8.2 ADVANCED CALLING FEATURES (Cont'd)

8.2.1 General (Cont'd)

B. Description of Features (Cont'd)

29. Hot Line

Customer call is automatically routed to a specified number when Customer is off-hook. This feature also allows for a programmed time interval of dial tone to permit a customer to dial a call, as usual, prior to being connected to a specific telephone number.

30. Do Not Disturb - Telemarketing

This screening feature intercepts incoming calls that are delivered as "private", "no data', or otherwise have blocked the Caller ID. Callers receive a recorded announcement that the subscriber does not accept calls from telemarketers. All other callers may press "1" if they wish to complete the call.

31. VoIP Feature Bundle (N)

This option includes all 30 Advanced Calling Features listed above and is available to our VoIP customers. (N)
