gas Main Relocation	2023
	SR 11 at SR 211 Utility Relocation	2023
	Midland Avenue High Pressure Gas Main	2023
	Exchange Boulevard Utility Relocation - 1st Submission	2022
	Preserve at Dove Creek Natural Gas Main	2021
	Natural Gas System Pressure Improvements	2021
	Smith Mill Road Gas Main Extension	2020
	SR 316 at SR 53 Utilities Relocation	2020
	West Winder Bypass Utilities Relocations, Phase I	2020
	West Winder Bypass Utilities Relocations, Phase II	2020
	Gas System Regulator Station Relocation	2019
	SR 316/SR 81 Utilities Relocation	2018
	SR 8 - Ed Hogan Road Utility Relocation	2017
	McNeal Road Improvements	2016

COVINGTON georgia



City of Covington Experience. KW has provided the City of Covington with professional engineering services since 2017. In 2023 KW was selected for the City's Annual Consulting Services in the areas of engineering, planning, permitting, water resources, stormwater, transportation, plan review, and management. To date, projects have included:

- Pace Street LCI
- Drainage Pipe and Retaining Wall Rehabilitation
- Traffic and Parking Study
- Turner Lake Road Widening
- Floyd at East Design
- SLI and Backflow
- City Pond Road Design
- Police Parking Lot B
- 2024 Water & Sewer Revenue Audit
- SR 12/US 278 from SR 81 to Hospital Drive

Project Approach

Our time proven approach to project delivery provides a roadmap to success.

Civil Engineering can prove challenging in many ways due to issues such as drainage changes, utility conflicts, right-of-way impacts, and ADA compliance regulations. We will utilize a highly successful Project Plan Preparation Guidelines and Quality Assurance Checklists developed from years of on-call municipal projects to deliver projects for the City of Covington. The breakdown below provides an overview of the approach we will provide under this contract.

This exhibit is not exhaustive of every step of a project, but it does outline the proposed delivery methods and processes KW will utilize during the City of Covington's On-Call Annual Consulting Services.

Project Approach (cont.)

Innovative Delivery Methods and Processes Implemented During a Project

Project Kickoff & Scoping

Project Kickoff & Scoping - provides a prime opportunity to safeguard the City's funds.
When issued a project from the City, KW's Project Manager, John Payne, PE, will schedule a Scoping Meeting. The goal is to review the pragmatics of the project with all stakeholders to capture the scope and breadth of work. This effort will provide a more complete design proposal, construction estimate, and realistic schedule for the work. The scoping meeting also allows the KW team to dig deeper into the project to predetermine potential hindrances, such as if a survey is needed, are easements required, are there planned or active projects within the area that would impact the design, and if permitting of any kind may be required. We have successfully utilized this scoping strategy with other municipal clients.

Preliminary Design Phase

Preliminary Design - builds the framework for a successful project.
With a project scope defined, the KW team will collaborate with the City to develop the preliminary (schematic) design package which will contain, but is not limited to, project route layouts, known existing utilities, known existing right-of-way limits, property limits, and/or design narratives. The data will be utilized to strengthen the preliminary opinion of probable cost and schedule from the scoping exercise. The KW team will review the information with the City and all stakeholders for potential changes, revisions, and additions.

Final Design Phase

Final Design - adds the necessary details for effective decision making.
The final (design development) phase will build upon the framework established in the preliminary design phase. Once the City and KW team narrow down a design option, the team will further develop the engineering aspects of the design through drawings, details, and specifications. Coupled with a revised cost estimate and project schedule, the City will have the opportunity to review the documents again before advancing to bidding and final documents. These documents can also be used to begin the permitting discussions with the required jurisdictions for approval.

Cost Estimating & Condition Survey

Cost Estimating & Budget Review - keeps the project costs in check.
From the project scope and engineering design phases, the KW team will develop a Rough Order of Magnitude (ROM) estimate as a check between the City's expectations, market conditions, and engineering needs. As the project design progresses, the ROM will migrate to a project cost estimate, which will be updated at each design milestone. As the estimate progresses, the results will be reviewed against KW's active database of current project bids from similar projects. Having this additional layer of verification based on current market conditions will enable our engineers to provide the most value for the City of Covington.

Contract Documents

Contract Documents - bring the entire project together for approvals, funding & construction.
After performing any changes and/or additions from the design phases, the KW team will complete the engineering for the project. They will complete the plan and specification development via 50% & 95% progress submittals, as well as an updated schedule. For budget review, we will utilize our bid database which chronicles our latest projects bid to get a real-world look at how the current economy can influence the upcoming project estimates. The documents will be carefully reviewed utilizing KW's QA/QC process for conformance to applicable codes and regulations as required. The documents will be prepared for bidding and construction.

Bidding | Negotiations

Bidding & Negotiations - is where our planning and teamwork will prove successful.
KW has the staff, technology, and experience to place projects for bid on behalf of the City. In addition to the pragmatics of bids, the KW team of professionals will also answer all RFI's and issue addenda as required. We will coordinate closely with the City to review subcontractors, bid tabulations, and evaluations. Before providing opinions on which firm is best suited for the work, we will once again compare the results with our bid database of recent work to see if the estimates reflect what other similar projects were bid at.

Construction & Post Const. Administration

Construction Engineering & Inspection - to ensure the project is built as designed.
Once the contractor has been selected and the proper permits are in place, the KW team will monitor the construction progress. We will start with the Preconstruction Meeting, then move to site visits at regular intervals. We will also field any questions and issue RFI's as required. The KW team will conduct site inspections, as required, to review and make recommendations on all pay applications. We will develop the punch-list and collect all of the as-built documentation, warranties, and manuals for the City. We will also provide necessary CADD files as required.

Keck+Wood
COLLABORATION BY DESIGN

Project Management Approach
Case Study

KW has successfully utilized this project approach with multiple clients including the City of Winder.

As development continues in many areas, a common scenario that occurs is the need to increase natural gas flow and system pressure. One system where this has recently occurred is the City of Winder, GA. The City's natural gas system had a primary high pressure feed and regulator station that served the City and surrounding areas. The largest concentration of large volume industrial customers is located to west of the City, thus requiring the natural gas flow to extend through the downtown and surrounding residential areas. Although there were many points of connectivity, the gas mains are of old age and relatively small diameter therefore creating a bottleneck for moving large volumes of natural gas through the system. A temporary fix was negotiated with the City of Buford to supplement natural gas at times of high demand and low pressure in the area of concern. However, the City needed a more dependable long-term solution.

The City of Winder requested our assistance to determine the most feasible option to provide high pressure natural gas to the western portion of the system. We developed a model of the high pressure mains within the system as well as a portion of what was considered the critical trunk lines of the medium and low pressure mains. Demands were based on the large volume users as well as an estimated consolidation of demands per geographic area. Utilizing this model, we developed proposed high pressure routes that were evaluated to determine the most feasible and cost-effective route. Due to the overall total length of main needed to accomplish the ultimate goal, we determined a point at which the project could be split for phased construction, yet provide a level of pressure improvement to the western portion of the system after the first phase was constructed.

The first phase of construction for the high pressure main was completed along Smith Mill Road in 2020. The project included approximately 4.5 miles of 6-inch steel gas main and associated regulator stations.

The second phase of construction of the high pressure main was completed in 2024. This phase included 7.75 miles of 6-inch steel gas main and the installation of a regulator station at the terminus of the project. This phase proved to be more of a challenge in design and construction due to the areas the main passed through. Multiple GDOT permits were needed to cross SR 316, crossing and installation along SR 81, crossing of W Winder Bypass, and crossing of SR 8. Pipeline crossing permits were also needed for crossings of Colonial Pipeline and Plantation Pipeline.

Services provided for this project by KW included preliminary project evaluation, natural gas modeling, feasibility study, cost estimation, design, permitting, bidding, and construction administration.

This project is now fully complete and in service. The City has boosted pressure and natural gas volume in this area and has additional capacity for future industrial development and expansion. The City also removed the interconnection with the neighboring gas system as part of the Phase 2 construction; thus, they are now self sufficient in supplying the needs of their system and customers.

COLLABORATION BY DESIGN

Project Management Approach

Quality Control

KW's Total Approach to Quality

We learned long ago that a day one approach to quality creates successful projects.

Our Total Approach to Quality methodology provides a high degree of quality on our projects through Personal Ownership. Our dedicated QA/QC Manager, Daniel Wallace, PE will create the Detailed Quality Control Plan (DQCP) with the planning team. This quality assurance strategy remains connected to the project and is based on four factors:

1. **Plan for quality (assurance).** As our team processes project data and reviews codes & guidelines, they will be documenting any potential shortfalls from quality, schedule, and budget standpoints. These findings are then discussed at project meetings with the Project Manager to provide clarity to the team.
2. **Implement the quality plan.** From kickoff meetings to frequent communications across the entire project team, we will be working together step-by-step with stakeholders to keep the project moving forward. Daniel will perform QC reviews at project milestones. He will provide direct feedback to the design team on any potential framework issues, or foreseeable errors.
3. **Measure and ensure quality (control).** Our top-down and bottom-up approach to quality is a proven process which has integrated checks and cross checks. Utilizing the DQCP and milestone quality reviews as the foundation for quality, the team will collaborate to provide QC checks from the boots-on-the ground design staff to the Principal level.
4. **QC Follow Through** The way to control the quality during a project's lifecycle is through consistency. The team that frames the design and performs QC on it, will remain on the project for the duration.

Quality Results that Matter

Designing with quality in mind is not achieved through a checklist, it must be a part of the company culture.

KW has been providing ***quality work for clients for 70 years.*** We achieve this by having pride in our work product and being committed to serving our clients. Committing our professionals and the necessary resources for our quality program gets results:

- *No E&O claims paid over the past ten (10) years*
- *Significant reduction of change orders on projects over the past five (5) years*
- *Low quantity of RFI's across project & engineering-related schedule | budget changes*

SR 334 Natural Gas Main GDOT Permitting, Phase 1
City of Commerce, Georgia

Drew Hart | Gas Superintendent
dhart@commercega.gov

Dates
2025 (Complete)
Engineering Fee
$2,000

Firm Role
GDOT Utility Permitting

Key Team Members
John Payne, PE
Aurie Manigo, PE

This project consisted of coordination with City staff for the development of project related exhibits and details, preparation of the GDOT utility permit application package, submittal of the permit application through GPAS, coordination with GDOT regarding project related questions, and coordination with City staff to activate the approved GDOT permit.

SR 83 - Monticello Road Natural Gas Main
City of Madison, Georgia

Shawn Wood | Public Works Director
swood@madisonga.com

Dates
2024 (Complete)
Engineering Fee
$20,000

Firm Role
Gas Distribution System Design & GDOT Utility Permitting

Key Team Members
John Payne, PE
Aurie Manigo, PE
Blake Hamby, EIT

This project consisted of the development of natural gas main extension plans to provide service to the Georgia Safari Conservation Park and the surrounding area south of the I-20 and SR 83 interchange. The scope consisted of connecting to the City's existing high pressure natural gas main near the intersection of SR 83 and Amtico Road, installation of a new regulator station, and installation of approximately 3,500 linear feet of 4-inch HDPE gas main from the regulator station, across I-20, and terminating at the entrance of the Park on SR 83. Services included the engineering design, preparation of construction plans, easement documents, and GDOT utility application package, submittal of the permit application through GUPS, and coordination with City staff to activate the approved GDOT permit. Construction was completed utilizing a combination of City natural gas crews and a local directional drilling contractor.

excluded

Natural Gas Take Station Upgrades
City of Adairsville, Georgia

Steve Smith | Gas Department Manager
ssmith@adairsvillega.net

Dates
2024 (Complete)
Engineering Fee
$20,000

Firm Role
Site Design, Regulator Station Design

Key Team Members
John Payne, PE
Aurie Manigo, PE

Project consisted of the development of a new regulator and meter station at the City's take point. The new station was designed to be located adjacent to the existing station. The new station also was designed in a way to utilize the existing station's odorant injection system. KW developed the station plans, sections, and bill or materials that was then used by the City to procure the various components. The City fabricated the station in house and procured the necessary contractors for connections and capping of the existing high pressure steel main, fencing, and shed structure.

Bostwick Natural Gas Main Extension, Phase II
City of Madison, Georgia

Shawn Wood | Public Works Director
swood@madisonga.com

Dates
2025 (Complete)
Construction Cost
$874,000

Firm Role
Gas Distribution Engineering, Bid Phase Services, Construction Administration

Key Team Members
John Payne, PE
Aurie Manigo, PE
Balke Hamby, EIT
Emme Yearwood, EIT

Project consisted of the construction of approximately 45,300 linear feet of 4-inch HDPE gas main providing natural gas service to the City of Bostwick, Georgia and surrounding area. This was the second phase of the project to complete this extension. KW developed the construction plans based on aerial photography and site visits, provided Bid Phase Services, prepared necessary easement documents and coordinated with Bostwick staff and legal council for acceptance and execution, prepared and submitted GDOT utility permits for the portions of the project located with GDOT right-of-way, and provided Construction Administration services.

excluded

2022 Annual Natural Gas Services Contract
City of Buford, Georgia

Darren Perkins | Gas Superintendent
dperkins@cityofbuford.com

Dates
2022 (Complete)
Engineering Fee
$20,500

Firm Role: Project Development, Bid Phase Services, Contract Preparation/Execution

Key Team Members
John Payne, PE
Aurie Manigo, PE
Emme Yearwood, EIT

Project consisted of the development of an updated Annual Gas Services construction contract for an on-call contractor to provide the City with various natural gas construction services including, but not limited to, new services installation, service renewals, and new gas main installations. The contract, once executed, ran for a maximum 3-year period, including renewal options. KW developed the Project Manual, conducted the Bid Phase Services, prepared the contract documents, and coordinated contract execution with the City and contractor.

2022 High Pressure Gas Main Improvements
City of Winder, Georgia

Horace Gee | Utilities Director
horace.gee@cityofwinder.com

Dates
2024 (Complete)
Construction Cost
$2.01M

Firm Role: Gas System Modeling, Gas Distribution Engineering, Bid Phase Services, Construction Administration

Key Team Members
John Payne, PE
Aurie Manigo, PE
Blake Hamby, EIT
Emme Yearwood, EIT

Project consisted of the construction of approximately 40,500 linear feet of 6-inch high pressure steel natural gas main. The project was the second and final phase to extend high pressure natural gas to the western portion of the City's distribution system to effectively provide additional capacity and pressure to the area. Services provided by KW included updating and operating the high pressure model that was developed for the first phase project (Smith Mill Road Gas Main Extension), route feasibility evaluation and coordination with City staff, preparation of the design and construction plans and Project Manual, Bid Phase Services, and Construction Administration Services. Construction consisted of trenched and untrenched installation of gas main, line valves, connections, installation of fabricated regulator station, multiple petroleum pipeline crossings, and commissioning of the project into the City's existing natural gas system.

excluded

Natural Gas System Mapping and Modeling
City of Eatonton, Georgia

Gary Sanders | City Administrator
gsanders@eatontonga.us

Dates
2023 (Complete)
Engineering Fee
$36,000

Firm Role: GIS Mapping, GPS Data Collection, Gas System Mapping

Key Team Members
John Payne, PE
Matthew Kaufman, PE

Project consisted of the development of a GIS database for the natural gas system mapping, digitizing of gas mains based on record drawings and as-builts, GPS collection of various system structures including, but not limited to, regulator stations, valves, cathodic protection test stations, anode beds, and rectifiers. The GIS database was then used in conjunction with the City's accounting system and usage records to develop a computerized model of the City's distribution system utilizing GASWorkS 10.0. The model has since been utilized for the evaluation of the available natural gas loads for various proposed developments within the system.

Bostwick Natural Gas Main Extension, Phase I
City of Madison, Georgia

Shawn Wood | Public Works Director
swood@madisonga.com

Dates
2023 (Complete)
Construction Cost
$1.12M

Firm Role: Gas System Modeling, Gas Distribution Engineering, Bid Phase Services, Construction Administration

Key Team Members
John Payne PE
Aurie Manigo, PE
Blake Hamby, EIT
Emme Yearwood, EIT

Project consisted of the modeling and feasibility study to extend natural gas service from the area of US 278 and Old Mill Rd to the City of Bostwick and surrounding areas with the intent to serve existing and future poultry farms as well as the cotton gin and residents along the route. Once the route was finalized, a preliminary cost estimate was developed. The project was then broken into two phases of design and construction. KW developed the design and construction plans as well as provided bid services, GDOT permitting, CSX permitting, Bid Phase services, and Construction Administration services. The City elected to install a portion of 4-inch HDPE main along the route. The portion of the project installed by the contractor included approximately 38,000 LF of 4-inch HDPE gas main along Old Mill Rd extending through Hard Labor Creek State Park along Fairplay Rd to the intersection with Sandy Creek Rd. The work included untrenched crossings of the CSX railroad, Hard Labor Creek, and Sandy Creek.

excluded

Smith Mill Road Gas Main Extension
City of Winder, Georgia

Horace Gee | Utilities Director
horace.gee@cityofwinder.com

Dates
2020 (Complete)
Construction Cost
$1.6M

Firm Role: Gas System Modeling, Gas Distribution Engineering, Bid Phase Services

Key Team Members
John Payne, PE

Project consisted of approximately 24,000 linear feet of 6-inch high pressure steel natural gas main and regulator station. High pressure gas system modeling development and results were used to develop the proposed route and feasibility. The goal of this project was to begin the first phase of extending high pressure natural gas to boost flow and pressures to the western portion of the system. Construction consisted of trenched and untrenched installation of gas main, line valves, connections, installation of fabricated regulator station, and commissioning of the project into the City's existing natural gas distribution system.

Gas System Regulator Station Relocation
City of Winder, Georgia

Horace Gee | Utilities Director
horace.gee@cityofwinder.com

Dates
2019 (Complete)
Construction Cost
$175,000

Firm Role
Site Design, Regulator Station Design

Key Team Members
John Payne, PE
Aurie Manigo, PE

Project consisted of the development of the site access and site design plans for the new regulator station which serves as the primary gate station to the City's low pressure system. Project also consisted of the development of the regulator station design plans and coordination with City selected contractor for the quoting and fabrication of the station. Site work and regulator station installation was completed using a mixture of City crews and a local contractor.

COLLABORATION BY DESIGN

JOHN PAYNE, PE

Project Manager | Project Principal
Primary Point of Contact

John's extensive utility coordination experience includes the design, drafting, specification preparation, bid process, and construction management & inspection for various natural gas, pedestrian facilities, stormwater, roadway, and water & wastewater system projects. *As Project Manager, it will be John's responsibility to ensure projects are completed as envisioned by the City. He will listen to the stakeholder needs and collaborate with the design team to ensure each project is completed on time and within the allocated budget.*

Project Experience

- **Gwinnett County Roadway Improvement Analysis | Multiple Locations, City of Buford, GA -** *Project Manager* responsible for the analysis of numerous Gwinnett County roadway improvement plans to determine locations of potential impacts with the City of Buford natural gas utilities. Work associated with these projects most often include the development of utility relocation plans, cost estimating, bidding, and construction administration including Gwinnett County project coordination meetings. Utility evaluation and relocation services have been provided for over 20 projects in the last five years.
- **SR 140 Widening and Reconstruction | City of Adairsville, GA -** *Project Manager* responsible for the relocation of existing natural gas mains and regulator stations, sanitary sewer lines, and water lines that are in conflict with the overall GDOT widening and reconstruction. Project includes the replacement of 8-inch through 2-inch high pressure steel gas mains, 4-inch and 2-inch polyethylene gas mains, 16-inch through 6-inch ductile iron water main, and 8-inch sanitary sewer lines.
- **GDOT Road Improvements | City of Winder, GA -** *Project Manager* responsible for the analysis of GDOT road improvement plans to determine locations of potential utility impacts for natural gas and water distribution systems. Recent projects completed include SR 316 at SR 53 Interchange, SR 316 at SR 81 Interchange, SR 316 at SR 11 Interchange, SR 11 at SR 211 Roundabout, SR 211 at Old Hog Min Rd Roundabout, W Winder Bypass Ph 1 & 2, SR 11 at Apalachee River Bridge Replacement. There are numerous GDOT projects in various stages of plan evaluation and development as well. Work on these projects includes attending of GDOT design meetings, utility relocation plan development, Utility Aid Request coordination & submittal, permitting, and bidding.
- **GDOT Road Improvements | City of Buford, GA -** *Project Manager* responsible for the analysis of GDOT road improvement plans to determine locations of potential utility impacts for natural gas, water distribution, and sanitary sewer utilities. Recent projects completed include SR 347 Ph 1 & 2 Widening, SR 13 Widening, SR 81 Roundabout, I-85 Widening Ph 1 & 2. There are numerous GDOT projects in various stages of plan evaluation and development as well. Work on these projects includes attending of GDOT design meetings, utility relocation plan development, Utility Aid Request coordination & submittal, permitting, and bidding.
- **High Pressure Gas Main Improvements | City of Winder, GA -** *Principal* responsible for preliminary route evaluations including route identification, system modeling of route options, cost estimation, and presentation to City staff for route selection. Responsibilities also included management and oversight of design team for the detailed design, permitting, bidding, and construction management of the 7.75 miles of 6-inch steel high pressure natural gas main and related facilities.
- **Natural Gas General Consulting | Multiple Municipalities -** *Principal & Project Manager* responsible for direct consultation with municipalities, including, but not limited to, the Cities of Eatonton, Winder, Buford, Thomson, Madison, and Commerce, to provide general services including, but not limited to, monthly lost and unaccounted volume reporting, annual reporting and tax filings, pressure improvement evaluations and suggestions, review and design of natural gas facilities to serve proposed developments, natural gas modeling of proposed developments to aid in available capacity and/or required capacity upgrades, and regulatory permitting services.

excluded

Aurie Manigo, PE
Assistant Project Manager
Natural Gas Design Lead

Registration: Professional Engineer GA (51205)
Education: BSCE 2016 | Clemson University
Experience: 9 years

Aurie's design experience includes natural gas main relocation, replacement, and extensions in addition to water & wastewater treatment plants, pump stations, sanitary sewer, and water main improvements. *Aurie will lead the natural gas design team, providing design oversight across the project team while working alongside John as the Assistant Project Manger.*

- **Natural Gas Main and Water Main Relocation | City of Winder, GA -** *Design Lead* responsible for the design and construction administration for the installation of 6-inch and 4-inch polyethylene gas mains, 10-inch ductile iron pipe water main, and 2-inch polyethylene water main for utilities that were in conflict with the GDOT bridge replacement project along SR 11 at Apalachee River.
- **Bostwick Natural Gas Main Extension - Phases 1 & 2 | City of Madison, GA -** *Design Lead* responsible for the design, permitting, bidding, and construction administration services for the design and installation of an overall total of approximately 16 miles of 4-inch HDPE, railroad and creek bores, valves, and connections.
- **GDOT Road Improvements | City of Lawrenceville, GA -** *Design Lead* responsible for the analysis of GDOT road improvement plans to determine locations of impacts to existing natural gas facilities requiring relocation or modifications to roadway plans. Recent projects that have been completed, or are in various stages of design, include SR 316 at Hi Hope Road, SR 316 From East of Cedars Road to East of Fence Road to West of Sugarloaf Parkway, SR 81 at Ozora Church Road Roundabout, and SR 81 at SR 138 Roundabout. Work on these projects have included attending City and GDOT meetings, utility relocation design and plan development, Utility Aid Request coordination and submittals, and permitting.
- **High Pressure Natural Gas Main Improvements | City of Winder, GA -** *Design Lead* responsible for the design, plan preparation, permitting, bidding, and construction administration services for the design and installation of approximately 7.75 miles of 6-inch steel gas main, valves, regulator station, and connections to existing mains.

Matthew Kaufman, PE
Modeling & Utilities Design Lead

Registration: Professional Engineer GA (48199)
Education: BSCE 2015 | Clemson University
Experience: 10 years

Matthew's experience includes design and project management for water and sewer improvements, stormwater, and system modeling for local and state governments, authorities, and private clients. *As Modeling & Utilities Design Lead, Matthew will coordinate with the design team to develop pragmatic solutions for the betterment of the City of Covington.*

- **Old Albany Road Utility Relocations | City of Thomasville, GA -** *Project Manager* for project that consisted of 4,560 LF of various nominal sizes of HDPE water main and associated appurtenances, 2,750 LF of cured-in-place pipe, 460LF of 8-inch PVC sanitary sewer installed via pipe bursting, and 60 LF of 6-inch PVC sanitary sewer via trenching.
- **SR 20 Utility Relocations | City of Loganville, GA -** *Project Manager* for utility relocations along GDOT PI 0016387 for the relocation of approximately 4,000 LF of sanitary sewer mains along the state route. Design also includes relocation of approximately 5,000 LF of water main and coordination with GDOT and other utilities within the corridor.
- **Natural Gas System Mapping & Modeling | City of Eatonton, GA -** *Modeling Lead* responsible for the development of a new natural gas model based on recently completed GIS mapping, coordination with City accounting department to obtain and import customer locations and demands into the model, and model calibration. The model has routinely been used and updated based on proposed and conceptual developments as well as to develop and model pressure improvement upgrades.
- **Natural Gas System Model Updates | City of Perry, GA -** *Modeling Lead* responsible for coordination with City staff to obtain plans and records for recent system upgrades, updating of upgrades into the model, updating of customer demands, calibration of model, addition of proposed and conceptual natural gas demands expected to be online soon, and evaluation of the model to determine if system improvements are necessary to maintain flow and pressure.
- **Downtown Utility Improvements | City of Gainesville, GA -** *Project Engineer* for utility relocations and improvements of approximately 1,000 LF of sanitary sewer mains in the downtown corridor. Improvements included rehabilitation efforts for existing sanitary sewer as well as material replacements and relocations for the ongoing streetscape project.

excluded

"Collaboration By Design"

It is our mission to engage with our clients every step of the way.

We believe that our job doesn't stop at delivering construction drawings.

We create partnerships on a personal level through clear communication, face-to-face meetings, boots on the ground, and personal accountability.

As trusted advisers we help clients navigate complex decisions by breaking them down into clear, understandable choices.

It's how we educate, how we mentor, and how we deliver!

Daniel Wallace, PE
QA/QC

Registration: Professional Engineer SC (27049)
Education: BSCE 2003 | University of South Carolina
Experience: 22 years

Daniel's experience includes working with municipalities, state institutions, multi-discipline engineers, architects, private developers, and contractors. He has participated in the design, construction review, and quality control for numerous projects including water & sewer infrastructure, storm drainage systems, sewer pump & grinder stations, streetscapes, commercial sites, and residential subdivisions. ***Daniel will collaborate with the team, scrutinize key milestones, and provide quality oversight throughout the project. His extensive utilities experience will make him a valuable technical resource.***

- **Basin 1 & 2 Outfall Stormwater Improvements |City of Winder, GA -** ***Project Manager.*** The Basin 1 & 2 outfall was identified as a critical stormwater system in need of improvements. The existing system frequently flooded at a railroad underpass frequently blocking the primary path to travel across the City. In addition to capacity restraints, the existing system was experiencing multiple modes of failure such as pipe collapse, joint separation, and corrosion at multiple locations along the system. Services provided included hydrologic and hydraulic analysis, route assessment, easement acquisition, and coordination with multiple authorities having jurisdiction and utilities along the project route.
- **Liberty Street Waterline Upgrade | City of York, SC** - ***Project Principal*** for this RIA and SCIIP funded project that included upgrading an existing 6-inch waterline to 12-inch through downtown York. Services included route assessment and coordination with funding authorities, multiple jurisdictional authorities, and utility providers.
- **Springs Mill Water & Sewer Replacement | Town of Kershaw, SC** - ***Project Manager*** for the water system, gravity sewer system, and pump station design, permitting, bidding, and construction administration.
- **Celanese/India Hook Utility Relocations | City of Rock Hill, SC** - ***Project Principal*** for the relocation of existing 8-inch sanitary sewer line and replacement of existing 8-inch AC waterline with 12-inch DIP as a part of the intersection upgrades. Services included route assessment, easement acquisition, and coordination with multiple authorities having jurisdiction and utilities along the project route.
- **Multiple Water & Sewer Projects | Town of Andrews, SC** - ***Project Manager/ Lead Engineer*** for the master planning, mapping, water & sewer assessments, and multiple rehabilitation and replacement projects for both water and sewer systems. Services have included full water and sewer system mapping, sewer system assessments, CIPs, water system modeling, rate studies, CMOM, and CAPs for the Town. Many items were related to both SCDHEC water and sewer consent orders. To date, over $10M in improvements have been completed or are nearing construction.

COLLABORATION BY DESIGN

Appendix
Billing Rates

The key personnel listed on the organizational chart will be billed at the following labor categories:

Key Personnel	Role	Labor Category	Hourly Rate
John Payne, PE	Project Manager | QA/QC	Market Leader/VP	$285
Daniel Wallace, PE	QA/QC	Market Leader/VP	$285
Aurie Manigo, PE	Assistant Project Manager | Natural Gas Design Lead	Project Manager 1	$195
Matthew Kaufman, PE	Utilities Design Lead	Project Manager 1	$195

KW's routine tasks associated with Natural Gas General Consulting clients is typically billed on an hourly rate basis per the hourly billing rates listed below. Examples of these tasks may include utility permitting, attending requested meetings, system evaluations, etc. Our rates are adjusted on an annual basis on or around January 1st of each fiscal year. On average, we typically experience an annual increase of approximately 4% per year.

Specific tasks or assignments can be broken down into their own project number as well as the development of a project budget with a not to exceed fee. Examples of these tasks may include the design and bidding of natural gas main extensions, system improvements, or system modeling upgrades. There are also instances of where we can arrange to bill assigned tasks as lump sum rather than hourly. This is case by case and can be discussed as tasks are assigned.

Subconsultant related work is typically based upon lump sum cost agreements for surveying and environmental work. Easement acquisition work with subconsultants is typically based on lump sum or per parcel cost agreements.

RE: Hourly Fees to Provide Right of Way Acquisition Services for On-call Natural Gas Engineering Services within the City of Covington, GA

Dear Mr. Payne,

THC, Inc. (THC) is pleased to submit hourly fees for right of way acquisition services as part of the RFQ for On-call Natural Gas engineering services. As we discussed by phone today, we anticipate proposing lump sum/per parcel rates for each assigned project involving easement or parcel acquisitions for the City of Covington. Below is a list of available staff for these projects and their loaded hourly rates.

Hourly Fees Chart

Name	Project Role	Years of R/W Experience	Loaded Hourly Rate
Wesley Brock	Program Manager/Principal	33	$204.80
Wayne Roberts	Project Manager	25	$171.77
John Albrycht	Senior R/W Agent, Cost Estimates	30	$150.00
Nathaniel Kimbro	Senior R/W Agent	9	$148.64
Michael Woodall	R/W Agent	6	$142.87
Mercedie Woodall	R/W Agent	3	$118.92
Clint Johnson	R/W Agent	2	$124.53
Jennifer Roberts	R/W Agent	2	$112.31

We appreciate the opportunity to serve you and your client on this project. Please contact us if you have questions about this proposal.

Sincerely,

Wesley K. Brock
Georgia Program Manager

Re: 2025-15, Annual Consulting Services
Category B - Site Plan Review Services

Dear Mr. Cromer and Selection Committee:

Providing the City of Covington with consulting engineering services to protect and improve quality of life is a mission that requires people dedicated to serving citizens and backed by a team of dependable consultants. Keck & Wood (KW) is ready to provide reliable and steady professional services to help you serve the citizens and natural gas customers of the City of Covington. We are the right choice to be selected as the City's Site Plan Review Services for assistance in development plan review and natural gas technical assistance based on the following:

We Value Long-Term Relationships - As consulting professionals, we strive to be your trusted advisor. More than 75% of our work is generated from local government and municipal engineering projects resulting in long-term collaborative partnerships. For decades, we have been providing natural gas consulting services for clients including the Cities of Buford, Winder, and Eatonton, just to name a few. Additionally, dating back to 2017, we have been providing the City of Covington with a variety of engineering services with projects including Pace Street LCI, Traffic & Parking Study, Turner Lake Road Widening, and are currently one of the City's Annual Consulting Engineers. ***We value our longstanding client relationships.***

Dedicated Natural Gas Team - At KW we have a team of engineers dedicated to only serving the natural gas needs of our clients. Services include distribution system design; system mapping, modeling, and GIS; state DOT coordination, regulator station/metering design, system relocation and extensions; and bidding and construction administration. Having this niche service in-house, will benefit the City of Covington through ***streamlined communications coupled with a shared knowledge of City procedures from a tight-knit group of professionals.***

Responsiveness - Having served local governments throughout Georgia for 70+ years, we understand the need for effective communication and know how important it is to be responsive and nimble when serving on-call contracts. Our natural gas team of professionals is committed to being available to address your project needs and concerns. ***We know there will be times when you need our services on short notice and we will always be ready to serve!***

KW hereby acknowledges receipt of Addendum No. 1 dated July 21, 2025.

We look forward to partnering with the City of Covington. If you have any questions or need additional information, please contact me at 706-540-4010 (mobile), 678-417-4006 (direct), or by email at jpayne@keckwood.com.

Sincerely,

Keck & Wood, Inc.

John Payne, PE
Vice President | Natural Gas Market Leader

Firm History. Since its founding in 1954, KW has continued the traditions of engineering excellence and commitment to exemplary service established by our founders, Wylly Keck and Tom Wood. ***With over 70 years of public sector experience***, KW has earned an outstanding reputation for integrity, knowledge, and professionalism in advising our clients. We are committed to improving the quality of life of the region and communities we serve through ethical conduct and dedicated client service.

Corporate Structure/Legal Status. KW is a Class C Georgia Corporation, incorporated in 1959, 100% employee owned, and governed by a seven person Board of Directors. From our offices in Duluth, GA, Rock Hill, SC, and North Charleston, SC, we serve clients in the southeastern states.

Business Activities. KW offers professional Engineering, Planning, Land Surveying, and Landscape Architecture services to provide solutions for natural gas, energy supply, transportation, traffic, parks & recreation, water resources, and urban redevelopment. We proudly serve community & local governments, state governments & jurisdictional authorities, utility infrastructure, public institutions, and private developers. ***Our natural gas professional services include***, but are not limited to:

- Distribution System Design
- System Mapping, Modeling, GIS
- State DOT Coordination
- Regulator Station/Metering Design
- System Relocation & Extensions
- Bidding & Construction Administration

Additional professional services include:

- Planning
- Traffic Engineering
- Rural & Urban Roadway
- Development Plan Review
- Streetscape
- Multi-Use Paths/Trails
- Parks & Recreation
- Utility Coordination
- Stormwater Systems
- Water/Wastewater Treatment
- Wastewater Collection
- Water Supply, Storage & Distribution
- Public Works Facilities
- Landscape Architecture

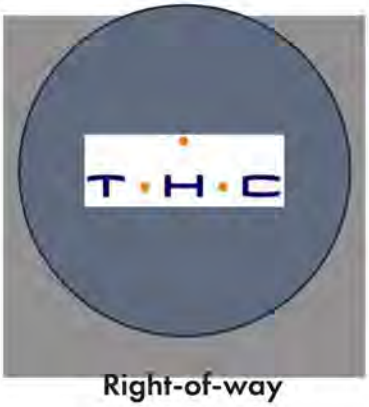
Subconsultant Firm Information

To augment the KW Team, we have included Trusted Partners and Professionals.

Environmental Assessments

Edwards-Pitman Environmental, Inc.

Edwards-Pitman provides natural and cultural resources surveys, environmental permitting and mitigation planning for transportation projects. Their environmental division offers a full range of NEPA and Permitting services; including ecological surveys, threatened and endangered species surveys, air and noise analysis and documentation, historical and archaeological resource surveys, Section 106 and 4(f) compliance, wetland delineations, jurisdictional determinations, Section 404 permitting and mitigation strategies. They offer experienced, well-trained, professional staff capable of producing exceptional environmental surveys and reports in a timely, cost-efficient manner.



Land Surveying

Rochester | DCCM

Since 1966, the ***Rochester | DCCM*** name has been synonymous with quality, reliability and expertise. As Georgia's premier infrastructure solution provider, their team of engineers, land surveyors, and GIS professionals, along with their exceptional support staff deliver technical knowledge and seasoned guidance backed by the responsiveness your project demands.

Since their inception, Rochester | DCCM's expertise in land surveying has given them a significant competitive advantage. By constantly staying on the forefront of new technology and techniques, their registered, professional land surveyors and survey teams deliver fast, accurate information.

- ALTA/ASCM surveys
- Boundary surveys
- Topographic, GPS, Volume surveys
- Easement/ROW Acquisition Services
- Database preparation
- Construction staking
- As-built surveys
- Airborne/static GPS photo control
- Infrastructure inventorying for GIS
- Revit modeling
- Boundary Disputes
- Construction layout
- Pipeline mapping
- Reservoir/shoreline surveys
- Wetland delineation
- Terrestrial scanning indoor/exterior
- Airborne lidar collection/extraction UAS/UAV
- Photogrammetry aerial collection & processing

Right-of-way

THC, Inc.

THC, Inc. is a professional program management firm providing right of way land acquisition, relocation and noise mitigation services for airports, highway departments, utility companies, municipalities, governmental agencies and engineering firms around the nation since 1994. Whether you need help acquiring property for natural gas system expansion, relocating families from a flood-prone area or managing an airport sound insulation program, THC can provide you with professional services to complete your local, state or federally funded project.

City of Covington Experience. KW has provided the City of Covington with professional engineering services since 2017. In 2023 KW was selected for the City's Annual Consulting Services in the areas of engineering, planning, permitting, water resources, stormwater, transportation, plan review, and management. To date, projects have included:

- Pace Street LCI
- Drainage Pipe and Retaining Wall Rehabilitation
- Traffic and Parking Study
- Turner Lake Road Widening
- Floyd at East Design
- SLI and Backflow
- City Pond Road Design
- Police Parking Lot B
- 2024 Water & Sewer Revenue Audit
- SR 12/US 278 from SR 81 to Hospital Drive

Project Approach

Our time proven approach to project delivery provides a roadmap to success.

Civil Engineering can prove challenging in many ways due to issues such as drainage changes, utility conflicts, right-of-way impacts, and ADA compliance regulations. We will utilize a highly successful Project Plan Preparation Guidelines and Quality Assurance Checklists developed from years of on-call municipal projects to deliver projects for the City of Covington. The breakdown below provides an overview of the approach we will provide under this contract.

This exhibit is not exhaustive of every step of a project, but it does outline the proposed delivery methods and processes KW will utilize during the City of Covington's On-Call Annual Consulting Services.

Project Approach (cont.)

Innovative Delivery Methods and Processes Implemented During a Project

Project Kickoff & Scoping - provides a prime opportunity to safeguard the City's funds.
When issued a project from the City, KW's PM, John Payne, PE, will schedule a Scoping Meeting. The goal is to review the pragmatics of the project with all stakeholders to capture the scope and breadth of work. This effort will provide a more complete design proposal, construction estimate, and realistic schedule for the work. The scoping meeting also allows the KW team to dig deeper into the project to predetermine potential hindrances, such as if a survey is needed, are easements required, are there any other planned or active projects within the area that would impact the design, and if permitting of any kind may be required. We have successfully utilized this scoping strategy with other municipal clients.

Preliminary Design - builds the framework for a successful project.
With a project scope defined, the KW team will collaborate with the City to review any available development or roadway plans to determine the presence of conflicts, needed relocations, or to design gas facilities to serve a proposed development. The preliminary design will contain known utilities, known right-of-way, existing easements, and/or design narratives. This data will be utilized to strengthen the preliminary opinion of probable cost and schedule from the scoping exercise. The KW team will review the information with the City and all stakeholders for potential changes, revisions, and additions.

Final Design - adds the necessary details for effective decision making.
The final (design development) phase will build upon the framework established in the preliminary design phase. Once the City stakeholders and KW team narrow down a design option, the team will further develop the engineering aspects of the design through drawings, details, and specifications. Coupled with a revised cost estimate and project schedule, the City will have the opportunity to review the documents again before advancing to GDOT utility aid request, bidding, and final documents. These documents can also be used to begin permitting discussions with the required jurisdictions for approval.

Cost Estimating & Budget Review - keeps the project costs in check.
From the project scope and engineering design phases, the KW team will develop a Rough Order of Magnitude (ROM) estimate as a check between the City's expectations, market conditions, and engineering needs. As the project design progresses, the ROM will migrate to a project cost estimate, which will be updated at each design milestone. As the estimate progresses, the results will be reviewed against KW's active database of current project bids from similar projects. Having this additional layer of verification based on current market conditions will enable our engineers to provide the most value for the City of Covington.

Contract Documents - bring the entire project together for approvals, funding & construction.
After performing any changes and/or additions from the design phases, the KW team will complete the engineering for the project. They will complete the plan and specification development via 50% & 95% progress submittals, as well as an updated schedule. For budget review, we will utilize our bid database which chronicles our latest projects bid to get a real-world look at how the current economy can influence the upcoming project estimates. The documents will be carefully reviewed utilizing KW's QA/QC process for conformance to applicable codes and regulations as required. The documents will be prepared for bidding and construction.

Bidding & Negotiations - is where our planning and teamwork will prove successful.
KW has the staff, technology, and experience to place projects for bid on behalf of the City. In addition to the pragmatics of bids, the KW team of professionals will also answer all RFI's and issue addenda as required. We will coordinate closely with the City to review subcontractors, bid tabulations, and evaluations. Before providing opinions on which firm is best suited for the work, we will once again compare the results with our bid database of recent work to see if the estimates reflect what other similar projects were bid at.

Construction Engineering & Inspection - to ensure the project is built as designed.
Once the contractor has been selected and the proper permits are in place, the KW team will monitor the construction progress. We will start with the Preconstruction Meeting, then move to site visits at regular intervals. We will also field any questions and issue RFI's as required. The KW team will conduct site inspections, as required, to review and make recommendations on all pay applications. We will develop the punch-list and collect all of the as-built documentation, warranties, and manuals for the City. We will also participate in road construction utility coordination meetings as required for applicable projects.

COLLABORATION BY DESIGN

Case Study

KW has successfully utilized this project approach with multiple clients including the City of Winder.

In recent years, the State of Georgia has experienced significant growth in the residential, commercial, and industrial sectors. This growth has led to the design and construction of a large number of road improvement projects, both at a local level and at a state level through GDOT. These projects often are in areas where growth has already taken place and there is a large volume of existing utilities in place. Municipalities that own and operate natural gas, water distribution, and/or sanitary sewer systems find themselves in a position of needing to review the proposed road improvement plans to determine if their facilities will be in conflict and if so, they have to develop relocation plans. This is a service that KW provides to a number of clients.

One of the most recent projects such as this we have been involved in is the W Winder Bypass Phase 3 Construction Project in Winder, GA. The project is the last segment in the W Winder Bypass that will connect the already completed Phase 2 of the Bypass to SR 316. The City of Winder's natural gas and water distribution systems are both located within the project limits and were both affected by construction thus requiring major relocations.

Our involvement started with GDOT's First Submission Plans. The City requested that we review the plans and provide the information requested by GDOT as we were already involved in both Phase 1 & 2 of the Bypass. We coordinated with City staff to obtain records of the City's existing facilities within the project limits, including main sizes and materials, and verified if the facilities were accurately indicated on the plans.

Once the Second Submission Plans were issued by GDOT, we immediately began the process to review the construction plans, cross sections, and storm drainage profiles to verify areas where construction of the Bypass would require relocation of the natural gas and water facilities. Based on our review, natural gas mains found to be in conflict included approximately 450 linear feet (LF) of 4-inch polyethylene (PE) main, 1,200 LF of 6-inch PE main, and 1,200 LF of 6-inch steel main. Water distribution facilities that were found to be in conflict included approximately 1,500 LF of 6-inch CIP, 450 LF of 8-inch PVC, 350 LF of 8-inch DIP, and 1,800 LF of 16-inch DIP water main. Both facilities required replacement of crossings beneath SR 316.

The replacement of the 16-inch DIP water main and required casing under SR 316 resulted in an evaluation and request for a limited access variance due to the surrounding topography and resulting depths that would be required to meet the minimum cover requirements while crossing SR 316. We provided numerous route options and costs as well as a feasibility study detailing the difficulties that will be experienced during initial construction as well as in the future should the City need to access the casings for maintenance or replacement of the main. After multiple meetings and requests to re-evaluate the request, GDOT denied the variance. At the present, the road contractor is lobbying GDOT for a variance due to the difficulties they are about to experience in construction.

Our scope of services also included the preparation and submittal of a Utility Aid Request. After numerous meetings and negotiations, the City was able to obtain partial aid for the relocation of the facilities in-kind. Being that aid was provided; the construction of the relocations was included in the roadway contract.

The project is currently under construction. The natural gas main construction has been completed. The water main relocation work is on-going. KW continues to assist the City of Winder by providing construction administration services. We have been participating in bi-weekly utility coordination meetings as well as various relocation design modifications that were required due to roadway construction field changes.

This project is just one of many relocation projects that we have been involved in with GDOT as well as local jurisdictions. We have the experience and expertise to provide this same level of service to the City of Covington for any relocation projects that may come in the future.

Project Management Approach

Quality Control

KW's Total Approach to Quality

We learned long ago that a day one approach to quality creates successful projects.

Our Total Approach to Quality methodology provides a high degree of quality on our projects through Personal Ownership. Our dedicated QA/QC Manager, Daniel Wallace, PE will create the Detailed Quality Control Plan (DQCP) with the planning team. This quality assurance strategy remains connected to the project and is based on four factors:

1. **Plan for quality (assurance).** As our team processes project data and reviews codes & guidelines, they will be documenting any potential shortfalls from quality, schedule, and budget standpoints. These findings are then discussed at project meetings with the Project Manager to provide clarity to the team.
2. **Implement the quality plan.** From kickoff meetings to frequent communications across the entire project team, we will be working together step-by-step with stakeholders to keep the project moving forward. Daniel will perform QC reviews at project milestones. He will provide direct feedback to the design team on any potential framework issues, or foreseeable errors.
3. **Measure and ensure quality (control).** Our top-down and bottom-up approach to quality is a proven process which has integrated checks and cross checks. Utilizing the DQCP and milestone quality reviews as the foundation for quality, the team will collaborate to provide QC checks from the boots-on-the ground design staff to the Principal level.
4. **QC Follow Through** The way to control the quality during a project's lifecycle is through consistency. The team that frames the design and performs QC on it, will remain on the project for the duration.

Quality Results that Matter

Designing with quality in mind is not achieved through a checklist, it must be a part of the company culture.

KW has been providing ***quality work for clients for 70 years.*** We achieve this by having pride in our work product and being committed to serving our clients. Committing our professionals and the necessary resources for our quality program gets results:

- *No E&O claims paid over the past ten (10) years*
- *Significant reduction of change orders on projects over the past five (5) years*
- *Low quantity of RFI's across project & engineering-related schedule | budget changes*

Tessa Development Natural Gas Plans
City of Sugar Hill, Georgia

Alex Philmon | Natural Gas Supervisor
aphilmon@cityofsugarholl.com

Dates
2025 (Under Const.)
Engineering Fee
$2,600

Firm Role
Development Plan Review, Gas Distribution System Design

Key Team Members
John Payne, PE Blake Hamby, EIT

This project consisted of the review of a proposed townhome development that was under construction within the City of Sugar Hill, recommendations of proposed gas main route, and development of construction plans for use during construction by the City's contractor. Construction of the natural gas main and service connections is being handled directly by the City and their on-call contractor.

SR 44 from S of King Drive to E of Greensboro
Tri-County Natural Gas Authority, Georgia

Wendell Matthews | Natural Gas Superintendent
wmmtcng@gmail.com

Dates
2025 (Awaiting Const.)
Construction Cost
$1.0M

Firm Role: GDOT Plan Review, Permitting, and Utility Aid Coordination; GPS Utility Locate Collection; Utility Relocation Plan Design

Key Team Members: John Payne, PE; Aurie Manigo, PE; Blake Hamby, EIT; Emme Yearwood, EIT

Project consisted of the review of the GDOT 2nd Submission Plans for the Phase 1 Widening of SR 44, performing a conflict analysis to determine the extent of natural gas facilities that will require relocation, marking up of cross sections and profiles, development of natural gas relocation plans and associated cost estimates, and preparation of technical specifications. Separate relocation plan sets were developed for the portion of the project under the ownership of Tri-County and for the portion under the ownership of the City of Greensboro. Services also included the preparation of the utility aid request packages for each Tri-County and Greensboro, coordination for acceptance of utility aid, and for the preparation of GDOT permits for each system. The relocation of the gas facilities was included in the GDOT contract and is currently awaiting the start of construction. Total gas main to be relocated includes 4,000 linear feet (LF) of 6-inch high pressure steel main, 2,750 LF of 2-inch PE low pressure main, valves, regulator station, and service connections. Total estimated cost of construction for the Greensboro portion is approximately $275,000 and the Tri-County portion is approximately $725,000.

excluded

Bethlehem Church - SR 53 Gas Main Relocation
City of Winder, Georgia

Horace Gee | Utilities Director
horace.gee@cityofwinder.com

Dates
2023
Construction Cost
$455,000

Firm Role: Development Plan Review, GDOT Plan Review, Utility Relocation Plan Design, GDOT Permitting, Bid Phase Services, Construction Administration

Key Team Members: John Payne, PE; Aurie Manigo, PE

Project consisted of the relocation of approximately 1,850 linear feet of 8-inch high pressure steel gas main along SR 53 that was determined to be in conflict with the turning lane and related construction associated with the new Bethlehem Church. KW reviewed the development plans to verify the presence of conflict and prepared necessary relocation plans. The majority of this project was also located within the limits of the SR 53 at Jackson Trail Road roundabout and required coordination and modifications with the 2nd submission relocation plans that KW had previously completed and submitted to GDOT. The project also conflicted with a water main extension and replacement project that was underway. KW coordinated with the City and water main design consultant for necessary project modifications. KW prepared the natural gas relocations plans and associated Project Manual, provided Bid Phase Services, and provided Construction Administration Services.

SR 81 at Ozora Church Road Natural Gas
City of Lawrenceville, Georgia

Todd Hardigree | Natural Gas Director
todd.hardigree@lawrencevillega.org

Dates
2025 (Complete)
Engineering Fee
$27,000

Firm Role
GDOT Plan Review, Utility Relocation Plan Design, GDOT Permitting, and GDOT Utility Aid Coordination

Key Team Members: John Payne, PE

Project consisted of the review of the GDOT 2nd Submission Plans for a roundabout project at the intersection of SR 81 and Ozora Church Road. Services included performing of a conflict analysis to determine the extent of natural gas facilities that would require relocation due to conflicts with the proposed road improvements, markup of GDOT cross sections and storm drainage profiles, development of relocation plans and a preliminary relocation cost estimate, preparation of a request for utility aid, and submittal of 2nd submission package to GDOT. Due to the denial of utility aid for the project by GDOT, the City elected to remove the gas relocation work from the GDOT contract. Keck & Wood coordinated this change with GDOT, revised the 44-series plans to 24-series plans, provided revised plans and quantities to City staff for advertisement, and prepared and submitted the GDOT utility permit package.

excluded

Indian Shoals Road Natural Gas Relocation
City of Buford, Georgia

Daren Perkins | Gas Superintendent
dperkins@cityofbuford.com

Dates
2024 (Complete)
Construction Cost
$107,000

Firm Role
Road Improvement Plan Review, GPS Utility Locate Collection, Utility Relocation Plan Design, GCDOT Utility Aid Coordination Construction Administration

Key Team Members
John Payne, PE
Blake Hamby, EIT
Aurie Manigo, PE
Emme Yearwood, EIT

The project consisted of the relocation of approximately 2,500 linear feet of 4-inch PE gas main due to conflicts with a Gwinnett County DOT road improvement project to install a roundabout at the intersection of Indian Shoals Road and Bold Springs Road. Services provided included review of road improvement plans, coordinating with City staff to locate the their existing buried facilities, GPS collection of locates and incorporation of data into plan files, conducting a conflict analysis to determine the extent of natural gas facilities that would be in conflict, coordination with County representatives in attempt to redesign portions of the roundabout plans to avoid conflicts, preparation of relocation plans and cost estimate, coordination with County representatives regarding availability of utility aid, coordination with the City's natural gas contractor, and construction administration.

Sardis Church Road Natural Gas Relocation
City of Buford, Georgia

Daren Perkins | Gas Superintendent
dperkins@cityofbuford.com

Dates
2022 (Complete)
Construction Cost
$350,000

Firm Role
Road Improvement Plan Review, GPS Utility Locate Collection, Utility Relocation Plan Design, GCDOT Utility Aid Coordination, Bid Phase Services, Construction Administration

Key Team Members
John Payne, PE;
Aurie Manigo, PE

The project consisted of the relocation of approximately 920 linear feet (LF) of 4-inch high pressure steel gas main and 3,650 LF of 4-inch PE gas main due to conflicts with a Gwinnett County DOT road improvement project to install a roundabout at the intersection of Sardis Church Road and W Rock Quarry Road. Services provided included review of road improvement plans, coordinating with City staff to locate the their existing buried facilities, GPS collection of locates and incorporation of data into plan files, conducting a conflict analysis to determine the extent of natural gas facilities that would be in conflict, coordination with County representatives in attempt to redesign portions of the roundabout plans to avoid conflicts, coordination for potholing of existing gas main, preparation of relocation plans and cost estimate, coordination with County representatives regarding availability of utility aid, preparation of the Project Manual, Bid Phase Services, and provided Construction Administration Services.

excluded

Thompson Mill Road at North Bogan Road
City of Buford, Georgia

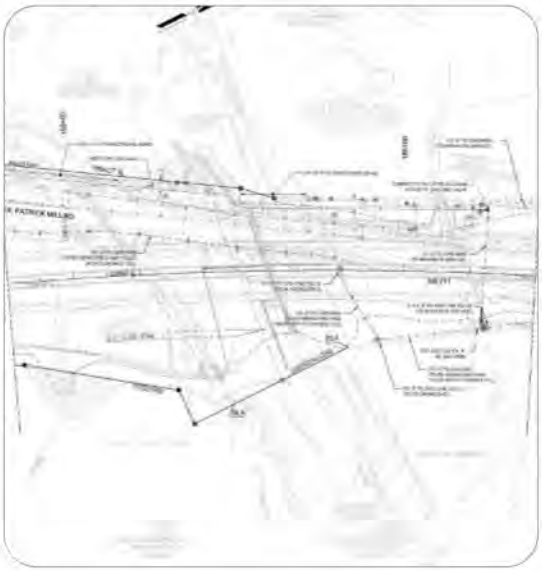
Daren Perkins | Gas Superintendent
dperkins@cityofbuford.com

Dates
2025 (Awaiting Const.)
Construction Bid Cost
$381,000

Firm Role
Road Improvement Plan Review, GPS Utility Locate Collection, Utility Relocation Plan Design, GCDOT Utility Aid Coordination, Bid Phase Services, Construction Administration

Key Team Members
John Payne, PE
Aurie Manigo, PE
Emme Yearwood, EIT

The project consisted of the relocation of approximately 450 linear feet (LF) of 8-inch high pressure steel gas main, 1,900 LF of 6-inch PE gas main, and 1,700 LF of 4-inch PE gas main due to conflicts with a Gwinnett County DOT road improvement project to install a roundabout at the intersection of Thompson Mill Road and North Bogan Road. Services provided included review of road improvement plans, coordinating with City staff to locate the their existing buried facilities, GPS collection of locates and incorporation of data into plan files, conducting a conflict analysis to determine the extent of natural gas facilities that would be in conflict, coordination with County representatives in attempt to redesign portions of the roundabout plans to avoid conflicts, coordination for potholing of existing gas main, preparation of relocation plans and cost estimate, multiple revisions of relocation plans due to road plan revisions, coordination with County representatives regarding availability of utility aid, preparation of the Project Manual, Bid Phase Services, and provided Construction Administration Services.



W Winder Bypass Utility Relocation, Phase 3
City of Winder, Georgia

Horace Gee | Utilities Director
horace.gee@cityofwinder.com

Dates
2025 (Under Const.)
Construction Cost
$6.9M

Firm Role: GDOT Plan Review, Utility Relocation Plan Design, GDOT Permitting, GDOT Utility Aid Coordination, Construction Administration

Key Team Members: John Payne, PE, Aurie Manigo, PE, Blake Hamby, EIT, Emme Yearwood, EIT

Project consisted of the review of the GDOT 1st and 2nd Submission Plans for the Phase 3 of the West Winder Bypass, performing a conflict analysis to determine the extent of natural gas facilities that will require relocation, marking up of cross sections and profiles, development of natural gas and water main relocation plans and associated cost estimates, and preparation of technical specifications. Services also included the preparation of the utility aid request package the City of Winder for the gas and water relocations, request of limited access variance and coordination with GDOT for resolution to concerns, coordination for acceptance of utility aid, preparation of 44-Series plans for the gas relocations and the water relocations, and preparation of GDOT permits for each system. The relocation of the gas facilities was included in the GDOT contract. We have been participating in the bi-weekly utility coordination meetings with the road contractor and have been involved in the review of proposed utility alignment changes based on construction plan updates as they arise. The natural gas relocations have recently been completed. The water relocations are under construction.

excluded

Camellia Park Gas Main Extension
City of Thomson, Georgia

Trelles Robinson | Natural Gas Director
trelles.robinson@thomson-mcduffie.gov

Dates
2024 (Complete)
Construction Labor Cost
$52,000

Firm Role: Development Plan Review, Gas Distribution System Design, GDOT Permitting, Bid Phase Services

Key Team Members: John Payne, PE; Aurie Manigo, PE; Emme Yearwood, EIT

Project consisted of the review of the subdivision plans, including the future phases, coordination with City staff to determine what the natural gas needs of the development will be, analysis of existing gas mains within the area, coordination with the developer for electronic design files, development of gas main construction plans, quantity take-off, development of a Project Manual containing a bid form, contracts, and technical specifications. Services also included Bid Phase Services including coordination with multiple contractors to solicit bids, review of bids submitted, development of a bid tabulation, and submittal to City staff for review and approval. We also assisted in the development and execution of the contracts as well as the preparation and submittal of the GDOT permit for the connection to the existing natural gas main along SR 223.

SR 316 at Harbins Road Gas Relocations
City of Buford, Georgia

Daren Perkins | Gas Superintendent
dperkins@cityofbuford.com

Dates
2020 (Complete)
Construction Cost
$944,000

Firm Role: Road Improvement Plan Review, GPS Utility Locate Collection, Utility Relocation Plan Design, GCDOT Utility Aid Coordination, Bid Phase Services, Construction Administration

Key Team Members: John Payne, PE; Aurie Manigo, PE

The project consisted of the relocation of approximately 8,000 linear feet (LF) of 8-inch high pressure steel gas main, 300 LF of 4-inch high pressure steel gas main, and 1,250 LF of 4-inch PE gas main due to conflicts with a Gwinnett County DOT road improvement project to install an interchange at Harbins Road and SR 316. Services provided included review of road improvement plans, coordinating with City staff to locate the their existing buried facilities, GPS collection of locates and incorporation of data into plan files, conducting a conflict analysis to determine the extent of natural gas facilities that would be in conflict, preparation of relocation plans and cost estimate, coordination with County representatives regarding availability of utility aid, coordination with Colonial Pipeline for a crossing agreement and crossing design, and development of the Project Manual containing contract related documents and technical specifications. Services provided also included Bid Phase and Construction Administration Services including site visits, payment application review and processing, GDOT utility coordination meeting attendance, and project closeout.

excluded

EXPERIENCE

24 years

Project Experience

- **Gwinnett County Roadway Improvement Analysis | Multiple Locations, City of Buford, GA -** *Project Manager* responsible for the analysis of numerous Gwinnett County roadway improvement plans to determine locations of potential impacts with the City of Buford natural gas utilities. Work associated with these projects most often include the development of utility relocation plans, cost estimating, bidding, and construction administration including Gwinnett County project coordination meetings. Utility evaluation and relocation services have been provided for over 20 projects in the last five years.
- **SR 140 Widening and Reconstruction | City of Adairsville, GA -** *Project Manager* responsible for the relocation of existing natural gas mains and regulator stations, sanitary sewer lines, and water lines that are in conflict with the overall GDOT widening and reconstruction. Project includes the replacement of 8-inch through 2-inch high pressure steel gas mains, 4-inch and 2-inch polyethylene gas mains, 16-inch through 6-inch ductile iron water main, and 8-inch sanitary sewer lines.
- **GDOT Road Improvements | City of Winder, GA -** *Project Manager* responsible for the analysis of GDOT road improvement plans to determine locations of potential utility impacts for natural gas and water distribution systems. Recent projects completed include SR 316 at SR 53 Interchange, SR 316 at SR 81 Interchange, SR 316 at SR 11 Interchange, SR 11 at SR 211 Roundabout, SR 211 at Old Hog Min Rd Roundabout, W Winder Bypass Ph 1 & 2, SR 11 at Apalachee River Bridge Replacement. There are numerous GDOT projects in various stages of plan evaluation and development as well. Work on these projects includes attending of GDOT design meetings, utility relocation plan development, Utility Aid Request coordination & submittal, permitting, and bidding.
- **GDOT Road Improvements | City of Buford, GA -** *Project Manager* responsible for the analysis of GDOT road improvement plans to determine locations of potential utility impacts for natural gas, water distribution, and sanitary sewer utilities. Recent projects completed include SR 347 Ph 1 & 2 Widening, SR 13 Widening, SR 81 Roundabout, I-85 Widening Ph 1 & 2. There are numerous GDOT projects in various stages of plan evaluation and development as well. Work on these projects includes attending of GDOT design meetings, utility relocation plan development, Utility Aid Request coordination & submittal, permitting, and bidding.
- **High Pressure Gas Main Improvements | City of Winder, GA -** *Principal* responsible for preliminary route evaluations including route identification, system modeling of route options, cost estimation, and presentation to City staff for route selection. Responsibilities also included management and oversight of design team for the detailed design, permitting, bidding, and construction management of the 7.75 miles of 6-inch steel high pressure natural gas main and related facilities.
- **Natural Gas General Consulting | Multiple Municipalities -** *Principal & Project Manager* responsible for direct consultation with municipalities, including, but not limited to, the Cities of Eatonton, Winder, Buford, Thomson, Madison, and Commerce, to provide general services including, but not limited to, monthly lost and unaccounted volume reporting, annual reporting and tax filings, pressure improvement evaluations and suggestions, review and design of natural gas facilities to serve proposed developments, natural gas modeling of proposed developments to aid in available capacity and/or required capacity upgrades, and regulatory permitting services.

excluded

Aurie Manigo, PE
Assistant Project Manager
Natural Gas Design Lead

Registration: Professional Engineer GA (51205)
Education: BSCE 2016 | Clemson University
Experience: 9 years

Aurie's design experience includes natural gas main relocation, replacement, and extensions in addition to water & wastewater treatment plants, pump stations, sanitary sewer, and water main improvements. *Aurie will lead the natural gas design team, providing design oversight across the project team while working alongside John as the Assistant Project Manger.*

- **Natural Gas Main and Water Main Relocation | City of Winder, GA -** *Design Lead* responsible for the design and construction administration for the installation of 6-inch and 4-inch polyethylene gas mains, 10-inch ductile iron pipe water main, and 2-inch polyethylene water main for utilities that were in conflict with the GDOT bridge replacement project along SR 11 at Apalachee River.
- **Bostwick Natural Gas Main Extension - Phases 1 & 2 | City of Madison, GA -** *Design Lead* responsible for the design, permitting, bidding, and construction administration services for the design and installation of an overall total of approximately 16 miles of 4-inch HDPE, railroad and creek bores, valves, and connections.
- **GDOT Road Improvements | City of Lawrenceville, GA -** *Design Lead* responsible for the analysis of GDOT road improvement plans to determine locations of impacts to existing natural gas facilities requiring relocation or modifications to roadway plans. Recent projects that have been completed, or are in various stages of design, include SR 316 at Hi Hope Road, SR 316 From East of Cedars Road to East of Fence Road to West of Sugarloaf Parkway, SR 81 at Ozora Church Road Roundabout, and SR 81 at SR 138 Roundabout. Work on these projects have included attending City and GDOT meetings, utility relocation design and plan development, Utility Aid Request coordination and submittals, and permitting.
- **High Pressure Natural Gas Main Improvements | City of Winder, GA -** *Design Lead* responsible for the design, plan preparation, permitting, bidding, and construction administration services for the design and installation of approximately 7.75 miles of 6-inch steel gas main, valves, regulator station, and connections to existing mains.

Matthew Kaufman, PE
Modeling & Utilities Design Lead

Registration: Professional Engineer GA (48199)
Education: BSCE 2015 | Clemson University
Experience: 10 years

Matthew's experience includes design and project management for water and sewer improvements, stormwater, and system modeling for local and state governments, authorities, and private clients. *As Modeling & Utilities Design Lead, Matthew will coordinate with the design team to develop pragmatic solutions for the betterment of the City of Covington.*

- **Old Albany Road Utility Relocations | City of Thomasville, GA -** *Project Manager* for project that consisted of 4,560 LF of various nominal sizes of HDPE water main and associated appurtenances, 2,750 LF of cured-in-place pipe, 460LF of 8-inch PVC sanitary sewer installed via pipe bursting, and 60 LF of 6-inch PVC sanitary sewer via trenching.
- **SR 20 Utility Relocations | City of Loganville, GA -** *Project Manager* for utility relocations along GDOT PI 0016387 for the relocation of approximately 4,000 LF of sanitary sewer mains along the state route. Design also includes relocation of approximately 5,000 LF of water main and coordination with GDOT and other utilities within the corridor.
- **Natural Gas System Mapping & Modeling | City of Eatonton, GA -** *Modeling Lead* responsible for the development of a new natural gas model based on recently completed GIS mapping, coordination with City accounting department to obtain and import customer locations and demands into the model, and model calibration. The model has routinely been used and updated based on proposed and conceptual developments as well as to develop and model pressure improvement upgrades.
- **Natural Gas System Model Updates | City of Perry, GA -** *Modeling Lead* responsible for coordination with City staff to obtain plans and records for recent system upgrades, updating of upgrades into the model, updating of customer demands, calibration of model, addition of proposed and conceptual natural gas demands expected to be online soon, and evaluation of the model to determine if system improvements are necessary to maintain flow and pressure.
- **Downtown Utility Improvements | City of Gainesville, GA -** *Project Engineer* for utility relocations and improvements of approximately 1,000 LF of sanitary sewer mains in the downtown corridor. Improvements included rehabilitation efforts for existing sanitary sewer as well as material replacements and relocations for the ongoing streetscape project.

"Collaboration By Design"

It is our mission to engage with our clients every step of the way.

We believe that our job doesn't stop at delivering construction drawings.

We create partnerships on a personal level through clear communication, face-to-face meetings, boots on the ground, and personal accountability.

As trusted advisers we help clients navigate complex decisions by breaking them down into clear, understandable choices.

It's how we educate, how we mentor, and how we deliver!

Daniel Wallace, PE
QA/QC

Registration: Professional Engineer SC (27049)
Education: BSCE 2003 | University of South Carolina
Experience: 22 years

Daniel's experience includes working with municipalities, state institutions, multi-discipline engineers, architects, private developers, and contractors. He has participated in the design, construction review, and quality control for numerous projects including water & sewer infrastructure, storm drainage systems, sewer pump & grinder stations, streetscapes, commercial sites, and residential subdivisions. ***Daniel will collaborate with the team, scrutinize key milestones, and provide quality oversight throughout the project. His extensive utilities experience will make him a valuable technical resource.***

- **Basin 1 & 2 Outfall Stormwater Improvements |City of Winder, GA -** ***Project Manager.*** The Basin 1 & 2 outfall was identified as a critical stormwater system in need of improvements. The existing system frequently flooded at a railroad underpass frequently blocking the primary path to travel across the City. In addition to capacity restraints, the existing system was experiencing multiple modes of failure such as pipe collapse, joint separation, and corrosion at multiple locations along the system. Services provided included hydrologic and hydraulic analysis, route assessment, easement acquisition, and coordination with multiple authorities having jurisdiction and utilities along the project route.
- **Liberty Street Waterline Upgrade | City of York, SC** - ***Project Principal*** for this RIA and SCIIP funded project that included upgrading an existing 6-inch waterline to 12-inch through downtown York. Services included route assessment and coordination with funding authorities, multiple jurisdictional authorities, and utility providers.
- **Springs Mill Water & Sewer Replacement | Town of Kershaw, SC** - ***Project Manager*** for the water system, gravity sewer system, and pump station design, permitting, bidding, and construction administration.
- **Celanese/India Hook Utility Relocations | City of Rock Hill, SC** - ***Project Principal*** for the relocation of existing 8-inch sanitary sewer line and replacement of existing 8-inch AC waterline with 12-inch DIP as a part of the intersection upgrades. Services included route assessment, easement acquisition, and coordination with multiple authorities having jurisdiction and utilities along the project route.
- **Multiple Water & Sewer Projects | Town of Andrews, SC** - ***Project Manager/ Lead Engineer*** for the master planning, mapping, water & sewer assessments, and multiple rehabilitation and replacement projects for both water and sewer systems. Services have included full water and sewer system mapping, sewer system assessments, CIPs, water system modeling, rate studies, CMOM, and CAPs for the Town. Many items were related to both SCDHEC water and sewer consent orders. To date, over $10M in improvements have been completed or are nearing construction.

COLLABORATION BY DESIGN

Appendix
Billing Rates

The key personnel listed on the organizational chart will be billed at the following labor categories:

Key Personnel	Role	Labor Category	Hourly Rate
John Payne, PE	Project Manager | QA/QC	Market Leader/VP	$285
Daniel Wallace, PE	QA/QC	Market Leader/VP	$285
Aurie Manigo, PE	Assistant Project Manager | Natural Gas Design Lead	Project Manager 1	$195
Matthew Kaufman, PE	Utilities Design Lead	Project Manager 1	$195

KW's routine tasks associated with Natural Gas General Consulting clients is typically billed on an hourly rate basis per the hourly billing rates listed below. Examples of these tasks may include utility permitting, attending requested meetings, system evaluations, etc. Our rates are adjusted on an annual basis on or around January 1st of each fiscal year. On average, we typically experience an annual increase of approximately 4% per year.

Specific tasks or assignments can be broken down into their own project number as well as the development of a project budget with a not to exceed fee. Examples of these tasks may include the design and bidding of natural gas main extensions, system improvements, or system modeling upgrades. There are also instances of where we can arrange to bill assigned tasks as lump sum rather than hourly. This is case by case and can be discussed as tasks are assigned.

Subconsultant related work is typically based upon lump sum cost agreements for surveying and environmental work. Easement acquisition work with subconsultants is typically based on lump sum or per parcel cost agreements.

RE: Hourly Fees to Provide Right of Way Acquisition Services for On-call Natural Gas Engineering Services within the City of Covington, GA

Dear Mr. Payne,

THC, Inc. (THC) is pleased to submit hourly fees for right of way acquisition services as part of the RFQ for On-call Natural Gas engineering services. As we discussed by phone today, we anticipate proposing lump sum/per parcel rates for each assigned project involving easement or parcel acquisitions for the City of Covington. Below is a list of available staff for these projects and their loaded hourly rates.

Hourly Fees Chart

Name	Project Role	Years of R/W Experience	Loaded Hourly Rate
Wesley Brock	Program Manager/Principal	33	$204.80
Wayne Roberts	Project Manager	25	$171.77
John Albrycht	Senior R/W Agent, Cost Estimates	30	$150.00
Nathaniel Kimbro	Senior R/W Agent	9	$148.64
Michael Woodall	R/W Agent	6	$142.87
Mercedie Woodall	R/W Agent	3	$118.92
Clint Johnson	R/W Agent	2	$124.53
Jennifer Roberts	R/W Agent	2	$112.31

We appreciate the opportunity to serve you and your client on this project. Please contact us if you have questions about this proposal.

Sincerely,

Wesley K. Brock
Georgia Program Manager

RE: *Request for Qualifications for Annual Consulting Services | Category A—On-Call Consulting Services*

Dear Mr. Jewell and Members of the Selection Committee:

The City of Covington (City) is seeking the partnership of a firm that has the availability, expertise, and resources to serve as a reliable on-call consultant. As new projects emerge, the City needs the confidence that comes from partnering with a full-service engineering consulting firm with ample experience in the area, technical expertise in the full breadth of natural gas services, and the resources of a large firm that is wholly dedicated to providing excellent client service. That firm is Kimley-Horn.

EXPERTISE IN ALL THINGS NATURAL GAS: We have a dedicated nationwide team of natural gas specialists with decades of experience in programmatic work for municipalities and natural gas providers throughout the country. Our natural gas engineering professionals have easy access to in-house specialists in traffic management, environmental services, and permitting, which will allow us to identify potential schedule and cost efficiencies for you whenever possible. We will leverage this expertise to consistently exceed your expectations.

STRONG LOCAL RELATIONSHIPS: At Kimley-Horn, we take pride in our long-standing relationships with the Georgia Department of Transportation (GDOT), local municipalities, and permitting agencies around Covington. Our team's deep understanding of the regional regulatory landscape helps ensure seamless navigation through the permitting process, fostering efficient project approvals. This collaboration not only streamlines complex procedures but also reflects our commitment to exceptional client service and community partnership.

RESOURCES OF A LARGE, CLIENT-CENTRIC FIRM: Thanks to our experience serving clients through on-call projects, we understand how critical it is to provide the right staff and resources at the right time for any situation that may arise—sometimes at a moment's notice. With more than 450 staff in our five offices throughout Georgia, we are well-positioned to serve you whenever project needs arise. Additionally, because Kimley-Horn is a client focused firm that functions as one profit center, the City will have the resources of every member of our 8,900-person firm nationwide. When unique situations arise, we will get you the right people and tools you need to accomplish your goals.

Thank you for your consideration of our qualifications. We are committed to serving the City on this on-call contract and look forward to working with you to support your commitment to providing high-quality natural gas services to your customers. If you have any questions or need additional information, please do not hesitate to contact me at the information below. ***Kimley-Horn acknowledges that no formal addenda were issued, but our questions were answered via email by Mike Jewell on July 15, 2025.***

Sincerely,

Kimley-Horn and Associates, Inc.

TEAM AND QUALIFICATIONS

FIRM QUALIFICATIONS

Founded in 1967 in Raleigh, NC, Kimley-Horn has grown to one of the premiere full-service engineering and planning consulting firms in the nation. Our permanent staff includes more than 8,900 professional, technical, and support staff in more than 145 offices across the US, including more than 450 employees among our four Atlanta-area offices. In addition to engineering services for natural gas systems, Kimley-Horn's range of disciplines includes, site development, planning, transportation, traffic, roadway, landscape architecture, structures, water/wastewater, environmental, and aviation.

KIMLEY-HORN OFFICE LOCATIONS

Kimley-Horn Office

Kimley-Horn Natural Gas Experience

Kimley-Horn has been committed to serving the natural gas industry **for over a decade, and this team has 112 years of combined experience serving on 750+ natural gas projects** and assisting clients nationwide in maintaining access to both new and existing critical infrastructure. Our team's proactive approach, flexibility, and innovative design enable our clients to meet critical deadlines and address both short- and long-term planning needs. Kimley-Horn's skilled professionals successfully have expanded utility service to previously unserved areas, extended the life of existing infrastructure through rehabilitation and/or repair, designed new facilities, and replaced aging infrastructure. Our natural gas expertise is supplemented by our in-house land development, traffic, and permitting capabilities to provide a one-stop shop for natural gas projects.

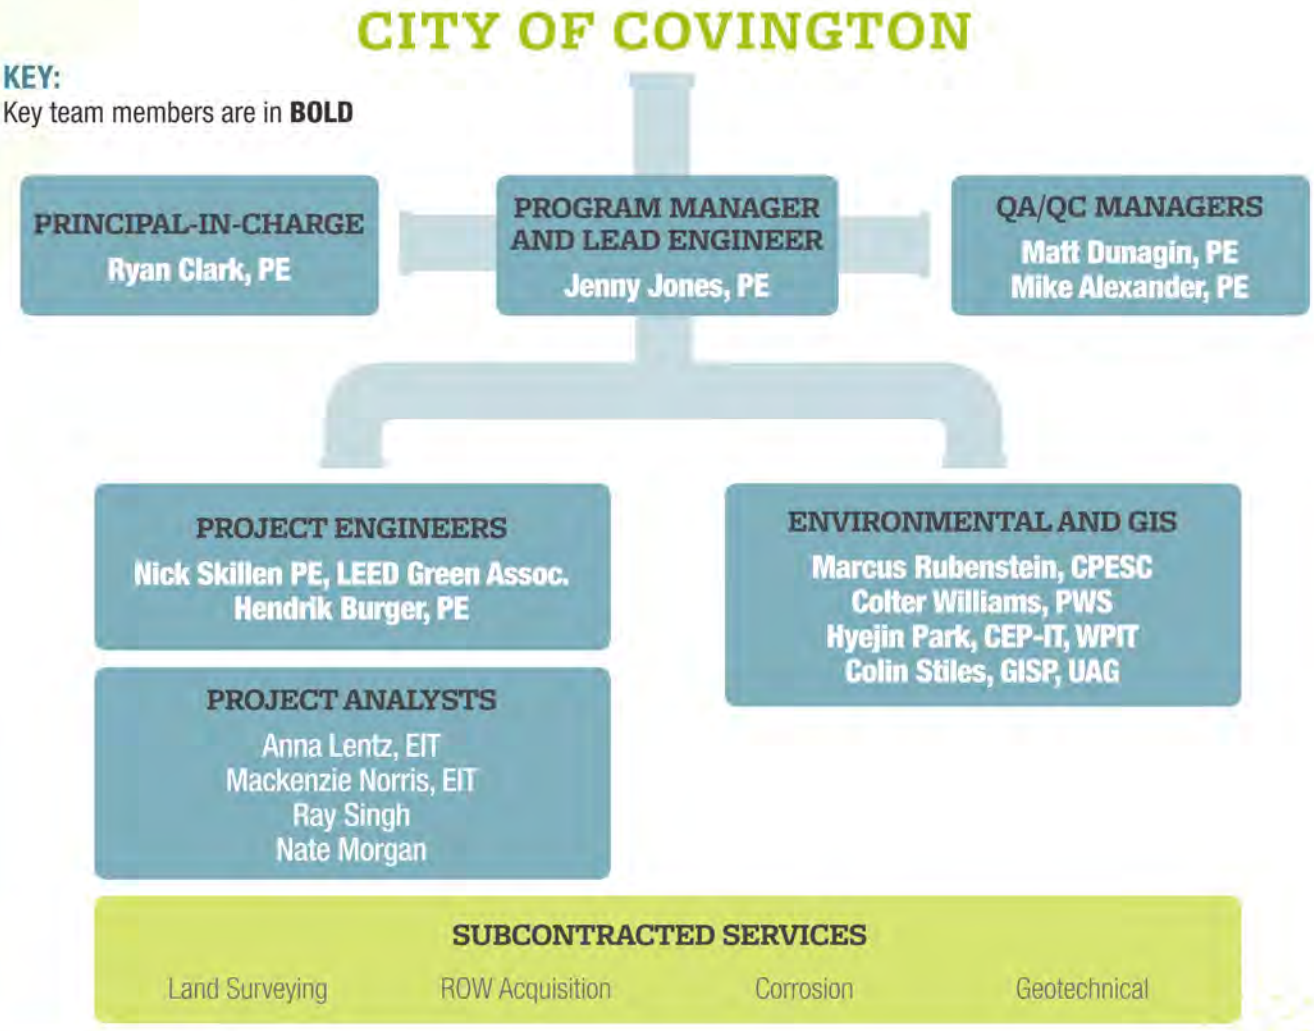
In addition, we have the outstanding in-house resources and technical expertise to provide virtually all required services. An employee-owned corporation, Kimley-Horn prides itself on a proven history of successful client service over the last 56 years. We have provided engineering and planning services to municipalities and agencies across the country and are currently serving numerous cities and counties throughout Georgia and the Southeast. A few of our staff members are former municipal engineers and planners who have a unique perspective on the common challenges facing growing municipalities and utility authorities.

NATURAL GAS CAPABILITIES

Our natural gas expertise is supplemented by our in-house land development, traffic, and permitting capabilities to provide a one-stop shop for natural gas projects.

- Pipeline Design (Transmission and Distribution)
- Routing Studies and Assessments
- Metering and Regulating (M&R) Station Design
- Station Maintenance and Upgrades
- Trenchless Technology
- Grant Writing
- Utility Conflict Resolution
- Main Replacement and Upgrades
- Project Management
- Base Mapping and GIS Services
- Permitting Services
- Pig Receiving/ Launching Station Design
- Electrical/ SCADA Design
- DOT Coordination
- Site Development
- Pipeline Integrity Design
- Environmental
- Structure and Foundation Design

HIGHLY EXPERIENCED, KNOWLEDGEABLE TEAM



Our team's combined municipal experience in design, planning, administration, and construction phase services has given us a comprehensive understanding of how to work with cities, counties, state DOTs, and other regulatory agencies, elected officials, various stakeholders, and the local community to negotiate support and buy-in to achieve project objectives.

Kimley-Horn has carefully assembled a multidisciplinary team with the skills and experience needed to meet the required services under this contract. Under the leadership of **Jenny Jones, PE,** Program Manager, our team will work to function as an extension of your staff through frequent communication, strong performance and management, and a constant focus on the schedule and budget for this contract. Additionally, our key team members will be supported by engineering production staff who also have been instrumental in the delivery of numerous high-profile natural gas projects around the country.

Kimley-Horn has a proven track record of delivering well-considered routing and construction designs that effectively minimize impacts and mitigate risks to project schedules, budgets, and long-term operations. For projects of significant length and complexity, which involve operational, construction, and environmental constraints, it is crucial to have a team that is adept at managing the diverse challenges that may arise. Our team is capable of quickly pivoting to implement alternate plans, ensuring efficiency and project continuity.

With extensive experience working alongside municipalities, we possess an in-depth understanding of the requirements and processes necessary to design and permit large-scale projects while staying within budget. We have assembled a highly qualified, locally knowledgeable team, ready to leverage their expertise to ensure the successful execution of your project.

An organizational chart that identifies the project manager and key team members is included below. Resumes for key team members can be found in the Appendix, starting on page 21.

EXPERIENCE

EXPERIENCE WITH NATURAL GAS PROJECTS

We have **more than a decade** of experience of successfully delivering on **750+ natural gas infrastructure projects**, fostering lasting partnerships with local utility companies and municipal gas agencies to bring comprehensive natural gas solutions. In Georgia, we have **completed more than 75 similar projects directly and indirectly for municipal gas agencies in the last five years**, including distribution and transmission pipelines, stations, and master plans. **Our 10 relevant project sheets and key team member resumes highlighting relevant project experience can be found in the Appendix, starting on page 21.**

EXPERIENCE WITH ON-CALL CONTRACTS

Kimley-Horn has extensive experience working on and completing similar contracts for government entities. Our team's success is due to our ability to quickly mobilize and commit necessary resources to deliver contracts and task orders. We realize there are specific needs with standby services and on-call contracts, and **we have successfully completed nearly 6,000 projects for municipal clients throughout the Southeast in the past 10 years with 380 being in Georgia.**

One feature that separates Kimley-Horn from other firms is our ability to provide integrated services for any project. Kimley-Horn has outstanding in-house resources and technical expertise to provide virtually all required services. One of the benefits Kimley-Horn offers is our diversified resources and the ability to draw upon our experienced team and partnerships at any time. **Jenny Jones, PE,** will call upon any resources you may need, and can assure you that, if required, additional technical expertise is only a phone call away. We are pleased to offer the City a consulting firm that is local, provides a wealth of experience in natural gas projects, has complementary engineering discipline in-house capabilities, and has an experienced, professional team that has served Georgia clients **for over 50 years on more than 8,800 successful projects.**

Our Georgia municipal clients include the following.

EXPERIENCE WITH THE CITY OF COVINGTON

Kimley-Horn has succesfully delivered two projects for the City in the last 10 years–a culvert replacement and a downtown parking study.

EXPERIENCE LOCATED IN THE CITY OF COVINGTON

Kimley-Horn is familiar with the City and the area surrounding it, as demonstrated in our project experience below.

- Piedmont Healthcare, Airspace Analysis and Helistop Siting
- Serverfarm, Site Development
- Falconwood Farms Traffic Industrial Development
- SK Microworks America
- United Rentals Covington Site Improvements
- Highway 212 and 20 Mixed-Use Development
- EZ Car Wash–Covington
- Confidential EV Client Site Design for EV Chargers
- SR 142 at Hartland Drive GDOT ICE Traffic Analysis
- Project Hazelbrand–Traffic Impact Study
- Lochridge Boulevard Environmental Site Assessment
- Covington Multifamily Site Civil Engineering
- Dorchester Place Due Diligence
- DaVita Dialysis Site Design and Permitting
- 3110 Highway 278 Site Planning
- City of Covington Culvert Replacement
- Covington Downtown Parking Study
- Peoples Self Storage
- Crown Castle Atlantic Herron Project
- Crown Castle Atlantic Holmes Project
- Mount Pleasant Traffic Analysis
- Covington Comprehensive Transportation Plan
- Covington Hydro Study

MUNICIPAL ORGANIZATIONS WHERE SIMILAR SERVICES WERE PROVIDED

Kimley-Horn has completed similar services for the following municipalities.

- Augusta Utilities
- City of Adairsville, GA
- City of Augusta, GA
- City of Buford, GA
- City of Charlottesville, VA
- City of Ellensburg, WA
- City of Live Oak, FL
- City of Tomball, TX
- Colorado Springs Utilities
- Knoxville Utilities Board (KUB)
- Roanoke Gas Company
- Various municipalities through the AGL DOT program

RESUMES

Resumes for our key team members are included in the Appendix, starting on page 21.

RELEVANT PROJECT EXPERIENCE

1. CITY OF ELLENSBURG, SYSTEM LOOP AND SERVICE LINE

ELLENSBURG, WA

OWNER: City of Ellensburg

OWNER CONTACT INFORMATION:
Darin Yusi
509 962 7229
yusid@ellensburgwa.gov

ROLE OF FIRM: Prime

CONTRACT VALUE: $168,425

YEAR COMPLETED: Ongoing

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: The City of Ellensburg selected Kimley-Horn to provide the planning and design of approximately 6,200 linear feet of 6-inch HDPE natural gas pipe. The design aimed to create a loop within the system and establish a fresh service connection to a granite facility. The design incorporated multiple trenchless installations to successfully traverse a BNSF railway, a WSDOT road, and two stream crossings. Furthermore, Kimley-Horn is providing support for obtaining permits concerning the BNSF railway and WSDOT road crossings.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Ryan Clark, PE | QA/QC | Ryan developed, implemented, and monitored QA/QC processes to ensure all project deliverables meet required standards and regulatory compliance.

Nick Skillen, PE | Project Engineer | Nick provided coordinated engineering tasks, ensuring technical accuracy and compliance with regulatory standards; managed resources; and supported Jenny in achieving project objectives on time and within budget.

Ray Singh | Project Analyst | Ray assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

2. GREENVILLE UTILITIES COMMISSION (GUC), NC 11 NORTH NATURAL GAS EXTENSION

GREENVILLE, NC

OWNER: GUC

OWNER CONTACT INFORMATION:
Dillon Wade, PE
252 551 1594
wadede@guc.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $152,129

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn is currently assisting GUC with the design of an approximately 12,600 LF, 8-inch medium density polyethylene natural gas distribution main that will run along NC11 North from the intersection of MLK Jr. Hwy to Staton Mill Road. Project includes preparation of construction plans, traffic control plans, erosion control plans and specifications; preparation and submission of required permits, including, CSX Railroad Encroachments, North Carolina Department of Transportation (NCDOT) encroachments, North Carolina Department of Environmental Quality (NCDEQ) and United States Army Corps of Engineers (USACE) permits if required; coordination of meetings with GUC Gas Department personnel to finalize route(s) and sizing of the distribution facilities; and preparation and administration of Construction Specifications and Construction Bid Documents.

KEY TEAM MEMBERS INVOLVED:
Ryan Clark, PE | Project Manager | Ryan provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

3. CITY OF TOMBALL, SOUTH CHERRY STREET STEEL MAIN REPLACEMENT DESIGN

TOMBALL, TX

OWNER: City of Tomball

OWNER CONTACT INFORMATION:
Drew Huffman
281 290 1466
dhuffman@tomballtx.gov

ROLE OF FIRM: Prime

CONTRACT VALUE: $46,500

YEAR COMPLETED: 2022

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn was retained by the City of Tomball to design approximately 7,000 linear feet of 6-inch MDPE natural gas along South Cherry Street from Anna Street to just north of Holderreith Road. The project also included abandoning a 4-inch steel gas pipeline, service connection leads, and service connection transfers.

The alignment was generally placed in the eastern side of the parkway, adjacent to an existing 12-inch City of Tomball water line. The project also included a CenterPoint Energy Transmission corridor crossing, permit coordination with Harris County and various public and franchise utility crossings. HDD was utilized for a majority of the project with open-cut sections as necessary for connections and horizontal alignment changes not suited for HDD.

KEY TEAM MEMBERS INVOLVED:
Mike Alexander, PE | QA/QC | Mike developed, implemented, and monitored QA/QC processes to ensure all project deliverables meet required standards and regulatory compliance.

4. AGL, PROJECT FORAGE

VALDOSTA, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Joseph White
912 239 6508
josewhit@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $462,729

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn provided design services for a 4.5-mile natural gas distribution pipeline replacement, extension, and retirement project in Valdosta, GA, aimed at serving a new customer along Inner Perimeter Road. The project was divided into two segments. Segment 1 involved replacing 1,750 linear feet of the existing 8" steel (STL) pipeline—600 linear feet of which were service lines—along W. Hill Avenue and beneath I-75, with 2,070 linear feet of new 12" STL. Segment 2 included replacing 6,715 linear feet of 6" STL along East Hill Avenue, from South Forrest Street to Clay Road, and installing 17,600 linear feet of new 12" STL extending from Fry Street to Barack Obama Boulevard to Cypress Street to Blanchard Street to East Hill Avenue/Highway 221 to Inner Perimeter Road. Additionally, 3,850 linear feet of new 8" STL was installed along Inner Perimeter Road and Hollywood Street, terminating at the new customer connection. Kimley-Horn managed the geotechnical and CP/AC subconsultants.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Ryan Clark, PE | QA/QC | Ryan developed, implemented, and monitored QA/QC processes to ensure all project deliverables meet required standards and regulatory compliance.

Nick Skillen, PE | Project Engineer | Nick provided coordinated engineering tasks, ensuring technical accuracy and compliance with regulatory standards; managed resources; and supported Jenny in achieving project objectives on time and within budget.

Ray Singh | Project Analyst | Ray assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

5. AGL, BRUNSWICK TIDEWATERS INDUSTRIAL PARK

BRUNSWICK, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Joseph White
912 239 6508
josewhit@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $385,785

YEAR COMPLETED: Ongoing

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project is a distribution gas pipeline project to extend approximately 20,000 linear feet of 6" HP steel and 5,000 linear feet of 4" MHP PLS and two (2) regulator stations to serve the Tidewaters Industrial Park. The installation will tie-in to the existing HP gas main that currently terminates at Darien River and will extend north along US Highway 17 to GA Highway 251 at I-95.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny is providing project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Ryan Clark, PE | QA/QC | Ryan developed, implemented, and monitored QA/QC processes to ensure all project deliverables meet required standards and regulatory compliance.

Nick Skillen, PE | Project Engineer | Nick coordinates engineering tasks, ensuring technical accuracy and compliance with regulatory standards; manages resources; and supports Jenny in achieving project objectives on time and within budget.

Anna Lentz, EIT | Project Analyst | Anna assisted with technical tasks, conducted research, supported the project engineers, and ensured compliance with project specifications and standards.

6. AGL, PIEDMONT ENHANCEMENT PROJECT

ATLANTA, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Matthew Poelking, PE
404 273 8144
mrpoelki@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $1,854,279

YEAR COMPLETED: 2023

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Located within a highly congested area of Atlanta's Buckhead district, the Piedmont Enhancement Project integrated two projects. The Pressure Improvement (PRIM) project intended to improve gas pressures in the Buckhead area. The Distribution Integrity Management Program Project (DIMP) replaced old existing distribution pipes. The PRIM component included the design of approximately 12,600 linear feet of 12" HP steel distribution main, 4,000 linear feet of 12" plastic pipe, one regulator station, and one rectifier and anode groundbed. Approximately 4,500 linear feet of the 12" HP steel replaced the existing 6" HP steel from Pelham Road running north along Piedmont Road to I-85. The remaining 8,100 linear feet of 12" HP steel was installed from Fountainhead.

Kimley-Horn was also selected for the environmental portion of this project. Kimley-Horn completed a complex Phase I Environmental Site Assessment, which resulted in Phase II soil sampling at several locations along the project corridor. One location, adjacent to a dry cleaner, contained contaminated soils that needed to be removed and discarded at an acceptable landfill. The team also provided a soil management and safety plan for contractor use. The Kimley-Horn environmental team also prepared the NPDES construction stormwater permit and coordinated with the Georgia Environmental Division to ensure permit compliance. During construction, our team was onsite daily to complete storm event inspections, water quality sampling, agency reporting, and worked closely with the contractor to certify that erosion and sediment controls were property installed and maintained.

KEY TEAM MEMBERS INVOLVED:
Ryan Clark, PE | Project Manager | Ryan provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Jenny Jones, PE | Project Engineer | Jenny coordinated engineering tasks, ensuring technical accuracy and compliance with regulatory standards; managed resources; and supported Ryan in achieving project objectives on time and within budget.

Nick Skillen, PE | Project Engineer | Nick also coordinated engineering tasks with Jenny, ensuring technical accuracy and compliance with regulatory standards; managed resources; and supported Ryan in achieving project objectives on time and within budget.

Marcus Rubenstein, CPESC | Environmental Project Manager | Marcus completed a complex Phase I Environmental Site Assessment, produced soil management and safety plans, obtained stormwater permitting, and provided compliance oversight.

7. AGL, TOTO CREEK HDD

DAWSONVILLE, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Chris Brittian
770 570 8292
wcbritti@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $31,350

YEAR COMPLETED: Ongoing

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn is working with AGL and the USACE on the design and installation of approximately 900 lf of 6-inch HP steel pipe. This installation will require the use of HDD technology to cross under Lake Lanier. The project site is located near SR 136/Price Road, close to Toto Creek Park Road.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny is providing project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Mike Alexander, PE | QA/QC | Mike developed, implemented, and monitored QA/QC processes to ensure all project deliverables meet required standards and regulatory compliance.

Nick Skillen, PE | Project Engineer | Nick coordinates engineering tasks, ensuring technical accuracy and compliance with regulatory standards; manages resources; and supports Jenny in achieving project objectives on time and within budget.

8. AGL, TALBOTTON TAP STATION

TALBOTTON, GA

OWNER: AGL

OWNER CONTACT INFORMATION:
Josh McCrary
404 623 7255
tmccrary@southernco.com

ROLE OF FIRM: Prime

CONTRACT VALUE: $111,975

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: This project included engineering design for the installation of Over Pressure Protection (OPP) at the Talbotton Tap within the Griffin Service Center in Georgia. The former City Gate Station just north of the intersection of Washington Avenue and Project Street was retired as part of this project. Kimley-Horn's services included survey/site layout at the Talbotton Tap and City Gate Station Retirement Site, hot taps/tie-ins, electrical, design of new station/retirement of existing station, and any associated designs as necessary to complete the work as specified in the documents provided by AGL.

KEY TEAM MEMBERS INVOLVED:

Jenny Jones, PE | Project Manager | Jenny is providing project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nick Skillen, PE | Project Engineer | Nick coordinates engineering tasks, ensuring technical accuracy and compliance with regulatory standards; manages resources; and supports Jenny in achieving project objectives on time and within budget.

9. KUB, NATURAL GAS SYSTEM MONITOR AND CONTROL STUDY

KNOXVILLE, TN

OWNER: KUB

OWNER CONTACT INFORMATION:
Tim Kelly
865 320 2681
timothy.kelly@kub.org

ROLE OF FIRM: Prime

CONTRACT VALUE: $87,400

YEAR COMPLETED: 2025

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn was selected to produce a natural gas monitor and control study report for KUB. A PER was first developed to analyze the existing monitor and controls system state to identify areas of concern. Recommendations per regulations and other industry trends were further expanded to determine specific monitoring and controls system enhancements. Project tasks included gathering and evaluating data on the existing monitor and control system and assets at various locations, including regulator stations, gate stations, end of line (EOL) pipeline monitoring points, large commercial/industrial meter sets, programmable logic controllers (PLCs), and other supervisory control and data acquisition (SCADA) control equipment. Kimley-Horn reviewed the locations of existing key/emergency valves, recommended remote odorant monitoring locations, and provided alarm recommendations and communication recommendations. Kimley-Horn also identified short-term and long-term concerns within the system, provided possible solutions, and reviewed emerging or alternative technologies/equipment/analytical tools for KUB to consider. Collaborating with KUB subject matter experts and stakeholders during the project was essential. As a result, the study allowed KUB to reliably serve customers, improve current operations, and plan for asset replacement and improvement.

KEY TEAM MEMBERS INVOLVED:

Nick Skillen, PE | Project Manager | Nick is providing project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Mike Alexander, PE | QA/QC | Mike developed, implemented, and monitored QA/QC processes to ensure all project deliverables meet required standards and regulatory compliance.

10. CITY OF ADAIRSVILLE, ON-CALL CONTACT

ADAIRSVILLE, GA

OWNER: City of Adairsville

OWNER CONTACT INFORMATION:
Steve Smith
678 409 6092
ssmith@adairsvillega.net

ROLE OF FIRM: Prime

CONTRACT VALUE: $38,000

YEAR COMPLETED: Ongoing

DESCRIPTION OF THE PROJECT DEMONSTRATING RELEVANCE TO THE CITY'S NEEDS: Kimley-Horn was selected as the prime consultant for this on-call contract and has been providing natural gas services. Two projects have been completed to date, which includes the following.

City of Adairsville, GA 140 HDD Design and Joe Frank Harris Parkway HDD Design Projects, Bartow County, GA:
The City of Adairsville engaged Kimley-Horn through their on-call contract to assist with the design of two (2) HDDs for shorted casing projects crossing two different GDOT roadways: GA 140 and South Highway 41/Joe Frank Harris Parkway.

Prior to design, Kimley-Horn conducted a site visit to identify suitable locations for HDD bore pits and pipe stringout. Kimley-Horn also submitted the necessary GDOT permits through GUPS. The plan sets included both plan and profile views of the HDD, along with all required permitting details. Kimley-Horn also assisted the City with public advertisement of the contracts in accordance with the State of Georgia public bid procedures.

KEY TEAM MEMBERS INVOLVED:
Matt Dunagin, PE | Program Manager | Matt provided project oversight of the project's planning, execution, and completion while ensuring safety, regulatory compliance, budget adherence, and effective communication among stakeholders.

Jenny Jones, PE | Project Manager | Jenny provided project planning and coordination; management of budget, resources, quality, and health and safety; regulatory compliance; stakeholder communication; technical oversight; performance monitoring; and comprehensive documentation.

Nick Skillen, PE | Project Engineer | Nick coordinated engineering tasks, ensuring technical accuracy and compliance with regulatory standards; managed resources; and supported Jenny in achieving project objectives on time and within budget.

PROJECT MANAGEMENT APPROACH

COMMITTED PROJECT LEADERSHIP

Effective overall management is essential to delivering successful projects completed on schedule and within budget. The approach to any project begins with an effective and experienced program manager who understands the program requirements and is committed to developing a team that provides the right staff for a project and maximizes the expertise and experience of each individual. Kimley-Horn has carefully selected a team of expert engineering professionals with a wealth of experience and a thorough understanding of how local governmental and municipalities operate. We do not utilize pure managers who have not experienced all facets of a project. Each of our project managers also serve as project engineers and are heavily involved in each task to ensure a quality product.

TEAM SELECTION

Kimley-Horn recognizes that each task under a general professional engineering services contract is unique. Therefore, each assignment will be managed as an independent project. For assignments under this as-needed engineering services contract, Kimley-Horn proposes to follow a general process as outlined below. Selecting the right team after communicating a need for professional services, Program Manager Jenny Jones, PE, and the appropriate supporting professionals will meet with the City to review the assignment, scope of services, and alignment of service expectation. We will discuss the City's definition of project success and essential factors. After the initial meeting, we will provide a draft scope of services, staffing plan, and fee budget for review by the City. We will assign the appropriate task leaders depending on project needs. Key team members will be involved on every assignment to ensure communications, continuity, and delivery of exceptional service. As noted, Kimley-Horn is unique in that we are one profit center, allowing us to pull the available and qualified resources from our bench to correctly staff a project.

SCOPE AND FEE PREPARATION

A detailed project work plan will be developed for each assignment. This will be provided in the form of a formal and detailed scope of services with a description of tasks, assigned staff, deliverables, schedule milestones, internal quality reviews, client meetings, presentations, external client reviews, and deliverables. This will be coordinated with and accompanied by a task and staff-based level of effort (by hours) fee estimate and task plan. The work plan will be reviewed with the City to assure complete understanding of the services, budget, schedule, and deliverables prior to Notice to Proceed (NTP).

NOTICE TO PROCEED

Kimley-Horn will hit the ground running once the desired services of a task are requested and communicated effectively. Only upon receiving executed authorization and a Notice to Proceed, we will schedule a formal project kick-off meeting with Jenny Jones and the team. At the kick-off, we will revisit project success factors previously defined during our initial assignment review meeting. Kimley-Horn will schedule and conduct regular project status and review meetings with the City to evaluate progress and to adjust services as needed. Our preference is for face-to-face meetings as a cooperative forum for candid discussion and resolution of unforeseen occurrences or design challenges; however, we also have tools for efficient virtual meetings. Regular meetings allow project participants to be fully informed, resolve issues, and review intermediate deliverables. For all associated meetings, we will prepare meeting summaries, including a listing of decisions made and action items to ensure that we have fully communicated. If on review of the meeting summary it is discovered that decisions were not fully communicated, we will issue a revised summary noting updates. This documentation allows our clients to record decisions that had been made early in the project or perhaps by previous staff members. Our document reminders help the project team avoid delays and stay on track. We will provide a monthly project status report with monthly invoices.

COMMUNICATION

Regular meetings are important but are not our only means of communication. We will tailor our communication style to meet the preferences and schedule of the City staff. We regularly track lists of outstanding items for each project and use the list to remind each responsible party of their task and deadlines.

Kimley-Horn has implemented state-of-the-art systems for online and virtual meetings where we can provide presentations, documents for review, real-time mark-ups, and virtual face-to-face communication.

PROJECT SUCCESS EXAMPLE

AGL, Project Forage, Valdosta, GA: This project involved a 4.5-mile distribution gas pipeline replacement, extension, and retirement in Valdosta, GA, with the purpose of serving a new customer along Inner Perimeter Road. This complex and unique project did not have a clear route, which required coordination and a detailed investigation with the project team, including local permitting agencies, private owners, external design teams, multiple subconsultants, GDOT, and other stakeholders to pinpoint the best route for this gas main extension.

This project was led by Jenny Jones, PE, who assembled a team of qualified individuals from various offices and specialized subconsultants from across the nation. Kimley-Horn subcontracted the geotechnical services and corrosion services (CP/AC) for this project. Our first step was to develop a clear and concise scope, fee, and schedule that all team members could adhere to. The client evaluated our progress by comparing it to the schedule of values to ensure both budget and scope compliance. At the project's onset, we implemented a cloud-based document management system, granting all team members access to necessary files and information. Weekly meetings with both the team and the client were held, and all participants received a punchlist outlining completed and pending tasks. We foster open communication among all members to ensure alignment and clarity during the project.

Throughout the design and permitting phases, we encountered several challenges that led to route adjustments and delays in the schedule. One of the most complex aspects of the project was crossing I-75. After multiple revisions and iterations to secure approval from GDOT, the design was successfully finalized, utilizing three HDDs to navigate the congested utility corridor and space-limited area. During the construction period, Kimley-Horn attended the preconstruction meeting, coordinated and provided technical support, resolved construction-related issues, and provided team support to the project team as needed. This one-of-kind project spanning over two (2) years is a shining example of our principles put into practice, utilizing all available resources and skillsets tailored to meet the project and client demands.

BILLING RATES

Kimley-Horn will work under various compensation methods. For well-defined scopes, we typically will propose a lump-sum fee contract with a detailed hourly estimate by task for the clients review and concurrence. Those scope list all assumptions and clarifications. Lump-sum tasks may align with the clients goal of maintaining a firm budget for the project. Alternatively, where a project scope is indeterminate such as on-going or as-needed services, we will typically work under a time and materials contract with a not to exceed amount that may be adjusted or reduced as the project requirements dictate. Our current hourly labor rate schedule is below.

Classification	Rate	Personnel
Analyst I	$130-$160	Mackenzie Norris Nate Morgan Accountant
Analyst II	$170-$200	Anna Lentz Ray Singh Hyejin Park Colin Stiles
Professional	$200-$230	Nick Skillen Hendrik Burger
Senior Professional I	$255-$325	Jenny Jones Ryan Clark Matt Dunagin Mike Alexander Colter Williams
Senior Professional II	$350-$410	Marcus Rubenstein
Senior Technical Support	$120-$300	CADD Tech
Technical Support	$100-$175	Summer Intern

- Effective through June 30, 2026
- Subject to adjustment thereafter
- Internal reimbursable expenses will be charged at 5% of labor billings
- External reimbursable expenses will be charged at 15% mark-up, or per the contract
- Subconsultants will be billed per the contract

OPEN RECORDS

Kimley-Horn understands that all materials included in this submittal are the property of the City, and they will make every effort to protect the confidential elements listed on page 37.

APPENDIX

RESUMES

YEARS OF EXPERIENCE 13

ALPHARETTA, GA

JENNY JONES, PE

PROGRAM MANAGER AND LEAD ENGINEER

Jenny brings 13 years of diverse project experience, with expertise in natural gas pipeline design and utility coordination, project management, and permitting. Her technical background includes the design of horizontal jack and bores and HDDs beneath major roadways, railroads, and water bodies, as well as utility conflict analysis. She has been instrumental in conducting numerous route studies and analyses for AGL projects and has successfully led projects from conception through construction, effectively navigating complex challenges throughout the process. Additionally, Jenny has strong capabilities in civil site design, jurisdictional permitting, and National Pollutant Discharge Elimination System (NPDES) permitting. She is proficient in AutoCAD Civil 3D, BoreAid, Pipeline Toolbox, and ArcGIS Pro. Jenny brings proven leadership and hands-on experience to the Kimley-Horn team. ***Benefit to the City: Jenny has extensive experience in natural gas projects and collaboration with various Georgia municipalities, GDOT, and gas agencies. Her expertise will bring improved energy efficiency and cost savings.***

VIRGINIA BEACH, VA

RYAN CLARK, PE

PRINCIPAL-IN-CHARGE

PROFESSIONAL CREDENTIALS

Bachelor of Science, Civil Engineering, Virginia Polytechnic Institute and State University

Professional Engineer in GA, DE, ID, NC, NY, OH, PA, VA, WI, and WV

Ryan has earned a reputation for strong performance through his leadership of complex natural gas projects. During the past 15 years, he has successfully delivered projects routed within congested urban locations, situated within transmission easements, requiring permitting from multiple municipalities and agencies, and/or requiring delivery on aggressive schedules. He also is skilled in station design, including the design of launchers and receivers to support pigging operations. Ryan has valuable experience with permitting and design in roadway ROW. He also is highly skilled in jack and bore and HDD design and operations. Ryan has designed hundreds of successfully completed drills ranging up to 4,400 feet. He excels at leading cross-functional teams to deliver projects on time and within budget and will work closely with his carefully selected team members to bring best practices to you on this important project. ***Benefit to the City: Ryan Clark has led hundreds of natural gas projects for clients across the nation. He has deep knowledge of natural gas industry codes and standards ensuring efficiecy and compliance with the highest safety and regulatory requirements.***

MIKE ALEXANDER, PE

QA/QC MANAGER

PROFESSIONAL CREDENTIALS

Bachelor of Science, Mechanical Engineering, Georgia Institute of Technology

Professional Engineer in GA, AL, FL, TN, TX, and UT

Mike has 19 years of experience leading complex natural gas projects, including a decade of engineering and management experience with one of the largest natural gas utilities in the country. He specializes in design for transmission and distribution systems, and his expertise encompasses all aspects of engineering, construction, and operations, including natural gas pipeline design, metering, and regulating stations, renewable natural gas upgrading and injection, hydrogen blending, pipeline replacement programs, routing analysis, and horizontal directional drill (HDD). Mike also brings valuable experience in integrity management projects, regulatory affairs, and compliance, as well as pipeline program execution and management. Mike has successfully completed projects in states nationwide, many of which had aggressive timelines and complex permitting requirements. ***BENEFIT TO THE CITY: Mike has extensive experience in natural gas systems and has prior experience with a major gas utility provider that gives him valuable insight into the construction and operation side, increasing value to our clients.***

ALPHARETTA, GA

NICK SKILLEN, PE, LEED GREEN ASSOC.

PROJECT ENGINEER

PROFESSIONAL CREDENTIALS

Bachelor of Science, Civil Engineering, University of Georgia

Professional Engineer in GA, FL, and TN

LEED Green Associate

Nick has a wide range of natural gas project experience to bring to the table. He has worked on distribution projects, transmission projects, station M&R projects, and more. He is skilled in M&R station design both with mechanical, site civil, and electrical design for regulator, over pressure protection, odorization, and metering projects. He has performed various trenchless HDDs and J&Bs and has performed difficult linear pipeline utility conflict design on distribution systems. For transmission projects, he has completed the design for hydrotesting, pipeline replacement, pipeline integrity analysis, and more. He is proficient in record drawing design for various linear and station natural gas projects and enjoys seeing various projects be successfully designed and built from start to finish. He regularly uses software, including Microsoft Project, AutoCAD Civil3D, ArcGIS Pro, Excel, and others often needed on these types of natural gas projects. ***BENEFIT TO THE CITY: Nick has extensive experience providing design for a variety of natural gas projects in the Southeast.***

HARRISBURG, PA

HENDRIK BURGER, PE

PROJECT ENGINEER

Hendrik is a skilled design engineer with five years of experience in the natural gas and propane industry, specializing in station design, distribution systems, and pipeline commissioning. Hendrik has led projects from conception to construction, navigating complex regulations and technical challenges. His expertise spans metering and regulating stations, pipeline replacement programs, and industrial applications, including propane bulk plants, ovens, and analog control systems. ***Benefit to the City: With a background in both field and project engineering, Hendrik bridges the gap between design and execution, ensuring practical, efficient, and regulatory-compliant solutions.***

YEARS OF EXPERIENCE 26

ALPHARETTA, GA

MARCUS RUBENSTEIN, CPESC

ENVIRONMENTAL AND GIS

As an ecologist, certified wildlife biologist, and a Certified Professional in Erosion and Sediment Control, Marcus specializes in all regulatory aspects of the CWA. Working in both the private and public sectors, Marcus has diligently built relationships while constantly seeking growth in his field. Marcus frequently serves as a technical expert and has been involved in more than 30 federal and state enforcement cases and citizen suits related to jurisdictional waters, erosion and sedimentation, and water quality. Marcus has received formal training in environmental site assessments, wetland delineations, erosion, sediment control, threatened and endangered species, and stream restoration. These trainings enable Marcus to be a valuable client advocate and project manager on large, complex projects. ***Benefit to the City: As an environmental professional, Marcus has conducted and managed stream and wetland delineations for hundreds of miles of infrastructure corridors, specifically natural gas pipelines; he has worked with several local Georgia municipalities; and he is knowledgeable in federal and state environmental regulations.***

ATLANTA, GA

COLTER WILLIAMS, PWS

ENVIRONMENTAL AND GIS

As an environmental scientist, Colter focuses on environmental consulting, specializing in various regulatory aspects. He is a Professional Wetland Scientist (PWS), with experience that includes wetland and stream delineations, protected species surveys, geographical information systems analysis and mapping, and environmental permitting for solar, residential, commercial, recreational, mixed-use, and linear utility and transportation projects throughout the Southeast. His experience includes permitting through Section 404 of the Clean Water Act (CWA) for impacts to jurisdictional surface waters regulated by the United States Army Corps of Engineers (USACE) and Georgia Environmental Protection Division (GAEPD) stream buffer variances. Colter also has conducted and prepared numerous Phase I Environmental Site Assessments (ESAs) throughout the Southeast, including linear infrastructure, solar, residential, commercial, and healthcare projects. ***Benefit to the City: Colter has experience providing environmental services for natural gas systems and other energy projects throughout the Southeast.***

HYEJIN PARK, CEP-IT, WPIT

ENVIRONMENTAL AND GIS

Hyejin is an environmental scientist with over four years of experience in environmental sciences and project management. Hyejin excels in leading stream and wetland delineations for jurisdictional determinations and is a trusted consultant for energy clients, providing comprehensive environmental due diligence, field work, permitting, and agency coordination. Hyejin's responsibilities include coordinating with various agencies such as the USACE, US Fish and Wildlife Service (USFWS), State Historic Preservation Office (SHPO), GAEPD, and local authorities to ensure regulatory compliance and effective project management. Hyejin is also proficient in conducting Phase I and Phase II Environmental Site Assessments, securing nationwide and individual permits, and completing National Environmental Policy Act (NEPA) Reviews and Environmental Assessments for telecommunications, solar, and Department of Transportation (DOT) projects. Her technical skills are further highlighted by her advanced proficiency in ArcGIS and ArcPRO, as well as her experience with AutoCAD. ***Benefit to the City: Hyejin has served a pivotal role in major natural gas projects in Georgia, such as the Piedmont Enhancement project and Wade Green Road PRIM with AGL, and she will leverage her environmental experience from these projects and apply them to any City of Covington natural gas project.***

CONSULTANT'S AFFIDAVIT OF EMPLOYMENT ELIGIBILITY

STATE OF GEORGIA
NEWTON COUNTY

By executing this affidavit, the undersigned Contractor verifies its compliance with O.C.G.A. 13-10-91, stating affirmatively that the individual, firm, or corporation which is engaged in the physical performance of services on behalf of **City of Covington** has registered with, is authorized to use and uses the Federal work authorization program commonly known as E-Verify, or any subsequent replacement program, in accordance with the applicable provisions and deadlines established in O.C.G.A. §13-10-91. Furthermore, the undersigned Contractor will continue to use the Federal work authorization program throughout the contract period.

The undersigned further agrees that, should it employ or contract with any Subcontractor(s) in connection with the physical performance of services pursuant to this contract with the **City of Covington.** Contractor will secure from such Subcontractor(s) similar verification of compliance with O.C.G.A. 13-10-91. Contractor further agrees to maintain records of such compliance and provide a copy of each such verification to the **City of Covington** at the time the Subcontractor(s) is retained to perform such service. Contractor hereby attests that its Federal work authorization user identification number and date of authorization are as follows:

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See ***Specific Instructions*** on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

Kimley-Horn and Associates, Inc.

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☑ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) _____

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) _____

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) **5**

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any) _____

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions ☐

5 Address (number, street, and apt. or suite no.). See instructions.

421 Fayetteville Street, Suite 600

6 City, state, and ZIP code

Raleigh, NC 27601

Requester's name and address (optional)

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–		–				

or

Employer identification number

5	6	–	0	8	8	5	6	1	5

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here **Signature of U.S. person** Tammy Fox **Date** March 1, 2025

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

SECTION 1:
LETTER OF INTEREST

August 5, 2025

Mr. Mike Jewell
Gas Director
City of Covington
2194 Emory Street
Covington, GA 30014

RE: **Request for Qualifications for Annual Consulting Services, RFQ No. 2025-15 I Category A**

Dear Mr. Jewell:

The Kleinfelder Team is pleased to submit our qualifications to provide **On-Call Consulting Services** for the City of Covington's (City) natural gas system. We are confident that we can provide the required expertise and services to support the City's objectives. The following are our team's strengths and benefits:

- **Past Performance** — Kleinfelder has a very strong **oil & gas business** line providing engineering services for natural gas clients for over 27 years. We have a proven record of helping solve our clients' challenges, meeting or exceeding their expectations, producing quality work on time, all while working within or below budget.
- **Local Presence in Atlanta** — We have over 55 professionals dedicated to natural gas in our Atlanta office. Additionally, for this SOQ, we complimented our team with **SinglePoint** to provide land surveying and land acquisition services, and **PCS (Project Cost Solutions)**, a minority owned firm with a strong construction cost estimating background, to provide professional cost estimating services. Our team consists of all local professionals with an understanding and approach that will provide benefits to the City. We have resources to carry out this contract and can begin quickly in a manner that meets or exceeds your expectations.
- **Trenchless Technologies (HDD) Experience** — Kleinfelder brings unparalleled expertise and experience in horizontal directional drills (HDDs) and other trenchless technologies. Our HDD team is not only experienced in design, but they also possess significant field experience from HDD installations. That experience is incorporated into our designs to help eliminate/reduce risks during construction. Beyond that, our geotechnical team is also experienced in these technologies not often found with traditional engineering firms.
- **Timely, Successful Permitting** — Kleinfelder has completed and received authorization from various permitting authorities including the USACE, EPD, DOT, railroads including CSX and local/county municipalities for many natural gas projects throughout the southeast. Kleinfelder can secure permits without delays by providing complete and thorough permit packages to the agencies. Many of these permits are authorized without comments or requests for additional information.
- **The Design Lead and Primary Point of Contact for this project will be Kyle Smith, PE**, whose contact information is below. Our team's strong reputation for delivering high-quality service and value for our clients will ultimately be the greatest asset for the City. We understand the importance of responsiveness, readiness and efficient execution of any small or large task order. We welcome the opportunity to present our experience and capabilities and look forward to working with you on this contract and providing you with outstanding service.

We acknowledge receipt of Addendum No. 1 issued July 21, 2025.

Respectfully submitted,

Mirsada Ilic, PE, PMP, LEED AP, BCEE
South Division Market Manager

SECTION 2:
TEAM AND QUALIFICATIONS

2 TEAM AND QUALIFICATIONS

Kleinfelder, Inc. (Kleinfelder) is headquartered in California, with more than 110 regional offices and laboratories located throughout the United States. Founded in 1961, Kleinfelder provides professional engineering, construction management, environmental, and testing and inspection services to public and private agencies throughout the region on public works, infrastructure, roadways, bridges, and vertical structures. With over 3,300 personnel and multiple regional offices, Kleinfelder provides our local clients with nationwide expertise as well as individualized, market-specific support. Our extensive experience gives our team valuable historical knowledge of the local infrastructure, stakeholders, construction environment, and site conditions, as well as regional guidelines and standards.

Ranked as one of the top engineering firms by Engineering News Record, our Atlanta office is staffed by professional and technical personnel to manage and perform on any natural gas project that the City may need support on. The depth of our local staff expertise will provide flexibility to meet project requirements for any consulting task, including permitting, bidding support, construction administration, resident engineering, inspection, constructability reviews, value engineering and construction material testing.

We specialize in providing innovative solutions for the planning, design, construction, and maintenance of energy infrastructure. Kleinfelder's expertise extends across various sectors within the energy industry, including oil and gas, electric and gas utilities, renewable energy and energy transition. Our team's use of new technologies and emerging tools continue to put us at the forefront of innovation and efficiency.

We understand the energy market and align our processes and solutions to help ensure we meet the needs of our clients. We focus on the complete project lifecycle, developing optimal solutions while seeking to reduce costs and minimize risks.

Our comprehensive approach helps to deliver flexibility and timely responsiveness in any situation that may arise during project development. This unique combination of technical expertise and our client-centric approach, allows Kleinfelder to play a significant role in advancing our client's energy goals with a focus on value, efficiency, reliability, and environmental responsibility.

SUBCONTRACTORS

SinglePoint Services, founded in 2007 and located in Monroe, GA – less than 20 miles from Covington, has been a leading survey and land acquisition firm specializing in delivering innovative and tailored solutions for the utility and pipeline industry, to drive success while respecting the environment and communities. With a proven track record of excellence, SinglePoint provides comprehensive services that streamline project development, mitigate risks, and ensure regulatory compliance. Their seasoned professionals leverage cutting-edge technology and industry best practices to deliver accurate, efficient, and cost-effective results. We retained SinglePoint for:

- Precision land surveys where advanced technology is utilized for accurate mapping and data collection
- Right-of-way acquisition to negotiate fair and transparent agreements with landowners to secure necessary access, workspace, and additional land rights for the City.

Project Cost Solutions (PCS) is a trusted cost advisory and construction estimating firm with over 150+ years of combined experience supporting public and private clients across the Southeast. PCS specializes in delivering high-confidence cost estimates, value engineering, bid analysis, and constructability reviews for complex infrastructure projects. As a Georgia-based firm, PCS brings a deep understanding of regional construction markets, regulatory frameworks, and capital project lifecycles.

PCS has supported utility and natural gas clients—including AGL Services Company—on enterprise-level estimating standardization and best practices implementation. Additionally, the firm has led detailed estimating and bid review services for large-scale water and wastewater projects across Georgia, including the Walnut Creek Wastewater Treatment Plant Expansion and the USF Linear Sewer Project in DeKalb County, each exceeding $90 million in construction value.

PCS is rooted in industry best practices (AACEI, PMI), and offer specialized expertise in:

- Capital cost estimating across planning, design, and construction phases
- QA/QC of contractor estimates and change order reviews
- Standardized estimating procedures and training
- Value engineering and lifecycle cost analysis
- Owner's representative services during procurement

PCS is well-positioned to support our team for the City of Covington on-call consulting services for its natural gas system needs and capital improvement program through a collaborative, responsive, and technically sound delivery model.

Kleinfelder has teamed with both SinglePoint Services and PCS on other natural gas projects. Our companies work seamlessly with each other, allowing not only for a smooth subcontracting process but also for easier communication and execution of project tasks.

All services will be completed in our respective Atlanta offices. As previously stated, Kleinfelder's Atlanta based professionals have been supporting southeast natural gas projects for over 27 years and have availability to provide the City of Covington with the required services for this contract.

When requested, our response time is very short and will be commensurate with the City's needs; it is common that we provide technical support ("boots on the ground") within a day or prepare a proposal for urgent projects in short timespans.

Our team organizational chart of selected professionals is included on the following page. One-page resumes for key personnel have been provided in Appendix A.

QUALIFICATIONS

Kleinfelder's natural gas expertise includes both distribution and transmission pipeline engineering projects varying from greenfield design to compliance, asset management, integrity, reliability and capacity related upgrades, replacements, relocations for third party utilities work, replacements for inline inspection (ILI), exposed pipe analyses, routing and feasibility studies, cost estimating, maintenance and operations consulting, and uprate driven replacements.

Kleinfelder has performed and/or supported all phases of a project, including but not limited to initial scope and design criteria development, ecological and environmental permitting, natural gas infrastructure detailed design, policy assistance, project management and administration, cost estimating, value engineering, bidding and construction administration. Our design team works closely with clients to evaluate design, schedule, and budget constraints to identify the optimal solution and has strong expertise in the following areas:

- Feasibility / Route Studies
- New Pipeline Installations
- Pipeline Replacements & Extensions
- Field Engineering
- Construction Management
- Uprates & Downrates
- Pipeline Retirement
- Trenchless – HDD Installation and Replacement
- ILI Retrofit
- In-situ Hydrotest Design and Certification
- Valve Automation
- Distribution Line Sizing/Hydraulic Analysis

The project descriptions included in the Appendix of this SOQ further demonstrate our deep expertise in natural gas with a variety of scopes for multiple operators. Projects have ranged in size from replacing a small valve set to installing long line, large diameter transmission main. With an industry leading understanding of natural gas equipment, code, standard requirements, and industry best practices, we collaborate with our clients to find the ideal solutions to best fit the project needs and requirements.

We anticipate that the typical life cycle of any task order awarded through the City of Covington Annual Consulting Services Contract RFQ #2025-15 may consist of the scope items organized in a larger "work breakdown structure" (WBS) and briefly described in the following subsections:

SURVEYING

Our surveying teaming partner, SinglePoint Services, will conduct planimetric and topographical surveys and Subsurface Utility Engineering (SUE) services for City natural gas projects. Their land surveying crews will operate under the direction of a Georgia Licensed Professional Land Surveyor. SinglePoint is experienced in researching recorded documents and have performed surveys for boundaries, easements, topography, the location of SUE utility designation, and potholes for level A and B work. SUE markings will adhere to APWA and ASEC coding. SinglePoint routinely performs surveying on completed projects to record as-built conditions. The surveyed data is developed into an as-built record drawing that includes planimetric information, a digital terrain model, and one-foot contours as requested. Copies of raw survey data and final field data, including sketches and photos as developed by the field crew, will be delivered along with the AutoCAD .dwg and a PDF of the drawing.

DESIGN DEVELOPMENT

Kleinfelder team will adhere to professional engineering practices and applicable codes such as 49 CFR Part 192 and ASME B31.8 for the natural gas projects.

The Kleinfelder Team and the City of Covington will work together during this phase so that the design intent and project expectations are exceeded, or met, at a minimum. It is also the phase in which the design itself will achieve the refinement and coordination necessary for a polished product. In this phase, engineering elements of the project, project scheduling, and project cost estimates will be further developed.

Design drawings will be dimensioned and will include necessary explanatory notes, schedules, and legends. As applicable, drawings will be prepared for the mechanical, civil, structural, and electrical disciplines.

Trenchless Designs (Horizontal Direction Drill – HDD and Jack & Bore)

Locations for trenchless installation methods (HDD or bore) will be considered and identified early in the project, based on information obtained during data collection and survey. For larger diameter steel lines, major utility crossings / structures

(bridges, culverts, etc.) will be candidates for trenchless methods along with wetland and water body, roads and railroad crossings. For small diameter plastic lines, trenchless installation may be preferred for large portions of the project due to cost and convenience.

For large diameter lines and high pressure steel lines, Kleinfelder understands it is often desired to keep the number of trenchless installations to a minimum due to the increased construction costs over open-cut installations.

When the use of a trenchless approach is preferred for large diameter and steel lines, a separate drawing will be prepared for each HDD and/or jack & bore design which is anticipated to include elevation information, utility information (type, size, location, and depth), soil boring logs, significant obstacles, and the HDD or jack & bore alignment and profile. Kleinfelder will coordinate with the City to determine the City's tolerances and minimum design parameters, but at a minimum Kleinfelder will attempt to adhere to the following rules of thumb:

- Minimum bend radius for steel pipe will be 100 times the pipe diameter. Minimum bend radius for plastic pipe installations will be evaluated on a case-by-case basis.
- Entry and exit angles will be kept to a minimum (between 8 & 16 degrees for the entry and between 5 & 12 degrees for the exit).

Every effort will be made to keep the maximum drill depth to a minimum to allow location of the pipe by conventional means. A unique design plan will be prepared for each proposed HDD and jack & bore installation concurrently with the topographic surveys and geotechnical investigations.

For small diameter plastic lines, Kleinfelder understands that trenchless installation by directional drill is less costly, lower environmental impact, and faster than open trench, often making it the preferred method by asset owners and contractors. Kleinfelder has extensive experience providing engineered designs for these applications as well. Given the reduced risk and complexity associated with small diameter drill methodologies, Kleinfelder provides a value oriented design which ensures safety and reliability, while prioritizing flexibility and cost.

PERMITTING PHASE

When requested, our team will provide permitting assistance. We have substantial and recent experience in the permitting process through local issuing authorities, Georgia Department of Transportation (GDOT), U.S. Army Corps of Engineers (USACE), Georgia Environmental Protection Division (GA EPD), and railroad companies. Erosion and Sediment Control Plans (ESCPs) will be prepared according to the latest standards and specifications outlined in the Georgia Soil Water and Conservation Commission (GA SWCC) Erosion and Sediment Control Manual, to obtain erosion and sedimentation control approval and to submit a Notice of Intent (eNOI) form requesting a Certificate of Coverage (COC) under the Construction General Permit. In addition to this approval and coverage, stream buffer variances, encroachment agreements and encroachment permits from applicable road and railroad companies will be obtained, when required. Our Atlanta team is very familiar with the application processes as we have obtained similar permits for the utility projects we designed.

We have been involved in numerous GDOT-related relocation projects and are very familiar with the GDOT encroachment process and permitting, including the online encroachment submittal portal. If needed our team can provide project-specific traffic control plans.

In addition to engineers with extensive permitting experience, Kleinfelder has in-house experienced environmental scientists including biologists/ecologists, geologists, and archaeologists who will provide the environmental assessments, planning, permitting, and compliance support required by the City of Covington. Our professionals will support all phases of projects, from conceptual design and planning, final design and review, agency reviews, permitting, construction and post construction. Specific services include the following:

- Riparian Buffer, Stream, and Wetlands Delineation: Our ecology team routinely provides these services.
- Environmental Permitting: Kleinfelder provides support for U.S. Army Corps of Engineers Clean Water Act §401/404 jurisdictional determinations, nationwide permits, individual permits, stream buffer permitting, and State/National Environmental Policy Act (SEPA/NEPA) documentation support, as needed.
- Phase I and II Environmental Site Assessments: Our team performs these environmental due diligence and site remediation studies for municipal, utility, and industrial clients throughout the region on a routine basis.
- Soil Contamination Testing: If a need arises, Kleinfelder's local geology and engineering team will efficiently support site investigation.

EASEMENT ACQUISITION

Our subcontractor, SinglePoint Services, will develop a schedule of anticipated base costs for working space, and temporary easements for the City of Covington review and approval. Anticipated costs will be based on documented real estate studies, comparable properties, certified appraisals, industry standards, etc. Studies and other sources used to prepare the schedule of base values will be submitted for approval. The schedule will be used as a basis for negotiations and to address different property characteristics anticipated along the pipeline alignment.

BIDDING ASSISTANCE

If requested, the Kleinfelder team will provide engineering services to the City of Covington during the bidding phase of the project. The proposed services may consist of the following tasks:

- Provide a signed and sealed set of reproducible bidding documents;
- Prepare a list of prospective bidders;
- Assist the City of Covington in obtaining bids and preparing contracts for construction;
- Attend and participate in a pre-bid conference;
- Respond to requests for technical information from prospective bidders and assist City of Covington in the issuance of addenda as appropriate to clarify, correct, or change the bidding documents. Assemble contract documents, including copies of signed contract forms and updated drawings and specifications incorporating revisions made by addenda; and
- Review Technical Component of Bid Submissions and assist in construction contractor selection
- Make recommendations for the construction schedule and schedule of values.

CONSTRUCTION ADMINISTRATION

Our team typically provides construction administration services on all projects we design. Therefore, during the construction phase of the project, Kleinfelder, as requested, will provide the following services:

- Represent the City of Covington to the extent provided in the contract documents.
- Review shop drawings and contractor submittals.
- Respond to Requests for Information (RFIs).
- Participate in project coordination and/or field observation meetings and prepare meeting agendas and minutes.
- Conduct inspections.
- Reject work that does not conform to the contract documents.
- Assist the City of Covington in review and approval of change orders and pay applications.
- Participate in the project's operational test period and final inspections, where applicable. Prepare the punch list. Furnish recommendations for final acceptance.
- Prepare record (as-built) drawings.

With no exception, we have provided all services requested in RFQ #2025-15 for Natural Gas through the hundreds of projects we have executed for our municipal and private natural gas clients in the Southeastern United States but also across the country. The following tables depict some of those projects completed in the last 5 and in the last 10 years. Please note that, due to our extensive experience and volume of projects in the natural gas space, we grouped projects per clients, as listing them all would exceed available space allocated for this SOQ.

Below is a partial list of projects Kleinfelder completed in the last 5 years.

CLIENT	STATE	NO. OF PROJECTS	SCOPE
SOUTHERN COMPANY GAS	FL, **GA**, TN	261	Ecological and Environmental Permitting, Conceptual and Preliminary Engineering Studies, Building and Site Architecture, Natural Gas Design, DOT Permitting, GIS, Bidding Services, Conceptual and Preliminary Engineering Design, Writing Technical Memorandums, Project Management, Owner's Representative, Construction Administration, and Construction Observation.

FLORIDA GAS TRANSMISSION COMPANY, LLC	FL	17	Natural Gas Design, DOT Permitting, and Project Management.

We included a sample of our relevant project descriptions in Appendix B, selected from our data base of literally hundreds of natural gas projects executed in the Southeast of United States

SECTION 3:
PROJECT MANAGEMENT APPROACH

3 PROJECT MANAGEMENT AND APPROACH

The Kleinfelder Team will execute all tasks that may be assigned under Category A of Annual Consulting Services for the City of Covington natural gas system. We understand that no work should begin without a written notice to proceed (NTP) signed by an authorized City of Covington representative.

The anticipated tasks will typically consist of preparation of surveys, reports, technical memorandums, assessments, environmental impact studies, planning, design drawings, and specifications for construction and improvements to City of Covington natural gas system. In addition, DOT permitting, policy assistance, bidding support, engineering studies, construction administration, cost estimating and value engineering may also be required and will be provided by our team.

At Kleinfelder, our Quality Management Program (KQMP) works with Delivery, Markets, and the Kleinfelder Global Technical Network to establish and implement processes to:

- Confirm Kleinfelder meets applicable client, regulatory, and accreditation agency quality requirements
- Facilitate efficient and effective delivery of client services and deliverables and
- Continuously improve processes and operations.

KQMP is designed to provide multiple, flexible paths to deliver services that meet or exceed client expectations. Kleinfelder has developed several quality management program manuals, and supporting quality procedures addressing specific quality standards for off-the-shelf use on projects. Kleinfelder will also develop project specific quality management plans, as needed, to meet client quality requirements.

Kleinfelder provides project control services for a wide range of industries, applying its expertise on various energy, facilities, government, and transportation projects. Specifically, our project controls team in the southeast supports our project management and delivery teams on numerous natural gas projects. We have proven experience with Key Performance Indicators and determination of the appropriate systems, tools, and processes to meet clients' specific needs within a pre-determined budget.

When paired with the excellence in technical delivery based on competent natural gas professionals with decades of experience in the industry, this approach produces results that meet and often exceed our clients' expectations. A couple of examples of our unique approach – success stories include:

- McGinnis Ferry Road Pressure Improvement Project for Southern Company Gas: Kleinfelder designed an approximately 2.9-mile 12" steel, high pressure distribution, natural gas line through Fulton, Gwinnett and Forsyth counties. The pipe was mainly installed within the existing right-of-way of McGinnis Ferry Road and the project included an HDD of the Chattahoochee River and Peachtree Industrial Boulevard. Our design and construction leads performed field visits early in design process and developed designs that are vetted against actual site conditions, so that construction documents were comprehensive, resulted in an expedited bidding (fewer RFIs) and minimized number of change orders during construction.
- Pipeline Relocation Program, Colonial Pipeline Company: Kleinfelder assists Colonial with their relocation program; evaluating proposed conflicts from encroaching parties such as DOTs, railroads, developers, etc., designing relocations to eliminate the conflicts, permitting the relocation designs and assisting Colonial through the bid and construction phases of projects. Since 2020, Kleinfelder has been working with Colonial on the Major Mobility Investment Program (MMIP) consisting of many transportation projects in the Atlanta metropolitan region, several of which have impacted Colonial pipelines and/or rights-of-way.
- Pipeline 49 for National Grid: Kleinfelder engaged with National Grid, internal and external subject matter experts, as well as the project team to minimize risk for an innovative trenchless design where constructability, subsurface geologic conditions, and environmental impacts were forefront in developing a feasible solution that National Grid has since been able to construct successfully.
- Blackwater HDD for UNITIL: This project ultimately required the design of two HDDs. The drills were located in populated areas with multiple underground utilities and overhead wires. We performed SUE (subsurface utility engineering) in the beginning phase of design, and were to quickly produce the HDD designs.
- Governor Printz OHP Line for Delmarva Power: Kleinfelder's surveyor established survey-grade control points and PID references with an aerial flight.
- Kinder Morgan's CSX Encroachment project: our team value engineered construction operations and optimized field oversight resulting in a saving of over $100K.
- Denville Trunk Main Replacement for New Jersey Natural Gas: quality of design resulted in flowless and fast permitting significantly ahead of the planned construction date.
- Operations Pipeline for Baltimore Gas and Electric: we expedited project schedule by recommending design and overall project execution in two parts, thus allowing for an earlier construction start date.
- PECO's Accelerated Gas Infrastructure Modernization: for this project, Kleinfelder completed over 50 AGIMP trenchless replacement designs, 9,800 LF of trenchless design, and over 100 geotechnical borings, on time and within the budget.

APPENDIX A:
RESUMES

KYLE SMITH, PE

Project Manager

Mr. Smith is an experienced utility engineering and project management professional with more than 12 years of engineering experience, including oversight of engineers and drafters to complete pipeline and station designs. Kyle has led the design effort as the engineer of record for multiple pipeline workstreams including linear replacements, in-situ hydrotest, ILI retrofit (make piggable projects), tap station renewal, and MAOP/MCAP remediation. Accomplishments include:

- Responsible for the oversight of six engineers in completing pipelineengineering design
- Completed engineering design for six miles of 8" steel high pressuredistribution pipeline with unique HDD design to navigate severe elevationdifference of ~1000 ft
- Completed ILI retrofit design for six miles of 12" pipe including design oflauncher and receiver, multiple valve assemblies, and 34 retrofit locations
- Completed engineering design for various short replacements of steel highpressure distribution and steel transmission pipelines ranging in size from 4"through 24"
- Completed ILI retrofit design for three miles of 24" pipe, including design oflauncher, receiver, and 7 retrofit locations
- Completed ILI retrofit design for thirty-two miles of 24" pipe, with 28 retrofitlocations
- Completed engineering design for hydrotest of 9 miles of 12" and 16" pipeand several regulator stations
- Completed engineering design for Regulating Interconnect Station renewals
- Completed engineering design for LNG Metering & Regulating Stationrenewal
- Completed engineering design for hydrotest of one mile of 24" pipe in heavyurban location

Years of Experience

12

Education

Bachelors, Mechanical Engineering, San Francisco State University, San Francisco, CA

Registrations/Certifications

Professional Engineer (PE)-Mechanical
No. PE042182, GA
No. M38022, CA
No. 120637, TN
No. 062072607, IL
No. 0402062934, VA
No. 92315, FL
No. PEN.0035705, CT
No. 57110, MA
No. 056222, NC

10-Hr General Industry Safetyand Health, OSHA

SELECT PROJECT EXPERIENCE

Buford Hwy ILI Retrofit Project, Chamblee, GA

As the Lead Engineer/Engineer of Record, Mr. Smith performed a piggability analysis, lead the site selection effort and design for both a new pig launcher and pig receiver at each end of the pipeline.

Norfolk RR to Central Ave Hydrotest Project, Atlanta, GA

As the Project Manager/Engineer of Record, Mr. Smith developed the hydrotest procedure and performed hydrotest leak modeling and on-site test certification for one-mile section in a heavy urban setting for the purpose of MAOP reconfirmation and integrity assessment.

West Chattanooga-Hamilton Expansion Project, Chattanooga, TN

As the Lead Engineer/Engineer of Record, Mr. Smith designed six miles of high-pressure distribution gas main extension through public roadways and private easements including several stream crossings. Steep terrain required specific pipeline design features; performed stress calculations for the designated operating pressure and for external traffic and construction loads. Sized the pipe wall thickness. Several trenchless installations via Horizontal Directional Drill required specific calculations for geometry and stress analysis. Performed hydrostatic strength test calculations to ensure adequate test pressure for the pipeline per Federal code and operator requirements.

KLEINFELDER
Bright People. Right Solutions.

RYAN PARKER, PE

Independent Technical Reviewer

With successful design abilities and strong people/communication skills, Mr. Parker has more than 14 years civil engineering experience, with a particular focus in pipelines. His current project manager portfolio includes managing $9 million in projects, and thrives in leading teams to support large, complex pipeline projects. Ryan serves as one of our primary oil and gas program managers and is a coleader of Kleinfelder's internal Oil and Gas Community of Practice. In this role, he is able to lead our nationwide staff in achieving the high level of quality for which Kleinfelder is known.

Years of Experience

NPDES Certified, Level II Certified Design Professional, GA

Level III Certification: Design of Erosion and Sediment Control Plans, NC

SELECT PROJECT EXPERIENCE

Southern Company Gas, McGinnis Ferry PRIM, GA

Project Manager for an approximately 2.9-mile 12" steel, high pressure distribution, natural gas line through Fulton, Gwinnett and Forsyth counties in Georgia. The pipe was mainly installed within the existing right-of-way of McGinnis Ferry Road and the project included an HDD of the Chattahoochee River and Peachtree Industrial Boulevard. The design was taken through a 30/60/90 process and Kleinfelder assisted the client with bidding support and construction administration. In addition to design, Kleinfelder provided environmental services, from wetland and stream delineation to erosion & sediment control inspections during construction, as well as geotechnical investigations for all the trenchless crossings on the project.

Colonial Pipeline Company, Rhodes St Relocation, College Park, GA

Engineer of record for the relocation of approximately 200' of 16" steel pipe due to the expansion of a GDOT intersection. Provided extensive coordination with GDOT and the city, including on-site meetings. Kleinfelder provided the design of the relocation along with erosion and sediment control design.

Confidential Client, Line 479, NC

Project Manager for the replacement of an existing transmission line that had inadequate records with a new 12", 27-mile line. The design included three HDDs, numerous conventional bores at road and railroad crossings, three remotely actuated mainline valves, a launcher, and six regulator stations. The project also included route development, geotechnical investigations, wetlands and stream delineation, threatened endangered species surveys, surveying and as-builts, and erosion/ sediment control design. Permitting included county, local municipality, NCDOT, CSX railroad, power authorities, SHPO, US Fish and Wildlife, USACE, NCDEQ, and FAA.

Confidential Client, Line 470, NC

Project Manager for design and permitting project consisting of the upgrade and replacement of an 8-inch pipeline to a 20-inch steel transmission main via lift and lay through a major US city. The design consisted of approximately eight miles of 20-inch transmission pipeline and includes three HDD's, 5+ conventional bores, two remote actuated main line valves, and two launcher/receivers. The design also includes mechanical, process and electrical design of a meter and regulator stations.

Due to the existing line being in urban areas of the city, along with limited workspace, proposed developments, wetlands, streams, rivers, and associated buffers, route development was a major challenge. Permitting included multiple jurisdictions: LIAs, NCDOT, Norfolk Southern railroad, water, sewer, & power authorities, USACE, and NCDEQ. Portions of the route followed a major stream and sewer outfalls requiring coordination with multiple entities to obtain the required permits.

MIRSADA ILIC, PE, PMP, LEED AP BD+C, BCEE

Principal in Charge

A Principal Civil Engineer, Mirsada has 35 years of program and project management experience in leading multidisciplinary teams to successfully execute infrastructure design and construction projects. Her civil engineering experience encompassing natural gas pipelines, water and wastewater conveyance and treatment, hydraulic and hydrologic modeling, pump stations, booster station, watershed management plans, stream restoration and stabilization, site civil design, stormwater management, facilities, air dispersion modeling, bidding assistance, construction administration and more. Mirsada's experience includes preliminary master planning, engineering studies, analysis, and construction documents preparation (design drawings and technical specifications) for municipal/public, commercial, industrial, mixed use and residential facilities.

In addition to the extensive background in hydraulic modeling and fluid mechanics, Mirsada has led multiyear professional architectural and engineering contracts that involve multidisciplinary team working on multiple task orders, very similar to the one requested by the City of Covington. Some of those contracts include:

Cobb County Department of Water Resources

- DeKalb County Department of Watershed Management, Professional Engineering Design Services and Construction Management (multiple contracts)
- DeKalb County Roads and Drainage Department, Professional Engineering Design (multiple contracts/renewals)
- Fulton County Department of Water Resources Professional Engineering Services (multiple contracts/renewals)

Years of Experience

GSWCC Level II Certified, GA No. 114

GSWCC Level II Design Professional (2005) & Refresher Courses (every 3 years)

SELECT PROJECT EXPERIENCE

AGLC, 10-mile Long 8" Diameter Natural Gas Pipeline, Liberty County, GA
Topographic and planimetric survey, subsurface utility engineering, environmental assessments (Phase I, archeological assessment and permitting with both USACE and GAEPD), engineering design (CP/AC included), land acquisition, and as-built drawings. Additionally, we provided a full time NPDES inspector during pipeline construction. Principal-in-charge and project manager responsible for quality, project budget, schedule and overall project execution.

Water Main - Kimball Bridge Road, GA
Surveying, civil engineering design and permitting with multiple permitting agencies (GDOT, City of Roswell, and Fulton County) for a new proposed 12-inch water line located along the north side of Kimball Bridge Road at GA400. Design lead and project manager responsible for project budget, schedule and overall project execution..

Fairoaks Water Line, GA
Our team provided construction administration and construction management (full time construction oversight) for the construction on one mile long 8" diameter DIP pipeline on Fairoaks Road in Decatur. Managed resources, schedule, budget, our LSBE subcontractor, progress meetings, reviewed and approved contractor's pay applications, RFI's and submittal logs.

Young Pipeline Professionals, From date: 09/07/2020 to Present

SHPE (Society of Hispanic Professional Engineer, Member since Jan 2017 to Present

SELECT PROJECT EXPERIENCE

Southern Company Gas, McGinniss Ferry PRIM, GA
Designer for 12-inch-high pressure steel natural gas distribution pipeline installed within the existing right-of-way of McGinnis Ferry. The proposed installation method consisted of designing two complex horizontal directional drilling (HDD) and two Jack & Bores.

Atlanta Ave to University Ave., GA
Designer for the proposed project consisted of installing ~3,000 feet of new 12" high pressure steel natural gas transmission pipeline.

Southern Company Gas, Mt. Vernon Highway to Abernathy Line, GA
Designer for relocation of two 12" pipelines on Peachtree Dunwoody & 6" pipeline on Mt. Vernon. The proposed SCG project consisted of 854 feet of new 12" high pressure natural gas and 600 feet of 6" high pressure natural gas.

Colonial Pipeline Co, SR-400 North Express Lanes Line 2 Crossing, GA
The project located in Sandy Springs consists of relocating CPC's 36 -inch mixed-use refined products pipeline known as Line02 under SR400. This project is necessary due to the expansion of the highway which is part of the GAMMIP expansion project. Designer for trench less drilling, a stream crossing, and the removal and abandonment of portions of the existing line.

Confidential Client, Line 490, Edgecombe and Nash Counties, NC
Designer for replacing approximately 10-miles of 6" pipe between Langley Rd RS to Junction D OPP, to allow for in-line inspection of the pipeline. Design also includes replacement of the existing station and construction of new stations as they will be required to tie-in to the existing distribution system. Grading and stormwater management, and erosion control design.

Confidential Client, Line 232 Replacement, NC
Client required the design of approximately 13 miles of 12" steel transmission main from the existing Line 448 Station in Clinton to approximately the Line 112 Tie-In along Turkey Highway in Turkey. Design includes a launcher and receiver at either end of the new line to support ILI of the line, a regulator station at the termination point of the new line, and the replacement of the existing Southeast Blvd Regulator Station.

Kinder Morgan, KMS CFPL Kissimmee Relocation, FL
Deisgner for 10-inch pipeline in Kissimmee in Osceola County. This project included the engineering design and field services to relocate approximately 700 ft of 10-inch diameter pipeline using horizontal directional drill (HDD) technologies that runs adjacent to a Sunrail line.

Bright People. Right Solutions.

MARKUS PAIZ, EIT

Mechanical Engineer

Mr. Paiz is a utility engineering professional with more than four years of experience designing ILI retrofits, valve replacements, hydrotests, and stations. Non-design work includes experience performing post-construction data QC, project closeout, and MAOP validation for natural gas pipelines and regulator stations. Markus's background includes strong design and leadership experience with project groups. Accomplishments include:

- Completed ILI retrofit design for five miles of 24" transmission pipe and seven retrofit locations.
- Completed ILI retrofit design for six miles of 16" transmission pipe and four retrofit locations.Completed engineering design and leak modeling for hydrotest of 968' of 16" transmission pipe.
- Completed engineering design for one 10" mainline valve site.
- Completed engineering design and material sizing for regulators and large station facility natural gas equipment.

Years of Experience

4

Education

Bachelor of Mechanical Engineering, Kennesaw State University

Young Pipeline Professionals, Member

SELECT PROJECT EXPERIENCE

Suwanee Tap Station Partial Renewal
Mr. Paiz scoped project and developed Design Basis Memorandum document and created engineering design drawings and exhibits for ongoing design project. He analyzed trend data and operational history, sized regulators, heaters, filters, pipe. Additionally, he coordinated and led meetings with structural and electrical engineering disciplines and managed surveyor and project financials.

Panthersville to Norcross ILI Retrofit
ILI Retrofit Design for seven locations. Mr. Paiz presented risk analysis and smart tool selection table. He executed successful smart tool run. As-built and closed out jack and bore replacement project. As-built and closed out 20 retrofit locations. Additionally, he managed subcontractors, tool run vendor, and environmental firm.

Suwanee to Norcross, Hydrotest
Engineer design for 968' of 16" steel pipe to assess an integrity threat. Mr. Paiz developed hydrotest procedure and leak modeling. He prepared as-built drawing and closed out project following construction and managed surveyor and project financials.

Bogart to Alto, 3rd Leaking Valve
As the Project Engineer, Mr. Paiz provided design for one new 10" valve site and two 4" blowdowns.

D-0684 Norcross Station Project
Mr. Paiz rovided engineering design for partial station retirement.

Macon to Milledgeville Closeout
Mr. Paiz closed out 17 Retrofits, three Tap Dig Sites, one 3-Mile Relay, two In-situ Hydrotests.

Bogart to Alto, Leaking Valve 1 and 2
As-built and closed out two valve replacement projects.

Asset Knowledge, Atlanta
Utilizes Code of Federal Regulations, Part 192 to provide clients with key deliverables. Reviews and revises Transmission and Station as-built drawings in preparation for MAOP validation. Completes comprehensive written technical reports and MAOP design and pressure calculations. Completed initial MAOP validation including requesting document retrieval, applying as-built information, and associating construction drawings and test records with the associated pipeline or station.

AGLC, Operating Diagram Routing
Perform final reviews on operating diagrams and upload them to client. Apply GIS, as-built information, and field visit data to deliver accurate and fully revised oprating diagrams.

KLEINFELDER
Bright People. Right Solutions.

CIARA WINFIELD, EIT

Mechanical Engineer

Ms. Winfield is a utility engineering professional with eight yaers of industry experience. She is experienced in project planning, MAOP validation, design, construction support, working with design teams and is highly proficient in technical communications.

- Skilled in historical research and data reconciliation to make 30-60-90- IFC plans that provide solutions to pipeline anomalies.
- Proficient in post construction data reconciliation to make as-builts and closeout packages.
- Uses professional experience to recommend material specifications to create cohesive and compliant pipelines.
- Knowledgeable in completing hydrotest designs and reviews to meet OPM and CFR requirements.
- Coached several members of the team from MAOP technical skills
- Proficient in MAOP validation, corrective action plans, and site evaluations of pipelines
- Proficient in the protocols of quality control for several MAOP validation processes.

Years of Experience

8

Education

Bachelor of Mechanical Engineering, Mercer University

Registrations/Certifications

Engineer-in-Training (EIT/FE)

SELECT PROJECT EXPERIENCE

Regulator Station Review Process PFL & SFL Creation and Analysis

Lack of records is often the cause of issues when doing maintenance for pipeline clients. Many pipelines and distribution systems were made before the CFR had a section for pipelines. Ms. Winfield was part of a team of engineers that built PFL/SFL deliverables. Conducted research to include GIS, as-builts, and applied historical data in an accurate order of pipeline features. Completed companion documents to the PFLs/ SFLs such as Op Diagrams, Issues Analysis Reports, and MCAP recommendations.

Southern Company Gas, Digs PMO As-Built, GA and VA

Through the RSRP process, anomalies and information gaps were found. To clear them the Digs PMO ordered direct examination digs. On the front end, Ms. Winfield created plans for new dig assessments. This process included reviewing PFLs/ SFLs, drawing plans, scoping access to the site, and making a list of discoveries needed. On the back end, Ms. Winfield was part of the team of engineers who reviewed collected data and made tracible, verifiable, and complete as-builts. These as-builts were made to client specifications and quality controlled by this team.

Southern Company Gas Projects

Performed data reconciliation and made deliverables for project close-out. Provided quality control review of construction documentation to identify discrepancies, and conversed with the document's respective stakeholders to provide corrections. After achieving alignment in documentation, prepared as-built drawings based off the information found. The as-builts include information about welds, heat numbers, hydrotest, bill of materials, and applicable design calculations. Successfully completed closeout processes on the following projects: Suwanee to Norcross, Bass Junction Station, Hampton to Thomaston Line (14") RLR, Live Oak Land Fill Hydrotest, Sewell to Johnson 36" RLR, and Shalimar Rd to New Peachtree ILI Retrofit.

KLEINFELDER
Bright People. Right Solutions.

JACOB CLAPP, PE

Civil Engineer

Mr. Clapp has 12 years of experience in Pipeline engineering. His experience focuses on engineering pipeline replacement/expansion projects and integrity management projects, and include pipeline designs, trenchless installation designs, route studies, in-situ hydrotesting, Inline Inspection Investigation (ILI) retrofit designs, ILI launcher and receiver station designs, project scoping, and project management. Skilled in historical research and data reconciliation to make 30-60-90- IFC plans that provide solutions to pipeline anomalies.

Years of Experience

12

Education

Bachelors, Civil Engineering, California State University

Registrations/Certifications

Professional Engineer (PE)-Civil, No. 94261, CA

SELECT PROJECT EXPERIENCE

AGLC, Southern Company Gas, Digs PMO (2023 Digs)

The original scope for the Digs PMO project has expanded into a multi-year program. Engineering, planning and execution of an estimated 92 digs (AGLC), and 46 digs (VNG). Program also included completion of an estimated 236 as-builts (AGLC), 75 as-builts (VNG), five as-builts (CGC) and completion of an estimated 311 DE Reports (AGLC), 84 DE Reports (VNG), andfive DE Reports (CGC) from previously completed projects.

Southern Company Gas, Digs Project Management Organization (PMO)

Mr. Clapp served as the Lead Engineer to provide engineering review and supervision for Digs PMO to perform Integrity Management Direct Assessments and Maximum Allowable Operating Pressure (MAOP) confirmation program. Developed drawing standards to ensure permitting application success with minimal detail for rapid drawing creation. Additionally, the DIG PMO for Southern Company Gas is used to gather asset information to confirm the MAOP per 49 CFR 192.624.

Southern Company Gas, Signal Mountain High Pressure Expansion

Mr. Clapp served as Project Manager and Engineer for a 6-mile 8-inch-high pressure steel distribution gas main expansion and regulator station design. The project required management of land survey, CP design and AC mitigation, geotechnical borings, and geohazard analysis. Due to a nearly vertical escarpment toward the top of the mountain, the pipeline was designed to be installed via Horizontal Directional Drilling (HDD). The HDD would overcome nearly 400 feet of elevation change between the entry and exit point which required detailed engineering analysis of the pipeline geometry, external forces acting on the pipeline, hydrofracture analysis, geohazard analysis and coordination with an experienced drilling contractor. New easements were identified and procured for installation within the cross-country segments.

Southern Company Gas, Pipeline Retrofit & Inline Inspection Investigation (ILI) Projects

Mr. Clapp served asLead Engineer and Project Manager for three separate ILI retrofit and pipeline inspections. The projects involved were the Columns Drive to Maner Road Line (11 miles of 24-inch pipe), Riverdale Liquefied Natural Gas (LNG) to Forsyth Line (26 miles of 16-inch pipe), and Buford Highway to Peachtree Boulevard Line (3 miles of 24-inch pipe). The scope of these projects covered the full ILI lifecycle and consisted of developing piggability studies, designing launcher and receivers to facilitate the tool run, ILI retrofit design drawings, developing project as-builts, procuring a tool vendor, overseeing the inspection, review of the ILI final report, and identifying and executing post ILI validation digs. All three projects were successfully retrofitted for ILI and had successful inspections.

DHRUV PATEL

Petroleum/Natural Gas Engineer

Mr. Patel is a service and solutions-focused Engineer with five years of engineering experience, applying technical knowledge and previous in-field experience in assisting multiple different clients across the U.S.

Years of Experience

5

Education

Bachelors, Petroleum Engineering, West Virginia University

Registrations/Certifications

Engineer-in-Training (EIT/FE), No. EIT029934, NCEES

Professional Affiliations

Society of Petroleum Engineers (SPE), Member since Aug 2018

SELECT PROJECT EXPERIENCE

NICOR, Southern Company Gas, GA

Mr. Patel performed quality control checks on documentation for the client's system. Provided feedback downstream to ensure the client receives a higher standard and quality of work moving forward. Actively had discussions on preventative measures for generic errors and new practices that may help improve the efficiency of document generation. Utilized Atlas maps to provide information regarding client's assets and incorporated that data in the builds to provide a more accurate working condition of the asset for the client.

AGLC, Southern Company Gas, GA

Mr. Patel fostered and maintained collaborative professional working relationship with project leadership team. Recommended modifications to the client systems to eliminate system failure. Utilized GIS technology to gather information regarding client's assets and incorporating that data in the builds to provide a more accurate working condition of the asset for the client. Performed site visits at multiple locations across Georgia and Tennessee to gather specs and other information regarding the assets with lack of documentation.

Confidential Client, Starita Station, NC

Mr. Patel provided general supervision over the drilling and the pullback operations on Starita HDDs to satisfy the design requirements for the client. Maintained communication between the design team and the client representatives in the field. Aided the drilling contractor and the client in solving the issue regarding mud loss.

AGLC, Southern Company Gas, McGinnis Ferry Rd. Project, GA

Mr. Patel ensured design implementation using contractor-provided drilling data. Monitored drilling fluid composition and test measurements. Produced detailed daily field reports, including annular pressures and rod times. Verified lift-plan matched pipe stress tolerance to prevent pipe and coating damage.

Dominion Energy, Gov. Scott Farm Rd. Project, NC

Mr. Patel oversaw design execution through analysis of contractor-provided drilling data. Tracked and evaluated drilling fluid composition and test results. Compiled comprehensive daily field reports, highlighting annular pressures and rod timing metrics. Ensured lift plans aligned with pipe stress tolerances to avoid damage to pipes and coatings.

Confidential Client, Greenville County Reliability Project, SC

Mr. Patel assisted in the permitting process with Greenville County, South Carolina Department of Transportation (SCDOT), and DHEC. Reviewed and responded to Request for Information (RFI) submissions. Provided real-time solutions to design implementation challenges. Maintained constant communication between the design team, client, general contractor, and permitting agencies.

Dominion Energy, Blood Run Creek Project, NC

Mr. Patel ensured proper execution of designs by utilizing contractor-provided drilling data. Conducted monitoring and evaluation of drilling fluid composition and test measurements. Generated thorough daily field reports, detailing annular pressures and rod-time data. Verified lift plans complied with pipe stress tolerances to avoid damage to pipes and coatings.

SELECT PROJECT EXPERIENCE

Chesapeake Energy LLC, Midstream Oil and Gas Pipeline Installation, Marcellus/Utica Play

Project desktop analysis of environmental and historical resources of significant importance. GPS data processing and mapping preparation for field delineations, Stream and Wetland Delineation Reports, Erosion and Sediment Control (ESCGP) permits, DEP General and Joint Permit applications, landowner agreement maps. Environmental and civil permitting for required state and federal permits, including PNDI Consultation, Act 14 preparation and submittal, ESCGP permit packages, general and joint permits and hydrology reports. Perform calculations to determine aquatic resource impacts, stream flow volume and landowner payouts. Wetland delineation, species survey and GPS data collection. Groundwater contour generation and figure preparation.

Transmission Line Development and Planning, National Grid, Various Locations

Post processing delineation data for proposed transmission line upgrade. Mapping production associated with Article VII application, Wetland and Stream Delineation Report, Endangered and Threatened Species and NYSDOT application.
Post processing ETR field assessment data and mapping production for ETR assessment report.

Remediation Program for Industrial Complex

Site-wide database management. Georeferencing & digitizing current, historic and proposed data from paper documents. Site-wide figure preparation to meet NJDEP requirements. Site remediation figures and remedy selection analysis and figure production. ArcGIS online Portal and AEC Site creation and management. Utilizing ArcScene to create 3D representations of soil contamination and remediation. Groundwater hydro-distribution and surface water flow representations.

Ash Creek Combined Sewer Outfall Project, Bridgeport

On behalf of the Town of Bridgeport, Ms. Williams supported database management and organization efforts and provided mapping support in ArcGIS to the city which supports their ongoing CSO removal program.

BRIAN HAMMOCK
Project Manager, SinglePoint

SinglePoint

Mr. Hammock has more than 25 years in the industry and has successfully managed projects in the surveying, engineering, construction, and utility industry throughout the U.S. He has managed all aspects of projects including scheduling, budget, preliminary studies, surveying, engineering, mapping, permit and right of way acquisition, condemnations, relocations, hydrographic studies, SUE investigations, construction, and as-builts. He has been involved with several programs for various clients including transmission projects, bare steel replacements, capital projects, right of way/easement acquisitions, high consequence area projects, hydrographic studies, integrity, distribution pipeline, AC mitigation, and asset protection projects. His certifications and skills including NSPS survey, environmental professional, NCCER, CDC safety & health, staking university utility locating, DOT PDP, and Avoiding Utility Impacts, PTC DOT Supervisor Training, and more.

Years of Experience
27

JOSH TRAWICK, PLS
Land Surveyor/Mapper, SinglePoint

Mr. Trawick has more than 27 years of experience in the surveying, engineering, and construction industry has been a Georgia Professional Land Surveyor for over 20 years. He also holds licenses as both a Professional Engineer and a Professional Land Surveyor in multiple states. He has been active in a diverse range of projects including public and private utility infrastructure, residential and commercial land development, roadway projects (including projects with city/county municipalities as well as Georgia DOT), and site construction projects. Josh provides oversight and direct leadership to SinglePoint's team of professionals and technicians. Services include property surveying and land boundary determinations, retracements, easement surveys, topographic mapping, hydrographic surveying, subsurface utility location and conflict avoidance, construction staking, as-built surveys, site planning, and civil engineering design.

Years of Experience
11

KELSEY DOWNS
Project Administrator, SinglePoint

Ms. Downs brings 11 years of real estate experience, brings a specialized focus on right-of-way and utility coordination. Kelsey manages communications, resolves conflicts, and anticipates issues before they arise. She has a strong background in property law enables her to navigate land use challenges with confidence, ensuring full compliance while safeguarding her clients' best interests from initial planning through project closeout. Kelsey's hands-on approach, sharp attention to detail, and practical understanding of both legal frameworks and field operations make her a trusted and valuable resource in the industry.

Years of Experience
11

MARY PRATHER
Document Specialist/Project Coordinator, SinglePoint

Ms. Prather has 11 years of experience in the Right of Way industry. Mary brings a real depth of knowledge and skills from her extensive career in the real estate/mortgage industry where her 20+ years as a Processor, Underwriter, Originator, Trainer, and Project Manager allowed her to seamlessly transition to the Right of Way and Land Services field. She directs our staff of six Document Specialists in our Research and Support department providing training, expanding opportunities, and bringing diversity to the industry. Under Mary's leadership, SinglePoint' s Research and Development team has performed a significant number of services for a variety of utilities and municipalities including but not limited to natural gas, power, water mains, storm sewers, etc., from notifications, easements, encroachments to condemnations for projects as simple as sidewalks to major transmission lines.

THOMAS HUMPHRIES, PE, CCP, PMP

Cost Estimator

Mr. Humphries has more than 40 years in the construction industry working for consulting firms, utility and general contractors, and a building general contractor as a senior cost engineer and estimator. Thomas has a mixture of experience in both the public and private sectors. He has experience in all aspects of project management..

These two projects consist of the installation of approximately 2.9 miles of new 12-inch diameter steel natural gas distribution pipeline with an MAOP of 300 psig and a horizontal directional drill (HDD) where the pipeline crosses the Chattahoochee River. For the river crossing, the numerous constraints (two power utilities, two counties, property owners, and limited access/ workspace) and sensitivity of the Chattahoochee River crossing made the planning and design of the HDD project very challenging, The HDD is approximately 1,700-feet in length and consist of 12-in high pressure distribution piping. This HDD project is part of an overall approximate 3-mile distribution project that was designed separately due to anticipated long lead times required for permitting.

The Challenge

HDD Crossing - A number of challenges existing for this crossing. The initial route was planned on the south side of McGinnis Ferry Road; however due to constraints of overhead power lines, Federal Park land, and limited workspace made crossing on the south side of the road not viable. The north side of McGinnis Ferry Road came with another set up challenges and constraints that included Federal Park land, other land, limited workspace, terrain, access, existing power utility structures, and NRHP- Eligible Site 9FO218 (potential Native American village and mound site) found during our environmental scope.

PRIM Project – One of the main challenges existed primarily due to the project being in a highly congested and urbanized area. The number of foreign utilities within the proposed alignment, especially a water line part of the Forsyth County Water & Sewer system. This required working with the county and making adjustments to the route in order to avoid utility conflicts.

The Solution

HDD Crossing - Our team worked together to provide an effective solution. It began with a site walk by the team to evaluate the constraints and develop an initial strategy for design/construction of the crossing. From the site walk, the team decided to move the route to the north side of McGinnis Ferry Road as the south side was considered by the team to be the most challenging route. Due to the constraints on the north side, the survey scope was expanded in order to fully evaluate all options. During evaluation of the potential alignment, it was determined that we could avoid Federal Park land resulting in a significant reduction in the project schedule due to elimination of this permit requirement. In addition, bore profile and workspace is being designed to minimize access, easement, landowner issues, and other constraints.

PRIM Project – SUE Level A work was performed along the alignment to assess if conflicts were present within the alignment. The benefit of early identification of foreign utilities should reduce contractor down time during construction.

TEAM MEMBERS
Josh Richardson
Jacob Clapp, PE

The Kleinfelder team designed a 5.7-mile installation of 8" steel pipe to increase Southern Company's pipeline capacity in Paulding County. The pipeline was to be designed as a high pressure (300 psig MAOP) distribution pipeline, fed via a tap from the existing Williams Transco pipeline near High Point road. The replacement entailed placing the alignment predominantly in road ROW with minimal permanent land acquisition, initial scoping identified the need for 9 HDDs and 14 Jack and Bores.

The scope of work also required collaboration with subject matter experts to perform a geotechnical study, CP and AC Mitigation Study, CP/AC design and provide a full time NACE accredited CP Inspector during construction.

Our team worked with Southern Company to split the project into two phases. Phase 1 to accommodate Paulding county's request to accelerate construction of a Jack & Bore and HDD ahead of the Bob Hunton roundabout road improvement project and install 1,500 FT of open trench along Winn Road during a local school's spring break.

Piping from Phase 1 was installed in 2019, connected to temporary Anodes and purged with Nitrogen before being left in place to be tied into Phase 2 at a later date. Construction of the remainder of the 5.7 mile installation, Phase 2, took place in 2020. During the installation of Phase 2, we collaborated with Southern Company and the construction contractor to answer technical RFIs as well as design a convenience HDD to navigate a portion of congested right of way with minimal workspace available.

We worked closely with Southern Company Gas, Paulding and Douglas County engineering representatives to obtain County utility drawings. We developed exhibits to facilitate the Gate Station land acquisition discussions, discussions with Transco-Williams, and to clearly convey proposed access and grading for multiple stakeholders. To facilitate the site selection and land acquisition of the proposed tap and gate station, our team completed a detailed site selection study.

Southern Company Gas (SCG) contracted Kleinfelder to investigate, engineer and design several relocation projects in the Macon and McIntyre areas of Georgia. The relocation projects were part of larger pipelines where approximately 8 miles of vintage pipeline was needed to be replaced due to smaller diameter (10" to 6"), restricting MAOP and inability to allow for In-Line Inspection tools. The new pipelines (12" and 8") required route selection, easement acquisition, permitting, pipeline design, trenchless designs for multiple railroad, river and highway crossings, and multiple facility modifications.

The Challenge

These pipelines were originally installed in largely rural lands with early pipeline technology. Since then, the areas around the pipelines have been largely urbanized and have created multiple areas of high density population and infrastructure. Many parts of the existing alignments were not immediately suitable for relocation, and there was very little land available to access and replace the pipelines.

The Solution

In exploring route options, our team recommended a combination of existing and proposed easements to avoid the major obstacles needed to relocate the vintage pipelines. Additionally, the new routes also utilized several trenchless technologies, such as HDD and JAB, to minimize the footprint of construction and to facilitate the crossing of obstacles such as highways, railroads and rivers. We also recommended and subsequently designed the replacement of multiple facilities in order to increase delivery pressure and remove pressure limiting devices since the pipeline MAOP was no longer restricted by the older pipe. The new pipelines and facilities were also designed to allow for passage of In-Line Inspection tools.

Client Benefits

The result of this project allowed SCG to own a safer assets through the removal of 1930's vintage pipelines, gain better control of their transmission system and prepare for transmission ILI tools.

Kleinfelder is providing engineering, procurement and construction management (EpCM) services for pipeline relocation projects throughout the Colonial Pipeline system.

Colonial Pipeline Company operates an underground pipeline system that includes over 5,500 miles of steel pipe across 13 States. Development in urban and suburban corridors and regular pipeline maintenance necessitate the replacement of pipeline segments under highways, under rivers, and in cross-country areas.

Kleinfelder has designed several such replacements that require open trench, bore and jack, and HDD construction techniques.

Kleinfelder is contracted to provide EpCM services that includes the following:

- Project Management, Estimating & Controls
- Design Development (Geotechnical, Civil, Electrical, Mechanical, Structural, HDD Design)
- Stream & Wetland Crossings
- Environmental Planning & Permitting
- Erosion Control
- Pipeline Alignment Plans
- Corrosion Control & Cathodic Protection Plans
- Bid Package Development & Procurement Support
- Construction Management & Monitoring
- Risk Management
- Field Inspection & Subconsultant Management
- Health & Safety Management

Program Highlights

Kleinfelder's design and construction leads performed field visits early in the design process so that designs are developed and vetted against actual conditions so that Bidding and Construction Documents are comprehensive and result in good bids and fewer changes during construction.

The project consists of the upgrade and replacement Line 372 from an 8-inch pipeline to a 20-inch steel transmission main through the City of Charlotte. The design consists of approximately eight miles of 20-inch transmission pipeline in southwest portion Charlotte, North Carolina.

The design includes three HDDs, five Jack & Bore, two remote actuated main line valves, and two launcher/receivers. The design also included mechanical, process and electrical design of a meter and regulator stations.

The Challenge

Due to existing lines in urban areas of Charlotte, along with limited workspace, proposed developments, wetlands, streams, rivers, and associated buffers, route development was a major challenge. In addition, the project required permitting from multiple jurisdictions such as counties, municipalities, Department of Transportation, Water & Sewer Authorities, Encroachment for Foreign Line Crossing, Army Corp of Engineers, Department of Environmental Quality, etc. The challenges on this project were to understand the local requirements such a tree save areas and water quality buffers. Portions of the route followed a major stream and sewer outfalls requiring coordination with multiple entities to obtain the required permits.

The Solution

Through lessons learned in previous projects, the team, which comprised of our engineers, the surveyor, Client Engineering Project Manager, Client Construction Manager, and Land Agents, developed alternative routes and worked with the stakeholders to perform site walks to determine the most feasible route for the constraints and challenges within schedule and budget.

Client Benefits

The team was able to overcome the challenges with creative HDD designs, using “lift and lay” in some portions and working with land agents on challenging properties.

RELEVANCE
- Cost Estimation

TEAM MEMBERS
Thomas Humphries, PE, CCP, PMP

Project Cost Solutions (PCS) supported the cost estimating and bid analysis process for the USF Linear Sewer Project, which spans two major bid sections commissioned by DeKalb County.

Section 1 includes over $57 million in base bid items and focuses on large-diameter gravity sewer installation (up to 60"), significant bypass pumping operations, construction of 4' to 8' diameter manholes, and extensive erosion and sedimentation control. Other components include clearing and grubbing, driveway and sidewalk restoration, fencing, landscaping, and stream protection measures such as temporary diversion, riprap, and trenchless casing installations.

Section 2 adds more than $35 million in base bid scope and continues the linear infrastructure effort through additional neighborhoods and stream corridors. The section includes gravity sewer installation (primarily 36" to 54"), multiple trenchless crossings (jack-and-bore, HDD), manhole adjustments, trench safety, bypass systems, and environmental protections. The section also includes $294,000 in alternate bid items for additive scopes, such as additional stream bank stabilization and manhole modifications.

PCS analyzed over 150 combined bid line items across both sections, reviewed constructability assumptions, confirmed specification alignment, and provided validation of estimated quantities and unit pricing. PCS also ensured DeKalb County had a clear, itemized understanding of total projected costs for evaluation, award, and budget planning.

Form **W-9**
(Rev. March 2024)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

Go to *www.irs.gov/FormW9* for instructions and the latest information.

Give form to the requester. Do not send to the IRS.

Before you begin. For guidance related to the purpose of Form W-9, see *Purpose of Form*, below.

Print or type. See *Specific Instructions* on page 3.

1 Name of entity/individual. An entry is required. (For a sole proprietor or disregarded entity, enter the owner's name on line 1, and enter the business/disregarded entity's name on line 2.)

KLEINFELDER, INC.

2 Business name/disregarded entity name, if different from above.

3a Check the appropriate box for federal tax classification of the entity/individual whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor ☑ C corporation ☐ S corporation ☐ Partnership ☐ Trust/estate

☐ LLC. Enter the tax classification (C = C corporation, S = S corporation, P = Partnership) _____

Note: Check the "LLC" box above and, in the entry space, enter the appropriate code (C, S, or P) for the tax classification of the LLC, unless it is a disregarded entity. A disregarded entity should instead check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) _____

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from Foreign Account Tax Compliance Act (FATCA) reporting code (if any) _____

(Applies to accounts maintained outside the United States.)

3b If on line 3a you checked "Partnership" or "Trust/estate," or checked "LLC" and entered "P" as its tax classification, and you are providing this form to a partnership, trust, or estate in which you have an ownership interest, check this box if you have any foreign partners, owners, or beneficiaries. See instructions ☐

5 Address (number, street, and apt. or suite no.). See instructions.

770 FIRST AVE, SUITE 400

Requester's name and address (optional)

6 City, state, and ZIP code

SAN DIEGO, CA 92101

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN*, later.

Note: If the account is in more than one name, see the instructions for line 1. See also *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number

			–			–				

or

Employer identification number

9	4	–	1	5	3	2	5	1	3

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and, generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here | **Signature of U.S. person** [signature] **Date** 01-07-2025

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9*.

What's New

Line 3a has been modified to clarify how a disregarded entity completes this line. An LLC that is a disregarded entity should check the appropriate box for the tax classification of its owner. Otherwise, it should check the "LLC" box and enter its appropriate tax classification.

New line 3b has been added to this form. A flow-through entity is required to complete this line to indicate that it has direct or indirect foreign partners, owners, or beneficiaries when it provides the Form W-9 to another flow-through entity in which it has an ownership interest. This change is intended to provide a flow-through entity with information regarding the status of its indirect foreign partners, owners, or beneficiaries, so that it can satisfy any applicable reporting requirements. For example, a partnership that has any indirect foreign partners may be required to complete Schedules K-2 and K-3. See the Partnership Instructions for Schedules K-2 and K-3 (Form 1065).

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS is giving you this form because they

ANNUAL CONSULTING SERVICES: CATEGORY A – ON-CALL CONSULTING SERVICES

City of Covington
5 August 2025

MAGNOLIA RIVER®

LETTER OF INTEREST

Mike Jewell, Gas Director

City of Covington

2194 Emory Street

Covington, GA 30014

Mr. Jewell,

Magnolia River Services, Inc. (Magnolia River), a subsidiary of Magnolia River International, Inc. (MRI) and the premier provider of engineering, inspection, GIS, and software solutions for utility and pipeline infrastructure and operations, is pleased to submit our proposal to the City of Covington (the City) for the Category A – On-Call Consulting Services portion of the Annual Consulting Services project.

As a trusted advisor to municipalities and utilities across the country, Magnolia River brings 25 years of experience delivering engineering, GIS, software, and inspection solutions to utility clients across the country. With more than 450 professionals supporting infrastructure and operations in over 30 states, we offer the City a reliable and knowledgeable partner for on-call support. Our team is prepared to serve as a trusted advisor—providing strategic insight, technical expertise, and responsive service that support the City's goals for safety, compliance, and system improvement.

We have a strong track record of helping municipalities and utilities plan and execute capital projects with a balance of regulatory requirements, customer expectations, and long-term infrastructure performance. Our capabilities span feasibility and planning studies, detailed design, permitting, budgeting, and construction support. We also offer turnkey project management, giving the City access to cohesive, end-to-end services that simplify coordination and accelerate progress.

In order to provide the most effective support for the City, Magnolia River plans to collaborate with SGC Engineering, LLC (SGC), a subsidiary of MRI and affiliated entity of Magnolia River, and McFadden Engineering, Inc (McFadden). SGC will provide land surveying services and McFadden will provide environmental services.

We appreciate the opportunity to support the City and value the chance to build on our professional relationship. If you have any questions, please contact Jessica Kline, Project Manager, at (256) 612-9061 or jessica.kline@magnolia-river.com, or Kim Weaver, Municipal Lead, at (256) 957-9427 or kim.weaver@magnolia-river.com.

Magnolia River acknowledges receipt of the Addenda.

Allen Hughes

Director of Engineering

TEAM AND QUALIFCATIONS

Firm Background

With a large team of engineers and technicians solely focused on the natural gas industry, our engineering staff, which consists of professional engineers (PEs), project managers, GIS professionals, and supporting production personnel, provides both manpower and expertise and have successfully completed numerous major linear projects, including steel and plastic replacements, casing replacements, station design, and MAOP verification work. Magnolia River currently has four licensed Georgia PEs team members.

Our engineering staff provides services ranging from permitting and replacement programs to turn-key engineering and varying levels of project management, ranging from design management to full-scale management involving design, bids, construction, and completion. Our engineering staff specializes in distribution and transmission facility designs, including linear pipeline projects, meter and regulator (M&R) stations, SCADA and electrical systems, horizontal directional drilling (HDD), route selection class location analyses, site design, and system modeling.

Industry Knowledge	
Gas Distribution	Railroad Permitting
Gas Transmission	City / County Permitting
Linear Design	As-Built Drawings
Master Meter	Service Card / Map Digitization
Compliance	Skid Fabrication Design
O&M Manuals	Cable and Conduit Schedules
Modeling	Grading Plans
HDD Design	Maintenance of Traffic
M&R Station Design	Route Selection
Permitting	Route Studies
DOT Permitting	MAOP Verification
Tie-in and Retirement Plans	Hazardous Classification Analysis
Renewable Natural Gas (RNG)	Land Acquisition Support
TIMP Review/Development	DIMP Review/Development

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Topographic/Aerial Survey

Our teaming partner, SGC, has extensive experience providing survey, SUE, geospatial, GIS and mapping services to natural gas transportation, maintenance, and distribution industries, and is licensed to provide survey services in 35 states. SGC Survey understands our client's need for the highest quality survey data, delivered on time, and delivered on budget to support critical project development. SGC Survey achieves these goals by leveraging a highly skilled workforce equipped with the latest in modern measurement technology and robust, attentive project management.

Ecological/Environmental Permitting

Our teaming partner, McFadden, specializes in water and environmental engineering, supported by in-house civil engineers and geologists with deep knowledge of federal and state permitting processes. McFadden has a strong track record of delivering practical, regulatory-compliant solutions across the Southeast. Their service offerings include environmental permitting and compliance support, as well as the development of Pollution Abatement Plans (PAPs), Stormwater Management Plans, and Construction Best Management Plans for NPDES applications. McFadden also designs site-specific best management practices to address runoff diversion, sediment control, and site reclamation—helping projects move forward with reduced risk of delay or non-compliance.

Conceptual/Preliminary Engineering Studies

Our engineers regularly perform feasibility studies and conceptual engineering for new pipeline corridors, pressure regulation systems, and station upgrades. These efforts include system modeling, route analysis, constructability reviews, and early cost estimating, equipping our clients with the data needed for funding applications, stakeholder approvals, and phasing decisions.

Technical Memorandums

We routinely develop clear, actionable technical memorandums for internal decision-making, permitting justification, and board-level reporting. These documents clarify complex engineering evaluations, such as pipeline sizing, material selection, and site suitability analysis, into a format accessible to both technical and non-technical stakeholders.

Building and Site Architecture

Our engineers specialize in the design of district regulator and gate stations to deliver safe, efficient, and reliable pressure regulation for various distribution pressures. We consider the access of vehicles and personnel when designing these sites for maintenance and operation requirements. Our expertise covers the engineering, installation, and maintenance of these critical infrastructure components, optimizing performance while maintaining compliance with industry standards and regulatory requirements. We also understand making these sites as aesthetically pleasing as practical to blend into the neighborhoods where they exist.

Natural Gas Infrastructure Design

From transmission to distribution systems, our team delivers full-service design packages including alignment sheets, pipe stress analysis, valve station layout, and trench detail development. Our

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

designs are stamped by Georgia-licensed Professional Engineers and developed with construction phasing and O&M considerations in mind.

DOT Permitting

We have extensive experience obtaining permits from the Georgia Department of Transportation (GDOT) for utility crossings, longitudinal installations, and work within the ROW. Our familiarity with GDOT utility accommodation policies allows us to minimize review cycles and keep projects on schedule.

GIS and Asset Management

We support utilities in developing and enhancing GIS-based asset management systems that meet regulatory expectations for traceability, mapping accuracy, and data governance. Our services include GIS schema development, GPS-based as-building, and integration with work order and maintenance tracking systems. Magnolia River has its own internal GIS Department to handle any of the City's GIS needs.

Policy Assistance

Our team partners with municipalities to draft, update, and review system ordinances, design standards, and operational policies in compliance with DOT 192. We bring insight into industry best practices, regulatory trends, and utility governance structures to support practical, enforceable, and scalable policies. We have staff members with decades of municipality operations experience to better understand Covington's challenges associated with operating a system.

Our policy support services extend to operating procedures, safety program alignment (e.g., PHMSA requirements), and utility rate analysis. We help municipal utilities strengthen internal governance and regulatory readiness.

Bid Proposals, Project Management, and Design

We assist with bid document preparation, including technical specifications, drawings, and bid schedules. Our project managers (PMP-certified and/or Georgia PEs) provide oversight across the entire project life cycle, including schedule tracking, contractor coordination, submittal review, and stakeholder communication.

Conceptual/Preliminary Engineering Studies and Design

In addition to early-stage feasibility studies, we provide preliminary design documents suitable for stakeholder presentations, permitting, and phased construction. These include preliminary piping and instrumentation diagrams (P&IDs), system models, cost models, and equipment selection narratives.

Project Management and Administration

Our project managers oversee all phases of work—from kickoff through closeout—ensuring documentation, cost tracking, invoicing, and reporting align with City protocols. We maintain regular communication with City staff and are adept at managing multi-phase or multi-vendor assignments under on-call frameworks.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Right of Way Acquisition

We support ROW identification, title search coordination, easement negotiations, and documentation. Our ROW team works in tandem with design engineers and surveyors to ensure corridor integrity and timely access for construction.

Owner's Representative

As an owner's representative, we evaluate construction manager proposals, support contractor selection, and represent the City's interests during design build projects. Our staff ensures transparency in decision-making and alignment with the City's budget, timeline, and technical expectations.

Cost Estimating

We provide independent cost estimating services during all project phases, using current labor and material rates and benchmarking from recent municipal projects. Our estimates are detailed, transparent, and tailored to municipal budgeting formats.

Value Engineering

Our approach to value engineering prioritizes lifecycle cost, constructability, and operational impact. We offer design alternatives, cost-benefit analyses, and stakeholder workshops to identify opportunities for cost savings without sacrificing quality or safety.

Bidding Services

We support the full bidding process–from preparing bid packages to evaluating contractor submittals. Our team ensures conformance with procurement policy, provides technical addenda responses, and leads pre-bid and pre-construction meetings.

Construction Administration

Our engineers manage submittal review, RFIs, pay application processing, and contractor coordination. We maintain all construction documentation and ensure the project remains compliant with plans, specifications, and applicable codes.

Construction Observation

We provide trained, third-party inspectors to observe utility construction in real-time. These representatives monitor safety, compliance, workmanship, and schedule progress, and provide daily logs, photo documentation, and field reports to the City.

Project Team

Magnolia River is committed to building long-term relationships with our clients by providing consistent, knowledgeable personnel throughout the life of a project and beyond. Our staffing approach assigns dedicated team members–familiar with the project's progress and internal workflows–promoting both continuity and operational efficiency. A project manager will lead the project team, supported by a qualified technical lead and a core team that includes a QA/QC lead, design engineer, and design technician.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

With our natural gas expertise, our team is well prepared to implement the City's scope of work (SOW) by utilizing personnel who are both experienced and customer focused. Each of these individuals has been selected based on their extensive qualifications. Please note that the selected project team is not guaranteed and is subject to change based on availability, unforeseen circumstances, workload, and prior commitments.

EXPERIENCE

We are highly proficient in the design, operation, and maintenance aspects of natural gas systems, and utilize our expertise to design with construction, operational efficiency, and system maintainability at the forefront. As such, we employ highly experienced engineers and designers to accomplish this. In fact, three of our licensed Professional Engineers have combined experience of over 100 years as gas system operators. We also employ project managers and engineers to guide the clients through every step of the design process–from initial feasibility to project construction. Magnolia River currently serves over 110 active clients in 30 states. Of those active clients, over 75 are municipalities.

The following summary covers some of the projects successfully completed for clients:

- **PHMSA Grant Support**
  Magnolia River has supported clients with PHMSA grant applications since 2022, offering a turn-key approach for awardees. Our team is experienced in environmental assessment, project planning, and full-scope project management. We assist clients with reimbursement requests, compliance reporting, and required project documentation throughout the grant lifecycle.
- **Comprehensive Project Management**
  We provide full project lifecycle management for distribution and transmission projects. Our dedicated Project Managers oversee work from design and engineering through construction inspection, GIS documentation, and as-built development. On past projects, Magnolia River managed all contractor and subcontractor invoices, helping clients stay within budget and meet key milestones.
- **Distribution Design**
  Over the past decade, Magnolia River has designed more than 2,000 miles of distribution replacement projects across Texas, Louisiana, Mississippi, and Alabama.
- **Transmission Design**
  Magnolia River has completed transmission projects up to 36 inches in diameter. Our work has included route selection, linear design, HDD (horizontal directional drilling) planning, meter and regulator station design, hydrotest planning, launcher/receiver integration, and mainline valve installation.
- **System Modeling**
  Our modeling team has completed more than 60 system models covering over 10,000 miles of pipeline. With expertise in both GASWorkS and Synergi, our staff brings more than 70 years of combined modeling experience.
- **TVC Record Review and MAOP Verification**
  Magnolia River has reviewed over 90,000 records to support TVC (traceable, verifiable, complete) documentation for transmission and distribution mains. For MAOP

verification, we have analyzed 232 miles of transmission mains and 242 miles of distribution mains for multiple clients.

Please find past performance examples in Appendix A – Past Performances.

RESUMES

Please find resumes for the selected team members in Appendix B – Resumes.

PROJECT MANAGEMENT APPROACH

Project Management Strategy

Magnolia River's project management approach centers on clear planning, open communication, and a collaborative team structure. We oversee every aspect of the project lifecycle–from initiation through close-out–prioritizing timely execution, transparent reporting, and high-quality deliverables. Our processes are supported by integrated IT platforms, standardized procedures, and continuous performance monitoring, allowing Project Managers to track schedules, budgets, documentation, and quality in real time.

Each project is governed by a Project Management Plan (PMP), which outlines scope, responsibilities, deliverables, communication protocols, and meeting schedules. This structured foundation promotes accountability and alignment throughout execution. All submittals follow a 10-business-day review cycle with a five-day response window for RFIs–supporting a consistent and collaborative project pace.

Real-Life Example

This project management approach was successfully applied on a recent cast iron and bare steel replacement project for a municipal utility in Alabama. The project, identified as high-risk in the client's DIMP, involved the replacement of over five miles of aging main pipe and over three miles of legacy service lines. Magnolia River provided full engineering services including pipe sizing, construction drawings, material lists, and budget estimates. We also developed bid packages, hosted pre-bid and kickoff meetings, and supported permitting and PHMSA Tier 2 environmental assessment. Our team inspected construction, updated GIS records, and delivered GPS-accurate as-builts with full traceability compliance.

Our PMP outlined a phased approach that consisted of real-time reporting, weekly check-ins, and milestone tracking. Leveraging our integrated IT tools and flexible staffing model, we kept the project on schedule despite unexpected delays. The final deliverables were completed ahead of schedule and our client praised our team for proactive communication and coordination with permitting agencies.

BILLING RATES

Magnolia River offers flexible compensation models tailored to the unique requirements of each assignment. We commonly work under both lump sum and time-and-materials (T&M) structures, including not-to-exceed agreements when appropriate.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Our approach to pricing is informed by past performance, historical cost data, internal production metrics, and clearly defined scopes of work. This allows us to provide fair, transparent, and accurate estimates that align with project expectations and client preferences.

Please find a copy of Magnolia River's Professional Services Rate Schedule in Appendix C – Billing Rates.

OPEN RECORDS

Magnolia River acknowledges that all materials submitted in response to this RFQ are subject to the Georgia Open Records Act and the City of Covington's policies. Our submittal does not contain trade secrets, proprietary commercial data, or confidential financial information.

FORMS

Please find the required forms in Appendix D – Forms.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

APPENDIX A – PAST PERFORMANCES

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential (Ongoing for 10+ years)
Project Name:	System Modeling and Distribution Improvement Projects
Project Description:	Magnolia River was a subcontractor for the cities of Covington, Royston, Social Circle, Hartwell, and Nickville, as well as working at Fort Stewart.
Scope Responsibility:	Magnolia River modeled gas systems to determine optimum pipe sizing and designed system improvements to the client's distribution system to improve the pressures to their customers.
Contract Value:	$147,000

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential (Ongoing for 10+ years)
Project Name:	Pre-1984 Pipeline Replacement
Project Description:	Magnolia River was selected to provide engineering designs for the replacement of pre-1984 plastic pipeline within the client's system in the coastal regions of Texas. Magnolia River has designed over 1,100 miles of replacement for this program.
Scope Responsibility:	Firstly, the client performed an internal at-risk assessment on their system to identify mains within the system that needed to be addressed. Criteria in the assessment included plastic pipe installed prior to 1984, leaks, and steel. Magnolia River reviewed the identified main and proceeded to look for logical replacement areas adjacent to the identified main. Designs were generally one mile in total length and included services to be tied over or replaced. Magnolia River reviewed available on-line resources for other existing utility information to be included as part of the design. Magnolia River designed the main locations and identified the appropriately sized EFV's or curb valves from existing load information. Magnolia River was also tasked to provide the completion of many internal forms and documentation that were part of the construction package issued to contractors for construction to include an environmental review, permitting through county and city agencies, railroad agencies, pipeline easements and flood control districts. Magnolia River provided assistance to the surveyors

	staking the projects, as well as the construction contractors when issues arose in the field.
Contract Value:	$6,567,908

Project Owner:	Magnolia River
Client:	Confidential (2025)
Project Name:	Cast Iron and Bare Steel Replacement – PHMSA Grant
Project Description:	Pipeline replacement projects were identified in the client's Distribution Integrity Management Plan (DIMP) as high-risk leak prone and corrosion hazards. The projects will replace cast iron and bare steel pipelines. Based on high level construction estimates, projects identified could be completed within a 9-to-12-month period.
Scope Responsibility:	The project included replacing approximately 5.6 miles of cast iron high risk/leak prone main pipe, ranging from 2-inch to six-inch diameter, and replacing approximately 396 bare steel and legacy plastic service lines for a total of 3.4 miles of service line pipe. The project included replacing approximately one mile of 2-inch steel high risk/leak prone main pipe installed in 1970 with dresser couplings every 40 feet, presenting numerous potential leak points to replace, which included five bare steel service lines totaling approximately 225 feet of service line pipe. Magnolia River proposed cost-effective solutions, designed the overall cast iron and unprotected steel replacement to include pipe sizing, prepared construction drawings, material list, and construction estimate / budget for phases of pipe replacement, and prepared bid packages, held pre-bid, bid, and construction kickoff meetings. In addition to the engineering work, Magnolia River performed environmental assessment for PHMSA Tier 2 requirements, assisted the client with updating their GIS, inspected the construction of the pipe replacement work, and provided as-built mapping with GPS accuracy and tracking and traceability compliance. This project is ahead of schedule (seven months), on budget, and will be one of the earliest completed PHMSA grant projects in the nation.
Contract Value:	$280,000

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Project Owner:	Magnolia River
Client:	Confidential
Project Name:	PHMSA NGDISM Grant Management and Tier 2 Assessment
Project Description:	Magnolia River and McFadden, our teaming partner, successfully navigated the 2023 funding recipient through the Tier 2 environmental assessment process and are currently awaiting PHMSA approval.
Scope Responsibility:	Magnolia River collaborated with McFadden to navigate the 2023 funding recipient through the Tier 2 environmental assessment process and are currently awaiting PHMSA approval. The Tier 2 tasks include: 1) Project planning, management, and coordination of activities; 2) A site visit to review project route for environmental concerns; 3) The review of individual maps for environmental conditions; 4) The development of documentation for addressing environmental considerations identified in Tier 2 assessment process; and 5) Input PHMSA Tier 2 assessment information into Power Apps online portal for submittal. Magnolia River has taken the next step in designing the actual replacement plan, adhering to the intent of the client's grant application.
Contract Value:	Tier 2: $32,650; Replacement Plan: $99,484

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	System Model
Project Description:	This project called for the gas system modeling of the client's distribution system.
Scope Responsibility:	Magnolia River modeled the client's natural gas system to help identify any existing pressure concerns and to develop a tool for future system planning. Magnolia River provided full professional modeling services, including GIS data cleanup, customer demand data importation, the creation of a GASWorkS model with customer data, model calibration, and system optimization to mitigate low pressures. Magnolia River also ran scenarios detailing the future growth concerns of the client's system in order to determine if the system could handle the expected growth without uprating portions of the system.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Contract Value:	$23,500

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	Springfield to Calvary Turnkey Project
Project Description:	Magnolia River provided comprehensive project management, design, and inspection services for a system improvement and reinforcement project. The project included 16 miles of 6-inch HP steel pipeline, two miles of 6-inch IP HDPE, and approximately 15 miles of 2-inch IP HDPE. Additionally, the scope covered the design and installation of one fully automated purchase station--which included a tie-in, meter station, regulator station, water bath heater, odorization, canopies, site grading plan, electrical plan, and RTU--along with five district regulator stations, several smaller stations, launcher/receiver systems, and two block/section valves.
Scope Responsibility:	Magnolia River's responsibilities encompassed complete turn-key project management, from initial design to final inspection. This included evaluating the distribution system, pipeline and station design, permitting, creating plan sets, bidding assistance, contractor selection, construction management, and the development of hazardous operation procedures and as-built documentation. Magnolia River also coordinated third-party services such as surveying, land acquisition, and environmental permitting. Project permits were obtained from agencies including the Kentucky Transportation Cabinet, the City of Lebanon, the U.S. Army Corps of Engineers (USACE), and the Kentucky Energy and Environmental Cabinet. Magnolia River handled all permitting requirements, working closely with regulatory bodies and submitting necessary documentation. Magnolia River also managed the project's construction entirely, conducting weekly conference calls to keep stakeholders updated on progress. Construction management was staffed by multiple Magnolia River inspectors. In the first phase, which focused on thedistribution (HDPE), two utility inspectors were involved. The second phase, focusing on the steel pipeline, involved three inspectors. Over the course of the three-year project, more than 400 HDPE fittings and pipe fusions, as well as over 2,500 welds, were inspected.
Contract Value:	$2,365,577

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	Marion to Fredonia Turnkey Project
Project Description:	Magnolia River provided a client a turnkey solution to a pipeline replacement project in the cities of Marion and Fredonia, KY that included engineering design, project management, land rights acquisition, subcontractor management (survey, land, environmental, and cathodic protection), permitting, and inspection services for 11 miles of 6-inch HP steel, two miles of 4-inch IP HDPE, and roughly eight miles of 2-inch IP HDPE.
Scope Responsibility:	Magnolia River designed and managed the installation of one purchase station, which included a meter station, a regulator station, a water bath heater, odorization, canopies, site grading plan, electrical plan, and RTU design. In addition, the project also included the management, design and installation of three town border stations, and multiple small farm tap stations. The construction of this project was staffed with multiple Magnolia River inspectors, beginning with two utility inspectors for the first phase of the distribution portion (HDPE). Steel pipeline was conducted in the second phase with two inspectors. Over the course of this project (18 months), over 300 HDPE fitting and pipe fusions and 1,600 welds were inspected. Permitting for the project was obtained through various agencies, to include the Kentucky Transportation Cabinet, City of Marion, KY, USACE, and the Kentucky Energy and Environmental Cabinet.
Contract Value:	$1,940,975.35

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	Hwy 98 Relocation Project
Project Description:	Magnolia River provided design drawings for approximately 13 miles of 12" steel transmission main and three main line valve sites as part of a relocation design for an FDOT roadway expansion project.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Scope Responsibility:	Magnolia River was responsible for coordinating with the FDOT design build team and reviewing all roadway design plans from the state to provide red, green, brown (RGB) reviews and markups to identify conflicts with the proposed roadway expansion project, completing a utility work schedule (UWS) of planned construction activities for the pipeline relocation, providing project management support, engineering design for the proposed piping and main line valve sites, and permitting through county and state agencies for the relocation and testing of the pipeline. In addition, Magnolia River was responsible for providing the following: surveying, AC/CP mitigation designs, geotechnical reports, environmental review and permitting support, and bid documents for the project.
Contract Value:	$665,605

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	SW Lakeland Expansion
Project Description:	Magnolia River provided design drawings for approximately four miles of 4" steel transmission main and two meter and regulator sites.
Scope Responsibility:	Magnolia River was responsible for selecting the project route, providing project management support, engineering design for the proposed piping and station sites, and permitting through county and state agencies for the installation and testing of the pipeline. Design included launcher/receiver, odorization, metering, regulation, pipeline heating, and instrumentation. In addition, Magnolia River was responsible for providing the following: surveying, AC/CP mitigation designs, geotechnical reports, environmental review and permitting support, and bid documents for the project.
Contract Value:	$239,518.93

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

Project Owner:	Magnolia River Services, Inc.
Client:	Confidential
Project Name:	OPM Consolidation
Project Description:	Magnolia River provided a professional review of the existing OPM of each of the five operating areas with the objective of creating consolidated manuals and procedures to be utilized by the client.
Scope Responsibility:	The consolidated manuals met the requirements of 49 CFR 191, 192, 199, Alabama State Code, Mississippi Rules 48-57.2, and Chapter 40 of the Missouri Rules of the Department of Economic Development. The consolidated manual identified where federal standards were more stringent than state codes and specified the applicable requirements. In cases where state codes were more restrictive, the manual clearly defined the specific state requirements. Additionally, a review was conducted to compare existing procedures against industry best practices, consolidating multiple procedures into a single, streamlined approach where appropriate. The final documents were provided in electronic format for easy access and integration into internal systems.
Contract Value:	$137,750

Due to the confidentiality agreements we uphold and our commitment to client privacy, we do not disclose client names or contact information at this stage. Full reference details can be provided upon award or under a mutually executed non-disclosure agreement.

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

APPENDIX B – RESUMES

INDUSTRY KNOWLEDGE

Gas, Water, Wastewater

QUALIFICATIONS

Mr. Hughes has an extensive background in the gas, water, and wastewater industries with over 37 years of design and field experience. Mr. Hughes is a registered Professional Engineer and has been the engineer of record for various projects within the utility industry. As the former General Manager for a municipality, Mr. Hughes guided daily operations of electric, gas, water, and wastewater departments. At said municipality, Mr. Hughes initiated a Civil Engineering Department to provide engineering design and compliance support for the gas, water, and wastewater utilities. Mr. Hughes also developed fair rate structures for all rate classes to provide revenue for needed system improvements. Currently, at Magnolia River, Mr. Hughes manages all phases of each project life cycle and is responsible for day-to-day engineering services.

EXPERIENCE

TECO Peoples Gas / Fernandina Uprating / FL
Technical Lead.

- Develop a 58-page purge out of service plan for 17.5 miles of 12" transmission main. The plan includes five days of cross-compression to eliminate unnecessary releases of gas to the atmosphere.
- Develop 32-page purge into service plan including detailed nitrogen injection/pigging operations.

TECO Peoples Gas / Regulator Pilot Project / FL
Technical Lead.

- Review 10 district regulator stations to determine adequate sizing of regulators and to verify OPP. This involves calculating equivalent lengths of all piping and modeling the system to determine if pressure reductions prevented proper operation of the relief valves. Project requires a thorough understanding of manufacturer's regulator/relief valve operations.

Kinder Morgan / Multiple Projects / GA
Senior Engineering Manager.

- Manage a multiple-task project that involved reversing the natural gas flow in piping to a LNG facility.
- Design facilities to install the separation of existing 30-inch lines, including converting a 30-inch receiver trap into a launcher, converting a 30-inch launcher into a receiving trap, and removing check valve assemblies.

MAGNOLIA RIVER

Austin Gay

QA/QC LEAD

EDUCATION

BS in Civil Engineering, Auburn University

10 years of experience

CREDENTIALS

Professional Engineer (PE): AL (#37110), AZ (#72238), AR (#18529), CO (#54781), FL (#87859), IO (#P26780), IN (#PE12100440), KY (#34157), LA (#43206), ME (#PE 17484), MA (#57711), MI (#6201311408), MN (#59264), MS (#29532), MT (#72760), NE (#E-18298), NM (#26218), NY (#106403), OK (#PE 32677), SC (#40511), TN (#122018), WI (#48557-6)

PRODUCTS / PLATFORMS

GASWorkS, AutoCAD, ArcGIS, Synergi

INDUSTRY KNOWLEDGE

Gas

QUALIFICATIONS

Mr. Gay has 10 years of experience as an engineer in the natural gas industry and is a licensed PE in multiple states. He is knowledgeable in developing gas network models using GIS data and GASWorkS software. Mr. Gay also has experience managing and designing both modeling and linear/facility projects. Mr. Gay's linear/facility experience includes regulator station and over pressure protection design, pipeline replacement design, transmission pipeline design, permitting, meter station design, client interaction, and drafting.

EXPERIENCE

TECO Peoples Gas / Various Projects / FL
Technical Lead.

- Lead design team on multiple Synergi, linear distribution, linear transmission, and station projects.
- Lead design of transmission pipeline uprate, including mainline valve, farm tap, and hydrotest design.
- Lead design of multiple gate station projects, including regulator, control valve, meter specification, prefab skid design, launcher and receiver design, grounding plan design, electrical design, and pressure test planning.
- Lead design of multiple distribution replacement projects. The design included material specification, tie-in design, and pressure test design.

Atmos Energy Mid-States / Various Projects / KY, TN, and VA
Technical Lead.

- Lead design team on multple linear and station projects.
- Station designs include prefab regulator and meter station design, sizing, and material specification, water bath heater specification, odorizer specfication, pressure test plan, electrical plan, grounding plan, and supporting details.
- Linear designs include material specification and strength calculations, horizontal directional drill (HDD) design and calculations, hydrotest planning and calculations, and tie-in design and material specifications.

Spire Inc. / Westover Hardy Reinforcement / AL
Technical Lead.

- Design of 2-inch and 8-inch medium density polyethylene (MDPE) system reinforcement with multiple HDDs and interstate crossing.

MAGNOLIA RIVER

Jessica Kline

PROJECT MANAGER

EDUCATION

BS in Civil Engineering, University of Alabama at Huntsville

10 years of experience

CREDENTIALS

Engineer in Training (EIT): AL (#17364)

PRODUCTS / PLATFORMS

AutoCAD, AutoCAD Civil 3D

INDUSTRY KNOWLEDGE

Gas

QUALIFICATIONS

Mrs. Kline is experienced and knowledgeable in coordinating and implementing all elements of pipeline replacement design. Mrs. Kline has experience in HDD and JAB designs, permitting, regulator station design, various retirement draft plans, and as-built drawings through AutoCAD and AutoCAD Civil 3D.

EXPERIENCE

CenterPoint Energy / Various Projects / TX
Project Manager.

- Manage the design of approximately 1,100 miles of 2-inch - 8-inch replacement projects and 100,000 services.

Atmos Energy / Maryville Airport Station / KY
Senior Design Engineer.

- Design a large regulator station.
- Evaluate the flow and pressure requirements and performed sizing of the regulator and odorizer components.

Atmos Energy / Hwy 53 to Line 12 / KY
Design Engineer.

- Design eight miles of steel pipeline with three regulator stations and a launcher.
- Design HDDs at a railroad crossing, a creek, and several major roadways.

Atmos Energy / East Shelbyville Reinforcement / KY
Design Engineer.

- Design five miles of steel pipeline with two regulator stations and a launcher and receiver.

CenterPoint Energy / Vintage Plastic Replacement / TX
Design Engineer/Design Lead.

- Manage the design of the 2016 vintage plastic replacement projects, as well as approximately 120 vintage plastic replacement projects in 2015.
- Manage the submittal of all permit forms, staking requests, and service work order forms.

Piedmont Natural Gas / Various Projects / Multiple Locations
Design Engineer.

- Design HDDs for river crossings.

MAGNOLIA RIVER

Austin Cunningham

DESIGN ENGINEER

EDUCATION

BS in Mechanical Engineering, Lipscomb University

4 years of experience

CREDENTIALS

Engineer in Training (EIT): TN (# 36176)

PRODUCTS / PLATFORMS

AutoCAD, Smallworld GDO

INDUSTRY KNOWLEDGE

Gas

QUALIFICATIONS

Mr. Cunningham has four years of experience in the natural gas industry. He is knowledgeable in developing natural gas network models in both Smallworld GDO and AutoCAD. Mr. Cunningham also has experience developing project phasing plans for linear replacements, highway and railroad permits, and developing station design drawings.

EXPERIENCE

Atmos Energy / Various Projects / LA
Design Engineer.

- Perform linear Replacement design work.
- Develop project estimates including material and labor costs.
- Plan projects and conduct conducting contractor meetings.
- Assist with highway and railroad permits.
- Conduct field visits for project planning and field verifications.
- Create training manuals for SIIP project design in GDO.

Atmos Energy / Chalmette / LA
Design Engineer.

- Design M&R station design.
- Draft in Civil 3D.
- Draft design views in Plant 3D.

TECO / Various Projects / FL
Design Engineer.

- Perform drafting work for service permits.
- Perform drafting work for as-built systems.

Josh Smith

DESIGN TECHNICIAN

EDUCATION

AS in Computer Drafting and Design, ITT Technical Institute

9 years of experience

PRODUCTS / PLATFORMS

AutoCAD, MicroStation

INDUSTRY KNOWLEDGE

Gas

QUALIFICATIONS

Mr. Smith has nine years of experience as a CAD Technician. Mr. Smith also has designed many projects for utility clients and is responsible for designing pipeline in CAD and/or GIS. Mr. Smith has expertise in the linear design and distribution replacement of natural gas pipelines and designs during the project life cycles. He also has worked on linear design of projects in MicroStation.

EXPERIENCE

CenterPoint Energy / Pre-1984 Steel and Plastic Replacement / TX
Design Technician.

- Work on replacement design (over 50 miles per year) of pre-1984 steel and plastic replacement.
- There are more than 300 projects in central and southern regions of Texas in residential, commercial, and industrial areas that have been worked on.

Atmos Energy / HDDs and Alignment Design / TX
Design Technician.

- Work on HDD and alignment designs.

TECO Peoples Gas / HDD and Alignment Design / FL
Design Technician.

- Draft HDDs, alignment designs, and as-built designs.
- Review 50+ valve sites to be designed in 3D Design.

Spire Gulf / Alignment Design / FL
Design Technician.

- Work on HDDs and alignment designs.

Consumers Energy / Transmission Line Installation / MI
Design Technician.

- Design 36 miles of steel pipe. The pipeline is divided among more than 30 project sheet alignments in the central and northern region of Michigan in residential, commercial, and industrial areas.
- Draft the gate stations along the 36-mile pipeline.

A. Frank McFadden, P.E.
2860 Dauphin St., Suite D
Mobile, AL 36606
Contact: (251)470-6870
fmcfadden@mcfaddenengineering.com

President – McFadden Engineering, Inc.
Managing Member of Water Reclamation Solutions, LLC,

EDUCATION:
M.A., Christian Studies, Wesley Biblical Seminary, 2022
M.S., Civil/Environmental Engineering, Auburn University, 1984
B.S., Civil Engineering, Auburn University, 1981
B.A., Biology/Chemistry, Asbury College (now Asbury University), 1977
Graduate Coursework, Vanderbilt University with W. Wesley Eckenfelder, Distinguished Professor of Environmental Engineering, 1978

PROFESSIONAL REGISTRATIONS:
Professional Engineer: Alabama, Florida, and Mississippi

DISTRINGUISHING QUALIFCATIONS:
Serving in the professional engineer position on the Alabama Environmental Management Commission, the state agency overseeing the Alabama Department of Environmental Management (ADEM).

RELEVANT EXPERIENCE:

Mr. McFadden has extensive experience in water and wastewater design, water quality modeling, hydraulic modeling, site remediation, and modeling scenario analyses. As a holder of the patented wastewater treatment process (OxySharkTM), he has been involved in the permitting, design and manufacturing of this system and others for treating domestic and commercial/industrial wastewater. He has been involved in all phases of water, wastewater and environmental projects for both public and private sector clients including: development of laboratory and field sampling procedures, stream time-of-travel studies using tracer dyes and inert gases, stream flow measurement, preliminary engineering, feasibility studies, water quality modeling development and implementation, treatment plant design, pipeline design, site remediation, construction administration, and facility operation and upgrade planning. Mr. McFadden has expertise in management of a civil and environmental consulting firm specializing in innovative wastewater design, pollution control, water quality assessment and modeling for CONUS and international projects.

Harry McCaskill, E.I.T

Staff Engineer

Education

Master of Science, Systems Engineering (MSSE) • University of South Alabama, 2023
Bachelor of Science (BS) in Civil Engineering • University of South Alabama, 2021
Associate of Science (AS) • Coastal Alabama Community College, 2018

Professional Registrations

Engineer Intern Certificate: Alabama – Registration Number EI51141

Memberships

- Water Environment Federation (WEF)
- Alabama's Water Environment Association (AWEA)

Highlighted Projects

- Hybrid Lateral Flow Sand Filter Wastewater Treatment System
  - Conducted research and analysis on decentralized wastewater treatment systems within the Alabama Black Belt, aiming to resolve challenges arising from soil drainage issues prevalent in the region. Designed and implemented a solution that positioned decentralized systems as enduring treatment alternatives in areas affected by socioeconomic challenges.
  - The successful performance of the system affirmed that the effluent wastewater discharged poses no significant threat to the environment, marking a significant stride in sustainable wastewater management.
- Eastern Jackson County Consolidated Water Reclamation Facility
  - Collaborated with the design of a wastewater treatment plant for Jackson County, MS.
  - This facility aimed to enhance sustainable water management practices in the region, ensuring reliable access to treated water while supporting local industries and promoting environmental stewardship.

Experience

McFadden Engineering, Inc. **Mobile, Alabama** **December 2024 - Present**

Staff Engineer

- Currently work as an environmental staff engineer, involved with design, construction, operations, and maintenance of numerous wastewater technologies across the United States.
- Assist with wastewater and groundwater sampling for compliance purposes..
- Responsible for the design of stormwater infrastructure including detention ponds, discharge structures, and conveyance systems. .

Arcadis **Mobile, Alabama** **April 2024 - November 2024**

Water Engineer II

- Worked as a full-time Staff Water Engineer, involved with design-bid-build water treatment projects across the Southeast, with a focus on centralized wastewater and drinking water systems that enhance public health and environmental sustainability.
- Assisted with permitting applications, design scheduling, cost estimations, and design layouts for engineering projects.
- Ran calculations, reviewed engineering drawings, and gathered engineering specifications for design projects.

University of South Alabama **Mobile, Alabama** **August 2021 - July 2023**

Graduate Assistant

- Led groundbreaking environmental research, specializing in decentralized wastewater treatment solutions for the Alabama Black Belt, and contributed to publications that addressed critical challenges in wastewater treatment.

Marshall Eschete, P.G.

Senior Geologist

Education

B.S., Geology, University of South Alabama, 1992
Double Minor, Applied Sciences and English, University of South Alabama

Professional Registrations

Professional Geologist: Alabama – Registration Number 637
Professional Geologist: Mississippi – Registration Number 387
Professional Geologist: Louisiana – Registration Number 612

Memberships

- Geological Society of America
- Southwest Alabama Geological Society (past President)

Training and Certification

- OSHA HAZWOPER (OSHA 29 CFR 1910.120) and refresher courses
- Risk Based Corrective Action Assessments, The RAM Group
- Alabama Department of Environmental Management Underground Storage Tank Conferences 1999-present
- Groundwater Hydraulics, Alabama Technology Center
- The Princeton Course, Groundwater Pollution and Hydrogeology

Experience

McFadden Engineering, Inc. **Mobile, Alabama** **2010-Present**

Senior Geologist

- Senior Geologist for investigations involving subsurface releases, manufactured gas facilities, underground storage tanks, dry cleaner sites, and chemical releases to groundwater.
- Duties include supervision of crews of up to 30 workers, multiple subcontractors, preparation of Work Plans, Quality Assurance Plans, Health and Safety Plans, and Final Reports, Tier I/Tier II Risk Based Corrective Action Evaluations, Corrective Action Plans.
- Sample collection, data evaluation, modeling, waste management and disposal, liaison between regulatory agencies and clients ensuring that projects are on time and within specifications.
- Test well installation, aquifer testing, recovery well installation, remediation equipment assembly, installation, setup, operation, and maintenance.

Aerostar Environmental Services, Inc. **Mobile, Alabama** **2007-2009**

Senior Geologist

- Project Manager/Geologist for investigations of petroleum contaminated US Army Corps of Engineers Formerly Used Defense Site projects underground storage tank sites, dry cleaner sites.
- Duties included supervision of workers and subcontractors, preparation of Work Plans, Quality Assurance Plans, Health and Safety Plans, and Final Reports, Tier I/Tier II Risk Based Corrective Action Evaluations, Corrective Action Plans.
- Ensured that projects were scheduled, on time, within budget and specifications.
- Sample collection, data evaluation, modeling, waste management and disposal, liaison between regulatory agencies and clients ensuring that projects are on time and within specifications.

Matt Pastorcich, P.G.

Professional Geologist

Education

BS, Biology, University of South Alabama, 2002

BS, Geology, University of South Alabama, 2013

Professional Registrations

Professional Geologist: Alabama – Registration Number 1536

Training and Certification

- OSHA HAZWOPER (OSHA 29 CFR 1910.120) and refresher courses
- Continuing education on Aquifer Testing and Analyses
- Vapor Intrusion -ASTM E2600 Overview
- Continuing education on Cleanup Methods for Contaminated Soil and Groundwater
- Continuing education on Risk-Based Corrective Action (RBCA) for UST Sites

Experience

McFadden Engineering, Inc. **Mobile, Alabama** **2019-Present**

Project Geologist

- Project Geologist/Manager for investigations involving subsurface releases, manufactured gas facilities, underground storage tanks, dry cleaner sites, and chemical releases to groundwater.
- Duties include supervision of drilling subcontractors and field investigation activities, preparation of Site Assessment Plans & Reports, Groundwater Monitoring Plans & Reports, Health and Safety Plans, performance of Risk Based Corrective Action Evaluations, Corrective Action Plans.
- Sample collection, data evaluation, modeling, waste management and disposal, liaison between regulatory agencies and clients ensuring that projects are carried out properly under regulatory guidelines.
- Stormwater permitting activities including the development and implementation of Best Management Practice (BMP) Plans for stormwater management projects.
- Oversight of monitoring well installation, aquifer testing, recovery well installation, and related site investigation activities.
- Preparing ADEM UIC permit applications, determining site suitability for bioremediation activities, and implementation of subsurface disposal systems.

McFadden Engineering, Inc. **Mobile, Alabama** **2014-2019**

Staff Geologist

- Performed hydrogeologic investigations of chemical release sites, including natural gas, dry-cleaning, and UST sites.
- Duties included preparation of project documents including work plans and figures, data tables, and charts, using mapping software.
- Sample collection, data evaluation, modeling, waste management and disposal, liaison between regulatory agencies and clients ensuring that projects are on time and within specifications.
- Performed flood modelling studies to obtain "No-Rise Certifications" for clients using Army Corps of Engineering HEC-RAS software.
- Additional duties include overseeing and carrying out compliance sampling programs including NPDES permit sampling for clients.
- Permit compliance activities including the development of discharge monitoring reports and non-compliance forms for clients.

McFadden Engineering, Inc. **Mobile, Alabama** **2007-2014**

Technician

- Performing support activities for various civil and environmental projects including drafting, technical writing, elevation surveying, and environmental assessment activities.
- Assisting project engineers on permit applications and design work.
- Performing chemical inventories and Tier II form preparation, updating Spill Prevention, Control, and Countermeasure Plans, submittal of Hazardous Waste Notification Forms to ADEM; assisting clients with NPDES compliance.
- Performing sample collection in support of environmental assessments and ongoing monitoring.

Michael Taylor Hayes Daniels

Staff Geologist

Education

B.S., Geology, University of South Alabama, 2022
Minor, Composite Science, University of South Alabama

Training and Certification

- OSHA HAZWOPER (OSHA 29 CFR 1910.120) and refresher courses

Experience

McFadden Engineering, Inc. **Mobile, Alabama** **2022-Present**

Staff Geologist

- Assisting with investigations involving subsurface releases, underground storage tanks, dry cleaner sites, and chemical releases to groundwater.
- Assisting with the preparation of Work Plans, Quality Assurance Plans, Health and Safety Plans, and Final Reports, Tier I/Tier II Risk Based Corrective Action Evaluations and, Corrective Action Plans.
- Operation and maintenance of remediation equipment.
- Groundwater and soil sample collection, data interpretation, and modeling.
- Installation of Type II and Type III groundwater monitoring wells.
- Inspection of sites to monitor quality assurance and proper risk management is performed by subcontractors.
- Waste management and disposal of hazardous and non-hazardous waste.
- Development of GIS maps and figures for use in project evaluation as well as deliverables.
- Stormwater sampling and compliance services including discharge monitoring report preparation.

Southern Earth Sciences, Inc. **Mobile, Alabama** **2021**

Internship

- Groundwater and soil sample collection, data interpretation, and modeling.
- Installation of Type II and Type III groundwater monitoring wells.
- Inspection of sites to monitor quality assurance and proper risk management is performed by subcontractors.
- Investigations of underground storage tanks.

APPENDIX C – BILLING RATES

Confidentiality Disclaimer:
The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

MAGNOLIA RIVER

Professional Services Rate Schedule

Rates valid from 07/01/2025 until 06/30/2028
Provided by Magnolia River Services, Inc. ("Magnolia River")
For City of Covington, Georgia ("Client")

	Position	Rate
ENG	Drafting Technician	$ 97.00
	Senior Drafting Technician	$ 111.00
	Project Coordinator	$ 131.00
	Design Engineer/Integrity Engineer/Project Specialist	$ 138.00
	Senior Design Engineer	$ 162.50
	Senior Integrity Engineer	$ 175.00
	Professional Engineer/Technical Lead	$ 198.00
	Position	**Rate**
GIS	GIS & Data Technician	$ 81.50
	Sr. GIS & Data Technician	$ 98.00
	GIS & Data Analyst	$ 108.00
	Sr. GIS & Data Analyst	$ 118.50
	GIS & Data Specialist	$ 123.50
	Sr. GIS & Data Specialist	$ 134.00
	GIS & Data Consultant	$ 144.00
	Sr. GIS & Data Consultant	$ 159.50
	Principal GIS & Data Consultant	$ 180.50
	Senior Technical Advisor	$ 257.50
	Position	**Rate**
PM	Administration/Accounting	$ 68.00
	Technical Writer	$ 123.50
	Assistant Project Manager	$ 159.50
	Project Manager	$ 180.50
	Sr. Project Manager	$ 190.50
	Project Director	$ 257.50

- Hours in excess of forty (40) hours per week will be charged at one and a half (1.5) times the standard rate.
- Rates listed will increase each year by 3%, with the initial increase going into effect on 7/1/2026 and subsequent increases effective every year thereafter on 7/1, unless mutually agreed to otherwise in writing by Magnolia River and Client.
- Subsistence for lodging, meals, and incidentals as defined by the GSA is guaranteed and will be billed to the client for scheduled worked and travel days.
  - Mileage for mobilization and demobilization will be billed at the standard IRS rate to/from the Magnolia River employee home office/home site to the project site.

Confidentiality Disclaimer: The information contained in this document is confidential, privileged and only for the use of the named client, and may not be used, published or redistributed without the prior written consent of Magnolia River.

  - Travel time for mobilization and demobilization will be billed at the hourly rate which corresponds with the labor category. A maximum of eight (8) hours travel time per day will be charged for travel.
  - Per diem (lodging and meals) for mobilization and demobilization for the number of required travel days to/from the project location.
- Non-GSA travel costs (airfare, rental car, etc.) and Other Direct Costs (ODC) incurred by Magnolia River, such as equipment rental, software license fees/maintenance, shipping, etc., will be invoiced to Client separately at cost plus 15%.
- Included in these hourly rates, Magnolia River will obtain all software needed for it to perform its professional services. These rates do not include providing Client with a license to view or use the deliverables. Client may need its own license(s) to the software(s) to view or use the deliverables.
- All sub-contractor invoicing shall be at cost plus 20% markup. (A copy of sub-contractor invoices shall be attached with the Magnolia River invoice at time of submission).
- Payment of an invoice charging any of the above rates constitutes acceptance of the entire Rate Schedule by Client, regardless of whether Client has signed the Rate Schedule.

Article	Comments
	Attachment A: Proposed Agreement for General Consulting Services between Owner and Consultant
B.3.	Revise this Article as follows: The CONSULTANT shall perform, in a professional manner in accordance with the Standard of Care, all services described in the Scope of Services attached as Exhibit B, and incorporated by reference herein (collectively the "Scope of Services").
B.13.	Revise this Article as follows: All documents prepared or furnished by CONSULTANT pursuant to this Agreement are instruments of CONSULTANT'S professional service, and CONSULTANT shall retain an ownership and property interests therein, including all copyrights, unless otherwise agreed in writing by CONSULTANT and the City. Regarding construction drawings, CONSULTANT grants the City a license to use instruments of CONSULTANT'S professional service for the purpose of constructing, occupying, or maintaining the PROJECT. The City shall have the option to purchase copies of all finished or unfinished documents, data, studies, surveys drawings, maps, models, photographs, and reports prepared by the CONSULTANT under this Agreement, and Scope of Services for the price of Ten Dollars ($10.00). Reuse or modification of any such documents by the City, without CONSULTANT'S written permission, shall be at the City's sole risk. Documents are defined as reports, drawings, specifications, record drawings, plats, and other deliverables defined in the SERVICES, whether in printed or electronic format. The Parties acknowledge and agree that the CONSULTNAT'S Services do not include and the City shall have no rights under this Agreement to any of CONSULTANT'S products under GeoCurrent, the technology division of CONSULTANT, or the packaged software, FlowGIS, or any elements thereof, or any tailored version thereof, or any other packaged software offered by CONSULTNAT, the use of which shall be governed by: (1) the applicable End User License Agreement ("EULA") and/or Software-as-a-Service Agreement ("SaaSA"), whether such EULA and/or SaaSA is in writing or in electronic form; and (2) and payment of the required fees. The use of any third-party software shall be governed by: (1) the applicable third-party End User License Agreement ("EULA") and/or third-party Software-as-a-Service Agreement ("SaaSA"), whether such EULA and/or SaaSA is in writing or in electronic form; and (2) and payment of the required fees by the City to the third party provider for continued access.

21.	Revise this Article as follows: CONSULTANT will provide professional services so as to minimize errors and omissions through the use of a Quality Assurance Plan approved by the City. CONSULTANT will employ that degree of care and skill ordinarily exercised by CONSULTANTS practicing in the same or similar locale as the project, on projects of a similar scope and nature (the "Standard of Care").

Form **W-9**
(Rev. October 2018)
Department of the Treasury
Internal Revenue Service

Request for Taxpayer Identification Number and Certification

► **Go to *www.irs.gov/FormW9* for instructions and the latest information.**

Give Form to the requester. Do not send to the IRS.

Print or type. See **Specific Instructions** on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
Magnolia River Services, Inc.

2 Business name/disregarded entity name, if different from above

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☒ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☐ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ► _____

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ►

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from FATCA reporting code (if any) _____

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
PO Box 1267

Requester's name and address (optional)

6 City, state, and ZIP code
Hartselle, AL 35640

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN,* later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number
			–			–				

or

Employer identification number
6	3	–	1	2	5	8	7	9	6

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

Sign Here Signature of U.S. person ► *Emily Reischman* Date ► 12/9/2024

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

By signing the filled-out form, you:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),

2. Certify that you are not subject to backup withholding, or

3. Claim exemption from backup withholding if you are a U.S. exempt payee. If applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income, and

4. Certify that FATCA code(s) entered on this form (if any) indicating that you are exempt from the FATCA reporting, is correct. See *What is FATCA reporting,* later, for further information.

Note: If you are a U.S. person and a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

Definition of a U.S. person. For federal tax purposes, you are considered a U.S. person if you are:

- An individual who is a U.S. citizen or U.S. resident alien;
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States;
- An estate (other than a foreign estate); or
- A domestic trust (as defined in Regulations section 301.7701-7).

Special rules for partnerships. Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax under section 1446 on any foreign partners' share of effectively connected taxable income from such business. Further, in certain cases where a Form W-9 has not been received, the rules under section 1446 require a partnership to presume that a partner is a foreign person, and pay the section 1446 withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid section 1446 withholding on your share of partnership income.

In the cases below, the following person must give Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States.

- In the case of a disregarded entity with a U.S. owner, the U.S. owner of the disregarded entity and not the entity;
- In the case of a grantor trust with a U.S. grantor or other U.S. owner, generally, the U.S. grantor or other U.S. owner of the grantor trust and not the trust; and
- In the case of a U.S. trust (other than a grantor trust), the U.S. trust (other than a grantor trust) and not the beneficiaries of the trust.

Foreign person. If you are a foreign person or the U.S. branch of a foreign bank that has elected to be treated as a U.S. person, do not use Form W-9. Instead, use the appropriate Form W-8 or Form 8233 (see Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities).

Nonresident alien who becomes a resident alien. Generally, only a nonresident alien individual may use the terms of a tax treaty to reduce or eliminate U.S. tax on certain types of income. However, most tax treaties contain a provision known as a "saving clause." Exceptions specified in the saving clause may permit an exemption from tax to continue for certain types of income even after the payee has otherwise become a U.S. resident alien for tax purposes.

If you are a U.S. resident alien who is relying on an exception contained in the saving clause of a tax treaty to claim an exemption from U.S. tax on certain types of income, you must attach a statement to Form W-9 that specifies the following five items.

1. The treaty country. Generally, this must be the same treaty under which you claimed exemption from tax as a nonresident alien.

2. The treaty article addressing the income.

3. The article number (or location) in the tax treaty that contains the saving clause and its exceptions.

4. The type and amount of income that qualifies for the exemption from tax.

5. Sufficient facts to justify the exemption from tax under the terms of the treaty article.

Example. Article 20 of the U.S.-China income tax treaty allows an exemption from tax for scholarship income received by a Chinese student temporarily present in the United States. Under U.S. law, this student will become a resident alien for tax purposes if his or her stay in the United States exceeds 5 calendar years. However, paragraph 2 of the first Protocol to the U.S.-China treaty (dated April 30, 1984) allows the provisions of Article 20 to continue to apply even after the Chinese student becomes a resident alien of the United States. A Chinese student who qualifies for this exception (under paragraph 2 of the first protocol) and is relying on this exception to claim an exemption from tax on his or her scholarship or fellowship income would attach to Form W-9 a statement that includes the information described above to support that exemption.

If you are a nonresident alien or a foreign entity, give the requester the appropriate completed Form W-8 or Form 8233.

Backup Withholding

What is backup withholding? Persons making certain payments to you must under certain conditions withhold and pay to the IRS 24% of such payments. This is called "backup withholding." Payments that may be subject to backup withholding include interest, tax-exempt interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, payments made in settlement of payment card and third party network transactions, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

You will not be subject to backup withholding on payments you receive if you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return.

Payments you receive will be subject to backup withholding if:

1. You do not furnish your TIN to the requester,

2. You do not certify your TIN when required (see the instructions for Part II for details),

3. The IRS tells the requester that you furnished an incorrect TIN,

4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only), or

5. You do not certify to the requester that you are not subject to backup withholding under 4 above (for reportable interest and dividend accounts opened after 1983 only).

Certain payees and payments are exempt from backup withholding. See *Exempt payee code,* later, and the separate Instructions for the Requester of Form W-9 for more information.

Also see *Special rules for partnerships,* earlier.

What is FATCA Reporting?

The Foreign Account Tax Compliance Act (FATCA) requires a participating foreign financial institution to report all United States account holders that are specified United States persons. Certain payees are exempt from FATCA reporting. See *Exemption from FATCA reporting code,* later, and the Instructions for the Requester of Form W-9 for more information.

Updating Your Information

You must provide updated information to any person to whom you claimed to be an exempt payee if you are no longer an exempt payee and anticipate receiving reportable payments in the future from this person. For example, you may need to provide updated information if you are a C corporation that elects to be an S corporation, or if you no longer are tax exempt. In addition, you must furnish a new Form W-9 if the name or TIN changes for the account; for example, if the grantor of a grantor trust dies.

Penalties

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of $50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a $500 penalty.

Criminal penalty for falsifying information. Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of federal law, the requester may be subject to civil and criminal penalties.

Specific Instructions

Line 1

You must enter one of the following on this line; **do not** leave this line blank. The name should match the name on your tax return.

If this Form W-9 is for a joint account (other than an account maintained by a foreign financial institution (FFI)), list first, and then circle, the name of the person or entity whose number you entered in Part I of Form W-9. If you are providing Form W-9 to an FFI to document a joint account, each holder of the account that is a U.S. person must provide a Form W-9.

a. **Individual.** Generally, enter the name shown on your tax return. If you have changed your last name without informing the Social Security Administration (SSA) of the name change, enter your first name, the last name as shown on your social security card, and your new last name.

Note: ITIN applicant: Enter your individual name as it was entered on your Form W-7 application, line 1a. This should also be the same as the name you entered on the Form 1040/1040A/1040EZ you filed with your application.

b. **Sole proprietor or single-member LLC.** Enter your individual name as shown on your 1040/1040A/1040EZ on line 1. You may enter your business, trade, or "doing business as" (DBA) name on line 2.

c. **Partnership, LLC that is not a single-member LLC, C corporation, or S corporation.** Enter the entity's name as shown on the entity's tax return on line 1 and any business, trade, or DBA name on line 2.

d. **Other entities.** Enter your name as shown on required U.S. federal tax documents on line 1. This name should match the name shown on the charter or other legal document creating the entity. You may enter any business, trade, or DBA name on line 2.

e. **Disregarded entity.** For U.S. federal tax purposes, an entity that is disregarded as an entity separate from its owner is treated as a "disregarded entity." See Regulations section 301.7701-2(c)(2)(iii). Enter the owner's name on line 1. The name of the entity entered on line 1 should never be a disregarded entity. The name on line 1 should be the name shown on the income tax return on which the income should be reported. For example, if a foreign LLC that is treated as a disregarded entity for U.S. federal tax purposes has a single owner that is a U.S. person, the U.S. owner's name is required to be provided on line 1. If the direct owner of the entity is also a disregarded entity, enter the first owner that is not disregarded for federal tax purposes. Enter the disregarded entity's name on line 2, "Business name/disregarded entity name." If the owner of the disregarded entity is a foreign person, the owner must complete an appropriate Form W-8 instead of a Form W-9. This is the case even if the foreign person has a U.S. TIN.

Line 2

If you have a business name, trade name, DBA name, or disregarded entity name, you may enter it on line 2.

Line 3

Check the appropriate box on line 3 for the U.S. federal tax classification of the person whose name is entered on line 1. Check only one box on line 3.

IF the entity/person on line 1 is a(n) . . .	THEN check the box for . . .
• Corporation	Corporation
• Individual • Sole proprietorship, or • Single-member limited liability company (LLC) owned by an individual and disregarded for U.S. federal tax purposes.	Individual/sole proprietor or single-member LLC
• LLC treated as a partnership for U.S. federal tax purposes, • LLC that has filed Form 8832 or 2553 to be taxed as a corporation, or • LLC that is disregarded as an entity separate from its owner but the owner is another LLC that is not disregarded for U.S. federal tax purposes.	Limited liability company and enter the appropriate tax classification. (P= Partnership; C= C corporation; or S= S corporation)
• Partnership	Partnership
• Trust/estate	Trust/estate

Line 4, Exemptions

If you are exempt from backup withholding and/or FATCA reporting, enter in the appropriate space on line 4 any code(s) that may apply to you.

Exempt payee code.

- Generally, individuals (including sole proprietors) are not exempt from backup withholding.
- Except as provided below, corporations are exempt from backup withholding for certain payments, including interest and dividends.
- Corporations are not exempt from backup withholding for payments made in settlement of payment card or third party network transactions.
- Corporations are not exempt from backup withholding with respect to attorneys' fees or gross proceeds paid to attorneys, and corporations that provide medical or health care services are not exempt with respect to payments reportable on Form 1099-MISC.

The following codes identify payees that are exempt from backup withholding. Enter the appropriate code in the space in line 4.

1—An organization exempt from tax under section 501(a), any IRA, or a custodial account under section 403(b)(7) if the account satisfies the requirements of section 401(f)(2)

2—The United States or any of its agencies or instrumentalities

3—A state, the District of Columbia, a U.S. commonwealth or possession, or any of their political subdivisions or instrumentalities

4—A foreign government or any of its political subdivisions, agencies, or instrumentalities

5—A corporation

6—A dealer in securities or commodities required to register in the United States, the District of Columbia, or a U.S. commonwealth or possession

7—A futures commission merchant registered with the Commodity Futures Trading Commission

8—A real estate investment trust

9—An entity registered at all times during the tax year under the Investment Company Act of 1940

10—A common trust fund operated by a bank under section 584(a)

11—A financial institution

12—A middleman known in the investment community as a nominee or custodian

13—A trust exempt from tax under section 664 or described in section 4947

The following chart shows types of payments that may be exempt from backup withholding. The chart applies to the exempt payees listed above, 1 through 13.

IF the payment is for . . .	THEN the payment is exempt for . . .
Interest and dividend payments	All exempt payees except for 7
Broker transactions	Exempt payees 1 through 4 and 6 through 11 and all C corporations. S corporations must not enter an exempt payee code because they are exempt only for sales of noncovered securities acquired prior to 2012.
Barter exchange transactions and patronage dividends	Exempt payees 1 through 4
Payments over $600 required to be reported and direct sales over $5,000[1]	Generally, exempt payees 1 through 5[2]
Payments made in settlement of payment card or third party network transactions	Exempt payees 1 through 4

[1] See Form 1099-MISC, Miscellaneous Income, and its instructions.

[2] However, the following payments made to a corporation and reportable on Form 1099-MISC are not exempt from backup withholding: medical and health care payments, attorneys' fees, gross proceeds paid to an attorney reportable under section 6045(f), and payments for services paid by a federal executive agency.

Exemption from FATCA reporting code. The following codes identify payees that are exempt from reporting under FATCA. These codes apply to persons submitting this form for accounts maintained outside of the United States by certain foreign financial institutions. Therefore, if you are only submitting this form for an account you hold in the United States, you may leave this field blank. Consult with the person requesting this form if you are uncertain if the financial institution is subject to these requirements. A requester may indicate that a code is not required by providing you with a Form W-9 with "Not Applicable" (or any similar indication) written or printed on the line for a FATCA exemption code.

A—An organization exempt from tax under section 501(a) or any individual retirement plan as defined in section 7701(a)(37)

B—The United States or any of its agencies or instrumentalities

C—A state, the District of Columbia, a U.S. commonwealth or possession, or any of their political subdivisions or instrumentalities

D—A corporation the stock of which is regularly traded on one or more established securities markets, as described in Regulations section 1.1472-1(c)(1)(i)

E—A corporation that is a member of the same expanded affiliated group as a corporation described in Regulations section 1.1472-1(c)(1)(i)

F—A dealer in securities, commodities, or derivative financial instruments (including notional principal contracts, futures, forwards, and options) that is registered as such under the laws of the United States or any state

G—A real estate investment trust

H—A regulated investment company as defined in section 851 or an entity registered at all times during the tax year under the Investment Company Act of 1940

I—A common trust fund as defined in section 584(a)

J—A bank as defined in section 581

K—A broker

L—A trust exempt from tax under section 664 or described in section 4947(a)(1)

M—A tax exempt trust under a section 403(b) plan or section 457(g) plan

Note: You may wish to consult with the financial institution requesting this form to determine whether the FATCA code and/or exempt payee code should be completed.

Line 5

Enter your address (number, street, and apartment or suite number). This is where the requester of this Form W-9 will mail your information returns. If this address differs from the one the requester already has on file, write NEW at the top. If a new address is provided, there is still a chance the old address will be used until the payor changes your address in their records.

Line 6

Enter your city, state, and ZIP code.

Part I. Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. If you are a resident alien and you do not have and are not eligible to get an SSN, your TIN is your IRS individual taxpayer identification number (ITIN). Enter it in the social security number box. If you do not have an ITIN, see *How to get a TIN* below.

If you are a sole proprietor and you have an EIN, you may enter either your SSN or EIN.

If you are a single-member LLC that is disregarded as an entity separate from its owner, enter the owner's SSN (or EIN, if the owner has one). Do not enter the disregarded entity's EIN. If the LLC is classified as a corporation or partnership, enter the entity's EIN.

Note: See *What Name and Number To Give the Requester,* later, for further clarification of name and TIN combinations.

How to get a TIN. If you do not have a TIN, apply for one immediately. To apply for an SSN, get Form SS-5, Application for a Social Security Card, from your local SSA office or get this form online at *www.SSA.gov*. You may also get this form by calling 1-800-772-1213. Use Form W-7, Application for IRS Individual Taxpayer Identification Number, to apply for an ITIN, or Form SS-4, Application for Employer Identification Number, to apply for an EIN. You can apply for an EIN online by accessing the IRS website at *www.irs.gov/Businesses* and clicking on Employer Identification Number (EIN) under Starting a Business. Go to *www.irs.gov/Forms* to view, download, or print Form W-7 and/or Form SS-4. Or, you can go to *www.irs.gov/OrderForms* to place an order and have Form W-7 and/or SS-4 mailed to you within 10 business days.

If you are asked to complete Form W-9 but do not have a TIN, apply for a TIN and write "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments, generally you will have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note: Entering "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon.

Caution: A disregarded U.S. entity that has a foreign owner must use the appropriate Form W-8.

Part II. Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if item 1, 4, or 5 below indicates otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required). In the case of a disregarded entity, the person identified on line 1 must sign. Exempt payees, see *Exempt payee code,* earlier.

Signature requirements. Complete the certification as indicated in items 1 through 5 below.

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered inactive during 1983. You must sign the certification or backup withholding will apply. If you are subject to backup withholding and you are merely providing your correct TIN to the requester, you must cross out item 2 in the certification before signing the form.

3. Real estate transactions. You must sign the certification. You may cross out item 2 of the certification.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have been notified that you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments made in settlement of payment card and third party network transactions, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, qualified tuition program payments (under section 529), ABLE accounts (under section 529A), IRA, Coverdell ESA, Archer MSA or HSA contributions or distributions, and pension distributions. You must give your correct TIN, but you do not have to sign the certification.

What Name and Number To Give the Requester

For this type of account:	Give name and SSN of:
1. Individual	The individual
2. Two or more individuals (joint account) other than an account maintained by an FFI	The actual owner of the account or, if combined funds, the first individual on the account[1]
3. Two or more U.S. persons (joint account maintained by an FFI)	Each holder of the account
4. Custodial account of a minor (Uniform Gift to Minors Act)	The minor[2]
5. a. The usual revocable savings trust (grantor is also trustee)	The grantor-trustee[1]
b. So-called trust account that is not a legal or valid trust under state law	The actual owner[1]
6. Sole proprietorship or disregarded entity owned by an individual	The owner[3]
7. Grantor trust filing under Optional Form 1099 Filing Method 1 (see Regulations section 1.671-4(b)(2)(i)(A))	The grantor*
For this type of account:	**Give name and EIN of:**
8. Disregarded entity not owned by an individual	The owner
9. A valid trust, estate, or pension trust	Legal entity[4]
10. Corporation or LLC electing corporate status on Form 8832 or Form 2553	The corporation
11. Association, club, religious, charitable, educational, or other tax-exempt organization	The organization
12. Partnership or multi-member LLC	The partnership
13. A broker or registered nominee	The broker or nominee
14. Account with the Department of Agriculture in the name of a public entity (such as a state or local government, school district, or prison) that receives agricultural program payments	The public entity
15. Grantor trust filing under the Form 1041 Filing Method or the Optional Form 1099 Filing Method 2 (see Regulations section 1.671-4(b)(2)(i)(B))	The trust

[1] List first and circle the name of the person whose number you furnish. If only one person on a joint account has an SSN, that person's number must be furnished.

[2] Circle the minor's name and furnish the minor's SSN.

[3] You must show your individual name and you may also enter your business or DBA name on the "Business name/disregarded entity" name line. You may use either your SSN or EIN (if you have one), but the IRS encourages you to use your SSN.

[4] List first and circle the name of the trust, estate, or pension trust. (Do not furnish the TIN of the personal representative or trustee unless the legal entity itself is not designated in the account title.) Also see *Special rules for partnerships,* earlier.

***Note:** The grantor also must provide a Form W-9 to trustee of trust.

Note: If no name is circled when more than one name is listed, the number will be considered to be that of the first name listed.

Secure Your Tax Records From Identity Theft

Identity theft occurs when someone uses your personal information such as your name, SSN, or other identifying information, without your permission, to commit fraud or other crimes. An identity thief may use your SSN to get a job or may file a tax return using your SSN to receive a refund.

To reduce your risk:

- Protect your SSN,
- Ensure your employer is protecting your SSN, and
- Be careful when choosing a tax preparer.

If your tax records are affected by identity theft and you receive a notice from the IRS, respond right away to the name and phone number printed on the IRS notice or letter.

If your tax records are not currently affected by identity theft but you think you are at risk due to a lost or stolen purse or wallet, questionable credit card activity or credit report, contact the IRS Identity Theft Hotline at 1-800-908-4490 or submit Form 14039.

For more information, see Pub. 5027, Identity Theft Information for Taxpayers.

Victims of identity theft who are experiencing economic harm or a systemic problem, or are seeking help in resolving tax problems that have not been resolved through normal channels, may be eligible for Taxpayer Advocate Service (TAS) assistance. You can reach TAS by calling the TAS toll-free case intake line at 1-877-777-4778 or TTY/TDD 1-800-829-4059.

Protect yourself from suspicious emails or phishing schemes. Phishing is the creation and use of email and websites designed to mimic legitimate business emails and websites. The most common act is sending an email to a user falsely claiming to be an established legitimate enterprise in an attempt to scam the user into surrendering private information that will be used for identity theft.

The IRS does not initiate contacts with taxpayers via emails. Also, the IRS does not request personal detailed information through email or ask taxpayers for the PIN numbers, passwords, or similar secret access information for their credit card, bank, or other financial accounts.

If you receive an unsolicited email claiming to be from the IRS, forward this message to *phishing@irs.gov*. You may also report misuse of the IRS name, logo, or other IRS property to the Treasury Inspector General for Tax Administration (TIGTA) at 1-800-366-4484. You can forward suspicious emails to the Federal Trade Commission at *spam@uce.gov* or report them at *www.ftc.gov/complaint*. You can contact the FTC at *www.ftc.gov/idtheft* or 877-IDTHEFT (877-438-4338). If you have been the victim of identity theft, see *www.IdentityTheft.gov* and Pub. 5027.

Visit *www.irs.gov/IdentityTheft* to learn more about identity theft and how to reduce your risk.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to provide your correct TIN to persons (including federal agencies) who are required to file information returns with the IRS to report interest, dividends, or certain other income paid to you; mortgage interest you paid; the acquisition or abandonment of secured property; the cancellation of debt; or contributions you made to an IRA, Archer MSA, or HSA. The person collecting this form uses the information on the form to file information returns with the IRS, reporting the above information. Routine uses of this information include giving it to the Department of Justice for civil and criminal litigation and to cities, states, the District of Columbia, and U.S. commonwealths and possessions for use in administering their laws. The information also may be disclosed to other countries under a treaty, to federal and state agencies to enforce civil and criminal laws, or to federal law enforcement and intelligence agencies to combat terrorism. You must provide your TIN whether or not you are required to file a tax return. Under section 3406, payers must generally withhold a percentage of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to the payer. Certain penalties may also apply for providing false or fraudulent information.

CONSULTANT'S AFFIDAVIT OF EMPLOYMENT ELIGIBILITY

STATE OF GEORGIA
NEWTON COUNTY

By executing this affidavit, the undersigned Contractor verifies its compliance with O.C.G.A. 13-10-91, stating affirmatively that the individual, firm, or corporation which is engaged in the physical performance of services on behalf of **City of Covington** has registered with, is authorized to use and uses the Federal work authorization program commonly known as E-Verify, or any subsequent replacement program, in accordance with the applicable provisions and deadlines established in O.C.G.A. §13-10-91. Furthermore, the undersigned Contractor will continue to use the Federal work authorization program throughout the contract period.

The undersigned further agrees that, should it employ or contract with any Subcontractor(s) in connection with the physical performance of services pursuant to this contract with the **City of Covington.** Contractor will secure from such Subcontractor(s) similar verification of compliance with O.C.G.A. 13-10-91. Contractor further agrees to maintain records of such compliance and provide a copy of each such verification to the **City of Covington** at the time the Subcontractor(s) is retained to perform such service. Contractor hereby attests that its Federal work authorization user identification number and date of authorization are as follows:

1557402

E-Verify Company ID Number

9/4/2020

Date of Authorization

Magnolia River Services, Inc.

Name of Contractor

SAVE AFFIDAVIT

STATE OF GEORGIA
NEWTON COUNTY

By executing this affidavit under oath, as an applicant for a public benefit, as referenced in O.C.G.A. §50-36-1, administered by the Georgia Department of Community Affairs, the undersigned applicant verifies one of the following with respect to my ability to enter into a contract with the City of Covington:

1) __X__ I am a United States citizen.

OR

2) _____ I am a legal permanent resident of the United States.

OR

3) _____ I am an otherwise qualified alien or non-immigrant under the Federal Immigration and Nationality Act and lawfully present in the United States with an alien number issued by the Department of Homeland Security or other federal immigration agency. My alien number issued by the Department of Homeland Security or other federal immigration agency is:

_____

The undersigned applicant also hereby verifies that he or she is 18 years of age or older and has provided at least one secure and verifiable document, as required by O.C.G.A. §50-36-1(f)(1), with this affidavit.

The secure and verifiable document provided with this affidavit can best be classified as:

Driver's License

In making the above representation under oath, I understand that any person who knowingly and willfully makes a false, fictitious, or fraudulent statement or representation in an affidavit shall be guilty of a violation of O.C.G.A §16-10-20, and face criminal penalties as allowed by such criminal statute.

2194 Emory Street
Covington, GA 30014

RE: Response to RFQ #2025-15 for the City of Covington

Sapp Engineering and Services (SES) would like to provide the enclosed documents in response to the above Request for Qualifications Annual Consulting Services for Category A – Consulting Services. All Addenda has been received for this RFQ.

I feel that my work experience in supervision and management of natural gas distribution operations, field supervision of construction projects and engineering design of natural gas systems allows me to bring more to a project than just engineering design. I can understand the needs of a client for not only a project but also how a project might impact the operations of the rest of the natural gas system.

On any project we do for a client, I first meet with the staff of the client to get their input on what they prefer for the type, size, placement and route for the proposed facilities, including main, regulator stations, meter sets and any other facilities as needed. I feel that I am working for you and my job is to take your recommendations and combine them with my experience to come up with the best design for all concerned.

The above approach is how we handle all of the projects. Jason Baker or myself will be the person that you will be working with in all phases of the project. That is the best way to assure you that you get the best quality product both in the design and the construction of the project

We look forward to working with you.

Sincerely,

Jack Sapp, PE

RESUME

Jack R. Sapp
200 Pete Sapp Rd
Eastman, GA 31023

email: jrsapp@sappengineering.com

Education 1968 – 1973 GA Tech Bachelor of Mechanical Engineering

Professional Registered Professional Engineer in Georgia and South Carolina
Previously-Certified Pipeline Welding Inspector
Previously-GSWCC Level II Certified Design Professional
Member National/Georgia Society of Professional Engineers

Work Experience

6/2007 – Present Owner Sapp Engineering & Services, LLC

- Natural Gas Operations and Engineering consulting work for natural gas utilities, municipal gas systems and industrial customers.
- Design, prepare bid documents, inspect and prepare as laid drawings for new installation and replacement projects from tap stations to customer meter sets.
- Conduct computer models of gas systems to plan system expansions and improvements.
- Assist customers with operations of gas systems.

6/2000 – 6/2007 Engineer D. Lance Souther, Inc.

- Natural Gas Operations and Engineering consulting work for Atlanta Gas Light Company and municipal gas systems.
- Design/build services for natural gas piping, maintenance, repairs and hot taps for municipal and industrial customers.
- Managed Construction Company to include routing and field supervision of construction crews for new and renewal plastic and steel main work up to 12".

6/1973 – 6/2000 Atlanta Gas Light Company

- 1973 – 1986 Various Operations positions in Macon.
- 1986 – 1995 Division Engineer for Macon Division.
- 1995 – 2000 Operations Manager for Atlanta Service Center-Metro Atlanta

Jason Baker

Sapp Engineering & Services, Eastman, GA · 229-563-6635 · tjbaker@sappengineering.com

Professional Summary

Engineer-in-Training and utility professional with 14+ years of experience in natural gas systems, utility operations, and infrastructure project management. Skilled in pipeline design, permitting, regulatory compliance, and team leadership. B.S. in Civil Engineering at Mercer University.

Professional Experience

Sapp Engineering and Services · Eastman, GA

Engineer in Training · July 2021 – Present

- Design natural gas pipelines for municipal projects.
- Execute permits for pipeline projects (DOT, Railroad, River Crossings).
- Perform gas load analysis and design regulator/meter sets for industrial customers.
- Consult with customers on new projects as well as help manage current projects.
- Earn B.S in Engineering at Mercer University while actively supporting projects.

Fort Valley Utility Commission · Fort Valley, GA

Operations Manager (Natural Gas, Electric, & Telecom) · August 2018 – July 2021

- Directed day-to-day operations of Natural Gas, Electric, and Telecom departments.
- Managed Operations budgets as well as individual Project budgets.
- Coordinated large-scale projects and utility repairs.
- Collaborated with department heads and local/state economic development leaders.

Foreman, Natural Gas Department · March 2015 – August 2018

- Scheduled and supervised service installations and leak repairs.
- Maintained documentation and ensured regulatory compliance with GPSC & PHMSA.

Natural Gas Operator · January 2010 – March 2015

- Installed mains/services, maintained system infrastructure and equipment.

Education

- Mercer University, Bachelor of Science in Engineering (Specializing in Civil Engineering) (2022 - 2025)
- Middle Georgia State University, Engineering Pathway Program (2021 – 2022)

Skills

- Good communicator
- Proficient in Excel, Turbo CAD, and gas load analysis software.
- Experienced in operating heavy equipment including Excavator, Backhoe, Skid steer, and Horizontal-Directional Drill.

COMPANY STRUCTURE AND WORK PHILOSOPHY:

Sapp Engineering & Services is a small company. I am the only registered engineer in the firm at this time and because of that we will not take on any more business than we can handle personally. We have recently added an engineer, Jason Baker, who is a recent graduate of Mercer University in Macon. Our plan is for Jason to eventually be the lead engineer for the firm. Jason has natural gas operations experience from his previous positions at Fort Valley Utility Commission. While Jason was in college at Mercer, he worked on projects for Sapp Engineering as his time allowed. Jason is now full time with Sapp Engineering and handling projects as he takes on more responsibilities in the firm.

In the past I have performed all of the engineering design, computer modeling and project management work for projects. My wife, Rebecca, is our Chief Financial Officer and she handles all of the billing and other financial matters associated with the business. We do the CAD work for the regulator stations and meter sets and other facilities components of a project. We use Donaldson Garrett in Macon for all of our surveying needs. They do the field surveying and CAD work associated with the line work. We use Single Point Acquisitions for any easement or land acquisitions needed on a project. I have been a GSWCC Level II Certified Design Professional but we now sub out all of the E&S design and permitting as well as any environmental permitting to Still Waters Engineering. We have a good long term relationship with Donaldson Garrett, Still Waters Engineering and Single Point. By using them for the work they are experienced at, we only have that expense when we need that work. With this process we can keep our expenses down by only paying for the work as needed.

We use GASWorkS software to model gas systems to determine how to help solve problems such as low pressure or how to determine the best solution for adding a large industrial customer.

We have 2 employees that are doing inspection work for Southern Company Gas (Atlanta Gas Light Company) on various projects from 2" PE to 24" HP steel. We also have several retired pipeline contractors that we use for inspection on our projects if needed.

I feel that our work experience in supervision and management of natural gas distribution operations, field supervision of construction projects and engineering design of natural gas systems allows us to bring more to a project than just engineering design. We can understand the needs of a client for not only a project but also how a project might impact the operations of the rest of the natural gas system.

We will take the information obtained from meeting with the client and select the route for the main line and the equipment for the regulator station and meter set as needed. After the route is determined, the route will be surveyed to prepare the bid drawing sheets for the project. Erosion & Sedimentation Control plans will be developed and incorporated into the bid drawings and permits will be applied for as needed. Once the permits are approved the bid package will be prepared and put out for bid. Once the bids are returned, we will assist the City with the bid opening and preparation of the bid comparison sheet.

After the contract is awarded and the contractor begins work, we will manage the project as needed to assure the contractor is providing quality work. If needed, Sapp Engineering can provide an inspector to inspect the work as it is done. This service is provided at an additional charge since some Cities use City employees to inspect on a project.

Using this approach to helping a client achieve what would appear to be an impossible task, we were able to assist the City of Claxton secure a large industrial customer that they would not normally have been able to serve.

We have been assisting the City of Claxton with small projects for the last ten years. Three years ago, they contacted us to get our help to determine if they could serve a large automobile manufacturing plant that was looking to locate in their territory. The City's existing facilities would not nearly supply the volume of gas needed. If the City could not supply the gas, the customer was looking to locate in an area supplied by AGL. We met with them and looked at all of the options and by using the GasWorkS modeling software, developed a plan to install a new tap station and 12" and 8" lines to serve the facility. With our contacts at Kinder Morgan and with the help of the funding from through MGAG, we were able to help the City install the needed facilities by providing the services of designing the infrastructure, acquiring the needed permits, putting the project out for bid and managing the project through completion. They are now operating a system that is supplying 10 times more gas than they ever supplied in the past and should have the construction cost paid off in around ten years.

Attached on the next few pages is a list of some of the projects we have handled for clients over the last ten years. Not all are as large as the Claxton project but we handle small projects with the same philosophy as the large projects. All projects, no matter the size are important to the Client.

AGREEMENT FOR GENERAL CONSULTING SERVICES

This Agreement is made and entered into effective date of _____, by and between the City of Covington (City, OWNER), and _____,

(CONSULTANT) for General Consulting Services as outlined in the Request for Qualifications Annual Consulting Services, issue date August 2025

W I T N E S S E T H:

WHEREAS, the OWNER has periodic need of professional advice and consulting services;

NOW, THEREFORE, for and in consideration of the covenants and promises to be carried out by each party herein, it is agreed by and between the parties that the OWNER shall and does hereby employ said CONSULTANT to provide certain professional advice and consulting services as follows:

ITEM A - CONSULTANT'S SERVICES

The specific services which the CONSULTANT agrees to furnish and the terms the CONSULTANT agrees to follow are set forth herein:

1. For each major task or project, the OWNER shall provide to the CONSULTANT a detailed description of the services to be performed. The CONSULTANT shall respond describing its proposed work procedure, schedule and estimated fee to complete the described services. If this response is acceptable, the OWNER shall issue a written Task Order to the CONSULTANT containing the agreed upon description of the work and consulting services fee. Each Task Order shall be numbered consecutively, shall reference this AGREEMENT, and shall be deemed an authorization for the CONSULTANT to proceed with the work when signed by the OWNER, unless otherwise stated. The provisions of this AGREEMENT shall control with respect to each Task Order. Each Task Order, after execution by both parties to this AGREEMENT, shall be incorporated into and become a part to this AGREEMENT. See **Exhibit A** for the Task Order format.

2. Signature by the authorized representative of the OWNER on each Task Order shall constitute authorization to proceed by the CONSULTANT for services defined by that Task Order.

ITEM B – TERMS AND CONDITIONS OF AGREEMENT

The parties hereto do mutually agree as follows:

1. Governing Law. This AGREEMENT and the attachments hereto shall be governed by and construed in accordance with the laws of the State of Georgia, City of Covington, Newton County, in which the work is delivered. If dispute arises out of or relates to this Agreement, or the breach thereof, and the dispute is not resolved through mediation, the parties agree that venue for any litigation will be in the courts of Newton County, Georgia and the parties hereby waive any right to initiate any action in, or remove any action to, any other jurisdiction.
2. Engagement. The City hereby engages the CONSULTANT and the CONSULTANT hereby agrees to perform the professional services hereinafter set forth.
3. Services. The CONSULTANT shall perform, in a professional manner, all services described in the Scope of Services attached as Exhibit B, and incorporated by reference herein (collectively the "Scope of Services").

CONSULTANT'S AFFIDAVIT OF EMPLOYMENT ELIGIBILITY

STATE OF GEORGIA
NEWTON COUNTY

By executing this affidavit, the undersigned Contractor verifies its compliance with O.C.G.A. 13-10-91, stating affirmatively that the individual, firm, or corporation which is engaged in the physical performance of services on behalf of **City of Covington** has registered with, is authorized to use and uses the Federal work authorization program commonly known as E-Verify, or any subsequent replacement program, in accordance with the applicable provisions and deadlines established in O.C.G.A. §13-10-91. Furthermore, the undersigned Contractor will continue to use the Federal work authorization program throughout the contract period.

The undersigned further agrees that, should it employ or contract with any Subcontractor(s) in connection with the physical performance of services pursuant to this contract with the **City of Covington.** Contractor will secure from such Subcontractor(s) similar verification of compliance with O.C.G.A. 13-10-91. Contractor further agrees to maintain records of such compliance and provide a copy of each such verification to the **City of Covington** at the time the Subcontractor(s) is retained to perform such service. Contractor hereby attests that its Federal work authorization user identification number and date of authorization are as follows:

357515

E-Verify Company ID Number

9-14-2010

Date of Authorization

Sapp Engineering & Services, LLC

Name of Contractor

Annual Consulting Services for the City of Covington

Name of Project

I (We) hereby declare under penalty of perjury that the foregoing is true and correct.

Executed on the 30TH day of JULY, 2025, in EASTMAN, GEORGIA (City),

(State).

Give Form to the requester. Do not send to the IRS.

Print or type. See **Specific Instructions** on page 3.

1 Name (as shown on your income tax return). Name is required on this line; do not leave this line blank.
Jack Sapp

2 Business name/disregarded entity name, if different from above
Sapp Engineering & Services,

3 Check appropriate box for federal tax classification of the person whose name is entered on line 1. Check only **one** of the following seven boxes.

☐ Individual/sole proprietor or single-member LLC ☐ C Corporation ☐ S Corporation ☐ Partnership ☐ Trust/estate

☑ Limited liability company. Enter the tax classification (C=C corporation, S=S corporation, P=Partnership) ▶ S

Note: Check the appropriate box in the line above for the tax classification of the single-member owner. Do not check LLC if the LLC is classified as a single-member LLC that is disregarded from the owner unless the owner of the LLC is another LLC that is **not** disregarded from the owner for U.S. federal tax purposes. Otherwise, a single-member LLC that is disregarded from the owner should check the appropriate box for the tax classification of its owner.

☐ Other (see instructions) ▶

4 Exemptions (codes apply only to certain entities, not individuals; see instructions on page 3):

Exempt payee code (if any) _____

Exemption from FATCA reporting code (if any) _____

(Applies to accounts maintained outside the U.S.)

5 Address (number, street, and apt. or suite no.) See instructions.
200 Pete Sapp Road

6 City, state, and ZIP code
Eastman. GA 31023

Requester's name and address (optional)
City of Covington
2194 Emory Street

7 List account number(s) here (optional)

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on line 1 to avoid backup withholding. For individuals, this is generally your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the instructions for Part I, later. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN,* later.

Note: If the account is in more than one name, see the instructions for line 1. Also see *What Name and Number To Give the Requester* for guidelines on whose number to enter.

Social security number
			–		–				

or

Employer identification number
2	0	–	1	1	9	2	6	3	2

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me); and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding; and
3. I am a U.S. citizen or other U.S. person (defined below); and
4. The FATCA code(s) entered on this form (if any) indicating that I am exempt from FATCA reporting is correct.

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the certification, but you must provide your correct TIN. See the instructions for Part II, later.

General Instructions

Section references are to the Internal Revenue Code unless otherwise noted.

Future developments. For the latest information about developments related to Form W-9 and its instructions, such as legislation enacted after they were published, go to *www.irs.gov/FormW9.*

Purpose of Form

An individual or entity (Form W-9 requester) who is required to file an information return with the IRS must obtain your correct taxpayer identification number (TIN) which may be your social security number (SSN), individual taxpayer identification number (ITIN), adoption taxpayer identification number (ATIN), or employer identification number (EIN), to report on an information return the amount paid to you, or other amount reportable on an information return. Examples of information returns include, but are not limited to, the following.

- Form 1099-INT (interest earned or paid)
- Form 1099-DIV (dividends, including those from stocks or mutual funds)
- Form 1099-MISC (various types of income, prizes, awards, or gross proceeds)
- Form 1099-B (stock or mutual fund sales and certain other transactions by brokers)
- Form 1099-S (proceeds from real estate transactions)
- Form 1099-K (merchant card and third party network transactions)
- Form 1098 (home mortgage interest), 1098-E (student loan interest), 1098-T (tuition)
- Form 1099-C (canceled debt)
- Form 1099-A (acquisition or abandonment of secured property)

Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN.

If you do not return Form W-9 to the requester with a TIN, you might be subject to backup withholding. See What is backup withholding, *later.*

NATURAL GAS SALES AGREEMENT

This Natural Gas Sales Agreement (this "Agreement") is effective as of the date last signed below by and between SF ATL2, LLC dba SF ATL2 (DE), LLC, (hereinafter referred to as "CUSTOMER"), and the CITY OF COVINGTON, GEORGIA, a municipal corporation of the State of Georgia (hereinafter referred to as "SELLER"):

WITNESSETH:

WHEREAS, the SELLER owns and operates a natural gas distribution system for the purpose of providing firm and interruptible natural gas sales service to requesting customers; and

WHEREAS, the SELLER is a customer of the Williams Transco Natural Gas Company (hereinafter referred to as "Transco"), maintains firm capacity on the pipeline for natural gas system supply and has interruptible natural gas transportation agreements on TRANSCO's natural gas pipeline; and

WHEREAS, the CUSTOMER desires to purchase natural gas from the SELLER on a firm and interruptible basis to serve its facility located at 10835 Hazelbrand Rd, Covington, Georgia as provided for hereunder;

NOW, THEREFORE, in consideration of the premises and of the mutual covenants and agreements of the parties hereto hereinafter set forth, and other good and valuable consideration, it is agreed by and between the parties hereto as follows:

1. Nature of Service: CUSTOMER may purchase from SELLER firm and interruptible natural gas supplies in quantities up to the contract levels specified in Exhibit "A" of this Agreement. CUSTOMER shall purchase all natural gas requirements from SELLER, except that CUSTOMER may purchase natural gas from a third party if SELLER is not able to provide natural gas per the terms of this Agreement. SELLER provides the service from the TRANSCO delivery location 9002780 into SELLER's distribution system. No gas may be resold or transported to other facilities by CUSTOMER without SELLER'S written permission, which may be withheld in SELLER's sole discretion. A meter of suitable capacity and design to measure the natural gas for this service will be furnished and shall be maintained on CUSTOMER'S premises by SELLER at a suitable location agreed to by the parties, and shall be and remain the property of the SELLER. The CUSTOMER shall provide and maintain suitable spacing and fencing, as agreed by the parties, for the SELLER'S metering and regulating equipment.

2. Term: This Agreement shall commence on April 1, 2026 at 10:00 a.m. ET and shall continue in full force until June 30, 2028, at 9:59 a.m. ET, and shall continue with year to year evergreen term extensions thereafter consistent with the terms of SELLER'S Agreement with TRANSCO Natural Gas Company unless terminated by either party. As the SELLER holds firm contracts to serve CUSTOMER, this Agreement shall continue upon the same term the SELLER has with TRANSCO, unless and until terminated by either party in writing. A copy

of SELLER's agreement with TRANSCO is attached to this Agreement as Exhibit "E." SELLER will provide CUSTOMER with any amendments, updates, or renewals to the TRANSCO agreement, which will automatically form part of Exhibit "E" with no further action required by either party. SELLER may update SELLER will ensure that no terms in its agreement with TRANSCO conflict with the terms of this Agreement and in the event of a conflict, this Agreement will control. Any written non-renewal notice shall be delivered to the non-canceling party no later than 30 90 days preceding the end of the then-current term of this Agreement and shall be delivered by mail, certified mail or email to the non-canceling party. It is understood and agreed by the parties that the term of this agreement may be extended for more than one year by amendment. Such an amendment may be requested to maintain the same term as the Service Agreement with TRANSCO held by the SELLER.

3. Price: The price of natural gas for firm and interruptible service may vary monthly and shall be calculated according to Exhibit "A" to this Agreement.

4. Daily Volume of Firm Service: Except as set forth in Section 7 and as long as CUSTOMER is not in default hereunder and no event of force majeure has occurred and is continuing as described herein, SELLER shall make available to CUSTOMER daily volumes of firm gas up to the level of firm capacity acquired by SELLER in accordance with Exhibit "A" to this Agreement.

5. Notice of Curtailment: The interruptible natural gas service provided for herein (which does not include firm reservation of natural gas service provided in Exhibit "C") shall be subject to limitation by SELLER during periods of peak demand upon four (4) hours' telephone notice by SELLER to CUSTOMER. For the purpose of this Agreement, "peak demand" shall mean all periods in which SELLER reaches its maximum firm contract levels with TRANSCO. Upon the execution of this Agreement, CUSTOMER shall furnish SELLER with a written list containing the names and telephone numbers of persons to be contacted in the event of curtailment or interruption. Said contact list shall become part of this Agreement and shall be attached as Exhibit "B". Such curtailment or interruption may occur at any hour of day or night, and SELLER'S obligation to provide notice hereunder shall be met upon SELLER'S reasonable efforts to contact these named individuals at telephone numbers provided by CUSTOMER. CUSTOMER may revise the names and telephone numbers of persons to be contacted in the event of curtailment from time to time by notice in writing to SELLER.

6. Unauthorized Use of Gas: If, upon four (4) hours' notice of curtailment by SELLER as provided in Section 5 of this Agreement, CUSTOMER fails to comply with such curtailment or limitation in the manner specified by the telephone notice, and, by reason thereof, the SELLER incurs any TRANSCO penalties or higher gas costs, then CUSTOMER shall reimburse SELLER in the amount of such penalties and/or higher gas costs which are attributable to CUSTOMER'S failure to comply with SELLER'S telephone notice to CUSTOMER. CUSTOMER shall reimburse SELLER within fourteen (14) days of CUSTOMER'S receipt of SELLER'S written demand, which demand shall include adequate documentation to support its request for reimbursement of such penalties, for same. CUSTOMER'S reimbursement to SELLER as described herein shall not, under any circumstances, be construed or interpreted to authorize CUSTOMER to fail to comply with

SELLER'S then current or any future notice of curtailment or limitation.

7. Billing and Payment: SELLER shall read meter(s) measuring the quantity of gas delivered to CUSTOMER on or about the 1st day of each month and SELLER shall render an invoice for any gas delivered to CUSTOMER during the preceding month as soon as reasonably possible after such reading. Such invoice shall be due and payable not later than the 10th day following the date of SELLER'S invoice to CUSTOMER when sent, by mutually agreed upon means, to the address specified by CUSTOMER. In the event CUSTOMER fails to forward the entire invoice amount to SELLER when due and the invoice has been timely sent to the address specified by the CUSTOMER, a one-time late penalty of two percent (2%) of the unpaid amount of the invoice will be assessed. If CUSTOMER'S failure to comply with the terms of this Section 7 as herein provided continues for twenty (20) days following the date of SELLER'S written notice of non-compliance to CUSTOMER, SELLER shall have the right to terminate gas deliveries to CUSTOMER upon written notice to CUSTOMER by first class mail and/or certified mail of such termination forty-eight (48) hours prior to such termination. Upon termination of service pursuant to this paragraph, CUSTOMER shall pay SELLER outstanding charges. Termination of service pursuant to this paragraph shall also constitute termination of SELLER'S agreement to provide natural gas service under the terms of this Agreement but shall not relieve CUSTOMER of any obligation to pay or reimburse SELLER for any amounts due and owing under the terms of this Section 7, calculated as provided herein. In the event CUSTOMER disputes any amount invoiced, CUSTOMER shall provide SELLER with written notice detailing such exception and shall pay the undisputed portion of the invoice within ten (10) days and shall have the right to withhold payment on the disputed portion of such invoice until such exception is resolved in accordance with Sections 14 and 15 of this Agreement.

8. Financial Responsibility: The SELLER reserves the right to require that CUSTOMER provide an Adequate Assurance of Performance. "Adequate Assurance of Performance" means sufficient security in the form, amount, for a term, and from an issuer, all as reasonably acceptable to SELLER, including, a standby letter of credit in an amount set forth in Exhibit "D". Agreements of standby letters of credit will be made with an institution acceptable to the SELLER and will be renewed annually.

   If SELLER has reasonable grounds for insecurity regarding the performance of any obligation under this Contract (whether or not then due) by the CUSTOMEER (including, without limitation, the occurrence of a material change in the creditworthiness of CUSTOMER, if applicable, or the price of Gas or CUSTOMER volumes increase such that SELLER determines that the then current "Adequate Assurance of Performance" is or is expected to be insufficient), SELLER may demand additional Adequate Assurance of Performance. Should Seller require any additional Adequate Assurance of Performance, it will issue a written request to CUSTOMER and give CUSTOMER at least thirty (30) days to comply with the request. Provided, however, that to the extent that during such thirty (30) day period, SELLER reasonable expects any such insecurity regarding the performance of any obligation under this Contract (whether or not then due) by the CUSTOMER (including, without limitation, nonpayment risk exceeding the coverage afforded by the then current Adequate Assurance of

Performance), SELLER may curtail service hereunder sufficient to bring such nonpayment risk within such coverage.

9. Btu Adjustment: It is understood that the quantity of gas purchased by the SELLER is adjusted each month to reflect actual Btu content of such gas. All invoices to CUSTOMER for gas delivered shall be measured by meter(s) provided by SELLER. Gas shall be metered by SELLER to CUSTOMER'S facility located at 10835 Hazelbrand Rd, Covington, Georgia, at a base pressure of 14.73 pounds per square inch absolute, at a temperature base of 60 degrees Fahrenheit and shall be adjusted for actual Btu content. Any such adjustment for actual Btu content pursuant to this Section 8 shall be in the same proportion as the corresponding adjustment made by TRANSCO for such gas transported to SELLER, provided that CUSTOMER shall have the option (at its expense) to install a recording calorimeter and any observed differences in Btu content shall serve as the basis for a request by CUSTOMER for an adjustment to the billing quantity. CUSTOMER shall provide SELLER all reasonable documentation supporting any claimed difference in Btu content. In the event CUSTOMER'S pressure or location requirements change during the term of this Agreement or any extensions thereof, CUSTOMER shall be responsible for any and all reasonable, out-of-pocket costs and expenses, assessed without markup on an open-book basis, associated with adjustments in pressure, facility location, and/or relocation of existing facilities necessary to supply CUSTOMER'S modified requirements.

10. Gas Quality: All physical properties of the gas sold and delivered to CUSTOMER hereunder, including specific gravity, Btu content and physical impurities, shall be within the same limits prescribed by TRANSCO for such gas transported by TRANSCO to SELLER in accordance with TRANSCO's effective tariff.

11. Minimum Delivery Pressure: Delivery pressure into CUSTOMER'S fuel line shall not fall below fifteen (15) pounds per square inch (p.s.i.g.).

12. Force Majeure: Neither party shall be liable to the other for any failure to perform any provision or obligation of this Agreement (except CUSTOMER'S obligation to pay for natural gas dispatched and delivered plus any late charges for nonpayment calculated in accordance with Section 7 hereof) to the extent such failure is caused by or results directly or indirectly from any act of God; federal or state legislation or regulation; fires, floods, storms or other natural disasters; strikes, labor disputes or walk-outs; war, acts of terrorism; accidents; breakage or accident to machinery or lines of pipe, freezing or rupture of lines of pipe not due to the gross negligence of SELLER or any third party or to any failure to maintain, inspect, or timely repair such machinery or lines of pipe; the refusal or inability of any transporter to accept gas for delivery or failure of any transporter to deliver gas; (collectively "Force Majeure" events) or the loss or failure of SELLER'S gas supply due to any Force Majeure event. This provision only applies to the extent the Force Majeure event is or any similar cause or emergency beyond the control of the party failing to perform.

13. Responsibility and Liability: SELLER and CUSTOMER do respectively assume full responsibility and liability for the maintenance and operation of the facilities operated by each, and each shall indemnify to extent allowed by law and save harmless the other from all

liability and expense (including reasonable attorney's fees) on account of any and all damages arising from third-party claims or actions, including injury to and death of persons, arising directly or indirectly from any act or omission by the indemnifying party hereunder in connection with the installation, presence, maintenance and operation of facilities operated by the indemnifying party. It is agreed that neither party hereto shall be liable to the other for damage to the equipment, apparatus, appliances or property of any kind, caused by defects in or failure of the machinery, apparatus, or appliances. SELLER shall have no obligation for the distribution or control, or care, or protection, or proper utilization of the gas beyond the meter set which establishes the point of its delivery of gas to CUSTOMER. CUSTOMER shall have no obligation for the distribution or control, or care, or protection, or proper utilization of the gas prior to its delivery to the meter set which establishes the delivery point of gas to CUSTOMER. SELLER shall not be liable for damages or injuries to persons or property resulting in any manner directly or indirectly from the receiving, use or application by CUSTOMER of such natural gas unless such damages or injuries are caused solely out of the gross negligence or willful misconduct of the SELLER or SELLER'S agents, employees, or contractors. CUSTOMER shall not be liable for damages or injuries to persons or property resulting in any manner directly or indirectly from the receiving, provision, use or application by SELLER of such natural gas unless such damages or injuries are caused solely out of the gross negligence or willful misconduct of the CUSTOMER or CUSTOMER'S agents, employees, or contractors. Notwithstanding any other provisions of this Agreement, SELLER and CUSTOMER each releases the other and, on behalf of its insurers, waives its entire right to recovery against the other for loss or damage to the waiving party and its property to the extent that the loss or damage is covered by insurance or would have been covered by insurance proceeds payable under any policy maintained by CUSTOMER or SELLER. CUSTOMER and SELLER each agrees to furnish to each insurance company which has or will issue such policies notice of the mutual waivers contained herein and to have the insurance policies properly endorsed, if necessary, to prevent the invalidation of said coverage by said waivers.

14. Negotiation of Disputes: The parties shall attempt in good faith to resolve all claims, disputes and controversies of any nature, arising out of or relating to this Agreement or the relationship of the parties (collectively "Dispute") promptly by negotiation between executives with authority to settle the Dispute. Either party may give the other party written notice ("Initial Notice") of any Dispute not resolved in the normal course of business for resolution under this paragraph. The Initial Notice shall include a statement of that party's position and the names and titles of the executive and any other people who will represent that party's position. Within fifteen (15) days of the delivery date of the Initial Notice, the receiving party will respond with its own position statement and the names and titles of the executive and any other people who will represent that party's position. Within twenty-five (25) days of the delivery date of the Initial Notice, the parties will meet at a mutually acceptable time and place, and thereafter as often as reasonably deemed necessary to resolve the Dispute. Each party will honor the other party's reasonable requests for information during such negotiations.

15. Mediation of Disputes: If a Dispute has not been resolved by negotiation as described above

within 45 (forty-five) days of the delivery date of the Initial Notice, or if the parties' executives failed to meet within 25 (twenty-five) days of such delivery date, the parties agree that prior to attempting to resolve the Dispute by arbitration or litigation, they shall attempt to settle the Dispute by mediation in Augusta, Georgia under the then current Center for Public Resource's ("CPR") Model Mediation Procedures for Business Disputes. Within ten (10) days of a party's written notice of its desire to mediate to the other party, the parties will appoint a mutually acceptable mediator from the CPR Panels of Distinguished Neutrals. All applicable statutes of limitation and defenses based upon the passage of time will be tolled for the duration of any Dispute resolution under this Section. All negotiations and mediations shall be considered confidential and shall be treated as compromise and settlement negotiations for purposes of applicable rules of evidence. The parties shall continue to perform under this Agreement pending the final resolution of any Dispute, except as set forth in Section 7.

16. Governing of Law: This Agreement shall be governed by and interpreted in accordance with the domestic laws of the State of Georgia without giving effect to any choice or conflict of law provision or rule (whether of the State of Georgia or any other jurisdiction) that would cause the application of the laws of any jurisdiction other than the State of Georgia.

17. Amendments and Waivers: No amendment of any provision of this Agreement shall be valid unless the same shall be in writing and signed by SELLER and CUSTOMER. No waiver by any Party of any default, misrepresentation, or breach of covenant hereunder, whether intentional or not, shall be deemed to extend to any prior or subsequent default, misrepresentation, or breach of covenant hereunder or affect in any way any rights arising by virtue of any prior or subsequent such occurrence.

18. Notices: Any notice or communication required or permitted to be given pursuant to this Agreement shall be confirmed in writing (with exception of a curtailment notice pursuant to Section 5 of this Agreement) and shall be deemed properly given when emailed, hand delivered, sent by overnight mail service, or mailed from within the United States by certified mail, return receipt requested, postage paid to the following addresses:

19. Severability: Any term or provision of this Agreement that is invalid or unenforceable in any situation in any jurisdiction shall not affect the validity or enforceability of the remaining terms and provisions hereof or the validity or enforceability of the offending term or provision in any other situation or in any other jurisdiction. The parties will negotiate in good faith to replace the invalid or unenforceable provision with a new provision that most closely reflects the parties' original intent with respect to the invalid or unenforceable provision.

20. Time of Essence: Without expanding either party's termination rights under this Agreement, each party agrees that time is of the essence with respect to its obligations under this Agreement and each and all of its provisions.

21. Entire Agreement: This Agreement (including attached Exhibit "A") constitutes the entire agreement between the parties and supersedes and cancels any prior negotiations, arrangements, offers, agreements or understandings, written or oral, to the extent they relate in any way to the subject matter hereof.

22. Prior Contracts and Claims: This Agreement cancels and supersedes all prior contracts and claims between SELLER and CUSTOMER, except for volumes delivered but not yet billed under any previous agreement.

23. Binding Effect: This Agreement shall be binding upon the parties hereto and their successors and assigns.

24. Incorporation of Exhibits: Each Exhibit attached hereto constitute part of this Agreement.

25. Counterparts: This Agreement may be executed in one or more counterparts, each of which shall be deemed an original but all of which together will constitute one and the same instrument.

26. Construction: The introduction and recitals are a material part of this Agreement.

27. Anticipated Load Projections: SELLER requests that CUSTOMER provide a Month-Ahead load forecast by day for both firm and interruptible load at least six (6) business days prior to the start of each calendar month (Timely Month-Ahead Load Forecast). In addition, CUSTOMER will provide notice not later than 8:00 a.m. ET day ahead of any significant variations from the Timely Month-Ahead Load Forecast. If load changes occur after the Timely Day-Ahead Load Forecast CUSTOMER is requested to notify SELLER as soon as practical. Failure to provide SELLER with Timely Day-Ahead Forecasts with load variations

could result in pipeline imbalance penalties that are subject to being passed through the Customer.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be signed in their respective names and on their behalves by their proper officers or officials thereunto duly authorized as of the day and year written below.

EXHIBIT "A"

I. **Firm Contract Quantity:** Firm Base Load quantities of gas will be delivered based on the Customer's average daily quantities as requested by Customer. SELLER will make commercially reasonable efforts to supply such requested Firm Base Load quantities, including entering into firm wholesale contract obligations necessary to supply such requested Firm Base Load quantities ("Contract Obligations"). **Customer will have a right to review the Contract Obligations before entered into by SELLER.** Daily quantities of Firm Base Load quantities will be deemed as first gas through the meter and will be scheduled based on Exhibit "C". Volumes above the Firm Base Load quantities per day will be considered interruptible volumes and are subject to curtailment.

Special Provision: During peak, operational flow order days, CUSTOMER will limit its daily gas takes from the SELLER to those hourly volumes as shown in Exhibit "C". Any volumes requested above those volumes shown in Exhibit "C" will be considered interruptible volumes and subject to availability.

II. **Interruptible Contract Quantity:** The SELLER will provide Interruptible Natural gas Service for all timely nominated and confirmed quantities of up to 9,600 MMBtu per day in excess of the Firm Base Load Quantity stated in section I, subject to confirmation on the availability and the curtailment provisions contracted in the Natural Gas Sales Agreement.

III. **Monthly Charges for Firm Contract Quantity:** The sales price of gas shall be comprised of the following components for all firm and interruptible gas and Exhibit "B" shows the sample rate:

A. **Firm Contract Quantity Commodity Price:** For firm base load quantities, the rate is defined as NYMEX LD delivered to the City Gate of SELLER, plus any Contract Obligations entered into on behalf of CUSTOMER and not covered by such rate.

B. **Interruptible Commodity Price:** For interruptible quantities, the rate is defined as the daily market price of natural gas based on timely notices. Customer may request to purchase Interruptible Quantities in advance of the month, daily with timely notice, and daily without timely notice. Timely notice is 8:00 a.m. ET five business days prior to the start of the month, 8:00 ET on business day ahead of gas flow and ratable volumes over weekend/holidays, or not less than two hours prior to ID2 pipeline nomination deadline.

C. **Pipeline Fuel Cost:** The rate for fuel retention shall reflect the effective cost of TRANSCO's percentage of fuel retained as allowed for in their tariff.

D. **Pipeline Transportation Charge:** The rate of TRANSCO's firm transportation reservation fee applicable to the firm quantities per day, and the applicable commodity transportation charges, plus all applicable surcharges on the actual volumes delivered, as identified in TRANSCO's tariff. Total firm monthly volumes shall be determined as those firm contract quantities times the number of days in the month; the balance of usage shall be considered "interruptible" volumes. For all "interruptible" volumes purchased by the CUSTOMER from the SELLER, a transportation rate equal to TRANSCO's FERC approved interruptible transportation rate per MMBtu will apply to quantities.

Special Provision: In the event TRANSCO substantially changes its tariff, SELLER

reserves the right to alter the pricing structure contained herein; it is the SELLER'S intent to flow through charges as incurred, and the CUSTOMER'S intent to pay such charges.

E. **Agent and Supplier Fee:** Fees include those charges associated with the delivery of natural gas supplies to the SELLER charged by its supply agent or other suppliers outside of the Delivered Supply Contract Commodity Price adder.

F. **Distribution Fee:** The distribution fee shall be calculated monthly on the load of the CUSTOMER'S facilities located on SELLER'S natural gas system, and shall be:

For all volumes @ $0.20/MMBtu

G. **Taxes:** All applicable taxes shall be added as a separate line item(s) on all invoices to customer.

SGC Engineering, LLC
a Lloyd's Register Company

LETTER OF INTEREST

Mike Jewell, Gas Director
City of Covington
2194 Emory Street
Covington, GA 30014

Mr. Jewell,

SGC Engineering, LLC (SGC) and a subsidiary of Magnolia River International, Inc. (MRI), is pleased to submit our proposal to the City of Covington (the City) for the Category B – On-Call Consulting Services portion of the Annual Consulting Services project.

SGC is a multidisciplinary engineering firm serving clients in the northeastern region of the United States. SGC operates with focus on the delivery of world class consulting and advisory services to clients in renewable, utility, commercial and industrial markets. Our approach is to use the best available technical and scientific know-how to meet the needs of our clients while maintaining the highest level of quality.

SGC is a highly responsive, solution-oriented surveying firm serving clients throughout North America. Since our inception in 1999, our experienced professionals have delivered attentive service by using advanced technology to provide cost-effective land surveying solutions for energy and power transmission and distribution facilities, commercial and residential real estate developments, water and wastewater treatment, and stormwater management.

We appreciate the opportunity to support the City and value the chance to build on our professional relationship. If you have any questions, please contact Ray Lewis, Project Manager, at (704) 290-7458 or ray.lewis@sgcsurvey.com.

SGC acknowledges receipt of the Addenda.

Ray Lewis
Project Manager

TEAM AND QUALIFCATIONS

Firm Background

Headquartered in Mooresville, NC, we have a team of more than 230 employees operating from professional and field offices across the eastern US. These resources – combined with our experience, judgment, and responsiveness – make SGC one of the most sought-after and trusted surveying teams in the industry.

SGC Survey delivers responsive, accurate and cost-effective survey solutions in support of your development plans from inception to execution. Our survey solutions include:

- Property boundary, easement, and corridor surveys
- Preliminary route surveys, route selection, and constructability analysis
- Procurement and management of LiDAR and photogrammetric mapping
- Preliminary route surveys

Existing conditions surveys of facilities

- Construction staking and as-built surveys including as- built
- Inland and near shore hydrographic surveys
- GPS surveys for geodetic control networks and photo control
- ALTA/ACSM land title surveys
- HDS terrestrial laser scanning and 3-D modeling
- Electric transmission line conductor span surveys

Scope of Work

Review of Construction Plan Submittals and Review of Preliminary and Final Plat Submission

SGC prides itself on working with its clients to manage project costs at every step of a project's life cycle. Utilizing technological innovation and solutions, SGC will develop a cost-saving plan for each opportunity it receives. SGC utilizes multiple software platforms to make this happen, including ESRI GIS Software, Data Halo and a full host of Drafting software.

All survey data is subject to an independent peer review at every stage from when it is submitted by field crews to when it is provided to the Client. SGC has developed proprietary tools utilizing Esri's ArcGIS platform and Data Halo, that is an integral part of SGC's survey data QA/QC process. Each one of these tools are focused on two primary goals: (1) Is the data correct? and (2) Is the data complete?

SGC uses our internal Material Asset Tracking System (MATS) to assist our clients in ensuring that all pipeline components meet 49 CRF 192 regulatory specification. Our MATS program uses proprietary ERSI tools to review material and confirm that all proper documentation has been collected and is correct. Though we do not design or implement pipeline projects, our services are integral to completing said projects in line with federal standards.

SGC does not require access to Covington, GA office sites unless meetings are held that we need to attend. As long as any necessary data can be sent to us, we do not require any network access either. SGC will provide all equipment, both hardware and software needed to complete this project.

SGC has worked in the energy sector for 25 years. In that time SGC has successfully completed hundreds of energy projects from distribution to transmission. As a survey company, SGC has one of the largest working operational footprints in the country. We have the resources and the expertise to accomplish any project awarded

EXPERIENCE

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Cumming Lateral Pipeline, Forsyth County, GA
Project Description:	SGC pre-lim survey and plats
Scope Responsibility:	Survey CAD Technician. Responsible for CAD and easement plat drafting for the survey of a 16-inch diameter, high-pressure transmission line that runs for approximately 11 miles in central Forsyth County.
Contract Value:	$500,000

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Newnan Bypass Pipeline, Coweta County, GA
Project Description:	SGC pre-lim survey and plats
Scope Responsibility:	Survey CAD Technician. Responsible for CAD and easement plat drafting for the Newnan Bypass pipeline, a 17-mile pipeline in Coweta County, from Lunsford Road to Highway 54, just south of Ragsdale Road.
Contract Value:	$700,000

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Black Hills Pipeline, Arkansas
Project Description:	Boundary and topographic surveys in various locations for new pipeline installation
Scope Responsibility:	Survey field work, office work, deliverable preparation, client communication, project accounting tasks, creating field and office schedules, and managing direct report employees. Worked with office technicians to finalize boundary lines and generate exhibits for the installation of new gas lines. Project management duties included client communications, work coordination, budget preparation, and accounting duties. Various locations throughout Arkansas. The projects consisted of boundary resolution including parcels and road right of ways and topographic surveys to acquire new easements for the installation of new natural gas main pipelines.
Contract Value:	$300,000

Project Owner:	SGC Surveying
Clients:	Confidential
Project Name:	Bellevue Pipeline, TN
Project Description:	Boundary and Topographic surveys in Bellevue, TN for new pipeline installation.
Scope Responsibility:	Coordinating survey field work, office work, deliverable preparation, client communication, project accounting tasks, creating field and office schedules, and managing direct report employees. Worked with office technicians to finalize boundary lines and generate exhibits for the installation of new gas lines. Project management duties included client communications, work coordination, budget preparation, and accounting duties. The site was in Bellevue, Tennessee and was for installation of a new natural gas main pipeline. The projects consisted of boundary resolution including parcels and road right of ways and topographic surveys to acquire new easements for the installation of a new natural gas main pipeline.
Contract Value:	$80,000

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Polk County, FLA Reclaimed Natural Gas Pipeline
Scope Responsibility:	Preliminary work and staking for a 6 mile Reclaimed Natural Gas Pipeline
Contract value:	$78,900

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Sabal Trail Pipeline: Part of the 517-mile Sable Trail Pipeline
Scope Responsibility:	Perform preliminary work, topographic survey, easement mapping, as-built services and still provide limited staking support for ROW encroachments.
Contract Value:	$91,545

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Shands Bridge
Scope Responsibility:	SUE A & B. Preliminary survey
Contract Value:	$58,000

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Opa-Locka Gas Main Relocation
Scope Responsibility:	Route Survey
Contract Value:	$10,600

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Orlando South Station Rebuild
Scope Responsibility:	Preliminary survey at regulator station
Contract Value:	$19,600

Project Owner:	SGC Surveying
Client:	Confidential
Project Name:	Shands Bridge
Scope Responsibility:	SUE A & B. Preliminary survey
Contract Value	$58,000

Project Owner:	SGC Surveying
Clients:	Confidential
Project Name:	M-071 Concord/Kannapolis Pipeline, NC
Project Description:	Preliminary survey, easement plats, construction staking, as-built services, asbuilt deliverable for new 26-mile pipeline installation.
Scope Responsibility:	Coordinating survey field work, office work, deliverable preparation, client communication, project accounting tasks, creating field and office schedules, and managing direct report employees. Worked with office technicians to finalize boundary lines and generate exhibits for the installation of new gas lines. Project management duties included client communications, work coordination, budget preparation, and accounting duties. The site was in Concord, Kannapolis, Landis NC and was for installation of a new natural gas main pipeline. The projects consisted of boundary resolution including parcels and road right of ways and topographic surveys to acquire new easements for the installation of a new natural gas main pipeline.
Contract Value:	$3,000,000

Due to the confidentiality agreements we uphold and our commitment to client privacy, we do not disclose client names or contact information at this stage. Full reference details can be provided upon award or under a mutually executed non-disclosure agreement.

RESUMES

Please find resumes for the selected team members in Appendix A – Resumes.

PROJECT MANAGEMENT APPROACH

Project Management Strategy

SGC Surveying is a highly-responsive, solution-oriented surveying firm serving clients large and small throughout North America for 25 years. Since our inception in 1999, our experienced professionals have delivered attentive service by using advanced technology to provide cost-effective land surveying solutions for energy and power transmission and distribution

facilities, commercial and residential real estate developments, water and wastewater treatment, and stormwater management. SGC will work with Covington, GA to align all Survey Operations and deliverables. We will build a workflow and process that meets Covington, GA standards of practice and quality assurance.

Real-Life Example

This project management approach was successfully applied on a recent 26-mile transmission pipeline project that consisted of both 8IN and 12IN steel. This project also included preliminary survey work that included working with over 400 plats and property owners to assist in obtaining temporary working space and permanent easements as well and one railroad bore. This project began in July 2024 and was gassed up July 2025. This project also included several weeks of night work required by the NCDOT due to heavy daytime traffic. We are currently working on the as-built deliverables and expect that to be completed ahead of schedule.

BILLING RATES

Our approach to pricing is informed by past performance, historical cost data, internal production metrics, and clearly defined scopes of work. This allows us to provide fair, transparent, and accurate estimates that align with project expectations and client preferences.

Please find a copy of our rate sheet in Appendix B – Billing Rates

OPEN RECORDS

SGC acknowledges that all materials submitted in response to this RFQ are subject to the Georgia Open Records Act and the City of Covington's policies. Our submittal does not contain trade secrets, proprietary commercial data, or confidential financial information.

APPENDIX A – RESUMES

(800) 581-4031 www.sgcsurvey.com

Christopher Michaud, PLS

Director, Innovation and Technology

As a Director of Innovation and Technology for SGC Engineering, LLC, Mr. Michaud has over twenty-three years of surveying experience. Survey projects include working on: Unmanned Aerial Vehicles, UAV Inspection Surveys, Terrestrial and Aerial Lidar Surveys, Global Positioning Systems (GPS), Real-Time Kinematic and Static Surveys, Boundary Surveys, Topographic Surveys, Hydrographic Surveys, Subsurface Investigation Surveys, Corridor/Route Surveys and Construction Surveys. As the Director of Survey, Mr. Michaud plays an integral role in all aspects of surveys from directing and overseeing projects through to the production of the final product. His skills include the use of specialized equipment and various technologies, including experience operating a host of specialized software applications. Responsibilities include providing leadership, prototyping, and implementation of new technologies, processes, and procedures across the operating footprint of SGC.

RELATED PROJECT EXPERIENCE SAMPLING

Enbridge – Access Northeast Project (Project Manager)

Project Manager of Terrestrial Lidar facility surveys and Subsurface Utility Engineering (SUE) along the proposed project corridor. Responsible for the overall project management, quality control, and management of attribute rich spatial data collected along the 125-mile natural gas corridor from New Jersey though Massachusetts.

Atlanta Light and Gas (Senior Project Manager)

Responsible for working with multiple project managers and teams to support preliminary and as-built surveys on over twenty miles of local distribution lines located through-out the greater Atlanta area. In addition to survey support on projects, responsibility included the implementation of 3D Ground Penetrating Radar system to supplement Subsurface Utility Engineering (SUE) efforts on multiple projects.

Tennessee Gas Pipeline Northeast Upgrade Project (Project Manager and Supervising Professional Land Surveyor)

The 40-mile natural gas pipeline looping project in Pennsylvania and New Jersey. Project responsibilities include for Registry Research, Preliminary Survey, Boundary Determination and compilation of a 400+ property parcel mosaic, Land Plats, Condemnation Plats, Legal Descriptions, Construction Stakeout, Construction As-Built and Construction Support.

Maritimes and Northeast Phase III AC Mitigation (Project Manager)

The project involved six miles of new mitigation along the existing 23 mile pipeline running through Northern Massachusetts. Project responsibilities included the generation of alignment sheets, location of wetland delineation, and the layout of the proposed upgrades. Alignment sheet generation was performed in the AutoCAD drafting environment using in-house data from previous projects as well as the integration of data from other outside services.

Maritimes and Northeast Phase IV Expansion – Preliminary Survey (Project Manager)

Responsible for multiple crews conducting preliminary survey for a proposed pipeline looping project running 120 miles through Maine. While performing the route survey, special field procedures were implemented to correctly measure wire height and span sags. This information was collected in great detail to assist the future construction of the pipeline.

Maine Department of Transportation (MDOT) (Application Developer)

Implemented a revolutionary conversion tool that allows SGC the ability to transform standard data files into MDOT specific files. During the conversion process, a multitude of functions run allowing excellent quality control / quality assurance checks on data before it is passed onto the client.

Jason Tommell

Director, Operational Excellence

Jason is a Professional Surveyor with extensive experience in providing land surveying, land planning, and floodplain management across diverse project domains. He has successfully led teams on residential, commercial, industrial, and energy projects, including boundary surveys, construction layouts, linear route planning, ALTA/NSPS Land Title surveys, deformation monitoring, and GPS/GNSS services. Committed to ensuring overall customer satisfaction through a balanced approach to problem-solving, Jason integrates qualitative and quantitative methodologies to optimize operational processes. Jason is a results-oriented professional dedicated to excellence in many aspects of surveying and project management.

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

National Grid, Bensonhurst Mini-Gate, Brooklyn, New York, (Project Land Surveyor)
Provided oversight and final review of final phases of gas pipeline as-built of gas main, features, fittings and all visible utilities.

National Grid, Northwest Nassau Phase 3, Suffolk County, New York, (Project Land Surveyor)
Reviewed and provided oversight of established right-of-way and boundary computations and mapping that supported the design of an approximately 5-mile long transmission gas main.

SGC Engineering LLC, Westbrook, Maine
(Regional Survey Operations Manager—Northeast)
Responsible for land surveying operations for projects throughout the Northeast Region (ME, MA, RI, CT, NY, NJ, PA, VT, NH) and for maintaining enduring relationships with clients, contractors, and other stakeholders. Collaborate as a member of the Senior Leadership Team to strategically develop and advance overall business operations and culture.

MJ Engineering and Land Surveying, PC, Clifton Park, NY
(Survey Director/Survey Manager)
Responsible for survey project and client management, development, and monitoring of quality assurance measures. Evaluate, diagnose, and develop solutions to optimize the efficiency of the overall survey process. Program management, project management, and quality control for the construction surveying program.

TCE, Williston, Vermont (Director of Field Services)
Oversaw operations of Subsurface Utility Engineering services for VT Underground Locators (subsidiary) and land surveying operations for TCE.

Jason Tommell Land Surveying, Saratoga Springs, NY
(Sole Proprietor)
Owner/operator of a professional services business offering professional land surveying, land planning, and certified floodplain management services in New York and Vermont.

The Chazen Companies, Poughkeepsie, NY
(Director, Land Surveying)
Responsible for land surveying. Provided leadership and oversight for proposal development, client and project management, the development of standards, and overall quality assurance and control of survey products multiple offices. Provided leadership for land surveyors, SUE technicians, and GIS direct reports.

Cody Hodges

Director of Market Development

Results-driven energy and land professional with 10+ years of progressive experience in right-of-way acquisition, land negotiations, market development, and client relationship management across the utility, midstream, upstream, and renewable sectors. Proven leader in building business development infrastructure and delivering consistent, measurable growth. Trusted by top oil and gas and utility industry leaders for strategic expansion efforts. Active member in key industry organizations throughout Texas and the U.S.

EDUCATION

Tarleton State University, Stephenville, Texas
Bachelor of Business Administration, 2010

RELATED PROJECT EXPERIENCE

SGC Engineering LLC

(Director of Market Development)
Lead market development strategies across utility, midstream, and renewable sectors. Drive multi-market project growth through strategic planning, client alignment, and service expansion. Collaborate with executive leadership to identify emerging opportunities and enter new geographic markets. Develop go-to-market strategies to position SGC as a leading service provider across disciplines.

(Director of Key Accounts)
Focused on expanding business units in midstream, upstream, distribution and transmission for strategic utility clients. Managed long-term client partnerships and ensured successful delivery of high-volume infrastructure projects. Led coordination of internal teams to ensure consistency in quality, compliance, and client expectations.

(Business Development Manager)
Built, structured, and led a business development department across utility, midstream, upstream, and renewable markets. Delivered over 40% annual market growth while managing over 1,000 distribution projects. Secured major contracts by establishing strong relationships with key decision-makers across industries.

.

Transglobal Services
(Staff Landman)
Acquired ROW, easements, temporary workspace, and encroachment agreements for large-scale midstream and utility relocation projects. Negotiated landowner agreements and coordinated due diligence efforts across multiple regions. Supported midstream pipeline and upstream well pad developments through permitting and compliance efforts.

Permian Basin
(Independent Contractor)
Conducted ROW lease negotiations, land acquisition, land administration, and due diligence services for upstream and midstream operators. Delivered comprehensive title and permitting support across high-volume development areas. Worked closely with legal teams to support clean title and regulatory compliance.

PROFESSIONAL AFFILIATIONS

Fort Worth Association of Professional Landmen
Permian Basin Land Association
Houston Association of Professional Landmen
International Right of Way Association (IRWA)
Fort Worth Wildcatters

Joshua Ryan Holben

Director of Survey Operations

Josh is a highly experienced Regional Survey Operations Manager with over 18 years in the field, specializing in leading land survey operations for large-scale natural gas pipelines, distribution, and transmission projects. Expert in Boundary Surveys, Topographic Surveys, ALTA/NPS Surveys, As-Built Surveys, GPS Surveys, GIS Surveys, and Hydrologic Surveys. Additionally proficient in managing surveys implementing advanced technologies such as terrestrial scanning, static scanning, and UAV LiDAR scanning. Proven track record in managing profit and loss (P&L), leading high-performing teams, and driving operational excellence. Successfully collaborated with clients including Duke Energy, Centurion Pipeline L.P., Piedmont Gas, Columbia Gas, NiSource, and Dominion Energy, consistently contributing to the growth and success of dynamic organizations.

EDUCATION

University of North Dakota, Grand Forks, ND
BS, Engineering Studies, Spring 2024

Community College of the Air Force,
Montgomery, AL
Construction Technology, 2019

CERTIFICATIONS

Active security clearance – Secret Clearance
Expires 06/2025

Contracting Officer Representative – Defense Acquisition University, Certification 2020

United States Air Force Civil Engineering Management Craftsman Course, Certification 2019

United States Air Force Engineering Journeyman Course, Certification: 2017

United States Air Force Engineering Apprentice Course, Certification: 2016.

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

SGC Surveying, Cincinnati, OH (Regional Survey Operational Manager)
Led and managed land survey operations for infrastructure projects across the region, ensuring adherence to regulatory requirements and client satisfaction. Successfully managed the profit and loss (P&L) for the region, implementing strategic initiatives to optimize financial performance and achieve business objectives. Established and maintained strong relationships with clients, contractors, and stakeholders, driving business growth and customer retention.

Akkodis, Remote (Technical Project Manager)
Stood up an aerospace office and team of 28 aerospace engineers to support a VIP client in Irving, Texas to support a multi-million-dollar project. Oversaw the selection of team members, developing the work breakdown structure per discipline, and coordinated with global partners. Took a troubled program to a productive and efficient program.

SGC Surveying, Cincinnati, OH
(Sr Survey Project Manager & Office Manager)
Lead Program Manager of fifty-three complex gas infrastructure projects. Facilitated control network establishment and maintained strong client relations throughout the project lifecycle. Effectively managed survey crews, overseeing their performance and coordination to meet project milestones. Spearheaded data preparation and processing activities, implementing rigorous quality control and verification protocols. Provided oversight on construction layout and drafting processes to ensure accuracy and compliance with project specifications.

Boyle Associates, Portland, ME,
(Team Lead/Program Manager)
Technical program management for the development and execution of field data collection, data controls and decreased data inaccuracies. Fabricate, maintain, and administer task automation workflows for GIS analysis, production, and data management for Solar Installation throughout the New England area.

United States Air Force, Chicopee, MA
(Technical Sergeant)
Team Program Manager of military personnel and outsourcing contractors to construct, maintain, and repair base utilities, buildings, and equipment. Design, manage, and constructed an innovative flood mitigation system for a 21-million-dollar facility applying engineering principles and theories to solve an array of engineering challenges while deployed in the Middle East.

Cornerstone Energy Services, S. Portland, ME
(Senior GIS Analyst & FAA 1-8 UAS Pilot)
Proficiently managed the survey and base mapping of a 20" steel pipeline replacement project in Midland TX for Centurion Pipeline L.P. Oversaw control network establishment, fostering strong client relations throughout the project lifecycle. Effectively managed survey crews, ensuring optimal performance and adherence to project timelines. Led data preparation and processing efforts, including rigorous quality control and verification procedures. Conducted boundary calculations and provided drafting oversight on TCE and PE Plats to ensure accuracy and compliance with regulatory requirements integrating ArcMap and AutoCAD.

PROFESSIONAL EXPERIENCE

Over 23 years of experience as a surveyor, crew leader, technician, project manager, survey section/phase manager, and survey coordinator. Served as an instrument operator and crew leader on topographic and cross section surveys for FEMA and DOTs, RTK GPS surveys, GDOT surveys, right-of-way and construction staking projects, ALTA surveys, and boundary surveys. Equipment knowledge spans from Nikon and Sokkia conventional total stations, Leica and Trimble Robotic total stations, Leica and Trimble GPS, and Seafloor sonar, to RIEGL and Trimble laser scanners. Also, over 9 years of office experience as a CAD drafter, project surveyor, project manager, section/phase manager, and survey coordinator. Worked on drafting survey databases, compiling GDOT deliverables, point cloud extractions, property boundary resolution, plat drafting, project management, and people management. Software knowledge includes AutoCAD, Carlson, Trimble Business Center, InRoads, MicroStation, OpenRoads, and TopoDOT.

ATLANTA GAS LIGHT STRIDE II PROJECTS

- **CUMMING LATERAL PIPELINE, FORSYTH COUNTY, GA**

  Survey CAD Technician. Responsible for CAD and easement plat drafting for the survey of a 16-inch diameter, high-pressure transmission line that runs for approximately 11 miles in central Forsyth County.

- **NEWNAN BYPASS PIPELINE, COWETA COUNTY, GA**

  Survey CAD Technician. Responsible for CAD and easement plat drafting for the Newnan Bypass pipeline, a 17-mile pipeline in Coweta County, from Lunsford Road to Highway 54, just south of Ragsdale Road.

SR 307 AT I-16 INTERCHANGE, CHATHAM COUNTY, GA (GDOT)

Survey CAD Technician. Responsible for drafting of database survey for a reconstruction project for widening and improving SR 307, including the bridge crossing I-16. Project included coordination of aerial mapping and the associated photo control point establishment. The project also consisted of completing the main line and secondary control point establishment, following the guidelines within the GDOT Automated Survey Manual, which included a multi-point Static GPS/GNSS/OPUS network and traversing the entire perimeter of the project. The database survey included topographical features, property and right-of-way data as well as wetland locations. All data was delivered following the GDOT Electronic Data Guidelines.

Phillip Shaw

Senior Project Manager

Experienced management professional with over 10 years of leadership and 8 years of collaborative work with civil and routing engineers, as well as state officials. Served as Civil/Boundary Party Chief for 3.5 years and Pipeline Party Chief for 7 years, working with industry leaders such as Sunoco, Kinder Morgan, Piedmont Natural Gas, Duke Energy, and more. Proficient in Trimble Business Center, AutoCAD, and familiar with Carlson software. Strong knowledge of Microsoft Excel, Word, and PowerPoint, with a deep understanding of civil and pipeline project plans, phases, and processes. Expertise in Material Documentation, MAOP processes, and X-ray film handling. Successfully trained and mentored teams in surveying, MAOP processes, and field operations. Skilled in streamlining processes for efficiency and project success.

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

Duke Chesnee Regulator Station – Duke and WK Dickson, Chesnee, South Carolina
(Project Manager, MAOP Tech/Tech Support)
Took over for As-built Phase, Build Gate Completion, Stakeout Package Creation, Tally, Material List Creation, Crew Management, Data Processing, QA/QC processes through Asbuilts, As-built BOM creation for the 2 Major Project Numbers and Distribution portion of the Regulator Station. Submittal to Duke's Sharepoint, MAOP before in-service, Final as-builts with GIS deliverable prior to 30 days after. GIS Schema Creation for GIS department.

Duke Line 11 Duke and WK Dickson –
3 miles and 1 station
(Project Manager, MAOP Tech)
Took over for As-built Phase. Build Gate Completion, Stakeout Package Creation, Tally, Material List Creation, Crew Management, Data Processing, QA/QC processes through Asbuilts, As-built BOM creation for the 2 Major Project Numbers and Distribution portion of the Regulator Station. Submittal to Duke's Sharepoint, MAOP before in-service, Final as-builts with GIS deliverable prior to 30 days after. GIS Schema Creation for GIS department.

Duke Line 434 – AECOM – 20 miles
Hamlet to Pembrook, North Carolina
(MAOP and Data Tech)
Data Halo. Multiple Stations, MLVs, HDDs. Onsite MAOP and Data Tech – Updating Tally, Material List Updating, Crew Management, Data Processing, QA/QC processes, MAOP before in-service, Final as-builts with GIS deliverable prior to 30 days after.

Duke Line 451 – POND – 18 miles
Dallas to Mooresville, North Carolina
(MAOP and Data Tech)
Multiple Stations, MLVs, HDDs. Onsite – Took over for As-built Phase. Build Gate Completion, Stakeout Package Creation, Tally, Material List Creation, Crew Management, Data Processing, MAOP before in-service, Final as-builts with GIS deliverable prior to 30 days after. Supplied Natural Gas to convert Marshall Stream Plant from Coal to Natural Gas.

Duke Line 467 – WoodGroup – 15 miles
Monroe to Locus, North Carolina
(Project Manager and MAOP Support)
GIS Deliverable tech, 7 Stations, MLVs, 2 HDDs. For As-built Phase. Build Gate Completion. Stakeout Package Creation, Support for Tally Verification, Material List Creation, QA/QC processes through Asbuilts, As-built BOM creation, GIS deliverable Completion.

Line 120 – HDR – Reg Station
(Project Manager and MAOP Tech Support)
For As-built Phase. Build Gate Completion, Stakeout Package Creation, Support for Tally Verification, Material List Creation, QA/QC processes through As-builts, As-built BOM creation, GIS Schema Creation for GIS department.

Line 122 – HDR – Reg Station
(Project Manager and MAOP Tech Support)
For As-built Phase. Build Gate Completion, Stakeout Package Creation, Support for Tally Verification, Material List Creation, QA/QC processes through Asbuilts, As-built BOM creation, GIS Schema Creation for GIS department.

RLNG – BurnNMac – 2 Miles, 2 Stations
Maxton, North Carolina
(Project Manager and MAOP Tech)
Offsite. For As-built Phase. Build Gate Completion, Stakeout Package Creation, Tally Verification, Material List Creation, QA/QC processes through Asbuilts, As-built BOM creation, Final as-builts creation.

SGC SURVEYING

Ray Lewis

Project Manager

Over my 33 years of experience, I have witnessed new, emerging technologies used in the natural gas construction industry and have always worked with integrity, honesty and safety in mind to make our natural gas systems safe for our general public. I have experience inspecting plastic and steel natural gas pipelines of various sizes up to 30 inch and have coordinated the activities of contractors on numerous pipeline projects and have experience developing construction cost estimates for projects. I worked closely with the engineering department of Piedmont Natural Gas concerning construction activities and with other district offices, other than my home district, inspecting on construction activities. I have also worked closely with governmental agencies to mitigate conflicts between other utilities and any natural gas facilities and have developed a reputation of integrity and safety. I have been chairperson of several NC 811 UCC, Utility Coordinating Committees, during my tenure.

EDUCATION

Southern New Hampshire University, BS, Business Administration/Organizational Leadership

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

Piedmont Natural Gas, Northeast Region
(Sr. Project Distribution Specialist)
Managed multiple complex natural gas distribution construction projects assigned to the Northeast Zone. Covered the Elizabeth City territory to assist with project management on new construction projects.

PNG, New Bern Operations Center
(Distribution Project Specialist)
Manage multiple natural gas distribution construction projects. Work with sales team on expanding natural gas pipelines to areas of communities that do not have natural gas service including cost estimates. Work with engineering department to update natural gas distribution systems to eliminate more costly steel systems and manage system strengthening projects from conception to completion. Work with local NCDOT offices to relocate natural gas line with conflicting roadway projects.

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

PNG, Indian Trail RC
(Supervisor Field Services)
Managed and assigned work to crews responsible for maintenance on PNG's natural gas distribution system in the Indian Trail Resource Center coverage area which includes Indian Trail, Albemarle. This area of responsibility also includes transmission line work in areas that included Iredell, Mecklenburg, and Cabarrus counties. Dispatched crews for emergency leaks and 3rd party damages and assisted crews in the field.

PNG Operations and Maintenance,
Charlotte/Salisbury
(Operations Supervisor)
Managed and assigned work to PNG crews which are responsible for various types of maintenance work on their natural gas distribution system in the Central Zone. Dis-batched crews for emergency leaks; checked and verified completed orders. Re-located and up graded service for gas requirements increase. Worked together with Capital Construction on steel taps for contractors.

PNG Capital Construction, Charlotte/Salisbury
(Operations Supervisor)
Managed Design Operations Technicians concerning the design, cost estimating, permitting, and bidding natural gas pipeline construction projects for both underground and above ground facilities. Managed Utility Field Reps concerning the construction of natural gas pipeline projects both underground and above ground to ensure pipeline was installed to company and industry standards. Assisted with the construction of the meter and regulator station at the Pee Dee Electric Power plant in Anson County, installing approximately 1,500 of 24" steel transmission line.

Callen Cobb CPL

Project/Land Manager

Results-driven Land Manager with over 13 years of comprehensive experience across the land spectrum, including deep expertise in the Permian Basin and expanding portfolios in the renewable and utility sectors. Proven track record of building and scaling high-performing land teams for diverse energy clients, with a strong command of ROW acquisition, title research, and strategic project execution. Adept in managing complex land projects across ~20 counties in Texas and New Mexico, with proficiency in industry-standard tools such as DI-Courthouse, Texas File, and Basin Land Records. Equally skilled in stakeholder collaboration, cross-functional leadership, and leveraging technology to enhance operational efficiency and compliance.

EDUCATION

Stephen F. Austin State University
Bachelor of Business Administration 2010
Certified Professional Landman
TREC Licensed Easement or ROW Agent
AAPL's Renewable Energy Certificate

RELATED EXPERIENCE SAMPLING

Land Manager Experience

SGC Surveying, LLC (Land/Project Manager)
Introducing and building the company's Land Department. Provide comprehensive land services in support of survey operations for clients in utility, electric, oil & gas, renewable, and natural gas sectors. Serve as liaison between survey and land teams to streamline project execution and ensure compliance with client expectations and jurisdictional requirements.

Transglobal Services, LLC (Regional Land Manager)
Led a team of 10 land professionals, including landmen and land administrators, servicing clients in the renewable and utility energy sectors. Managed a project consisting of 23 miles of Overhead electric line ROW acquisition in South Texas without power of eminent domain. Scaled the land department from 6 to 30 team members while improving efficiency and workflow across operations. Acquired ROW, Easements, Temporary Workspace, and Encroachment Agreements for major pipeline relocation and utility line proposals. Drove a 60% year-over-year revenue growth within the Land Department by optimizing team structure and increasing productivity. Examined project proposals for buildable solutions for extensive projects involving above-ground electric lines and underground produced water systems. Oversaw high-level project execution and served as key stakeholder in strategic planning and client relationship management.

RRIG Energy (Land Manager)
Managed land communications and coordinated risk assessment based on specific land research projects. Allocated land personnel and developed project strategies to meet critical timelines. Accountable for NMA/NRA aggregation for investor reporting. Played a lead role in the $184M divestiture of Cordero Energy. Trained and mentored field landmen in all land disciplines (title, acquisition, curative, heirship, and administration). Responsible for quality control and the delivery of holistic, issue-free reports.

Permian Basin Experience

Independent Contract Landman

Due Diligence
Team lead on EOG's $2.5B acquisition of Yates Petroleum. Oversaw contract review, leasehold verification, title analysis and curative confirmation. Led research for both small-scale and large-scale acquisitions across the Permian.

Title Research
Conducted mineral, surface, leasehold, and drill-site title research. Verified ownership statuses using regulatory data (production, permits, etc.)

Curative/Acquisition
Reviewed and resolved title defects through negotiations and supplemental research. Extensive cradle-to-grave leasing experience, including land admin support.

RELATED PROJECT SAMPLING

Industrial Sun – Brazoria County, Texas
Oversaw easement acquisition for the Papa T 345kV transmission line project, covering 23 miles and involving negotiations with 68 surface owners, TxDOT, U.S. Railway, floodplain jurisdictions, and industrial property stakeholders. Contributed to the development of viable route alternatives and maintained landowner relations throughout the process. The project was ultimately discontinued due to unresolved contractual disagreements between the developer and a neighboring entity at the intended delivery site.

Wind Energy Transmission of Texas,
Various Locations, Texas
Supported route planning for a 60-mile 345kV transmission line by identifying potential constraints and required encroachment agreements. Led negotiations and secured approvals to cross existing infrastructure, including pipelines and electrical lines, ensuring right-of-way clearance from project inception through final alignment.

Energy Transfer Company
Texas, Louisiana, Arkansas, Mississippi
Managed the acquisition of Easements, Temporary Workspace Agreements, and Easement Amendments for various pipeline relocation initiatives. Acted as the primary liaison for landowner engagement and communications, ensuring smooth coordination from project planning through completion.

SGC SURVEYING

Joe Keily

Project Manager

With over 20 years of experience in the natural gas construction industry, Mr. Keily has developed a strong reputation for safety, integrity, and efficiency. He has extensive experience inspecting both plastic and steel natural gas pipelines up to 30 inches in diameter and has coordinated numerous pipeline projects. His roles have included managing crews for maintenance and emergency repairs, overseeing construction projects, and working closely with engineering departments to ensure compliance with industry standards. Mr. Keily holds a current OSHA 30 certification, and is EM-385 and CQM certified.

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

MARSOC Natural Gas Distribution, Camp Lejeune/Sneads Ferry, North Carolina

Plan and install approximately 39,000' of 8" PE NG main: This was initiated by Camp Lejeune to replace the existing Propane System aboard MARSOC with a new Natural Gas System for reliability and cost-effective fuel solution. This includes planning, permitting, NCDENR permits, Outside Engineer Firm for Sedimentation and Erosion Control Plan. NCDOT approval for placement in existing R/W. This also took coordination with key base personnel for planning around possible contamination to protect the integrity of the polyethylene pipe being installed. There would also be 50+ Commercial services required in the scope. Responsibilities include plan and submit to PNG System Design to ensure correct pipe size for anticipated loads after completion. Submit proposed route plans to PNG GIS for maps to be uploaded in PNG Database for tracking and future locating purposes. Cost analysis submitted to Commercial Sales for feasibility study on ROR for project cost.

Line 110 Recertification of MAOP Distribution Duplin/Onslow Co, North Carolina

Plan and install Approx 120,000' of Natural Gas Distribution main for Line 110 MAOP recertification project. Records for NG Transmission line 110 serving Onslow Co lacked appropriate documentation for PHMSA and had to be taken offline for Hydrostatic testing. The existing NG distribution had to be fed off a separate NG Transmission line 204 to prevent customer interruption, this entailed installing new NG PE main to tie the systems together for a seamless feed during the planned work and testing. All City Gates and regulator stations had to be identified in the planning to ensure no customer disruptions occurred. There are roughly 100+ sites that were visited and routes planned to install the required distribution during this time. Coordination with PNG System Planning, Major Project Group, NCDNR, Engineering First, NCDOT. Responsibilities include work with Major Projects on route design and timeframe for sections identified to be completed per the PHMSA timeline. Oversee/Monitor budget and process invoices for completed work in Maximo. Write Operating Permits to activate new sections of main to place "In-Service" Go to worksites to ensure proper and safe work practices and company procedures are being adhered to.

Riverbend Subdivision, New Bern, North Carolina

This was the largest residential conversion project across the Duke/PNG territory.
This was initiated by sales to serve the existing Riverbend golf community. This project encompassed over 30 miles of various size distribution main. There were numerous environmentally sensitive areas, and a CAMA permit was required before work could start. Mr. Keily submitted plans to PNG System Planning, GIS and various other departments to get this project completed in a timely manner. This project took 8 months from construction kick-off to completion, working in conjunction with a private town to ensure citizens were aware of the progress from start to finish. The project included over 500 residential services and Hurricane Florence flooded the area during installation. We completed the main installation 2 months ahead of the projected completion.

PNG, Onslow, Jones and Carteret Counties (Project Manager)

Oversight of the new natural gas distribution planning and installation.

MILCON, Camp Lejeune, New River Air Station, Camp Johson, Camp Geiger, and Cherry Point. Havelock, North Carolina

Responsible for the new natural gas installation.

Wallace Creek City Gate, Camp Lejeune, Dupont Regulator Station, Sanderson Farm Reg Station, Meter Station, Feed Mill Reg Station, 10003X Back Feed Station.
Kinston, North Carolina
(Welder/Crew Foreman)

Installation on the projects. Certified in Mueller Hot tapping for the DH-5 and C-136 Machine up to 8" Taps.

Terrance Davis

Project Manager

With over 30 years of experience in Photogrammetry, Geospatial Analysis, and Remote Sensing, Terrence Davis is proficient in diverse sectors, primarily focusing on Transmission and Utility industries, Department of Transportation, Airport and Rail operations, and CORP of Engineers, along with Civil and Site development projects. He has overseen extensive projects, including over 2,500 miles of Transmission Line projects and hundreds of miles of Department of Transportation, spanning tens of thousands of acres, involving topographic and surface data for clients in both public and private sectors. Notable clients include Southern Company (Georgia and Alabama Power), Duke Energy, TECO, and Departments of Transportation such as GDOT, ALDOT, and NCDOT, among others. Terrence excels in planning and estimating projects, drawing upon data collected from diverse platforms for LiDAR and Imagery collection, including manned aircraft such as fixed-wing and rotor-wing flights, as well as collection via UAS platforms. Commencing his career during an era of analog and analytical stereo plotting techniques, Terrence's expertise is deeply rooted in Photogrammetric principles. He is widely respected among his peers in the Remote Sensing and Geospatial industry for his commitment to excellence and innovative solutions. Terrence Davis is distinguished by his problem-solving skills, attention to detail, and holistic approach to analysis, consistently delivering impactful results.

RELATED PROJECT EXPERIENCE SAMPLING

Oil and Gas Pipelines

Americus/Tifton, Sylvester, Georgia, Georgia Power Company

Responsibilities included LiDAR point classification, producing DTM surfaces for 2-foot contours and vectorizing powerlines which was critical in identifying connection points catenaries. The LiDAR data covered a 56 miles long corridor and consisted of nearly 60 million points. All data was processed using Terrasolid and MicroStation software. Project was in 2009.

Vogtle Nuclear Plant; Waynesboro, Georgia; Georgia Power Company

Provided 1-foot contours for this 1500 acre site using LiDAR point data. Breaklines and conventional planimetric mapping were used to supplement the data. The LiDAR data proved to be highly reliable in areas that would normally be considered dense using convention photogrammetric means. Processed and classified over 50 million points. Project was in 2009.

Savannah Airport, Savannah, Georgia

Processed and classified Airbourne LiDAR Survey of 32,500 acres for study of aerial obstructions as they penetrate thru airport glide slopes. Deliverables included a 1-meter bare earth Digital Elevation Model, first return Digital Surface Model, Aerial obstructions thru glide slopes, classified LAS files and color Orthophotography. As a byproduct we fused the LiDAR returns to the color orthophotography for a 3D representation of Savannah International Airport. All data was tiled to client's specifications. Project was in 2009.

City of Albany, Albany, Georgia Topographic Mapping; United States Army Corps of Engineers, Mobile District

Performed aero triangulation for 3 separate areas of 1' and 2' topographic mapping consisting of 21,700 acres for the city of Albany, GA. Newly selected control combined with previous control was observed during the trig. solution. Assisted in compilation after AT was completed. Project Cost: $240,000. Project was in 2010.

Mix-Used Development Columbus, Georgia; Farner Barley & Associates

Processed LiDAR Survey of 8,000 acres for Mix-Use Development. Responsibilities included but not limited to LiDAR Survey flight planning, and processing color digital imagery. Prepared LiDAR DEM for 2-foot technical contours were Hydro-enforced thru drainage areas. Project was in 2010.

Franklin/Hart Counties, Lavonia and Royston, Georgia; Georgia Department of Transportation

This GDOT road project exceeded 10 miles. Topographic and planimetric compilation consisted of 1-foot contours. Mr. Davis served as Lead Photogrammetrist and project manager for all phases which included cost estimation, photogrammetric production, and quality control. Project was in 2005-06.

Orthophotography of Hartsfield-Jackson Atlanta International Airport, PBS&J

Area comprised of 90 square miles around Hartsfield-Jackson Airport including the airport property itself. Preformed all LiDAR classification to create a DEM in support of controlling the 0.5' orthophoto. Project was in 2009.

Butler County, OH

Coordinated efforts for collecting LiDAR and Imagery for county wide, pipeline study. Led Geospatial team in providing Bare Modeling and Photogrammetric Mapping. Provided cost estimation for LiDAR and Mapping phase. Managed schedules and delivery with Phase and Project Managers. Project was in 2022-2024.

APPENDIX B – BILLING RATES

Terrestrial LiDAR Scanner	$550	Day	
UTV w/ Trailer	$350	Day	
14' Boat w/ Trailer	$90	Day	
Per Diem (billed per day)	As Required	Day	Standard CONUS GSA Rate or Client Negotiated Rate
Mileage	$0.700	Mile	Based on 2024 IRS allowable mileage rates

Client:	**Vendor #:**
Contract:	**Date:**

Transportation

Mileage charges are based upon Revenue Service Guidelines. The rated quoted for mileage may be adjusted by notice to reflect changes in Internal Revenue Service Guidelines. Mileage for CLIENT business purposes shall be charged at the 2025 IRS mileage rate of $0.70 per mile.

Expenses

Charges for transportation by means other than SGC furnished vehicle and lodging expenses incurred when making overnight trips away from base location, in situations where lodging must also be maintained at base location, will be billed per terms in the following paragraph "Travel".

Travel

Air fare, taxi, rental cars, meals, lodging, parking, tolls, telephone, and other reasonable authorized travel expense on behalf of the CLIENT will be supported by invoices, vouchers, and receipts and billed to the CLIENT at cost plus ten percent (10%) handling fee. Domestic air travel charges will be coach class, if available. Appropriate lodging will be obtained at reasonably priced establishments as allowed by reservation and circumstance.

Third Party Service Materials

Services performed by a third party contracted under SGC's contract and supervision will be charged at cost plus ten percent (10%) for handling. Materials including survey supplies and consumables (stakes, lath, flagging, paint, etc.), off-premise reproduction, and other supplies purchased directly by SGC to be furnished to the CLIENT on a reimbursable basis will be charged at cost plus ten percent (10%).

Reproduction

Reasonable In-house production and reproduction of documents, drawings, files, or other requirements are included in the above listed rates.

Special Equipment Requirements

Special equipment may include, but not be limited to, computer time rental, computer software and hardware, reference materials, watercraft, aircraft, land craft, hardware, tools, testing equipment, cameras, video gear, etc. which has been authorized by the CLIENT for rental, lease, or purchase for use by SGC on behalf of the CLIENT. Such equipment, software or services will be charged at cost plus ten percent (10%) for handling.

Miscellaneous Costs

Client will reimburse SGC for miscellaneous costs incurred by SGC including but not limited to freight, express delivery, maps, abstract fees, permit fees, etc. at SGC's actual cost plus ten percent (10%).

Overtime

1. **Hourly paid (non-exempt) office employees** will have an overtime rate computed at 1.50 times the regular hourly rate for all time worked in excess of 8 hours per regular work day, and on weekends or holidays.

2. **Hourly paid (non-exempt) Field Survey employees** and crews will have an overtime rate computed at 1.50 times the regular hourly rate for all time worked in excess of 10 hours per day Monday through Saturday, and for all work on Sundays and holidays.

3. **Hourly rate Vendor Inspectors** will have an overtime rate computed at 1.50 times the regular hourly rate for all time worked in excess of 8 hours per regular work day, and all time worked on weekends and holidays.

Calendar Day Rate

Crews assigned to extended project durations are quoted on a day rate basis from initiation of their assignment to completion. This rate applies to a 6-day week. However, perdiem shall be paid on the 7th day whether or not the individual is expected to report for Sunday.

Standby

During the assignment of any survey personnel, SGC will charge a minimum of 4 hours per day or actual hours expended (whichever is greater) for standby at CLIENT request or due to inclement weather.

Holidays

Holidays for SGC employees include the following: New Years Day, Martin Luther King, Jr. Day, President's Day, Memorial Day, Fourth of July, Labor Day, Patriot Day, Thanksgiving, Friday after Thanksgiving and Christmas Eve and Day. When employees are assigned full time to a project and cannot work due to CLIENT holidays, an 8-hour workday will be charged to the CLIENT.

Special Arrangements

Adjustments to the foregoing rates may be required for special conditions of service such as extreme living and working conditions, extended offshore or overseas assignments, excessive insurance requirements , or other special conditions.

Tax on Services

The Client is responsible for payment of all gross receipts, sales or use taxes that are applicable for work performed under this contract, that may be due or become due, unless direct tax certificate exempting such payments are furnished by the CLIENT. Sales taxes on equipment may be applicable.

Invoices and Payment

SGC will invoice for services rendered on a Monthly basis during the progress of the work. Payment terms shall be net 30 days from date of invoice. Late payments are subject to a 1 1/2 % (0.15) charge per month until the outstanding amount is paid.

Foreign Service Rates

This Standard Schedule of Rates applies to services performed within the Continental United States of America. Rates for foreign assignments will be negotiated based on the location and duration of the assignment.

Good afternoon Robert,

Thank you for speaking to me last week and looking to help us get this building permit over the line!

Please see attached the following documents:

- Building Permit Application
- Site Plan
- Electrical oneline
- Mechanical oneline

Please let me know if you need to see any other documents and I will get them over to you asap! Your help is greatly appreciated.

Thanks,

Good morning Myrka,

We finally have everything signed and ready to send over to yourselves!

I tried to send everything this morning but had an email back saying it was undeliverable, I think because I am sending so much stuff over. So I will try sending bit by bit!

To follow, please see the attached building permit application and the trade permits to go along with them.

I have attached the site layout and lease agreement also.

Thank you again for your help and please let me know the next steps for payment.

Thanks,

Jenny Twentyman

Hi Myrka,

Apologies for all the questions. We have a signed lease agreement from the property owner as we are leasing the land to build on it. Do we still require their signature on our building permit, or will the lease agreement cover that?

Thanks,

Jenny Twentyman

Hi Myrka,

Thank you so much for confirming all that! That's great. Regarding the site plan, it references them being stamped. Is this required to be a Georgia state stamp. Our engineering firm is Texas based.

Lovely, I have sent the form onto our GC to fill out and send over. No apology needed, just thank you for assisting so much with this permitting process. It's been a great help!

Hello good morning,

Please see attached for the permit that you will need to fill out to permit the 33 generators. We were made aware that this is not actually a building structure. We discussed that this should fall under a master permit, since this is such a large group of installments. Please fill this application the best of your capabilities. This application will also require a sight plan.

Please have all your trades fill out the sub-contractor affidavit and submitted their 3 licenses (state license, business license & driver license), I have also attached this application to the email. I do apologize for the delay in responding. Please let me know if you have any further questions.

Good morning Myrka,

We finally have everything signed and ready to send over to yourselves!

I tried to send everything this morning but had an email back saying it was undeliverable, I think because I am sending so much stuff over. So I will try sending bit by bit!

To follow, please see the attached building permit application and the trade permits to go along with them.

I have attached the site layout and lease agreement also.

Thank you again for your help and please let me know the next steps for payment.

Thanks,

Hey J.T.,

Here is the invoice for the water usage for this hydrant meter. I mailed an invoice to the home office. Also, this is the meter that Clayton rented back in September 2025.

Have a great week!

Ashlan and Randy,

Can you give me total amounts that BOC and BOE owe for unpaid stormwater utility bills? We can only go back four years due to statute limitations. If any roll of on 12/31, don't include those.

Thanks in advance,
Frank

Hi Myrka,

Is that the process sorry? I'm not sure of the next steps as Robert mentioned he didn't see all the documents I sent over for the first application? I wonder if it's because I emailed over the electrical and mechanical one lines, but we dropped the other documents in person so they didn't get linked to the same application.

Thanks,

Jenny

Subject: Building Permit - 10835 Hazelbrand Rd NE

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon Robert,

Thank you for speaking to me last week and looking to help us get this building permit over the line!

Please see attached the following documents:

* Building Permit Application
* Site Plan
* Electrical oneline
* Mechanical oneline

Please let me know if you need to see any other documents and I will get them over to you asap! Your help is greatly appreciated.

Thanks,

Jenny Twentyman

Team,

To whom it may concern, there was discussion on site during an above ceiling inspection regarding the vertical sprinkler drops and acceptance by the EOR for the install method. Please see the attached for their comments on the matter.

Please let me know if there are any questions or if we may proceed with above ceiling inspections for cover up.

Subject: Re: Permit

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Hey Mike. The permit has been approved by GDOT and is ready for activation. In order to activate, we will need start and end dates, City onsite representative name, Contractor representative name, etc. I know Aurie and Chad have discussed this. If you have a date when Southern Pipeline plans to get started, I can have Aurie call Chad to coordinate on your end as well as call Jamey or Chad with Southern to coordinate info from their end.

Thanks,

John G. Payne, P.E.

Good morning Joe,

It was great to meet you in person last week. D'Avery kindly let me know that you stopped by this morning requesting a couple of documents so you could review them and help get the permitting process underway for the VoltaGrid power site.

I can't thank you enough for the support you're providing in helping us obtain the necessary permits. It's truly appreciated.

Please see attached the requested documents for your review.

Please let me know if you require any other documents, or if you have any questions.

Thanks,

Subject: Serverfarm Covington - Area of Rescue 2-way communication system

Good afternoon,

I am with Engineering Plus, the telecom and security design team for ATL Serverfarm project.

We were told that doors leaving the facility out into the Gen yard need to include a 2-way communication device.

Would adding a building intercom to all these doors, and having them call the security operations center within the building, be ok?

If you would like to schedule a call to discuss further id be happy to chat at any time.

Thank you,

Kevin Boyce, PSP

Attachments: Subcontractor Affidavit.pdf; Building Permit Application.pdf

Hello good morning, Jenny,

I was reviewing the application that was submitted for 10835 Hazel brand Rd. I noticed we are missing a couple information.

* Page 1 of the building permit application is incomplete. I have re-attached the application if this helps.
* Missing General Contractor driver license
* Missing the HVAC affidavit and driver license (I have attached the form on this email)

Good morning Myrka,

We finally have everything signed and ready to send over to yourselves!

I tried to send everything this morning but had an email back saying it was undeliverable, I think because I am sending so much stuff over. So I will try sending bit by bit!

To follow, please see the attached building permit application and the trade permits to go along with them.

I have attached the site layout and lease agreement also.

Thank you again for your help and please let me know the next steps for payment.

Thanks,

Hi Myrka,

Apologies for all the questions. We have a signed lease agreement from the property owner as we are leasing the land to build on it. Do we still require their signature on our building permit, or will the lease agreement cover that?

Thanks,

Hi Myrka,

Thank you so much for confirming all that! That's great. Regarding the site plan, it references them being stamped. Is this required to be a Georgia state stamp. Our engineering firm is Texas based.

Lovely, I have sent the form onto our GC to fill out and send over. No apology needed, just thank you for assisting so much with this permitting process. It's been a great help!

Thanks,

Hello good morning,

Please see attached for the permit that you will need to fill out to permit the 33 generators. We were made aware that this is not actually a building structure. We discussed that this should fall under a master permit, since this is such a large group of installments. Please fill this application the best of your capabilities. This application will also require a sight plan.

Please have all your trades fill out the sub-contractor affidavit and submitted their 3 licenses (state license, business license & driver license), I have also attached this application to the email. I do apologize for the delay in responding. Please let me know if you have any further questions.

Hello good morning, Jenny,

I do apologize for the late reply please see attached for the forms that need to be filled out. I spoke with joe he confirmed your trades can apply for individual permits.
If you are looking to have a GC over this project you will need to fill out our building permit application.

Hello good morning, Jenny,

I was reviewing the application that was submitted for 10835 Hazel brand Rd. I noticed we are missing a couple information.

* Page 1 of the building permit application is incomplete. I have re-attached the application if this helps.
* Missing General Contractor driver license
* Missing the HVAC affidavit and driver license (I have attached the form on this email)

Good morning Myrka,

We finally have everything signed and ready to send over to yourselves!

I tried to send everything this morning but had an email back saying it was undeliverable, I think because I am sending so much stuff over. So I will try sending bit by bit!

To follow, please see the attached building permit application and the trade permits to go along with them.

I have attached the site layout and lease agreement also.

Thank you again for your help and please let me know the next steps for payment.

Thanks,

Jenny Twentyman

Hi Myrka,

Apologies for all the questions. We have a signed lease agreement from the property owner as we are leasing the land to build on it. Do we still require their signature on our building permit, or will the lease agreement cover that?

Thanks,

Jenny Twentyman

Hi Myrka,

Thank you so much for confirming all that! That's great. Regarding the site plan, it references them being stamped. Is this required to be a Georgia state stamp. Our engineering firm is Texas based.

Lovely, I have sent the form onto our GC to fill out and send over. No apology needed, just thank you for assisting so much with this permitting process. It's been a great help!

Thanks,

Hello good morning,

Please see attached for the permit that you will need to fill out to permit the 33 generators. We were made aware that this is not actually a building structure. We discussed that this should fall under a master permit, since this is such a large group of installments. Please fill this application the best of your capabilities. This application will also require a sight plan.

Please have all your trades fill out the sub-contractor affidavit and submitted their 3 licenses (state license, business license & driver license), I have also attached this application to the email. I do apologize for the delay in responding. Please let me know if you have any further questions.

For your awareness...

---------- Forwarded message ---------
From: Sustainable Newton <info@sustainablenewton.org <mailto:info@sustainablenewton.org> >
Date: Thu, Mar 19, 2026, 8:58?AM
Subject: VoltaGrid Permitting
To: Fleeta Baggett <fbaggett@cityofcovington.org <mailto:fbaggett@cityofcovington.org> >, Tres Thomas <tthomas@cityofcovington.org <mailto:tthomas@cityofcovington.org> >, judyjohnson@cityofcovington.org <mailto:judyjohnson@cityofcovington.org> <judyjohnson@cityofcovington.org <mailto:judyjohnson@cityofcovington.org> >

Last week, Sustainable Newton joined Southern Environmental Law Center (SELC) and Altamaha Riverkeeper to submit comments to Georgia EPD's Air Division regarding the air permit they published for the VoltaGrid project at the ServerFarm property on Hazelbrand Road. Sustainable Newton also submitted a separate, independent letter. I wanted to share both letters with you for your awareness:

* Joint Letter: https://www.sustainablenewton.org/uploads/5/9/9/5/5995302/final_voltagrid_comments.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.sustainablenewton.org%2fuploads%2f5%2f9%2f9%2f5%2f5995302%2ffinal_voltagrid_comments.pdf&c=E,1,EfkZ8zGdhI9wJTEFM3lAosKQ6qNmYYHBw5qb9V_0XW7O3HGNSJXMAsUpmsYMZ_v5rNSXHWkogmfrbgl-Qt6yHYAX-ns48FOw3tTta_F9bwt_2YFFX-c,&typo=1>
* Independent Letter from Us: https://www.sustainablenewton.org/uploads/5/9/9/5/5995302/voltagrid_permit_comments_sustainable_newton_2026-03-13.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.sustainablenewton.org%2fuploads%2f5%2f9%2f9%2f5%2f5995302%2fvoltagrid_permit_comments_sustainable_newton_2026-03-13.pdf&c=E,1,diXQORbQ6Ov8aTwxTiRljrS_7EqJGqrGZYz0ts_bdX6gswO4AU_DBCgP5xSsQEQzr03n61gjGh-iMuBxFuG8MQZFxqWDLlO4J-eqSuW4&typo=1>

From an air quality perspective, our primary concern is the high levels of the carcinogen formaldehyde that will be emitted. SELC is concerned there is a high probably they could end up emitting over the allowed levels.

But the other concern is the manner in which VoltaGrid and ServerFarm are trying to permit as separate businesses, to avoid combining them, which would result in higher standards and stricter regulations on emissions. Problems with that approach, beyond the emissions levels are:

1. VoltaGrid does not appear to be registered with the Secretary of State as a business in Georgia.
2. VoltaGrid has no physical address other than the ServerFarm address.
3. VoltaGrid states they plan to generate electricity to sell to ServerFarm, which is not allowed under the Georgia Territorial Act of 1973, which would only allow VoltaGrid to sell electricity to a regulated utility.

As I am not sure how that could affect the City of Covington, I wanted you to be aware of these findings. This experience may also suggest requirements we want to add to the ordinances Judy is working on now.

Thanks,
Maurice

Tim,

Please see the meter reading for meter 241956626. We also have meter 19113310 that is ready to be returned. Please let me know if you have any questions.

Thanks

Hey J.T.,

Here is the invoice for the water usage for this hydrant meter. I mailed an invoice to the home office. Also, this is the meter that Clayton rented back in September 2025.

Have a great week!

Tim

UPDATE 251230-004222 You can use the Meeting Ticket number to check PRIS and see which members will and which will not attend the meeting. The day after the meeting the GA811 Online Ticketing System will generate the Excavation Ticket. The Excavation Ticket will have a different number than the Meeting Ticket. The Excavation Ticket will be emailed to the caller email address listed. The Excavation Ticket will show the expiration date and the update window. The update window will start 5 business days before the expiration and end at 4:30 pm on the expiration date. The expiration date may be on a holiday or on a weekend. The Excavation Ticket MUST be updated by 4:30 pm (when our system switches to the next business day) on the expiration date. After 4:30pm on the expiration date you will be required to enter a new Large Project. Bring proposed marking agreements to the meeting for each of the members listed and for yourself. Failure to bring marking agreements may result in the cancellation of your ticket. Sample marking agreements may be found on the Georgia811 website.

the meeting the GA811 Online Ticketing System will generate the Excavation Ticket. The Excavation Ticket will have a different number than the Meeting Ticket. The Excavation Ticket will be emailed to the caller email address listed. The Excavation Ticket will show the expiration date and the update window. The update window will start 5 business days before the expiration and end at 4:30 pm on the expiration date. The expiration date may be on a holiday or on a weekend. The Excavation Ticket MUST be updated by 4:30 pm (when our system switches to the next business day) on the expiration date. After 4:30pm on the expiration date you will be required to enter a new Large Project. Bring proposed marking agreements to the meeting for each of the members listed and for yourself. Failure to bring marking agreements may result in the cancellation of your ticket. Sample marking agreements may be found on the Georgia811 website.

Please have the Mayor sign this document in the proper location. Audra is going to be shocked that I let you handle this. I always want to handle my business, but I trust you to get it done. Please let me know when she has signed it. I will pick it up and get the GWES representative to sign the document. I will return the inked copy to you for retention. GWES and I will need a digital copy.

Thank You,

Kevin Sorrow

Subject: RE: Covington Gas Volumes

Original plan was April and now it is June. They are currently clearing the trees and right of way for us to have our contractor install the service. They have stopped trying to secure the property needed for the Transco tap station. I will be on a weekly call with them tomorrow. It appears from the load schedule they just sent that they do not intend on using up to the 750 MCFH that they originally wanted and plan to come off the gas supply in July 27.

What are projections beyond July 27 until swapping to the electric grid? Is that a 2028 target or will there be usage beyond that point?

Good afternoon Mike,

The permit for this project has been approved, and I have attached those plans to this email. I have also attached the GPAS permit checklist to this email. The permit checklist needs to be filled out and submitted to the permit area inspector so the permit can be issued.

To activate the permit, the attached permit checklist must be completed and submitted to the GDOT area inspector. Please fill out the checklist and return it to me for submittal. If you would like our assistance in completing this form, let me know.

If you have any questions, do not hesitate to contact me.

Thanks,

Aurie Manigo, P.E.

Good afternoon Mike,

I have attached the GPAS permit plans for the 6-inch natural gas main crossing at SR 142. Please review these documents and let me know if you have any revisions. Once I receive your approval and we are added to the City's GPAS account, I will proceed with the permit submission.

Let me know if you have any questions.

Thanks,

Aurie Manigo, P.E.

Last week, Sustainable Newton joined Southern Environmental Law Center (SELC) and Altamaha Riverkeeper to submit comments to Georgia EPD's Air Division regarding the air permit they published for the VoltaGrid project at the ServerFarm property on Hazelbrand Road. Sustainable Newton also submitted a separate, independent letter. I wanted to share both letters with you for your awareness:

* Joint Letter: https://www.sustainablenewton.org/uploads/5/9/9/5/5995302/final_voltagrid_comments.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.sustainablenewton.org%2fuploads%2f5%2f9%2f9%2f5%2f5995302%2ffinal_voltagrid_comments.pdf&c=E,1,EfkZ8zGdhI9wJTEFM3lAosKQ6qNmYYHBw5qb9V_0XW7O3HGNSJXMAsUpmsYMZ_v5rNSXHWkogmfrbgl-Qt6yHYAX-ns48FOw3tTta_F9bwt_2YFFX-c,&typo=1>
* Independent Letter from Us: https://www.sustainablenewton.org/uploads/5/9/9/5/5995302/voltagrid_permit_comments_sustainable_newton_2026-03-13.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.sustainablenewton.org%2fuploads%2f5%2f9%2f9%2f5%2f5995302%2fvoltagrid_permit_comments_sustainable_newton_2026-03-13.pdf&c=E,1,diXQORbQ6Ov8aTwxTiRljrS_7EqJGqrGZYz0ts_bdX6gswO4AU_DBCgP5xSsQEQzr03n61gjGh-iMuBxFuG8MQZFxqWDLlO4J-eqSuW4&typo=1>

From an air quality perspective, our primary concern is the high levels of the carcinogen formaldehyde that will be emitted. SELC is concerned there is a high probably they could end up emitting over the allowed levels.

But the other concern is the manner in which VoltaGrid and ServerFarm are trying to permit as separate businesses, to avoid combining them, which would result in higher standards and stricter regulations on emissions. Problems with that approach, beyond the emissions levels are:

1. VoltaGrid does not appear to be registered with the Secretary of State as a business in Georgia.
2. VoltaGrid has no physical address other than the ServerFarm address.
3. VoltaGrid states they plan to generate electricity to sell to ServerFarm, which is not allowed under the Georgia Territorial Act of 1973, which would only allow VoltaGrid to sell electricity to a regulated utility.

As I am not sure how that could affect the City of Covington, I wanted you to be aware of these findings. This experience may also suggest requirements we want to add to the ordinances Judy is working on now.

Thanks,

Maurice

* Independent Letter from Us: https://www.sustainablenewton.org/uploads/5/9/9/5/5995302/voltagrid_permit_comments_sustainable_newton_2026-03-13.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fwww.sustainablenewton.org%2fuploads%2f5%2f9%2f9%2f5%2f5995302%2fvoltagrid_permit_comments_sustainable_newton_2026-03-13.pdf&c=E,1,cL44BDuYlGGI3TbUgMGBI5XuwpL_xrGb6BdNdsHQKM63sJyqyPNe0xhF_Z5UkCathMkZ5jat5GruIdiQWOnljJfjGzFTMhUjq5kX35anK5KcVid8xxHH&typo=1>

From an air quality perspective, our primary concern is the high levels of the carcinogen formaldehyde that will be emitted. SELC is concerned there is a high probably they could end up emitting over the allowed levels.

But the other concern is the manner in which VoltaGrid and ServerFarm are trying to permit as separate businesses, to avoid combining them, which would result in higher standards and stricter regulations on emissions. Problems with that approach, beyond the emissions levels are:

1. VoltaGrid does not appear to be registered with the Secretary of State as a business in Georgia.
2.

VoltaGrid has no physical address other than the ServerFarm address.

3. VoltaGrid states they plan to generate electricity to sell to ServerFarm, which is not allowed under the Georgia Territorial Act of 1973, which would only allow VoltaGrid to sell electricity to a regulated utility.

As I am not sure how that could affect the City of Covington, I wanted you to be aware of these findings. This experience may also suggest requirements we want to add to the ordinances Judy is working on now.

Thanks,
Maurice

Last week, Sustainable Newton joined Southern Environmental Law Center (SELC) and Altamaha Riverkeeper to submit comments to Georgia EPD's Air Division regarding the air permit they published for the VoltaGrid project at the ServerFarm property on Hazelbrand Road. Sustainable Newton also submitted a separate, independent letter. I wanted to share both letters with you for your awareness:

Hi Jennifer,

Yes, I believe all of the applications are being turned in by someone other than myself. I have attached the GC License. Please disregard any applications that are not needed for Emcon Services, Inc.

Thanks,

Tammy Wallace|Accounting-Office Manager

Good morning,

Do you have a business license/occupational x license in the state of GA? If you do, you will not be required to submit an application with the city. If you don't, then please complete the attached application. I will be the point of contact if you need to send the application to our office. Feel free to reach out should you have any questions.

Jennifer

Hi Jennifer,

I wanted to ask a question. I work for Emcon Services, Inc. We are going to be the GC as well as a trade contractor on the upcoming project located at 10835 Hazelbrand Rd. NE, Covington GA 30014…The Serverfarm, LLC. We are working on the Power Generation station. Not the building. Do we still have to apply for the Occupational Tax Application? Please let me know.

Thanks,

Subject: RE: Question Server Farm- project/Power Generation Station

This will work to pull permits for mechanical. Do you have a separate GC business license for the company?

Good morning,

Do you have a business license/occupational x license in the state of GA? If you do, you will not be required to submit an application with the city. If you don't, then please complete the attached application. I will be the point of contact if you need to send the application to our office. Feel free to reach out should you have any questions.

Jennifer

Hi Jennifer,

I wanted to ask a question. I work for Emcon Services, Inc. We are going to be the GC as well as a trade contractor on the upcoming project located at 10835 Hazelbrand Rd. NE, Covington GA 30014…The Serverfarm, LLC. We are working on the Power Generation station. Not the building. Do we still have to apply for the Occupational Tax Application? Please let me know.

Thanks,

Subject: Re: Hazelbrand Road - Maintenance Bond

Hi Mike,
Our understanding is that the relocation work has already been completed, and that our obligation as the current property owner is limited to assuming the required maintenance bond associated with those previously completed infrastructure improvements, no performing the relocation itself. That is why our current plan set does not include relocation drawings.

Subject: RE: Hazelbrand Road - Maintenance Bond

Erick,

Please correct me if I am wrong, but I thought you would be relocating the watermain in question as part of the proposed activities at site.

I am trying to get a review of the bond documents from our Legal council and want to be sure I am giving him the correct information. Looking at your plans I do not see the relocation drawings

Subject: RE: Hazelbrand Road - Maintenance Bond

Erick,

Actually, The should be a maintenance bond and performance covenant. When installing, or in this case re-locating, city owned infrastructure, the developer is responsible to maintain the new infrastructure for three years and has to file a covenant agreement on record for their responsibility of said maintenance.

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms “Maintenance Covenant” and “Performance Covenant” being used interchangeably to refer to the template previously shared?

As the new owner, we’re being diligent in obtaining a copy, as it’s important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

Good Afternoon Michael,

I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.

I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.

I will let you guys take it from here but wanted to make the introduction.
Thank you,

Kevin

Hi Jennifer,

I wanted to ask a question. I work for Emcon Services, Inc. We are going to be the GC as well as a trade contractor on the upcoming project located at 10835 Hazelbrand Rd. NE, Covington GA 30014…The Serverfarm, LLC. We are working on the Power Generation station. Not the building. Do we still have to apply for the Occupational Tax Application? Please let me know.

Thanks,

Tammy Wallace|Accounting-Office Manager

Good afternoon Mike,

I have attached the GPAS permit plans for the 6-inch natural gas main crossing at SR 142. Please review these documents and let me know if you have any revisions. Once I receive your approval and we are added to the City's GPAS account, I will proceed with the permit submission.

Let me know if you have any questions.

Thanks,

Good afternoon Tres,

We have been coordinating with the City of Covington regarding the GDOT permit for the Serverfarm development. To permit this utility work with GDOT, we need to get added to the City's GPAS account as a utility sub-user/representative. The new GPAS system shows you are the City of Covington's account person of contact.

An account under Keck Wood was set up with an email address (permitsubs@keckwood.com <mailto:permitsubs@keckwood.com>) that will be used for GPAS communications. You will need to log onto your GPAS account and approve Keck Wood as a sub-user/representative on the City's GPAS account.

For K&W to be able to submit utility permits on behalf of the City, please be sure to approve Keck Wood as a sub-user. If you are having trouble approving us as a sub-user, please reach out to me for assistance.

Let me know if you have any questions or need to discuss further.

Thanks,

Aurie Manigo, P.E.

Can you explain further on item number seven regarding short-term rentals? The form only shows a date. At the beginning of the ordinance there are three or four sentences highlighted in yellow.

However, the requestor section was not filled out. It does not indicate who requested this ordinance—whether it was a citizen, a department head, or a city council member. It also does not explain what the discussion or reasoning behind the request was.

Subject: RE: 03/16/2026 agenda and packet
Attachments: Short-term Rental discussion.docx; 03022026 MINUTES.pdf

Good morning,

Item 7 was requested by Mayor Baggett. The attached is our understanding of the request. Also Item 2,the 3/2/2026 minutes, were inadvertently left out of the packet. They are also attached.

Sincerely,

Tina Hanson

Can you explain further on item number seven regarding short-term rentals? The form only shows a date. At the beginning of the ordinance there are three or four sentences highlighted in yellow.

However, the requestor section was not filled out. It does not indicate who requested this ordinance—whether it was a citizen, a department head, or a city council member. It also does not explain what the discussion or reasoning behind the request was.

Subject: GDOT Permit for Serverfarm Development - GPAS User Access - City of Covington, Ga - 260626

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon Tres,

We have been coordinating with the City of Covington regarding the GDOT permit for the Serverfarm development. To permit this utility work with GDOT, we need to get added to the City's GPAS account as a utility sub-user/representative. The new GPAS system shows you are the City of Covington's account person of contact.

An account under Keck Wood was set up with an email address (permitsubs@keckwood.com <mailto:permitsubs@keckwood.com>) that will be used for GPAS communications. You will need to log onto your GPAS account and approve Keck Wood as a sub-user/representative on the City's GPAS account.

For K&W to be able to submit utility permits on behalf of the City, please be sure to approve Keck Wood as a sub-user. If you are having trouble approving us as a sub-user, please reach out to me for assistance.

Let me know if you have any questions or need to discuss further.

Thanks,

Aurie Manigo, P.E.

Mike,

Based on my check in with staff this afternoon, we plan to have the GDOT permit exhibits and related documents completed and ready for submittal by the end of this week. Aurie will be in touch with you to obtain necessary information related to the GPAS process. We will send the draft exhibit over to you for concurrence before it is submitted to GDOT.

Subject: RE: 10835 Hazelbrand Road NE Permit form
Attachments: Building Permit Application.pdf; Subcontractor Affidavit.pdf

Hello good morning,

Please see attached for the permit that you will need to fill out to permit the 33 generators. We were made aware that this is not actually a building structure. We discussed that this should fall under a master permit, since this is such a large group of installments. Please fill this application the best of your capabilities. This application will also require a sight plan.

Please have all your trades fill out the sub-contractor affidavit and submitted their 3 licenses (state license, business license & driver license), I have also attached this application to the email. I do apologize for the delay in responding. Please let me know if you have any further questions.

HI Myrka,

Thank you so much! I have forwarded this on to the GC to complete. Regarding the building permit... what building am I referencing as in the application it asks for specific building details. We obviously have the 33 generators, but they aren't buildings rather generator structures. We have a fitted conex that will serve as an operations building. Should I be referencing that as the building please?

Subject: RE: Serverfarm Covington Water Meter
Attachments: Invoice for water usage since Sept 24 2025.pdf

Hey J.T.,

Here is the invoice for the water usage for this hydrant meter. I mailed an invoice to the home office. Also, this is the meter that Clayton rented back in September 2025.

Have a great week!

Tim

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms “Maintenance Covenant” and “Performance Covenant” being used interchangeably to refer to the template previously shared?

As the new owner, we’re being diligent in obtaining a copy, as it’s important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

Good Afternoon Michael,

I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.

I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.

I will let you guys take it from here but wanted to make the introduction.
Thank you,

Kevin

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms “Maintenance Covenant” and “Performance Covenant” being used interchangeably to refer to the template previously shared?

As the new owner, we’re being diligent in obtaining a copy, as it’s important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

From: Mike Willis <MWillis@cityofcovington.org <mailto:MWillis@cityofcovington.org> >

Hi Mike,

We are following up to see if you located the performance covenant.

Also, it's my pleasure to introduce you to my colleague Erick Martinez. Erick works in the Legal department here at Serverfarm and will be handling this process for us going forward.

Good Morning,

I was unable to locate a performance covenant that had been filed. But, in any case you as the new owner would need to file an updated one anyway.

Please find the template

Good Afternoon Michael,

I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.

I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.

I will let you guys take it from here but wanted to make the introduction.
Thank you,

Kevin

Hi Mike,

I totally agree. I think it makes far more sense to have it as one permit and us as the secondary permittees. It came back after the initial discussion that they weren't happy with us doing so, but I have reached out again asking if they would reconsider and let them know the below reservations you had with issuing a separate one.

I will let you know their response!

Thanks,

Hello Jenny,

As we discussed, your team would work under the primary permittee as a secondary permittee using their plan. I feel like issuing you a separate permit for the same exact site and plan will only confuse and conflate the two. Not to mention cause an opportunity for accusations and finger pointing.

At this time, I do not think this is the best course to follow. Could you please explain why the current primary permittee will not allow your activities to be conducted under their permit?

Good Afternoon Chief,

Attached is the agenda for the upcoming City Council meeting. There is a marijuana-related proposal listed, and I wanted to reach out beforehand so you're not put on the spot or blindsided during the discussion.

I understand that the Newton County Sheriff's Office has the discretion to issue a citation and release or possibly add an additional charge, and that policies can vary by jurisdiction. My question is whether this matter falls under a CPD policy or if it is governed by a city ordinance that the Council could amend or adapt.

Tres,

If there is a specific ordinance that addresses this, could you please provide it to me? I was under the impression that criminal matters typically fall under the Police Department's authority, so I would appreciate any clarification you can provide.

Thank you.

Hi Mike,

I totally agree. I think it makes far more sense to have it as one permit and us as the secondary permittees. It came back after the initial discussion that they weren't happy with us doing so, but I have reached out again asking if they would reconsider and let them know the below reservations you had with issuing a separate one.

I will let you know their response!

Thanks,

Jenny Twentyman

Hello Jenny,

As we discussed, your team would work under the primary permittee as a secondary permittee using their plan. I feel like issuing you a separate permit for the same exact site and plan will only confuse and conflate the two. Not to mention cause an opportunity for accusations and finger pointing.

At this time, I do not think this is the best course to follow. Could you please explain why the current primary permittee will not allow your activities to be conducted under their permit?

Hi Audrey,

Thank you so much for your help!

We can of course fill out the application form and pay any fees, but can we use the original documents from Brasfield & Gorrie during their application as they will be the exact same as what we require for the site? It will just be an additional permit opened for our GC, ACS, to carry out some excavation work on site.

Thanks,

Jenny Twentyman

Hi,

Thank you so much for the call on Friday!

Please see the information I sent to Joe below.

You mentioned you may be able to help with additional permits? I am looking to obtain a land disturbance permit also please for the site. There is currently one out pulled by a contractor called Brasfield & Gorrie and the original plan was for us to work as a secondary under their permit. They have requested that we obtain our own permit to carry out any land disturbance works on site. Can you advise me on the process please?

Thank you again for all your help!

Thanks,

Hi Joe,

Thank you for the call last week confirming the plan for the permits. When are we expecting the receive the permits please? Is there any other additional information that you or the team require to complete these that I didn't send in the email below?

We are talking the with GC, who will send over the 3 licenses required to obtain the electrical and mechanical permits you mentioned last week.

Thank you again! Your help through this process has been amazing!

Thanks,

Good morning Joe,

It was great to meet you in person last week. D'Avery kindly let me know that you stopped by this morning requesting a couple of documents so you could review them and help get the permitting process underway for the VoltaGrid power site.

I can't thank you enough for the support you're providing in helping us obtain the necessary permits. It's truly appreciated.

Please see attached the requested documents for your review.

Please let me know if you require any other documents, or if you have any questions.

Thanks,

Hi,

Thank you so much for the call on Friday!

Please see the information I sent to Joe below.

You mentioned you may be able to help with additional permits? I am looking to obtain a land disturbance permit also please for the site. There is currently one out pulled by a contractor called Brasfield & Gorrie and the original plan was for us to work as a secondary under their permit. They have requested that we obtain our own permit to carry out any land disturbance works on site. Can you advise me on the process please?

Thank you again for all your help!

Thanks,

Hi Joe,

Thank you for the call last week confirming the plan for the permits. When are we expecting the receive the permits please? Is there any other additional information that you or the team require to complete these that I didn't send in the email below?

We are talking the with GC, who will send over the 3 licenses required to obtain the electrical and mechanical permits you mentioned last week.

Thank you again! Your help through this process has been amazing!

Thanks,

Jenny Twentyman

Good morning Joe,

It was great to meet you in person last week. D'Avery kindly let me know that you stopped by this morning requesting a couple of documents so you could review them and help get the permitting process underway for the VoltaGrid power site.

I can't thank you enough for the support you're providing in helping us obtain the necessary permits. It's truly appreciated.

Please see attached the requested documents for your review.

Please let me know if you require any other documents, or if you have any questions.

Thanks,

Hi Mike,

I totally agree. I think it makes far more sense to have it as one permit and us as the secondary permittees. It came back after the initial discussion that they weren't happy with us doing so, but I have reached out again asking if they would reconsider and let them know the below reservations you had with issuing a separate one.

I will let you know their response!

Thanks,

Jenny Twentyman

Hello Jenny,

As we discussed, your team would work under the primary permittee as a secondary permittee using their plan. I feel like issuing you a separate permit for the same exact site and plan will only confuse and conflate the two. Not to mention cause an opportunity for accusations and finger pointing.

At this time, I do not think this is the best course to follow. Could you please explain why the current primary permittee will not allow your activities to be conducted under their permit?

Hi Audrey,

Thank you so much for your help!

We can of course fill out the application form and pay any fees, but can we use the original documents from Brasfield & Gorrie during their application as they will be the exact same as what we require for the site? It will just be an additional permit opened for our GC, ACS, to carry out some excavation work on site.

Thanks,

Jenny Twentyman

Hi,

Thank you so much for the call on Friday!

Please see the information I sent to Joe below.

You mentioned you may be able to help with additional permits? I am looking to obtain a land disturbance permit also please for the site. There is currently one out pulled by a contractor called Brasfield & Gorrie and the original plan was for us to work as a secondary under their permit. They have requested that we obtain our own permit to carry out any land disturbance works on site. Can you advise me on the process please?

Thank you again for all your help!

Thanks,

Hi Joe,

Thank you for the call last week confirming the plan for the permits. When are we expecting the receive the permits please? Is there any other additional information that you or the team require to complete these that I didn't send in the email below?

We are talking the with GC, who will send over the 3 licenses required to obtain the electrical and mechanical permits you mentioned last week.

Thank you again! Your help through this process has been amazing!

Thanks,

Jenny Twentyman

Good morning Joe,

It was great to meet you in person last week. D'Avery kindly let me know that you stopped by this morning requesting a couple of documents so you could review them and help get the permitting process underway for the VoltaGrid power site.

I can't thank you enough for the support you're providing in helping us obtain the necessary permits. It's truly appreciated.

Please see attached the requested documents for your review.

Please let me know if you require any other documents, or if you have any questions.

Thanks,

Hi Audrey,

Thank you so much for your help!

We can of course fill out the application form and pay any fees, but can we use the original documents from Brasfield & Gorrie during their application as they will be the exact same as what we require for the site? It will just be an additional permit opened for our GC, ACS, to carry out some excavation work on site.

Thanks,

Jenny Twentyman

Hi,

Thank you so much for the call on Friday!

Please see the information I sent to Joe below.

You mentioned you may be able to help with additional permits? I am looking to obtain a land disturbance permit also please for the site. There is currently one out pulled by a contractor called Brasfield & Gorrie and the original plan was for us to work as a secondary under their permit. They have requested that we obtain our own permit to carry out any land disturbance works on site. Can you advise me on the process please?

Thank you again for all your help!

Thanks,

Jenny Twentyman

Hi Joe,

Thank you for the call last week confirming the plan for the permits. When are we expecting the receive the permits please? Is there any other additional information that you or the team require to complete these that I didn't send in the email below?

We are talking the with GC, who will send over the 3 licenses required to obtain the electrical and mechanical permits you mentioned last week.

Thank you again! Your help through this process has been amazing!

Thanks,

Jenny Twentyman

Good morning Joe,

It was great to meet you in person last week. D'Avery kindly let me know that you stopped by this morning requesting a couple of documents so you could review them and help get the permitting process underway for the VoltaGrid power site.

I can't thank you enough for the support you're providing in helping us obtain the necessary permits. It's truly appreciated.

Please see attached the requested documents for your review.

Please let me know if you require any other documents, or if you have any questions.

Thanks,

Jenny Twentyman

Attachments: Trade Permit Application.pdf

Hello good morning, Jenny,

I do apologize for the late reply please see attached for the forms that need to be filled out. I spoke with joe he confirmed your trades can apply for individual permits. If you are looking to have a GC over this project you will need to fill out our building permit application.

Salma – sorry for missing the call on Monday. I have a couple of questions regarding this:

1. Will the blue sidewalk and the red gate shown in the attached site plan work?
2. Do we need to provide accessible path from the ped egress gate to the ROW? Or as long as we have an opening at the ped egress gate we are good?

Thanks!

Best Regards,

_____

Subject: Serverfarm Covington - Egress Coordination Recap

Hi all,

Please see recap and outstanding items from our call yesterday -

Fire marshal to review -

* Two (2) sets of secure gates (site gates in purple, gen yard gates in green) are provided before entering the fire lane within the generator yard. These gates have been part of the design since IFP; however, their locations have been slightly modified.

* Gates slide open, allowing the full 26'-0" fire lane width to remain accessible when in the open position.

* FDC connection is located after one set of secure gates (purple).

* No overhead obstructions are present within the fire lane up to 13'-6".

* All exterior doors on the north and south sides exiting into the generator yard are 4'-0" above grade and are provided with assisted areas of rescue with two-way communication systems per IBC 2018 Section 1009.7 and NFPA 101 Section 7.2.12.

* Interior access control will be tied to the fire alarm system.

    * Egress doors designated as fail-safe – confirmed acceptable.

    * Few doors designated as fail-secure – Eplus to confirm locations. Fire Chief to review.

    * No magnetic locks are provided; doors utilize crash bars or electric locksets for egress – confirmed acceptable.

* Gates to be submitted with low-voltage/ contractor license – Mac (B&G) confirmed prior approval.

* No maximum distance from building exits to the public way prescribed by IBC or NFPA 101; will be evaluated based on performance (max decibel level approx. 65db).

* A Security operations center will monitor the site 24/7; however, the vehicular gates will not be continuously manned.

Design team to add -

* *

Pedestrian egress swing gates (locations marked in pink) required from the outer fence to the public way adjacent to all vehicular gates.

* *

Accessible paths of egress from exterior exits extending to the public way.

Mac, could you please add Brian Thompson to this email as well.

Thanks,

Salma

Hi Joe,

Thank you for the call last week confirming the plan for the permits. When are we expecting the receive the permits please? Is there any other additional information that you or the team require to complete these that I didn't send in the email below?

We are talking the with GC, who will send over the 3 licenses required to obtain the electrical and mechanical permits you mentioned last week.

Thank you again! Your help through this process has been amazing!

Thanks,

Jenny Twentyman

Good morning Joe,

It was great to meet you in person last week. D'Avery kindly let me know that you stopped by this morning requesting a couple of documents so you could review them and help get the permitting process underway for the VoltaGrid power site.

I can't thank you enough for the support you're providing in helping us obtain the necessary permits. It's truly appreciated.

Please see attached the requested documents for your review.

Please let me know if you require any other documents, or if you have any questions.

Thanks,

Jenny Twentyman

Hi,

Thank you so much for the call on Friday!

Please see the information I sent to Joe below.

You mentioned you may be able to help with additional permits? I am looking to obtain a land disturbance permit also please for the site. There is currently one out pulled by a contractor called Brasfield & Gorrie and the original plan was for us to work as a secondary under their permit. They have requested that we obtain our own permit to carry out any land disturbance works on site. Can you advise me on the process please?

Thank you again for all your help!

Thanks,

Subject: RE: Business Conformance Zoning Review Application -VoltaGrid Power Site
Attachments: Occupational Tax Application eff 1-1-26.pdf

Hello, Jenny,

If you are not operating a business here, you would not be required to obtain a business license. The only way we would have you apply is as a out of state contractor, if you don't hold a valid business license anywhere in the state of GA, you can apply with our office. This license will expire on 12/31/26 but if the project is still active, you can renew for the 2027 then we can terminate the license once the project is finished.

If you are in need of this, you will be required to complete the attached occupational tax application and not the zoning review.

Subject: Re: Business Conformance Zoning Review Application -VoltaGrid Power Site

Hi Jennifer,

Thank you for getting back to me so quickly!

Ah lovely, I thought it was. Right okay, that's great. Thank you for clarifying that. So even though we are not erecting a permanent building as such, as the only "building" type structure that will be out there is our Operations building that will be a portable prefabricated Conex that we are dropping into place.

And then the 33 generators are also a self-contained unit that are arranged separately on the site. Please see the attached site layout for context.

Apologies if the answer is still a yes, I just wanted to be sure.

Thanks,

Jenny Twentyman

Good morning,

I did have the pleasure of speaking with you all last week. This would be the correct form that will need to be completed. Under the commercial section, simply write in “new commercial building, will be applying for permits”. As far as “name and description” you can put “N/A, new building”. Have you spoken with the Newton County Tax Assessor to obtain an additional address for your proposed building as Serverfarm would probably be using the main address. They can be reached at 770-784-2030 and will be able to assist in this process.

Let me know if you have any questions as I will be happy to help.

Jennifer

Subject: Business Conformance Zoning Review Application -VoltaGrid Power Site

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon Jennifer,

Apologies if it is no yourself that I spoke with on Thursday last week. I am looking to get some guidance on filling out the Business Conformance Zoning Review Application form please. *2024_BusinessConformance.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fcityofcovington.org%2fckeditorfiles%2ffiles%2f2024_BusinessConformance.pdf&c=E,1,UrAdu5eXfrVK_eUviKKIU9dTgdPxE1nw7-Sr2eM8d1QR4wB2uZEpIvsdpp7vHPaYIKgSwUG1ubgWVcuMaQM-8XrkqaTEY6JFg4q3cVO-Yhuz2Vs6DemqV9E,&typo=1>

When reviewing and starting the process of filling this form it, it reads very much as if we were to be taking over a building from a previous business.

Would this form be applicable for the work we are doing out at 10835 Hazelbrand Road NE, Covington, GA 30014, where we are proposing to build a new natural gas power plant on a portion of the site? Our work on that site will be separate to the build out that Serverfarm and Brasfield & Gorrie are doing in the existing building at that address.

Thank you for your help in advance.

Kind regards,

Jenny Twentyman

Hi Mike,
Our understanding is that the relocation work has already been completed, and that our obligation as the current property owner is limited to assuming the required maintenance bond associated with those previously completed infrastructure improvements, no performing the relocation itself. That is why our current plan set does not include relocation drawings.

Erick,

Please correct me if I am wrong, but I thought you would be relocating the watermain in question as part of the proposed activities at site.

I am trying to get a review of the bond documents from our Legal council and want to be sure I am giving him the correct information. Looking at your plans I do not see the relocation drawings

Subject: RE: Hazelbrand Road - Maintenance Bond

Erick,

Actually, The should be a maintenance bond and performance covenant. When installing, or in this case re-locating, city owned infrastructure, the developer is responsible to maintain the new infrastructure for three years and has to file a covenant agreement on record for their responsibility of said maintenance.

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms “Maintenance Covenant” and “Performance Covenant” being used interchangeably to refer to the template previously shared?

As the new owner, we’re being diligent in obtaining a copy, as it’s important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

From: Mike Willis <MWillis@cityofcovington.org <mailto:MWillis@cityofcovington.org> >

Hi Mike,

We are following up to see if you located the performance covenant.

Also, it's my pleasure to introduce you to my colleague Erick Martinez. Erick works in the Legal department here at Serverfarm and will be handling this process for us going forward.

Good Afternoon Michael,

I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.

I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.

I will let you guys take it from here but wanted to make the introduction.
Thank you,

Kevin

Hi Jennifer,

Thank you for getting back to me so quickly!

Ah lovely, I thought it was. Right okay, that's great. Thank you for clarifying that. So even though we are not erecting a permanent building as such, as the only "building" type structure that will be out there is our Operations building that will be a portable prefabricated Conex that we are dropping into place.
And then the 33 generators are also a self-contained unit that are arranged separately on the site. Please see the attached site layout for context.

Apologies if the answer is still a yes, I just wanted to be sure.

Thanks,

Jenny Twentyman

Caution: EXTERNAL MESSAGE: Use Caution when opening attachments, clicking on links, or responding.

Good morning,

I did have the pleasure of speaking with you all last week. This would be the correct form that will need to be completed. Under the commercial section, simply write in “new commercial building, will be applying for permits”. As far as “name and description” you can put “N/A, new building”. Have you spoken with the Newton County Tax Assessor to obtain an additional address for your proposed building as Serverfarm would probably be using the main address. They can be reached at 770-784-2030 and will be able to assist in this process.

Let me know if you have any questions as I will be happy to help.

Jennifer

Subject: Business Conformance Zoning Review Application -VoltaGrid Power Site

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Good afternoon Jennifer,

Apologies if it is no yourself that I spoke with on Thursday last week. I am looking to get some guidance on filling out the Business Conformance Zoning Review Application form please. *2024_BusinessConformance.pdf <https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fcityofcovington.org%2fckeditorfiles%2ffiles%2f2024_BusinessConformance.pdf&c=E,1,UrAdu5eXfrVK_eUviKKIU9dTgdPxE1nw7-Sr2eM8d1QR4wB2uZEpIvsdpp7vHPaYIKgSwUG1ubgWVcuMaQM-8XrkqaTEY6JFg4q3cVO-Yhuz2Vs6DemqV9E,&typo=1>

When reviewing and starting the process of filling this form it, it reads very much as if we were to be taking over a building from a previous business.

Would this form be applicable for the work we are doing out at 10835 Hazelbrand Road NE, Covington, GA 30014, where we are proposing to build a new natural gas power plant on a portion of the site? Our work on that site will be separate to the build out that Serverfarm and Brasfield & Gorrie are doing in the existing building at that address.

Thank you for your help in advance.

Kind regards,

Jenny Twentyman

Subject: Transco Tap Property

Good Morning,

Are we going ot pursue the property purchase for the new Transco Tap, or should I ask Serverfarm to get their acquisition team on it? We cannot complete the tap application process without the coordinates (address) of the site. The City will need to own the property and not Serverfarm, so it is going to have to go to the Council for approval either way. This is very time sensitive for the project. I have not had to purchase property for a project before, and I am sure we need a real estate agent or someone to handle property acquisitions. Advice appreciated.

Thanks,

Mike

Hi Mike,

Picking back up from our previous email, I noticed that the Performance Covenant template you shared includes an Exhibit B stating, “Completion of final paving in accordance with the approved subdivision plans.” Could you please provide further clarification on this item, or, if available, forward the approved subdivision plans being referenced?

Additionally, could you forward the Maintenance Bond template as well?

Let me know if you have any questions.

Thank you,

Subject: RE: Hazelbrand Road - Maintenance Bond

Erick,

Actually, The should be a maintenance bond and performance covenant. When installing, or in this case re-locating, city owned infrastructure, the developer is responsible to maintain the new infrastructure for three years and has to file a covenant agreement on record for their responsibility of said maintenance.

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms “Maintenance Covenant” and “Performance Covenant” being used interchangeably to refer to the template previously shared?

As the new owner, we’re being diligent in obtaining a copy, as it’s important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

Good Afternoon Michael,

I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.

I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.

I will let you guys take it from here but wanted to make the introduction.
Thank you,

Kevin

D'Avery,

The City of Covington is requesting an easement in addition to the Georgia Power easement, not to encroach on their existing easement.

Mike

+SF Dev PM team

Hi Will,

Thanks for the update.

We've brought up the request to Georgia Power regarding potential encroachment into their right-of-way. To move this forward, we'll need a sketch showing the proposed pipeline route—including dimensions. Is that something the City can provide?

Also, please see the attached snip showing where we'd like the pipeline to tie into the natural gas yard.

Lastly, can we get confirmation from the City that the gas specification shared by Voltagrid will be what's delivered? Voltagrid is proceeding with their design based on that specification, so it's important we validate that alignment.

Let me know if you need anything further from our side.

Best regards,

D'Avery Brown

Hi D'Avery,

Mike is moving forward with metering design and route location for the service. Please let Mike know if the right of way we discussed previously, adjacent to the Power line easement is a workable option for installation of the 6" service line to the site.

Thanks,

Will

Will,

Attached is the sales agreement for your review.

As mentioned previously,

1. the payment due date will need to remain at 10 days from receipt of the city's invoice to customer.
2. With the addition of the possibility of third party supply, there is language added there along with an Exhibit to cover imbalances if a third party is used.
3. The LOC has been adjusted based on the delivered supply quotes previously obtained and based on the term requested by Serverfarm.

I will be out of the office this afternoon and not be available for the call. Once you have had a chance to review, let me know if you have any questions and we can work on a time to discuss.

Regards

Rusty

Subject: RE: Hazelbrand Road - Maintenance Bond

Erick,

Actually, The should be a maintenance bond and performance covenant. When installing, or in this case re-locating, city owned infrastructure, the developer is responsible to maintain the new infrastructure for three years and has to file a covenant agreement on record for their responsibility of said maintenance.

Since the bond and covenant were originally provided by the former property owner the new owner must provide their own bond and covenant once the property is sold.

Hi Mike,

I look forward to working with you to complete this outstanding item. To confirm my understanding, are the terms “Maintenance Covenant” and “Performance Covenant” being used interchangeably to refer to the template previously shared?

As the new owner, we’re being diligent in obtaining a copy, as it’s important that we review the obligations previously agreed upon to properly assess and finalize the agreement the County is requiring us to provide.

Thank you,

Good Afternoon Michael,

I have attached a string of emails to help refresh your memory on our project. I have also attached the Maintenance Bond and Calculation spreadsheet that was used when we originally worked with you to put the bond in place.

I have also copied Jason Volk to this email. We are in the process of selling the building to Jason's team. They are needing some additional information regarding the bond as they will be replacing our bond after purchasing the property.

I will let you guys take it from here but wanted to make the introduction.
Thank you,

Kevin

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

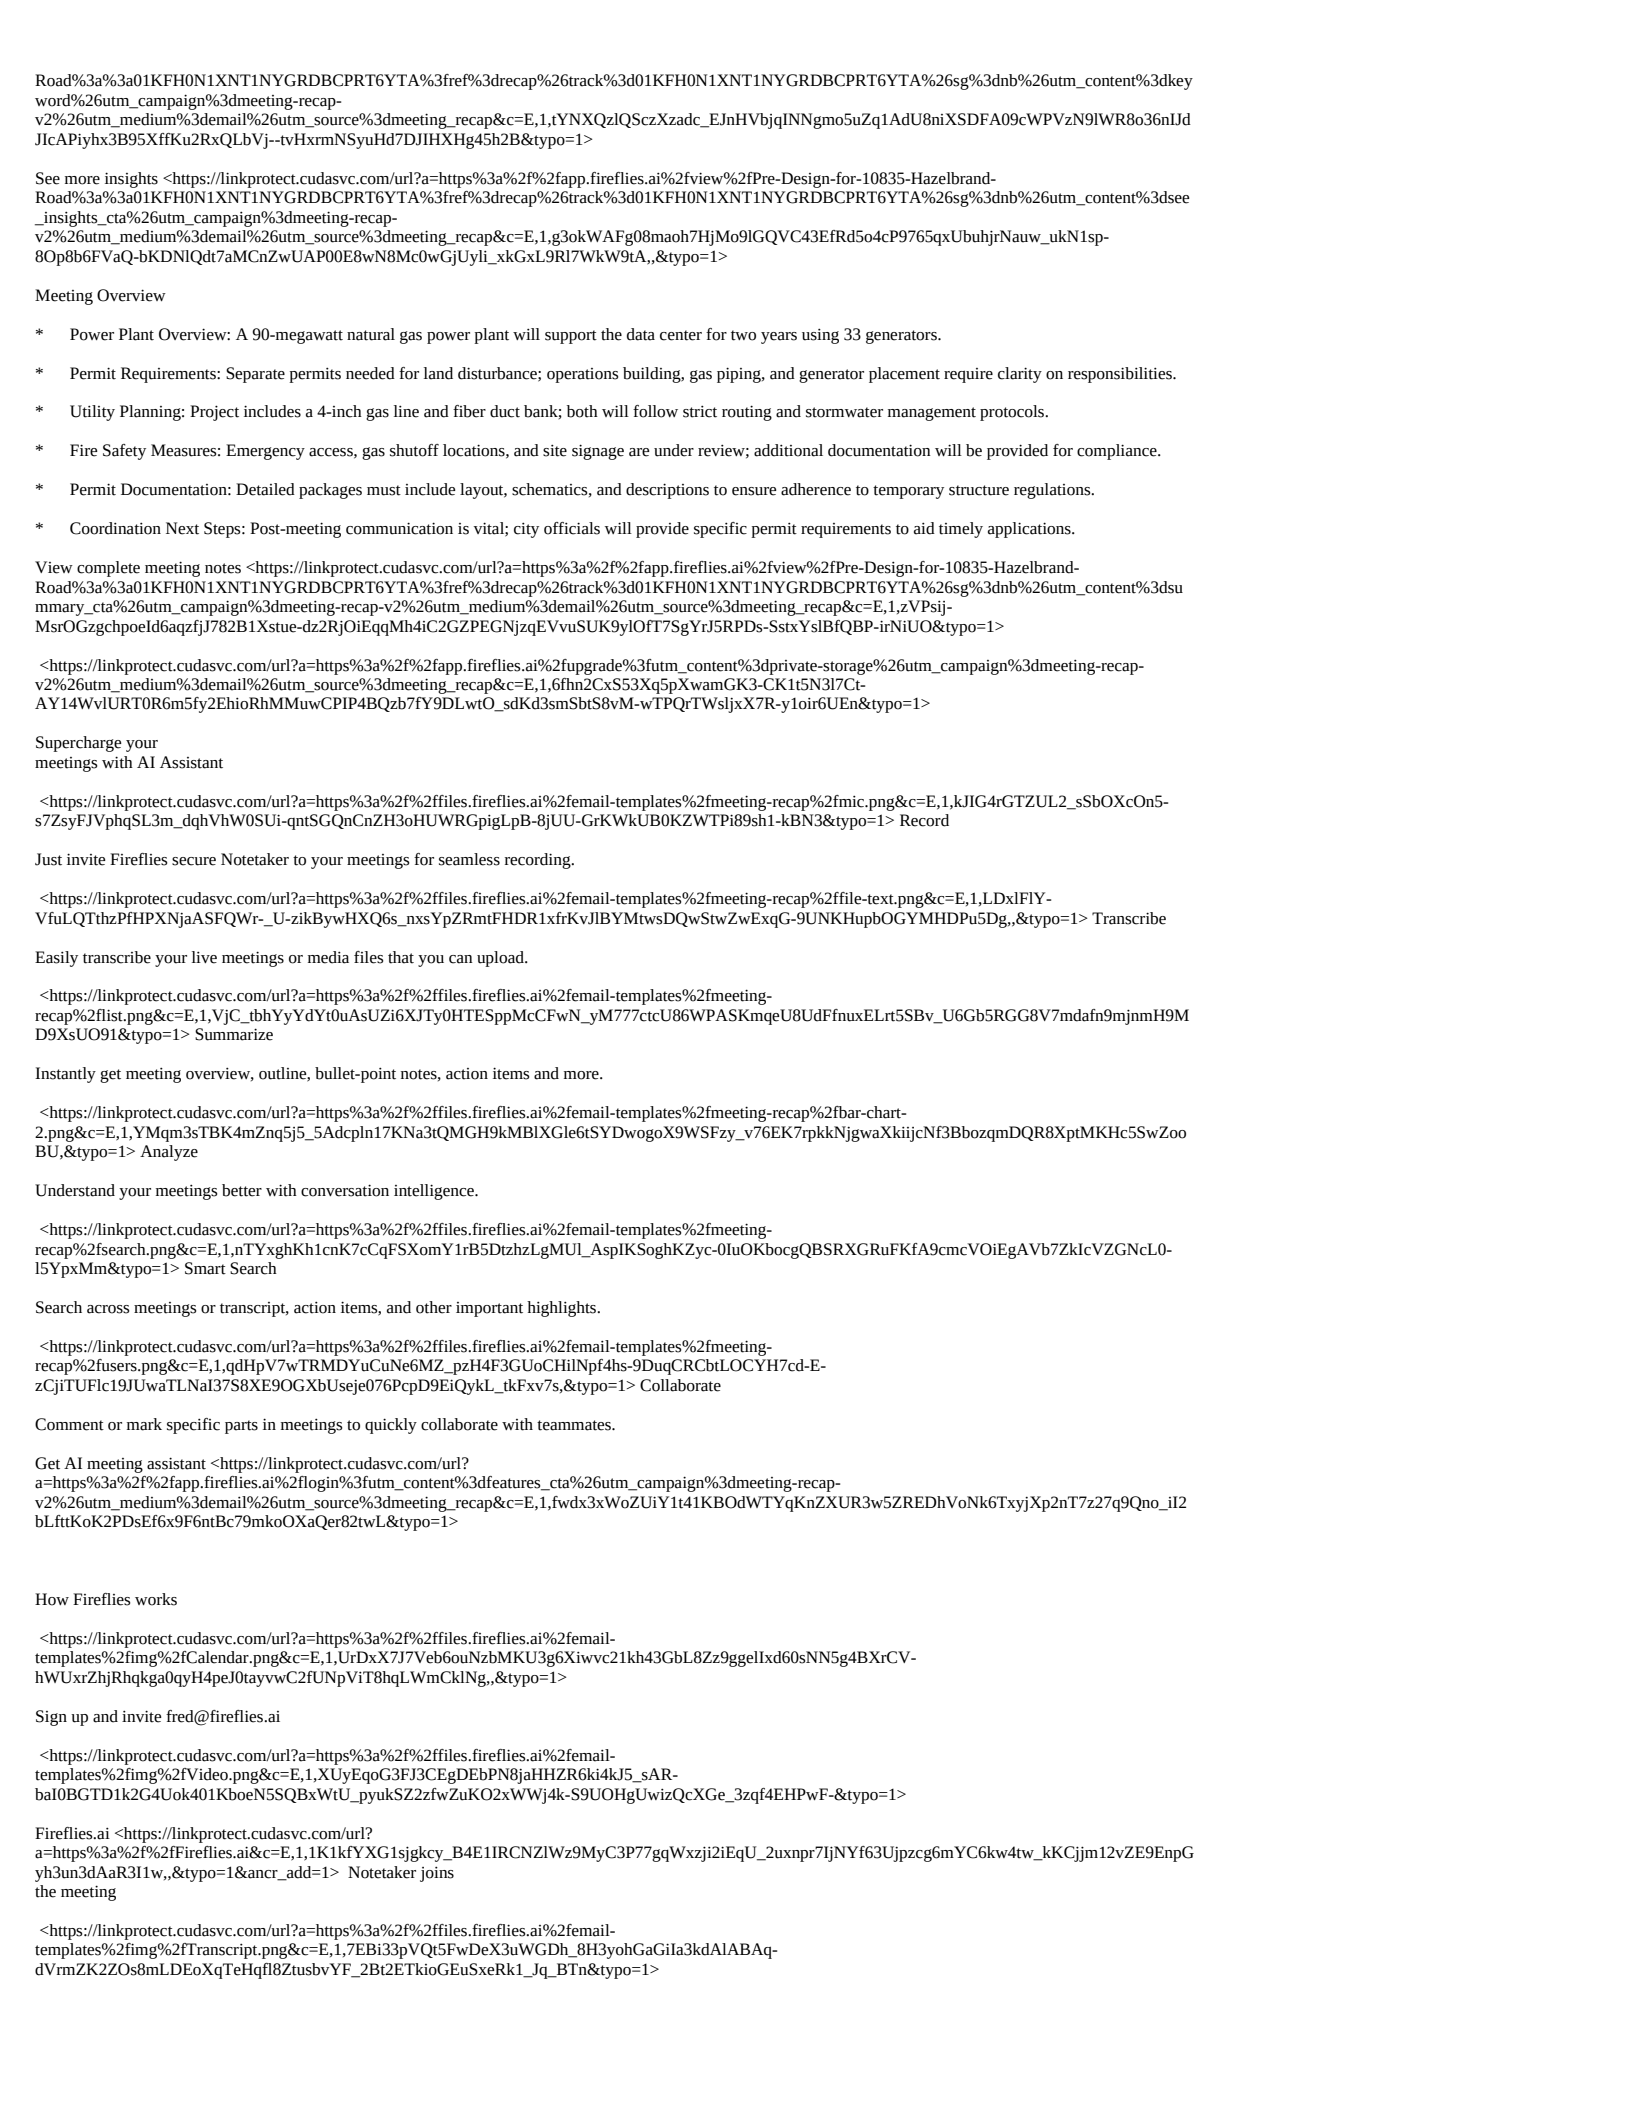
Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.



* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Meeting Overview

* Power Plant Overview: A 90-megawatt natural gas power plant will support the data center for two years using 33 generators.

* Permit Requirements: Separate permits needed for land disturbance; operations building, gas piping, and generator placement require clarity on responsibilities.

* Utility Planning: Project includes a 4-inch gas line and fiber duct bank; both will follow strict routing and stormwater management protocols.

* Fire Safety Measures: Emergency access, gas shutoff locations, and site signage are under review; additional documentation will be provided for compliance.

* Permit Documentation: Detailed packages must include layout, schematics, and descriptions to ensure adherence to temporary structure regulations.

* Coordination Next Steps: Post-meeting communication is vital; city officials will provide specific permit requirements to aid timely applications.

Covington, GA 30014

We are proposing to construct a natural gas power facility that will include 33 natural gas generators housed in self-contained units, an operations building that will be staffed, and additional supporting equipment to run the generators. I am hoping to gain clarity on the permits that will be required for us to proceed with this project and what information is required from us to obtain these permits.

Engineering Department is inviting you to a scheduled Zoom meeting.

Subject: Revision Requested Land Disturbance Permit # P25-06-012 for 10835 Hazelbrand Rd

Hi Russell,

I didn’t send the project closeout doc request because of the email listed below. Should I send it anyway?

Audrey

Ok, sounds good. We would like to discuss with the city about a fiber and gas connection to the west property line. Please see below the concept we are thinking of. We would like to talk to you about the LDP revision we will be working on for this primarily, but if you think anyone else would be beneficial, please invite them to the conversation as well. Thank you!!

Best Regards,

_____

Hello Anirudh,

Yes, hard copy plans are required. Is there anyone else from the city’s various utilities and properties that you would like to attend?

Kind regards,

Audrey

Dear Audrey and Mike,

I am working with Chen on the Serverfarm project, and we would appreciate some time early next week to discuss LDP revisions.

Could you please share your availability on Monday or Tuesday?

Thanks!

Good afternoon, Audrey –

Hope you enjoyed the Thanksgiving holiday!! I would like to follow up and see if we are able to get something back for this project today, or it will be early next week. Thank you!

Best Regards,

_____

Good afternoon Chen,

Please provide the following for your revision:

Submit two paper sets of plans (minimum of 24in x 36in) with cover page

Electronic copy of complete site plan on a single USB flash drive

A narrative detailing the changes would also be helpful

Kind regards,

Audrey Payne

Ok, sounds good. We would like to discuss with the city about a fiber and gas connection to the west property line. Please see below the concept we are thinking of. We would like to talk to you about the LDP revision we will be working on for this primarily, but if you think anyone else would be beneficial, please invite them to the conversation as well. Thank you!!

Best Regards,

Dear Audrey and Mike,

I am working with Chen on the Serverfarm project, and we would appreciate some time early next week to discuss LDP revisions.

Could you please share your availability on Monday or Tuesday?

Thanks!

Good afternoon Chen,

Please provide the following for your revision:

Submit two paper sets of plans (minimum of 24in x 36in) with cover page

Electronic copy of complete site plan on a single USB flash drive

A narrative detailing the changes would also be helpful

Kind regards,

Subject: Re: New Facility - Permitting Requirements

Hi Audrey,

Serverfarm have mentioned that they've spoken with the City of Covington, and it is the City's preference for them to join our call next week, as they also have permits to discuss regarding the site.

As we are two separate entities, we'd prefer to keep the details of our discussions separate where possible. With that in mind, I've let them know that if the City would like us both on the same call, Serverfarm would join at 2:30pm for the final half hour, with VoltaGrid taking the first half hour.

Please let me know if this works for you.

Thanks,

Good morning, Jenny.

If you would like to set up a pre-design Zoom meeting with the City of Covington, we have the following openings available.

Each Wednesday

9:00 am – 10:00 am

10:00 am -11:00 am

1:00 pm – 2:00 pm

2:00 pm – 3:00 pm

All city departments will attend the meeting including Engineering, Planning & Zoning, Transportation, Gas, Electric, Environmental and the Fire Marshall.

Please let me know what time works for you and your time.

Kind regards,

Audrey Payne

Hi Audrey,

Serverfarm have mentioned that they've spoken with the City of Covington, and it is the City's preference for them to join our call next week, as they also have permits to discuss regarding the site.

As we are two separate entities, we'd prefer to keep the details of our discussions separate where possible. With that in mind, I've let them know that if the City would like us both on the same call, Serverfarm would join at 2:30pm for the final half hour, with VoltaGrid taking the first half hour.

Please let me know if this works for you.

Thanks,

Subject: RE: 01202026 Agenda SUMMARY

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Out of curiosity, are you able to provide the resolution text for that item, as well as the ordinance/resolution text for Consent Agenda Item 10 and the moratorium for Item 2?

Good morning Samuel,

The resolution did pass. See attached. Let me introduce Allen Martin into this thread. He will be handling PIO duties upon my exit in a few weeks,

Thanks,

Ken

Hi Audrey,
Thank you again for taking the time to speak with me this morning.
Would you mind sending the meeting invite for the Voltagrid meeting you mentioned for next week? We'd like to join that discussion. Also, during the same call, we would like to work with you to better understand the LDP revisions for the project, so we can make sure everything is aligned moving forward.
Thanks!

Dear Audrey and Mike,

I am working with Chen on the Serverfarm project, and we would appreciate some time early next week to discuss LDP revisions.

Could you please share your availability on Monday or Tuesday?

Thanks!

Good morning, Chen.

Happy Monday ??

My apologies but it looks like the holidays have delayed completion of your plan review. I'll follow up with the remaining reviewers today and should have an answer

for you no later than Wednesday, December 3.

Kind regards,

Audrey Payne

Good afternoon Chen,

Please provide the following for your revision:

Submit two paper sets of plans (minimum of 24in x 36in) with cover page

Electronic copy of complete site plan on a single USB flash drive

A narrative detailing the changes would also be helpful

Kind regards,

Audrey Payne

Hi Audrey,
Thank you again for taking the time to speak with me this morning.
Would you mind sending the meeting invite for the Voltagrid meeting you mentioned for next week? We'd like to join that discussion. Also, during the same call, we would like to work with you to better understand the LDP revisions for the project, so we can make sure everything is aligned moving forward.
Thanks!

Guys-

Attached below is the breakdown for the increased cost to Project #91217 estimated by Andy.

As you know, PE consists of 2-3 task orders:

1: Concept design

2: Concept approval PFPR

3: Final Plan approval FFPR

Let me know if you need anything else.

Kathy

Jimmy,

It looks like the total will be around $2.1 million, so an additional $1.3 million for preliminary through final on top of the $817k in TO#1.

Let me know if you any questions.

Thanks,

Andy

Jimmy,

Attached is our updated fee spreadsheet. They kept the original hours and updated with their rates and overhead. The fee comes out slightly higher. Let me know if this is a problem.

Thanks,

Andy

Sorry about that. I sent them but the came back as undeliverable. Would you be okay with a Dropbox link for the files? I think the drawing set size is to big to email.
